

## QUARTERLYREPORT

ASX Announcement | 29 April 2024

## **Quarterly Activities Report – 31 March 2024**

### **Highlights**

#### Newnham Lake Uranium Project – Athabasca Basin, Saskatchewan, Canada

- Completion of the acquisition of highly sought-after Newnham Lake Uranium **Project**, located in Canada's Athabasca Basin, one of the world's premier uranium districts
- Newnham Lake is near to the northeast margin of the Athabasca Basin and is just 56km northwest of IsoEnergy Ltd's (TSX.V: ISO) Hurricane Deposit (Indicated Resource of 48.6Mlbs of  $U_3O_8$  based on 63,800 tonnes grading 34.5%  $U_3O_8$ )<sup>1</sup>
- Modern uranium discoveries in the Athabasca Basin highlight the potential for 'basement-hosted' mineralisation, where large, high-grade deposits occur below the unconformity, such as NexGen's Arrow Deposit (Resource of 337.4Mlbs @ 1.8% U<sub>3</sub>O<sub>8</sub>)<sup>2</sup>
- Newnham Lake provides an outstanding opportunity for Recharge to make a new uranium discovery against the backdrop of a strong uranium price
- Recharge's established Canadian footprint, in-country relationships, and focus on green energy make this a logical as well as a highly value accretive addition to Recharge's portfolio
- Completion of share placement to sophisticated and professional investors to raise A\$1.44 million; with up to an additional A\$50k to be placed to Directors, subject to shareholder approval.

#### Wapistan Lithium Project - Québec, Canada

- Over 8km of prospective greenstone belt untested at Wapistan West
- Limited sampling results confirm Wapistan West contains highly fractionated LCT-pegmatites and potential to host lithium mineralisation
- Targeting analysis to be completed using recent LiDAR survey to identify potential pegmatite outcrops not previously detected
- Preparation for upcoming field program at Wapistan well advanced with targeting work underway by Dahrouge Geological

#### Express Lithium Project - Québec, Canada

- Geochemical data from surface sampling completed indicates Express is in the right part of the system to host lithium mineralisation, based on signatures associated with lithium mineralisation and LCT pegmatites in the James Bay area
- Data highlights more fractionated pegmatites, with higher Li contents, within the project area, providing a vector towards potential lithium mineralisation
- Priority targets for lithium mineralisation covering over 6km of outcropping and subcropping pegmatites identified within the areas traversed in 2023

**T:** +61 (08) 9481 0389 **ABN:** 13 647 703 839

Recharge Metals Limited (**ASX: REC**) (**Recharge**, **REC** or the **Company**) is pleased to provide an activities and cashflow report for the period ending 31 March 2024. During the quarter the Company successfully finalised the acquisition of 100% of the highly sought-after **Newnham Lake Uranium Project**, located in Canada's Athabasca Basin, one of the world's premier uranium districts.

#### NEWNHAM LAKE URANIUM PROJECT - Saskatchewan, Canada

During the quarter, the Company announced the acquisition of the Newnham Lake Uranium Project. The Project covers an area of  $15.84 \, \text{km}^2$  and is proximal to the northeast margin of the Athabasca Basin. Newnham Lake lies  $56 \, \text{km}$  to the north-west of IsoEnergy's Hurricane Zone, which has an Indicated Resource of  $48.6 \, \text{Mlbs}$  of  $U_3 O_8$  based on 63,800 tonnes grading  $34.5 \, \text{M}_3 O_8$  including  $43.9 \, \text{Mlbs}$  of  $U_3 O_8$  at an average grade of  $52.1 \, \text{M}_3 O_8$  within the high-grade domain<sup>3</sup>.

Figure 1: Newnham Lake Project location within Athabasca Basin, Saskatchewan

Historical drilling at the Newnham Lake Uranium Project in the 1970s and 1980s identified anomalous uranium mineralisation in the vicinity of the unconformity at shallow depths. Drilling intersections include 488 ppm  $U_3O_8$  over 2.2 metres, including 2,260  $U_3O_8$  over 0.13 metres from 82.9m (refer Appendix 2). This intersection was from drillhole BL-146 and was immediately below the unconformity. The drillhole was terminated at 113.7 metres, with limited testing of the underlying basement rocks.

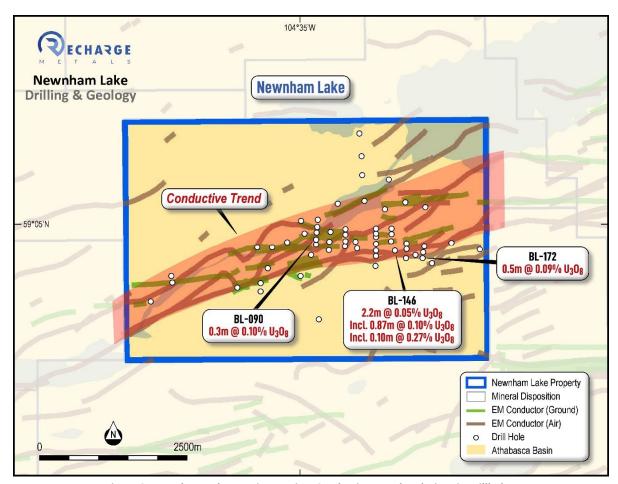

Figure 2: Newnham Lake Uranium Project Conductive Trend and Historic Drillholes

Due to the exploration model being pursued at the time, the focus was purely on unconformity-hosted uranium mineralisation, hence most drill holes were less than 100 metres in length and did not test the underlying basement rocks.

Two deeper drillholes were completed by ALX Uranium Corp in 2018. These drillholes confirmed the presence of uranium mineralisation over significant widths, as well as visible pitchblende, intense faulting and strong hydrothermal alteration deep in the basement, indicating potential basement hosted uranium mineralisation.

Notable examples of this style of uranium mineralisation within the Athabasca Basin are highlighted by the more recent discoveries at Arrow and Triple R (Patterson Lake South).

- NexGen's Arrow Deposit was discovered in 2014, with a Resource<sup>4</sup> of 337.41Mlbs @ 1.9%  $U_3O_8$  it currently stands as the largest, highest-grade undeveloped uranium deposit in Canada.
- Fission Uranium Corp's Triple R Deposit was discovered in 2012, currently has a Resource of 135.1Mlbs @ 1.8% U<sub>3</sub>O<sub>8</sub>.
- Eagle Point, part of Cameco's Rabbit Lake Operation which entered production in the 1990s is an older discovery of a basement-hosted uranium deposit.

More recent basement-hosted discoveries include 92 Energy Ltd's (ASX: 92E) Gemini discovery<sup>6</sup> and neighbouring Baselode Energy Corp's (TSX.V: FIND) ACKIO discovery<sup>7</sup>.

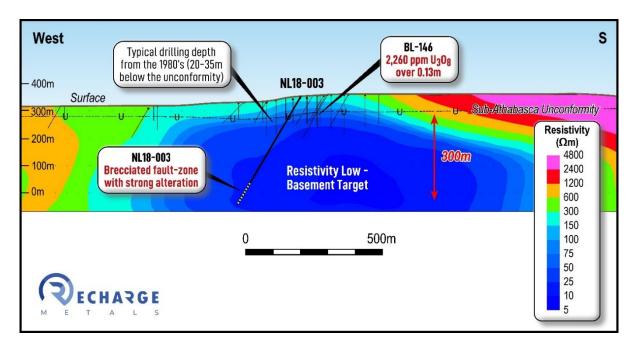

Figure 3: Resistivity Low on Sections 8400mE

Basement-hosted uranium mineralisation is relatively untested within the project area, as previous explorers concentrated on the "up-dip" expression of uranium mineralisation at the unconformity between the overlying sandstone and the basement rocks.

Recharge believes that the potential for uranium mineralisation within the Newnham Lake Property exists along the conductive structures deeper in the basement rocks. Geophysical surveys (tested by ALX) have demonstrated an exceptionally large scale, hydrothermal system extending to depth, beneath the conductive lithologies at Newnham Lake.

It is anticipated that a ground gravity survey will be undertaken to expand upon the existing data, which will help confirm drill targets selected from previous geophysical data set, which included:

- ZTEM Geophysics
- IP Resistivity
- Airborne Gravity

Recharge's ASX announcement dated 4 March 2024 details the material terms and conditions of the acquisition.

#### **Material terms of Acquisition**

Recharge finalised the acquisition on 18 March 2024 with DG Resource Management and Kalt Industries Ltd. (**Vendors**) to acquire 100% ownership of the **Newnham Lake Uranium Project** on the terms set out below:

#### (a) Consideration:

- (i) C\$300,000;
- (ii) C\$200,000 worth of fully paid ordinary shares in Recharge at a deemed issue price of A\$0.06 per share (**Consideration Shares**).

The Consideration Shares were issued utilising the available placement capacity under ASX Listing Rule 7.1.

#### (b) Conditions:

- (i) Recharge having completed legal, technical and geological due diligence on the Newnham Lake Uranium Project to its sole satisfaction;
- (ii) Recharge receiving binding commitments for a share placement to raise not less than A\$1 million (before costs); and
- (iii) Recharge having obtained all necessary shareholder, third-party and regulatory approvals required to complete the acquisition.

#### (c) **GSR Royalty**:

(i) Recharge will grant to each of the Vendors a 1.00% gross overriding return (GOR) royalty from revenue generated from the Newnham Lake Uranium Project.

Recharge also made payment to the Government of Saskatchewan of C\$23,757.21, corresponding to a forward term renewal of MC00001333.

#### WAPISTAN LITHIUM PROJECT - Québec, Canada

During the quarter, the Company reported the results of the limited field campaign completed at Wapistan during the 2023 Canadian summer and the commencement of targeting analysis using the recent LiDAR survey to identify potential pegmatite outcrops not previous detected.

Work was focused on analysing and interpreting imagery from the LiDAR survey completed in September 2023 to identify potential pegmatite targets not identified in historical mapping. In addition, preparations are being made for a helicopter-supported exploration program to test over 8km of prospective greenstone lithologies at Wapistan West which were not able to be accessed during the restricted 2023 field season.

Geochemical results from this fieldwork have recently been received and are detailed in Figure 4. Full results are detailed in ASX Announcement dated 23 February 2024. Results from Wapistan West confirmed the potential of this claim block, being closest to the Mia Lithium Project (owned by Q2 Metals; TSXV: QTWO) and the Radis Lithium Project (owned by Ophir Gold Corp; TSXV: OPHR).

#### Discussion of sampling and results

Traverses across accessible targets at Wapistan, including mapping and sampling of outcrops encountered, were completed by field crews from Dahrouge Geological Consulting (**Dahrouge Geological**), the highly experienced geological consulting firm with many years of experience exploring the James Bay region.

Dahrouge Geological are a related party of DG Resource Management, the vendor of the Express Lithium Project, who previously identified, acquired, and vended the Corvette Property to Patriot Battery Metals (TSX-V: PMET, ASX: PMT).

Due to the compressed nature of the 2023 field season as a result of the wildfire emergency in the James Bay area, only "walk-in, walk-out" traverses were possible. This has meant only 5km of the 13km greenstone belt in the Wapistan West claim block was mapped and sampled. Results from the sampling that was undertaken has demonstrated the prospectivity of this area with samples displaying geochemical signatures associated with lithium-caesium-tantalum (LCT) pegmatites as well as showing evidence of fractionation.

Geochemical ratios used to analyse the Wapistan sampling include diagnostic ratios of Nb/Ta, Zr/Hf and Mg/Li. Lower values of these ratios (Nb/Ta < 8 or <5, Zr/Hf < 18 and Mg/Li < 10) are all indicative of LCT pegmatites with prospectivity for lithium mineralisation.

The Company completed a high-resolution Light Detection and Ranging (LiDAR) survey in September 2023 and data from the survey has recently been validated and processed. Dahrouge Geological is currently undertaking a targeting analysis based on the imagery to identify areas of potential pegmatite outcrops at Wapistan West which will allow 2024 fieldwork to focus on the most prospective areas.

Results were also received from sampling at Wapistan East as shown on Figure 4. As expected, while the LCT pegmatite system does extend to Wapistan East it is believed that this claim block lies further from the source intrusion and accordingly, the prospectivity for lithium mineralisation is lower.

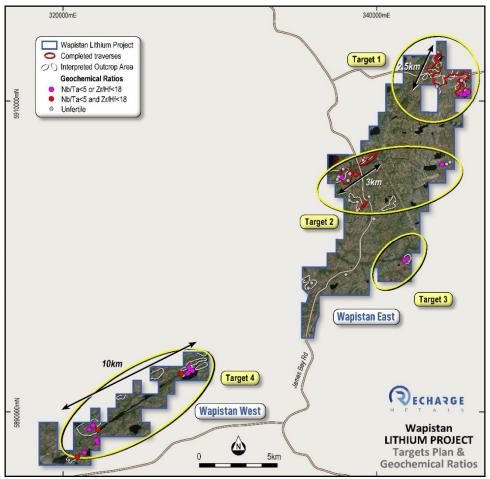

Figure 4: Geochemical Results from the Wapistan Project

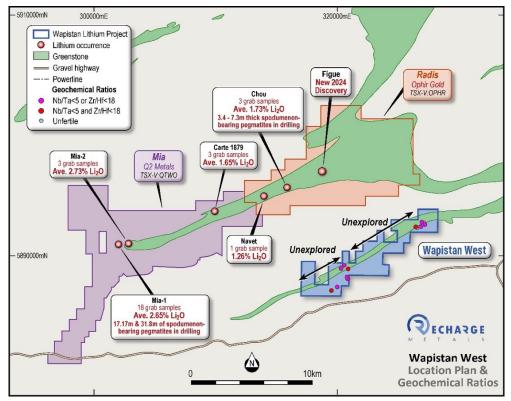

Figure 5: Wapistan West Geochemical Results highlighting underexplored areas

#### **EXPRESS LITHIUM PROJECT - Québec, Canada**

During the quarter, the Company provided the results from the 2023 sampling campaign completed at the Express Lithium Project.

Samples were collected during helicopter-supported exploration traverses across Targets 1 – 4 at Express (Figure 5) by Recharge's in-country exploration team, Dahrouge Geological.

Results confirm the potential of Express with assay data indicating a large number of the samples display the geochemical signatures associated with lithium-caesium-tantalum (LCT) pegmatites as well as showing evidence for varying degrees of fractionation across the project area. These fractionation trends, as well as key chemical ratios, can be used to vector in to lithium mineralisation.

From the assay data two high priority areas of outcropping pegmatites have been defined. Target 1A covers a strike length of 3.6km in the north-western corner of Target 1 and Target 3A covers a strike length of 3.2km in the western portion of Target 3 (Figures 7 and 8). In addition, several other areas have been highlighted by Dahrouge Geological for follow up exploration.

For complete results refer ASX Announcement dated 25 January 2024.

#### Discussion of sampling and results

Traverses across targets identified in areas 1 to 4 at Express, including mapping and sampling of all outcrops encountered, were completed by field crews from Dahrouge Geological, the highly experienced geological consulting firm with many years of experience exploring the James Bay region.

Dahrouge Geological are a related party of DG Resource Management, the vendor of the Express Lithium Project, who previously identified, acquired, and vended the Corvette Property to Patriot Battery Metals (TSX-V: PMET, ASX: PMT).

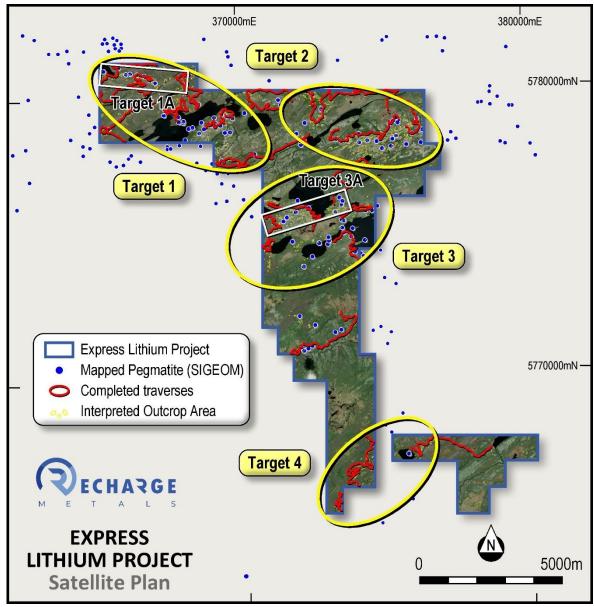

Figure 6: Target areas and completed traverses at the Express Lithium Project Refer ASX Announcement of 29<sup>th</sup> May 2023 for further details on Targets 1 - 4

A diverse range of pegmatite lithologies and mineralogies were recorded within the project area indicating that multiple pegmatite phases are likely present (confirmed below by the geochemical data) meaning that more detailed mapping is required in the areas of interest.

The dominant lithologies observed were quartz, feldspar, and muscovite pegmatites, paragneisses, and granites with local pegmatitic textures. Geological observations from the pegmatite sample locations included observations of tourmaline and beryl which can be used as vectors to potential lithium-bearing pegmatites.

Geochemical data indicates that the pegmatites within the Express Project are LCT pegmatites highly prospective for lithium mineralisation based on a number of criteria, including Li, Cs and Ta content, and diagnostic ratios such as K/Cs, K/Rb, Nb/Ta and Mg/Li.

The data confirms that a high degree of fractionation has occurred with the most fractionated samples containing the higher contents of lithium, providing another vector towards potential lithium mineralisation (Figures 7 and 8).

Based on the geochemical data and geological observations two areas have been designated as high priority targets for more detailed mapping and sampling as shown in Figure 6.

In addition, a number of other outcrops are recommended by Dahrouge Geological to be revisited based on prospective geochemical data, to collect further samples and geological observations. It is worth noting that Targets 1A and 3A are both in the western portion of the interpreted "Pegmatite Trend" shown in Figure 6. This may indicate that this part of the Express Project falls within the optimal distance from the host intrusion for the formation of lithium-bearing pegmatites.

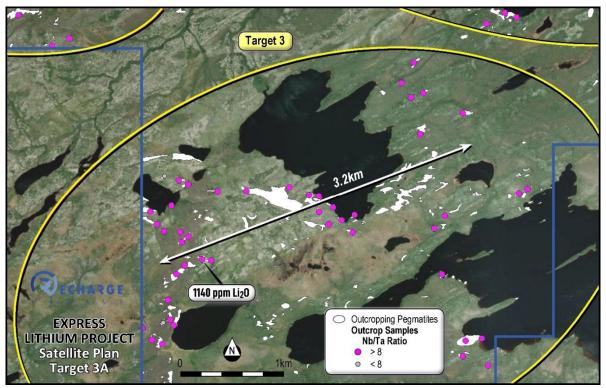

Figure 7: Target area 1A showing sample locations, Nb/Ta ratios from analysis and anomalous lithium assays.

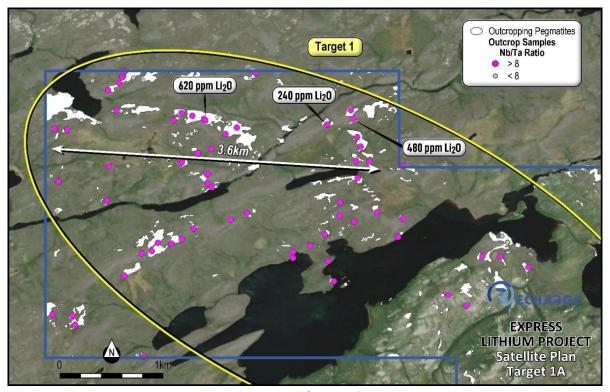

Figure 8: Target area 3A showing sample locations, Nb/Ta ratios from analysis and anomalous lithium assays.

#### BRANDY HILL SOUTH PROJECT - Western Australia, Australia

Recharge's Brandy Hill South Project is located within the Archaean Gullewa Greenstone Belt in Western Australia. The Project lies approximately 60km southeast of Yalgoo and covers approximately 850km<sup>2</sup>.

The area is well serviced with infrastructure, with Silver Lake Resources (ASX:SLR) Deflector gold-copper mine located 18km to the north. Recharge acquired the Brandy Hill South Project based on the exploration potential of the southern extension of the Gullewa Greenstone Belt and the continuation of the main geological structure, the Salt Creek Shear, through the tenure.

Whilst activities focused on Canadian projects during the March quarter, the Company continued to assess the prospectivity of the project and to explore corporate opportunities to advance the Brandy Hill South Project.

#### **CORPORATE**

#### **Placement**

Recharge successfully completed a share placement to raise A\$1.44 million (**Placement**) through the issue of 24,063,993 new fully paid ordinary shares in the capital of Recharge (**Placement Shares**). The Placement Shares were issued to sophisticated and professional investors without disclosure under section 708 of the Corporations Act. The Placement Shares were issued utilising available placement capacity under ASX Listing Rule 7.1 (16,702,796 shares) and 7.1A (11,135,197 shares). The Placement Shares rank equally with the existing fully paid ordinary shares in the Company.

The Company also completed the issue of 3,774,000 fully paid ordinary shares in the capital of Recharge at a deemed issue price of \$0.06 in satisfaction of its obligations to pay the equity component of the consideration for the acquisition of the Newnham Lake Uranium Project. The Consideration Shares were issued utilising available placement capacity under ASX Listing Rule 71

#### **Cash Position**

As at 31 March 2024, Recharge held \$1,838,432 in cash (31 December 2023 \$1,263,456). The current cash at bank is approximately \$1,729,780. For further movements in cash during the quarter, refer to Appendix 5B.

Related party payments for the quarter, as outlined in the Appendix 5B at section 6.1 and 6.2, total \$108,900 and \$nil respectively, which includes amounts paid to directors including director's fees and statutory superannuation.

Exploration and Evaluation Expenditure capitalised during the quarter ended 31 March 2024 was \$187,766.

#### Capital Structure as at 31 March 2024

Description	Number
Fully paid ordinary shares*	139,189,967
Unlisted options exercisable at \$0.25 on or before 7 October 2024	5,712,000
Unlisted options exercisable at \$0.25 on or before 7 July 2024	400,000
Unlisted options exercisable at \$0.20 on or before 3 May 2026	6,187,500
Unlisted options exercisable at \$0.35 on or before 3 May 2026	1,000,000
Unlisted options exercisable at \$0.30 on or before 27 June 2026	2,500,000
Unlisted options exercisable at \$0.40 on or before 27 June 2026	2,500,000
Performance Rights*	30,500,000

<sup>\*</sup> Includes 8,750,000 shares under voluntary escrow as at 31 March 2024

<sup>\*\*</sup>Refer to various 3B lodgments for performance rights terms and conditions

#### **Conversion of Performance Shares**

Post end of quarter, on 4 April 2024 500,000 performance shares held by the Managing Director converted to 500,000 fully paid ordinary shares.

#### Compliance

For the purpose of Listing Rule 5.3.1, details of the Company's group exploration activities for the quarter, including any material developments or material changes in those activities, and a summary of the expenditure incurred on those activities is detailed above and below.

For the purpose of Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities during the quarter by the Company or its subsidiaries.

Pursuant to Listing Rule 5.3.3, a full list of Mining Tenements held as at 31 March 2024 is included in Appendix 1. Tenement E80/5576 was surrendered during the quarter.

This announcement has been authorised for release by the Board.

#### **Competent Person Statement**

The information in this announcement that relates to Exploration Results is based on information compiled or reviewed by Ms Felicity Repacholi, a Competent Person who is a Director of the Company. Ms Repacholi is a Member of the Australian Institute of Geoscientists and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Ms Repacholi consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the Exploration Results information included in this report from previous Company announcements, including Exploration Results extracted from the Company's Prospectus.

#### Forward Looking Statements

Some statements in this announcement regarding estimates or future events are forward-looking statements. Forward-looking statements include, but are not limited to, statements preceded by words such as "planned", "expected", "projected", "estimated", "may", "scheduled", "intends", "anticipates", "believes", "potential", "could", "nominal", "conceptual" and similar expressions. Forward-looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Statements regarding plans with respect to the Company's mineral properties may also contain forward looking statements.

Forward-looking statements are provided as a general guide only and should not be relied on as a guarantee of future performance. Forward-looking statements may be affected by a range of variables that could cause actual results to differ from estimated results expressed or implied by such forward-looking statements. These risks and uncertainties include but are not limited to liabilities inherent in exploration and development activities, geological, mining, processing and technical problems, the inability to obtain exploration and mine licenses, permits and other regulatory approvals required in connection with operations, competition for among other things, capital, undeveloped lands and skilled personnel; incorrect assessments of prospectivity and the value of acquisitions; the inability to identify further mineralisation at the Company's tenements, changes in commodity prices and exchange rates; currency and interest rate fluctuations; various events which could disrupt exploration and development activities, operations and/or the transportation of mineral products, including labour stoppages and severe weather conditions; the demand for and availability of transportation services; the ability to secure adequate financing and management's ability to anticipate and manage the foregoing factors and risks and various other risks. There can be no assurance that forward-looking statements will prove to be correct.

## Appendix 5B

# Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name	of	entity

- Name of only	
Recharge Metals Limited	
ABN	Quarter ended ("current quarter")
13 647 703 839	31 March 2024

Con	solidated statement of cash flows	Current quarter \$A'000	Year to date (9 months) \$A'000
1.	Cash flows from operating activities		
1.1	Receipts from customers		
1.2	Payments for		
	(a) exploration & evaluation		
	(b) development		
	(c) production		
	(d) staff costs	(109)	(347)
	(e) administration and corporate costs	(143)	(625)
1.3	Dividends received (see note 3)		
1.4	Interest received	3	16
1.5	Interest and other costs of finance paid		
1.6	Income taxes paid		
1.7	Government grants and tax incentives		
1.8	Other (provide details if material)		
1.9	Net cash from / (used in) operating activities	(249)	(956)

2.	Cash flows from investing activities		
2.1	Payments to acquire or for:		
	(a) entities		
	(b) tenements	(337)	(479)
	(c) property, plant and equipment	-	-
	(d) exploration & evaluation	(188)	(670)
	(e) investments	-	-
	(f) other non-current assets	-	-

ASX Listing Rules Appendix 5B (17/07/20)

Cons	solidated statement of cash flows	Current quarter \$A'000	Year to date (9 months) \$A'000
2.2	Proceeds from the disposal of:		
	(a) entities		
	(b) tenements		
	(c) property, plant and equipment		
	(d) investments		
	(e) other non-current assets		
2.3	Cash flows from loans to other entities		
2.4	Dividends received (see note 3)		
2.5	Other (provide details if material)		
2.6	Net cash from / (used in) investing activities	(525)	(1,149)

3.	Cash flows from financing activities		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	1,444	1,444
3.2	Proceeds from issue of convertible debt securities		
3.3	Proceeds from exercise of options		
3.4	Transaction costs related to issues of equity securities or convertible debt securities	(95)	(95)
3.5	Proceeds from borrowings		
3.6	Repayment of borrowings		
3.7	Transaction costs related to loans and borrowings		
3.8	Dividends paid		
3.9	Other (provide details if material)		
3.10	Net cash from / (used in) financing activities	1,349	1,349

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	1,263	2,594
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(249)	(956)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(525)	(1,149)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	1,349	1,349

ASX Listing Rules Appendix 5B (17/07/20) + See chapter 19 of the ASX Listing Rules for defined terms.

Con	solidated statement of cash flows	Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	1838	1,838

If item 8.7 is less than 2 quarters, please provide answers to the following questions:

Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:							

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:			

8.8

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

#### **Compliance statement**

- This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 April 2024

Authorised by: The Board of Recharge Metals Limited

#### **Notes**

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
