Aircore Drilling Program Commences At Edjudina Gold Project (Clarification)

M3 Mining Limited (ASX: M3M) (**M3 Mining** or the **Company**) refers to the announcement lodged with ASX on 17 April 2024 titled "Aircore Drilling Program Commences at Edjudina Gold Project".

The Company provides a clarifying statement attached, which confirms that it is not aware of any new information or data that materially affects the information included in the earlier released announcements.

This announcement is authorised for release by the Board of Directors.

About M3 Mining

M3 Mining Limited (ASX:M3M) is a Perth-based mineral exploration company focused on creating value for shareholders through exploration and development of a high-quality copper and gold exploration portfolio. M3 Mining's projects are strategically located in regions surrounded by majors and has experienced minimal modern, systematic exploration across both projects. The Company's strategy is to apply a systematic approach to the assessment and prioritisation of its projects, all of which have the potential to produce material discoveries.

AIRCORE DRILLING PROGRAM COMMENCES AT EDJUDINA GOLD PROJECT

HIGHLIGHTS

- **Aircore (AC) drilling program commenced at key gold targets**
- **Recent soil sampling indicates continuation and intensification of mineralized trends from El Capitan where previous drilling intersected 1m at 2,304 g/t Au¹**
- **Drilling campaign to take place 15km from Solstice Mineral's (SLS) Hobbes gold deposit. This deposit is currently the focus of a sale and purchase agreement between SLS and Northern Star Resources (NST)²**

EXECUTIVE DIRECTOR SIMON ELEY SAID:

"This is a great time to be in the goldfields exploring for gold along a significant trend. The current record gold price and recent acquisition of the neighbouring Hobbes gold deposit by Northern Star provides real significance to the area and gives this upcoming AC drilling program some added anticipation."

Aircore Drilling Program

As announced on 18 March 2024, the Company has identified three high-priority targets at Edjudina³ for approximately 3,500m of AC drilling (see Figure 2). These targets are south-southeast of the El Capitan prospect that returned 10m at 241.2 g/t Au from 27m⁴. As noted previously, none of the targets have had any systematic exploration with target 1 having seen limited drilling in the past, whilst the two remaining targets have not been drilled. Drilling was delayed due to recent weather conditions, however, conditions have improved and drilling has since commenced.

Subject to the results of the upcoming program, as well as other drilling programs being planned, at Edjudina, the acquisition of the neighbouring Hobbes gold deposit by Northern Star⁵ is encouraging for M3 Mining due to the proximity of the Company's tenements (both granted and under application) to Northern Star's operations at both the Porphyry and Carosue Dam operations (see Figure 3).
