MARCH 2024 QUARTERLY ACTIVITIES REPORT

QUARTERLY ACTIVITY

Projects

During the quarter RemSense undertook reality capture scanning and delivered virtualplant for Woodside Energy Ltd's Okha FPSO (Floating Production Storage and Offloading) \$246,440 in value. In addition to the terrestrial scanning, RemSense delivered virtualplant Air which included drone aerial capture and processing of high-resolution imagery of the complete exterior of the vessel including waterline for use in detailed inspections.

The Company is finalising the schedule for scanning of Chevron's Wheatstone LNG Train 2 and Gorgon LNG Train 2. Work is expected to be done in July and October 2024 respectively. This value of this work is \$978,580. The Company is in discussion with one of Chevron's overseas Business Units which have expressed interest in the scanning of their onshore gas plants.

Captured high-resolution drone-based imagery of Newmont Boddington's primary crusher and 3km conveyor. This imagery was processed and modelled into a detailed 3D model for display and analysis in virtualplant Air. The Company continues to discuss the capture of other parts of Newmont Boddington's operation as access becomes available.

Continued regular drone based remote water sampling campaigns in abandoned open pits for BHP and Mine Waste Management and drone traffic monitoring for Western Australia's Main Roads

Product

Progressed the re-architecture of the virtualplant platform to provide a new and improved user interface and homepage, bolstered by advanced client configuration features and fortified data security measures. This initiative aims to offer increased flexibility to the management of user and group-based permissions.

Completed the seamless integration of virtualplant Air into our core virtualplant platform, enabling users to effortlessly analyse drone aerial reality capture imagery alongside ground-based facility imagery.

Enhanced our IoT capabilities to facilitate efficient integration of devices, enabling the real-time display of operational parameters within the virtualplant environment.

Researched requirements to identify enhancement opportunities for our maintenance planner and asset defect detection systems, particularly focusing on areas such as corrosion detection.

Company

Board Changes

During the quarter, Non-Executive Chairman, Chris Sutherland and Non-Executive Director, Sue Murphy resigned. Non-Executive Director, Ross Taylor was appointed Non-Executive Chairman and founding shareholders, Richard Pace and John Clegg were appointed Non-Executive Directors.

The new board has immediately been proactive in contributing to sales initiatives by leveraging their extensive networks.

Finance

Following the raising of \$460,026 through the Entitlement offer in the December 2023 quarter (\$272,778 in applications and \$187,248 in shortfall offers), an additional \$423,500 was raised from placement of part of the shortfall on 11 March 2024. Shareholder approval is being sought at a meeting of shareholders on 10 May to issue \$250,000 of shares to Richard Pace and \$50,000 of shares to John Clegg.

Opportunities

Following a restructuring of our business development capabilities, our sales pipeline is showing growth, with emerging opportunities spanning the oil and gas, mining, and utilities sectors. The Company has engaged an external sales consulting agency, The Models Method, to enhance our sales messaging and communication methodology.

The Company is continuing to work with our current clients to identify the next assets in their portfolio who are candidates for virtualplant. The Company is also working with several companies in the critical minerals market, specifically lithium, who have expressed interest in virtualplant for their processing facilities and refineries to reduce at risk activities, increase maintenance planning efficiency and improve contractor estimates.

A key growth strategy for RemSense is through establishing strategic partnerships with innovative technology companies developing cutting-edge applications. One such company is a Perth-based technology company which develops an AI-driven electrical device monitoring and data platform. The Company believes the combination of RemSense's 3D asset visualisation platform (virtualplant) with the monitoring and data platform provides a compelling solution that delivers exceptional value and remarkable ROI.
