REVIEW OF OPERATIONS

Ravensthorpe Lithium Project

Bulletin's 100% owned Ravensthorpe Lithium Project contains outcropping spodumene and lepidolite lithium bearing pegmatites. The 130km² tenement package is 12km southwest and along strike of Arcadium Lithium's (ASX: LTM) Mt Cattlin Lithium Mine in Western Australia (Figure 1).

Drilling of outcropping, high-grade lithium spodumene bearing pegmatites is proposed. The pegmatites are located within the Cocanarup Timber Reserve and DEMIRS consent to explore within the Timber Reserve was recorded within tenement conditions. To ensure minimal disturbance of the local flora, vegetation and fauna, Bulletin has implemented a number of avoidance and mitigation strategies and remains committed to following all necessary guidelines and requirements to mitigate any potential impact on the environment.

Much of the reporting period was consumed by the Western Australian Environmental Protection Authority (EPA) determining whether or not to assess the drilling program. The EPA subsequently advised Bulletin that they had completed their investigations and formally advised Bulletin of their decision not to assess the drilling proposal. When the EPA decides not to assess a proposal, it determines that the likely effect on the environment is not so significant as to warrant their further investigation and assessment. The EPA advised Bulletin the small scale and short term exploration program impacts on flora, vegetation and fauna can be adequately considered by the Western Australian Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) via a Native Vegetation Clearing Permit (NVCP), in line with typical approval processes.

Bulletin consequently recommenced its NVCP application in October 2023 with a substantial reduction of impacted area and re-engaged with DEMIRS. DEMIRS subsequently wrote to Bulletin highlighting key areas where additional information was necessary. Bulletin lodged with DEMIRS substantial new and better information and new expert reports and with further particulars on 28th February 2024. Bulletin expects that the further information provided will exceed DEMIRS' requirements and will enable DEMIRS to approve the NVCP.

DIRECTORS' REPORT
For the Half-Year Ended 31 December 2023

It is expected Bulletin will be notified of the DEMIRS determination in the near future Bulletin will advise the ASX of any further information when received but cannot at this time provide any guidance as to when DEMIRS will make its decision.

Lake Rebecca Gold Project

The Lake Rebecca Gold Project is approximately 150km east north-east of Kalgoorlie, WA and comprises eight granted and two pending Exploration Licences over a 635km² area (Figure 2). The two northern tenements of E28/2600 and E28/2635 total 100km² and are held in joint venture with Matsa Resources Limited (BNR 80%; MAT 20%), while the remaining tenements are wholly owned by Bulletin.

The project is in the southern part of the Laverton Tectonic Zone, a regional scale shear/fault system which is one of the more productive gold zones in the WA Goldfields. The zone hosts the Sunrise Dam, Wallaby, Red October and Granny Smith gold camps. The tenements are adjacent to, and along strike of Ramelius Resources Limited's (Ramelius, "RMS") 1.4M oz Rebecca Gold project. Recent corporate activity and consolidation of tenure in the area confirms Bulletin's view of the value of this region.

Chifley Gold Project

The Chifley Gold Project, E28/3002 is a 79km² exploration tenement. It is approximately 50km to the south of Lake Rebecca and on a northwest trending splay of the Claypan Fault, a major north-south structure that hosts the nearby 1.7M oz Lake Roe gold deposit owned by Breaker Resources NL (ASX:

DIRECTORS' REPORT
For the Half-Year Ended 31 December 2023

"BRB") 20 kilometres to the northwest. The tenement is interpreted to be dominated by a band of mafic-ultramafic greenstone on the northern flank of a large granitoid pluton. A series of discreet magnetic high units within the greenstone form the initial target as these features can be associated with mineralisation.

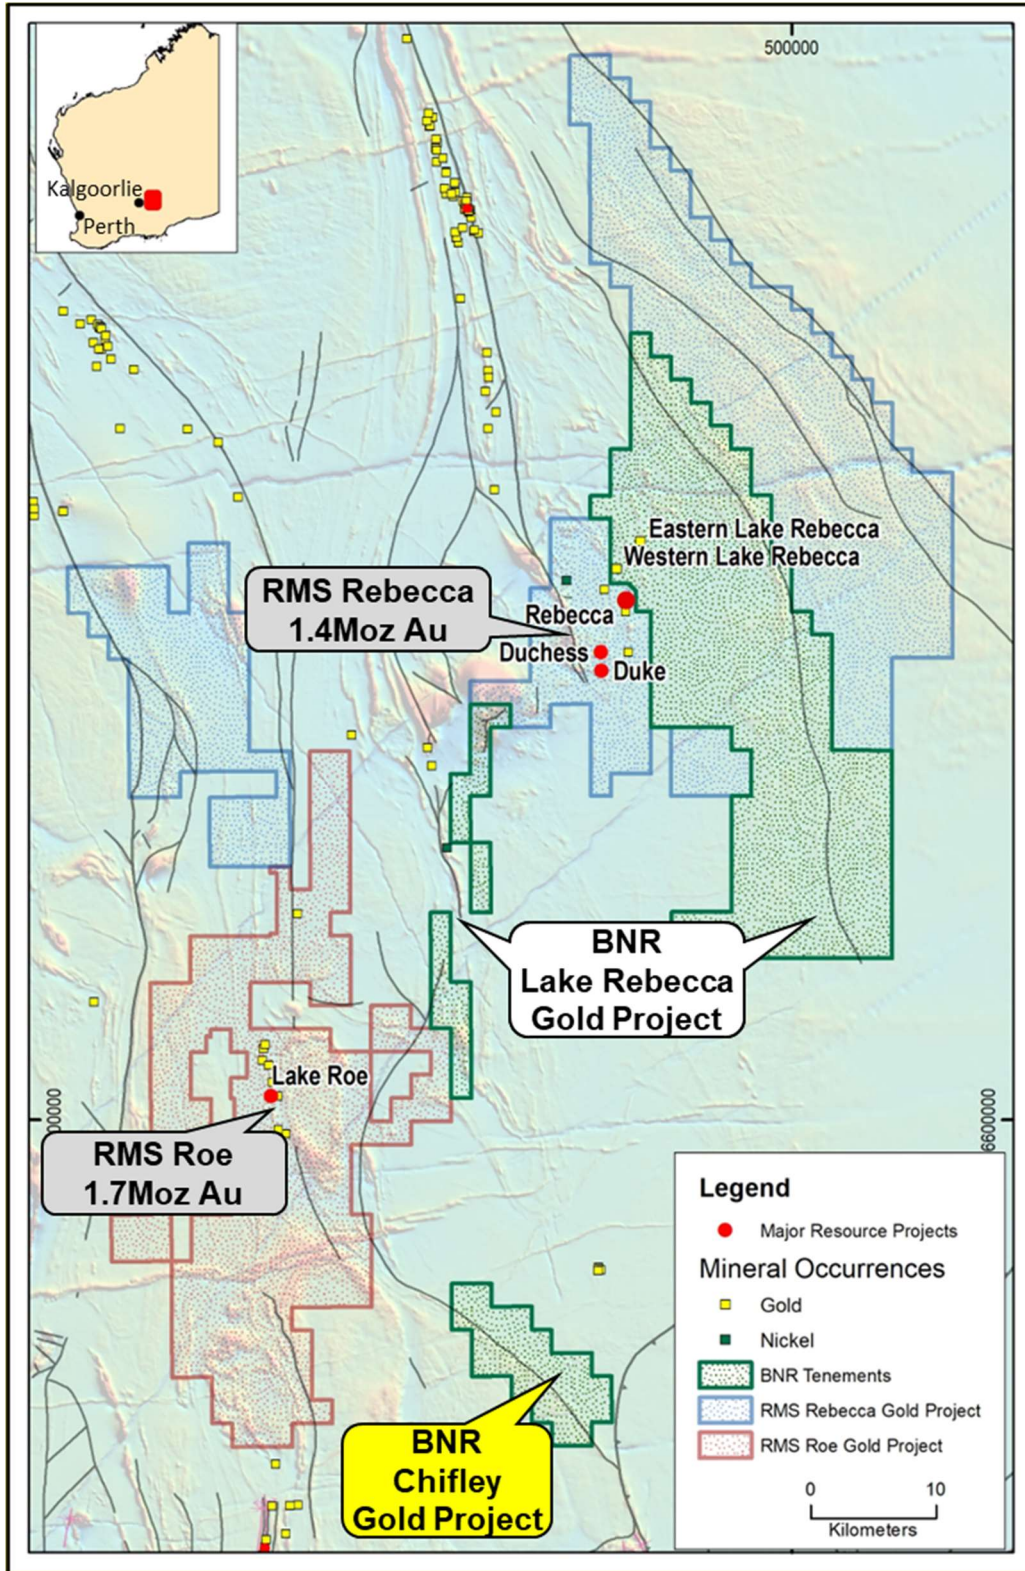

Figure 2: Bulletin's Lake Rebecca and Chifley Projects location map

DIRECTORS' REPORT
For the Half-Year Ended 31 December 2023

An infill soil sampling program was completed late in the year over a co-incident gold and copper soil anomaly delineated during initial wide spaced soil sampling. Results refined and confirmed a 1km x 1km gold in soil anomaly (max 14ppb Au) toward the southern boundary of the project. The gold in soil anomalism is interpreted to be associated with a discreet magnetic and gravity high within a wedge of basalt and ultramafics between granitic units along a splay of the Claypan Fault.

The results are moderately elevated and in the order of 3 times background gold levels. The coherent and extensive nature of the anomaly supports further investigation and sampling to better define the anomalous area to determine better defined targets for drilling.

Mt Jewel Gold Project

The Mt Jewell Gold Project (E24/221) is located 60kms north of Kalgoorlie, 10km north and along strike of the 130koz Au Tregurtha gold mine. The tenement covers a sequence of mafic-ultramafic package of interpreted komatiitic origin.

A first pass soil sampling reconnaissance program was completed over the eastern portion of the tenement where magnetics indicate mafic to ultramafic lithologies are present. Assays were generally subdued with limited coherent anomalism and no further work is planned in this area of the tenement. The northern area is interpreted to host granitic units disrupted by E to ENE faulting and initial testing with soil sampling remains to be completed.

Corporate

During the period the Company issued 7 million unlisted options to directors following shareholder approval at the Company's Annual General Meeting held on 29 November 2023. The unlisted options have an exercise price of \$0.25 each expiring on 30 November 2026.

On 5 December 2023, the Company issued 22,223 fully paid ordinary shares upon the exercise of listed options with an exercise price of \$0.10 each.

In October 2023 the Company received a dividend of \$38,162 from its investment in Ramelius Resources Limited.

INDEPENDENT AUDITOR'S REVIEW REPORT

To the members of Bulletin Resources Limited

Report on the Half-Year Financial Report

Conclusion

We have reviewed the half-year financial report of Bulletin Resources Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2023, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year ended on that date, a summary of significant accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of the Group does not comply with the *Corporations Act 2001* including:

- (i) Giving a true and fair view of the Group's financial position as at 31 December 2023 and of its financial performance for the half-year ended on that date; and
- (ii) Complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001* which has been given to the directors of the Company, would be the same terms if given to the directors as at the time of this auditor's review report.

Responsibility of the directors for the financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibility for the review of the financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2023 and its financial performance for the half-year ended on that date and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
