

High-quality uranium projects in world-class districts

RIU Sydney Resources Roundup

May 7- 9 2024

Ben Vallerine
Managing Director

KOBA
resources limited

Two high-grade uranium projects

Two world class uranium districts

- The Yarramba Uranium Project was acquired in January 2024.
 - 5,000km² and 250km of palaeochannels to explore.
 - Includes the Oban Uranium Deposit with a JORC 2004* resource of **4.6Mlbs @ 260ppm U₃O₈ from 8.2Mt.**
 - Located in a jurisdiction that includes Australia's three operating uranium mines.
- The extremely high-grade Harrier Uranium Project was added to the portfolio in April 2024, highlights include:
 - >1% U₃O₈ in rock chips have been returned from nine prospects.
 - Extremely under-explored.
 - Located 50km west of the 127.7Mlb Michelin Uranium Project.
- Two projects with outstanding potential to discover large, high-grade uranium deposits.

*Cautionary Statement – This Inferred Resource Estimate for the Oban Deposit (8.2Mt @ 260ppm for 4.62Mlbs of U₃O₈ using a 150ppm.m cut-off) was first disclosed in accordance with JORC 2004. It has been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since last reported. A Competent Person has not undertaken sufficient work to classify the JORC 2004 estimate in accordance with JORC 2012. It is uncertain whether it will be possible to update this Inferred Mineral Resource in accordance with the JORC 2012 Code.

Year to 3 May 2024

Flagship Yarramba Uranium Project is in a world-class uranium district

Two currently producing in-situ recovery uranium operations nearby.

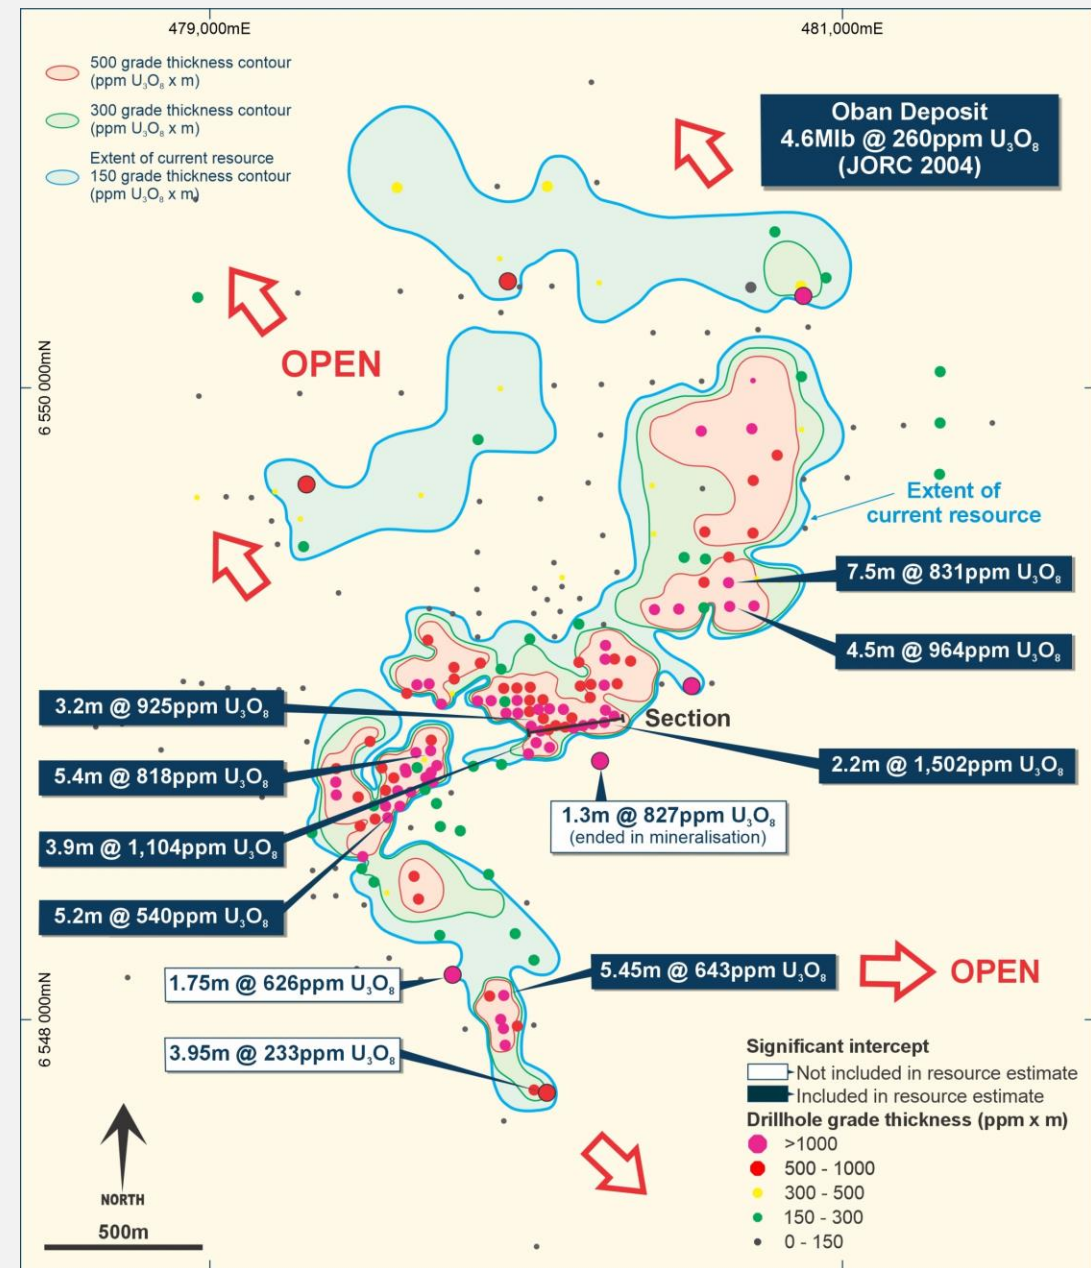

- The Yarramba Project is located:
 - 17km north of the Honeymoon Uranium Operation.
 - 71.6Mlbs @ 620ppm U_3O_8 of resources.
 - Recently commenced mining.
 - 120km southeast of the Beverley Uranium Operation.
 - 165Mlbs @ 2,766ppm U_3O_8 of resources.
 - Production of >40Mlbs of U_3O_8 .
 - 20 years of continuous operations.
- Curnamona Energy Limited achieved a market capitalisation of \$120m during 2007, whilst actively exploring Koba's Yarramba Project.

Yarramba's Oban Deposit offers outstanding potential

Immediate priority is to delineate high-grade mineralisation at the 4.6Mlb Oban Deposit.

- Previous intersections include:
 - 7.5m @ 831ppm U_3O_8 ;
 - 4.5m @ 964ppm U_3O_8 ; and
 - 3.9m @ 1,104ppm U_3O_8 .
- Opportunities to discover extensions of thick, high-grade mineralisation at Oban.
- Potential to expand the current resource with significant intersections outside the existing resource, including:
 - 1.3m @ 827ppm U_3O_8 (ended in mineralisation) ; and
 - 1.75m @ 626ppm U_3O_8 .

Yarramba's Oban Deposit has potential for a significant high-grade resource

Consistent and contiguous high-grade mineralisation.

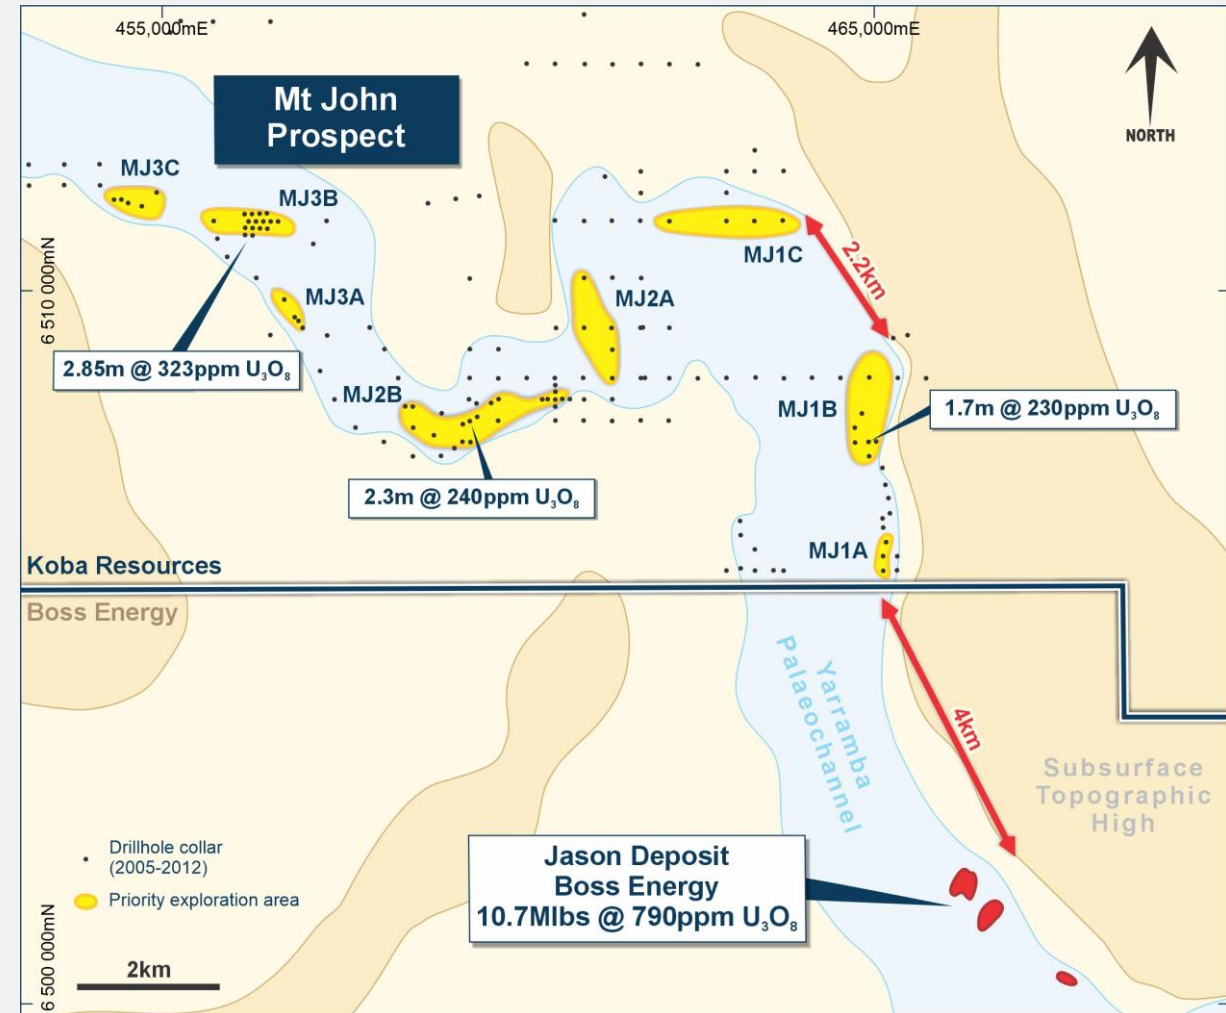

- A geological review has identified consistent high-grade mineralisation. Contiguous drill intersections include:
 - 2.12m @ 2,236ppm U_3O_8 ;
 - 2.65m @ 1,174ppm U_3O_8 ;
 - 2.20m @ 1,502ppm U_3O_8 ; and
 - 1.80m @ 1,306ppm U_3O_8 .
- Understanding these high-grade trends may lead to the discovery of additional high-grade resources.
- Upcoming drill program will target extensions to these high-grade trends.

Mt John Prospect within the highly endowed Yarramba Palaeochannel

Immediately along strike from over 50Mlbs of uranium resources at the Honeymoon, Jason and Saffron Deposits.

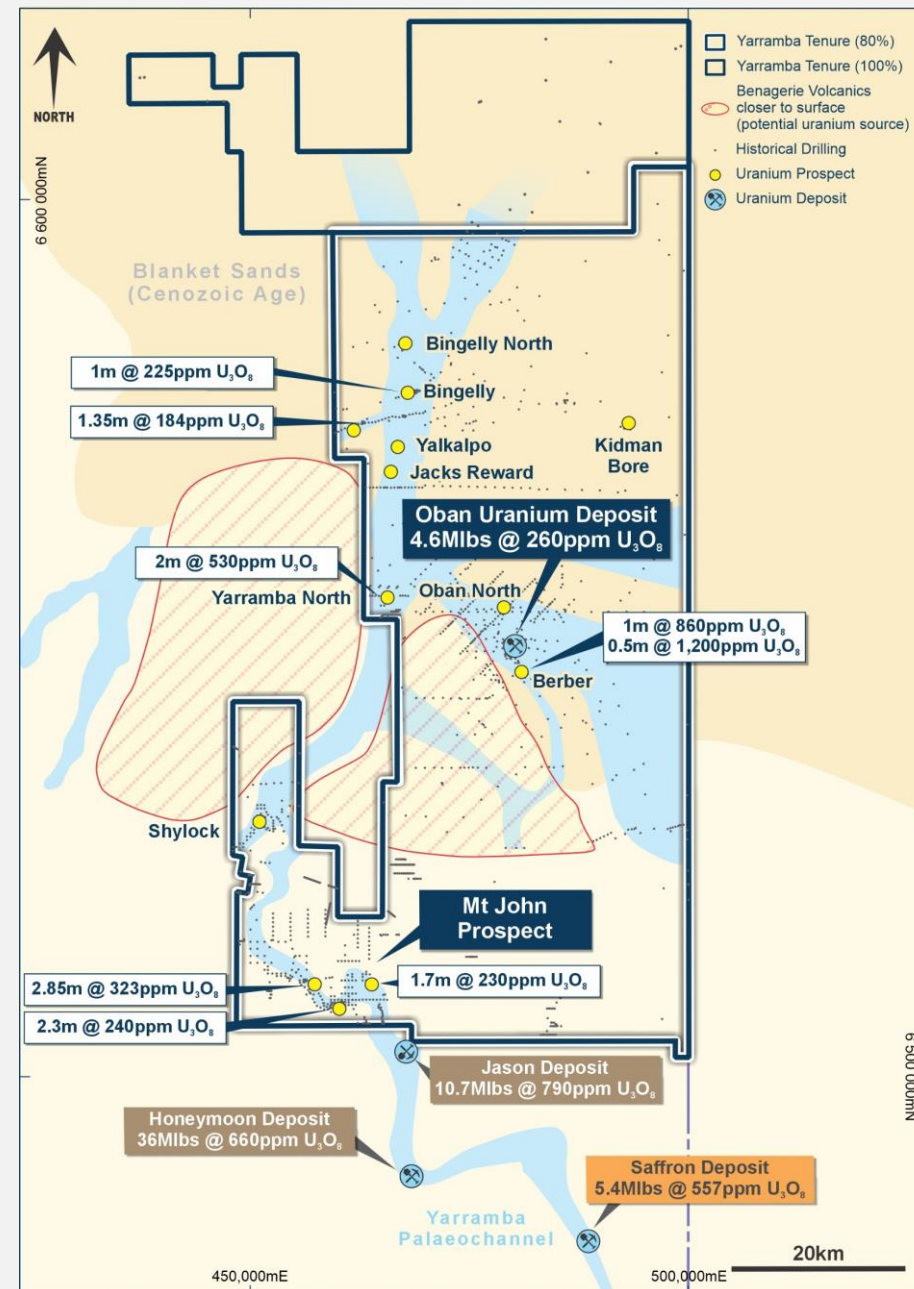

- Previous broadly-spaced drilling was to define the extents of the palaeochannel and was a first pass test for uranium. Drilling results included:
 - 2.85m @ 323ppm U_3O_8 and
 - 2.3m @ 240ppm U_3O_8 .
- Eight priority targets identified by the previous operator within a 15km stretch of palaeochannel.
- Large areas of the palaeochannel remain completely undrilled.
- Potential to discover additional mineralisation with closer-spaced and extensional drilling.

5,000km² and 250km of additional palaeochannels to explore.

Numerous prospects to follow-up.

- Previously identified prospects with limited broad-spaced drilling that have returned significant intercepts include:
 - Berber – 1.0m @ 860ppm U₃O₈ and 0.5m @ 1,200ppm U₃O₈
 - Yarramba North – 2.0m @ 530ppm U₃O₈.
 - Bingelly – 1.0m @ 225ppm U₃O₈.
 - Yalkalpo – 1.35m @ 184ppm U₃O₈ and multiple gamma readings up to 12.5 times background 2-3km apart.
 - Bingelly North – 20 times background at 24m depth
- Numerous other prospects have returned high gamma readings in drilling without any follow-up work since the 1980s.
- Large portions of the 250km of palaeochannels remain undrilled.
- Koba will prioritise targets for further investigation later in 2024 and beyond.

Untested exploration target includes 25km of additional interpreted palaeochannel

The highly-endowed Yarramba palaeochannel is interpreted to split south of the Jason Deposit.

- Potential extension to the high-grade mineralisation known at the Jason Deposit – 10.7Mlbs @ 790ppm U_3O_8 .
- The Yarramba East palaeochannel, east of the Jason Deposit, is a compelling target that warrants drill testing.
- Koba has submitted the requisite applications to undertake drilling in 2024.

New interpreted palaeochannel east of the Mt John Prospect shown on a state gravity image.

Maiden drilling to begin at Yarramba in Q2 2024

First exploration program at the Yarramba Project since 2012.

- Drill program will target:
 - Extensions to high-grade mineralisation at the Oban Deposit with ~80 drill holes for ~8,000m planned; and
 - New discoveries at Mt John with ~30 holes for ~3,000m planned.
- All requisite permit applications have been submitted; approvals are anticipated during May 2024.
- Drill contractor has been engaged and a rig secured.
- All other staff and contractors secured to implement the program.
- Heritage surveys completed at Oban with over 400 holes cleared.

Drilling at the Oban Deposit by Curnamona Energy circa 2008.

Harrier Uranium Project

Labrador Newfoundland, Canada

An exceptionally high-grade uranium project in Canada.

- In April 2024 Koba acquired a four-year option to purchase 100% of the 131km² project in eastern Canada.
- Located within a world-class uranium district that includes **127.7Mlbs of U₃O₈** at the Michelin Uranium Project.
- There is considerable potential to discover very high-grade uranium deposits.
- No exploration undertaken since 2012.
- Very low-cost acquisition providing exceptional upside.

Nine prospects have returned rock chip assays $> 1.0\% \text{U}_3\text{O}_8$

- $5.83\% \text{U}_3\text{O}_8$ – Moran Height Prospect
- $5.08\% \text{U}_3\text{O}_8$ – Fish Hawk North Prospect
- $4.86\% \text{U}_3\text{O}_8$ – Brook Prospect
- $3.48\% \text{U}_3\text{O}_8$ – Minisinakwa Prospect
- $2.12\% \text{U}_3\text{O}_8$ – Anomaly 7 Prospect
- $1.49\% \text{U}_3\text{O}_8$ – Fish Hawk South Prospect
- $1.48\% \text{U}_3\text{O}_8$ – Boiteau Prospect
- $1.31\% \text{U}_3\text{O}_8$ – Firestone Prospect
- $1.26\% \text{U}_3\text{O}_8$ – Anomaly 17 Prospect

Geologist at the Harrier Uranium Project.

Mineralised boulder at the Harrier Uranium Project.

Harrier Uranium Project

Field work to start in June 2024

Considerable potential to discover a very high-grade uranium deposit at Harrier.

- The Project is heavily under-explored as:
 - Three of the nine high-grade prospects are undrilled; and
 - Four of the prospects have been tested by 11 holes or less.
- Ongoing detailed project review will prioritise prospects for the upcoming field program.
- Higher priority targets will be mapped and sampled as part of the upcoming program to ensure that Koba's inaugural drilling program is focused on targets that are most likely to yield discovery.

Experienced Board and technical team

Extensive uranium experience

Mike Haynes
Non-Executive Chairman

- 30 years' experience in international resources industry
- Worked extensively on project generation and acquisition
- Past 17 years involved in the incorporation and IPOs of numerous resources companies, and in their ongoing financing and management
- Managing Director of New World Resources (ASX:NWC).

Ben Vallerine
Managing Director

- Founding Managing Director of Koba Resources.
- Experienced in the identification, acquisition and exploration of mineral assets including over 10 years in uranium.
- Former Exploration Manager and Director of uranium-focused Black Range Minerals.
- Built a portfolio of >90Mlbs of U_3O_8 through successful exploration and acquisition with Black Range.
- Geologist with over 20 years' experience throughout Australia and North America.

Scott Funston
Non-Executive Director

- Chartered Accountant and Company Secretary with 20 years' experience in the mining industry and accounting profession.
- Assisted a number of ASX listed resources companies as CFO and Company Secretary operating in Australia, South America, Asia, Africa and the USA.
- CFO and Finance Director of Challenger Exploration (ASX:CEL).
- Former CFO of Avanco Resources that bought their Carajas Operation into production in Brazil prior to a takeover by Oz Minerals.

Mark Couzens
Exploration Manager

- A geologist with over 10 years' experience in the exploration and management of uranium projects.
- A member of the team that discovered the world-class Four Mile deposits, part of the Beverley Operation that is located 120km northwest of Koba's Yarramba Uranium Project.
- Managed exploration programs that resulted in the increase of the resource base at the Bennett Well Deposit from 4.8Mlbs to 30.9Mlbs of U_3O_8 .

Nuclear energy is undergoing a resurgence globally

Uranium price surged to US\$106/lb in January 2024, the highest since 2007.

- Nuclear energy is a carbon-free, baseload power source; a critical part of the clean energy movement.
- Approximately 440 nuclear reactors operate globally.
- Countries are turning back to “clean” nuclear power with:
 - 60 nuclear reactors under construction; and
 - 110 nuclear reactors planned.
- In 2021, global uranium requirements totalled 62,496 tonnes.
- By 2040, that figure could rise by as much as 250% to 156,500 tonnes (World Nuclear Authority) putting strain on supply.

Uranium price (\$US/lb)

As at 1 May 2024

Disclaimer

This presentation prepared by Koba Resources Limited (“Company”) does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). To the maximum extent permitted by law, none of the Company its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

Forward Looking Statements

This presentation may contain forward looking statements that are subject to risk factors associated with mineral exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates. This presentation also contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. In particular, there is a risk that the Company will not be able to estimate, expand or upgrade existing JORC resources. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company's actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned

or intended. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and assumptions based on currently available information. Should one or more risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. The forward-looking statements are made as at the date of this document and the Company disclaims any intent or obligation to update publicly such forward looking statements, whether as the result of new information, future events or results or otherwise.

Competent Person's Statement

The information in this announcement that relates to past exploration results is based on, and fairly reflects, information compiled by Mr Ben Vallerine, who is the Company's Managing Director. Mr Vallerine is a Member of the Australian Institute of Geoscientists. Mr Vallerine has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results and Mineral Resources (JORC Code). Mr Vallerine consents to the inclusion in the announcement of the matters based on the information in the form and context in which it appears.

Past exploration results disclosed in this report have been previously prepared and disclosed by Koba Resources Limited (the “Company”) in accordance with JORC 2012 in ASX announcements. Refer to the Company's ASX announcements 31 October 2022 - Amended Announcement – Koba Stakes Lithium Project, 15 December - 2022 Koba Acquires Two More High-Quality Lithium-Pegmatite Projects in Canada, 11 September 2023 - Lithium-Bearing Pegmatites Discovers at Koba's Whitlock Lithium Project, 22 January 2024 – Transformational Acquisition of the Advanced Yarramba Uranium Project in South Australia, 25 January - Discovery of New LCT Pegmatites at the Whitlock Project and 11 April 2024 – Koba Acquires An Exceptional High-Grade Uranium Project in Canada. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Prospectus or subsequent announcements. The Company confirms that the form and content in which the Competent Person's findings are presented here have not been materially modified from the Prospectus or subsequent announcements.

Cautionary Statement – JORC 2004 Resource

The Inferred Resource Estimate for the Oban Deposit was first disclosed in accordance with JORC 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since last reported. A Competent Person has not undertaken sufficient work to classify the JORC 2004 estimate in accordance with JORC 2012. It is uncertain whether it will be possible to update this Inferred Mineral Resource in accordance with the JORC 2012 Code.

Appendices

The Oban Deposit Area

KOBA
resources limited

Appendix 1

Project Acquisition Terms

Yarramba Uranium Project

1. Koba acquired the right to earn an 80% interest in the Tertiary hosted uranium rights from Havilah Resources Limited in consideration for the issue:
2. To complete the acquisition of the 80% interest Koba is required to:
 - Spend \$6m on exploration over 4 years.
3. Havilah will then be free carried until completion of a BFS; thereafter contributing or diluting to a 1.5% net smelter royalty.

Harrier Uranium Project

1. Koba acquired a 4-year option to purchase 100% of the Harrier Uranium Project in consideration for:
 - C\$100,000 in cash and C\$50,000 in Koba shares.
2. Koba has the right to extend the option by paying:
 - C\$25,000 in cash and C\$50,000 in Koba shares (Year 1).
 - C\$50,000 in cash and C\$75,000 in Koba shares (Year 2).
 - C\$50,000 in cash and C\$100,000 in Koba shares (Year 3).
 - C\$100,000 in cash and C\$100,000 in Koba shares (Year 4).
3. Koba is required to:
 - Spend C\$3m on exploration over 4 years.
 - Assign a 2.0% net smelter royalty (1.0% may be purchased for C\$1m)

Appendix 2

Oban JORC Mineral Resource

Project	Classification	Tonnes (Mt)	eU ₃ O ₈ (ppm)	Contained eU ₃ O ₈ (Mlbs)
Oban ¹	Inferred	8.2	260	4.63

¹Details released to the ASX by Curnamona Energy Limited* on 4 June 2009 applying a grade-thickness cut-off of 150 metre.ppm eU₃O₈.

Numbers in the resource table are rounded.

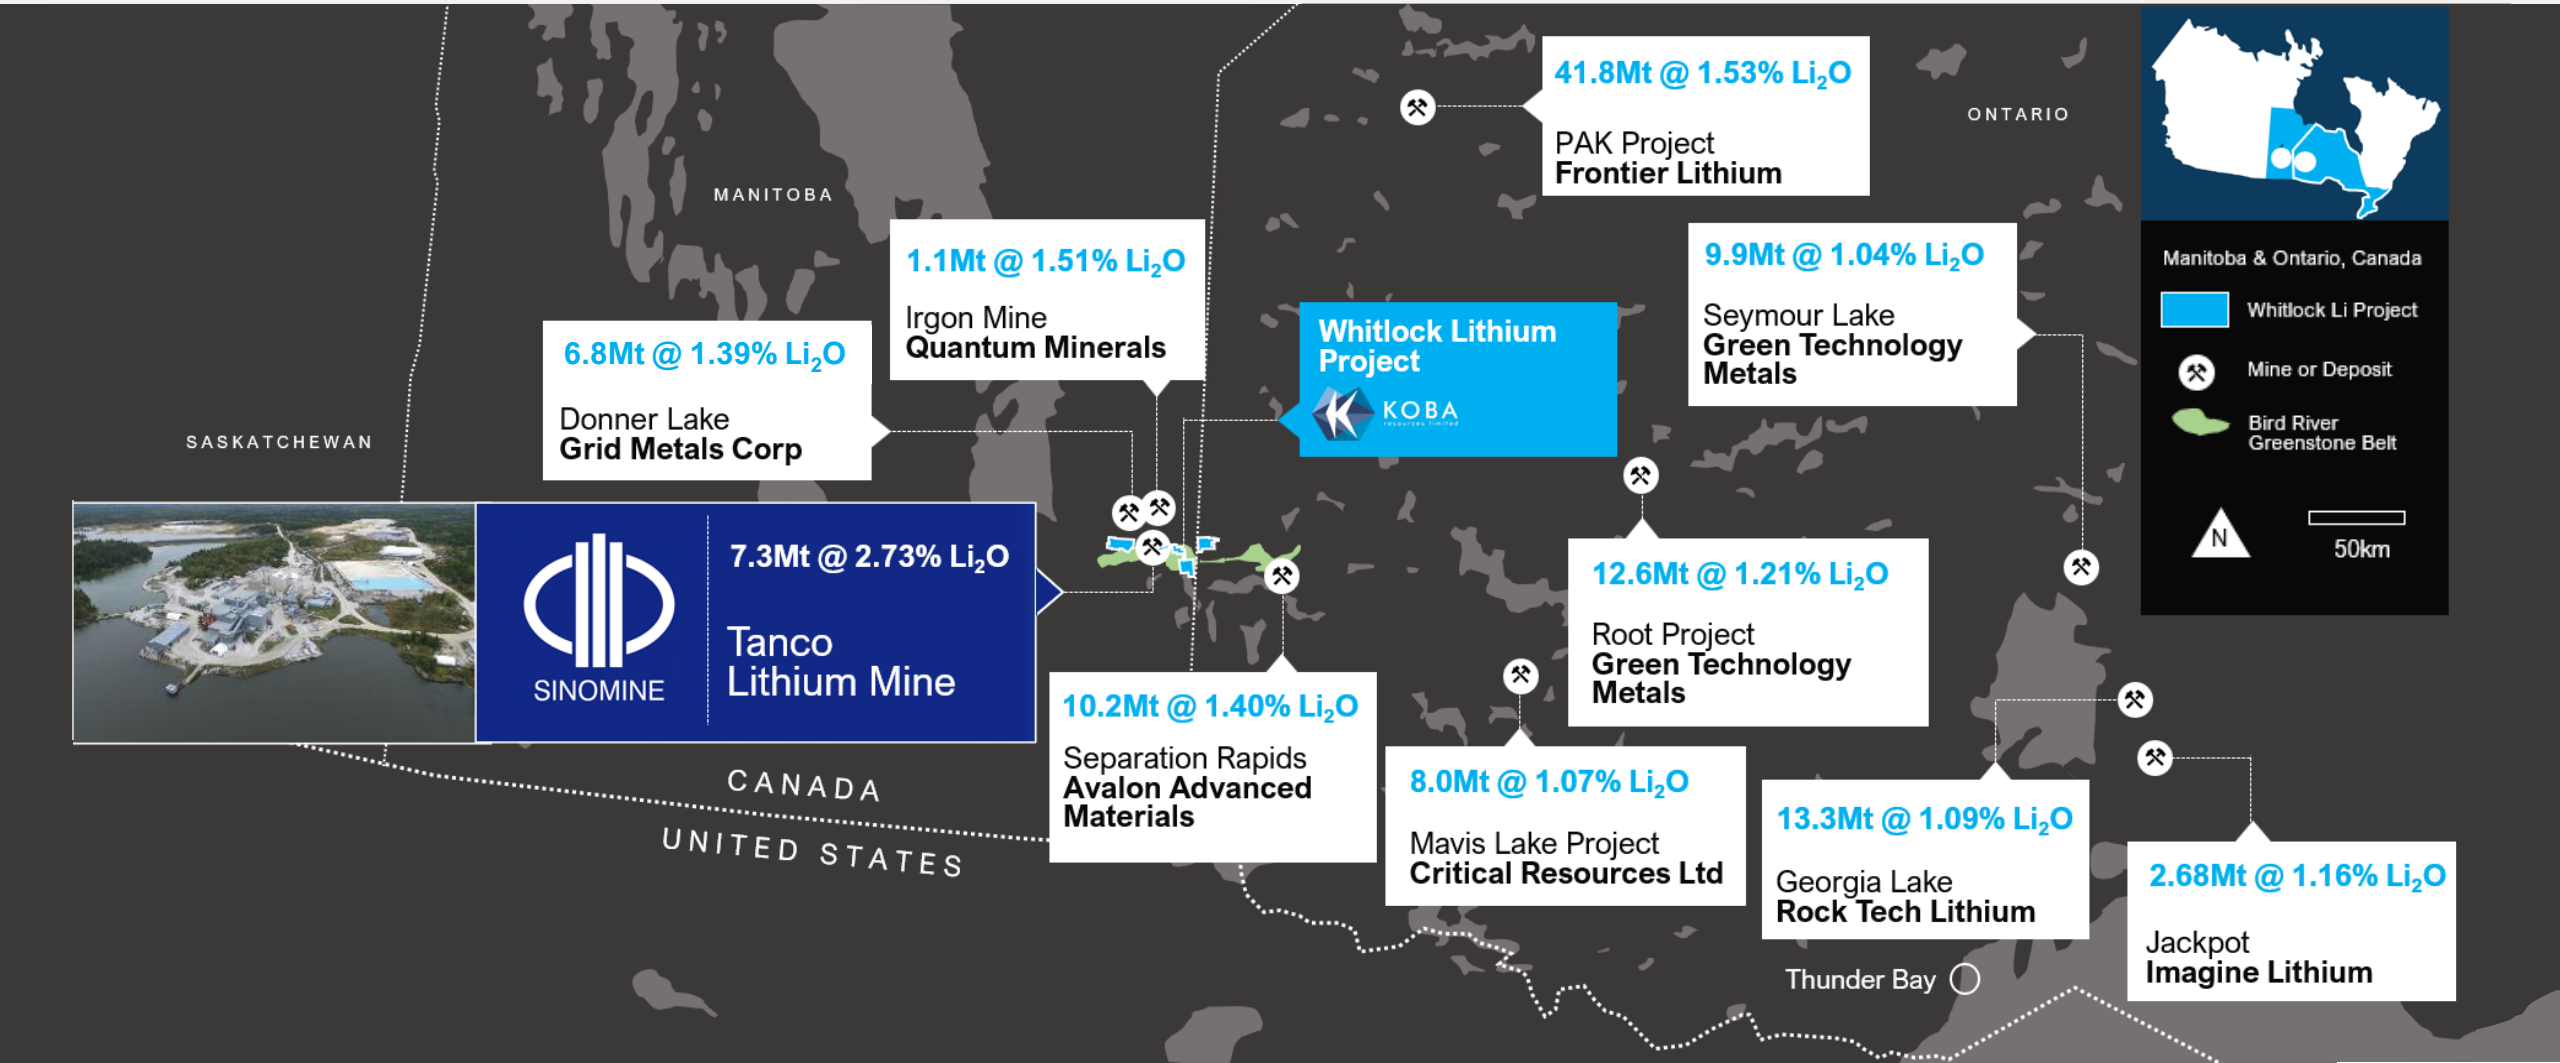

*Cautionary Statement – This Inferred Resource Estimate for the Oban Deposit was first disclosed in accordance with JORC 2004. It has been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since last reported. A Competent Person has not undertaken sufficient work to classify the JORC 2004 estimate in accordance with JORC 2012. It is uncertain whether it will be possible to update this Inferred Mineral Resource in accordance with the JORC 2012 Code.

Appendix 3

Lithium Projects

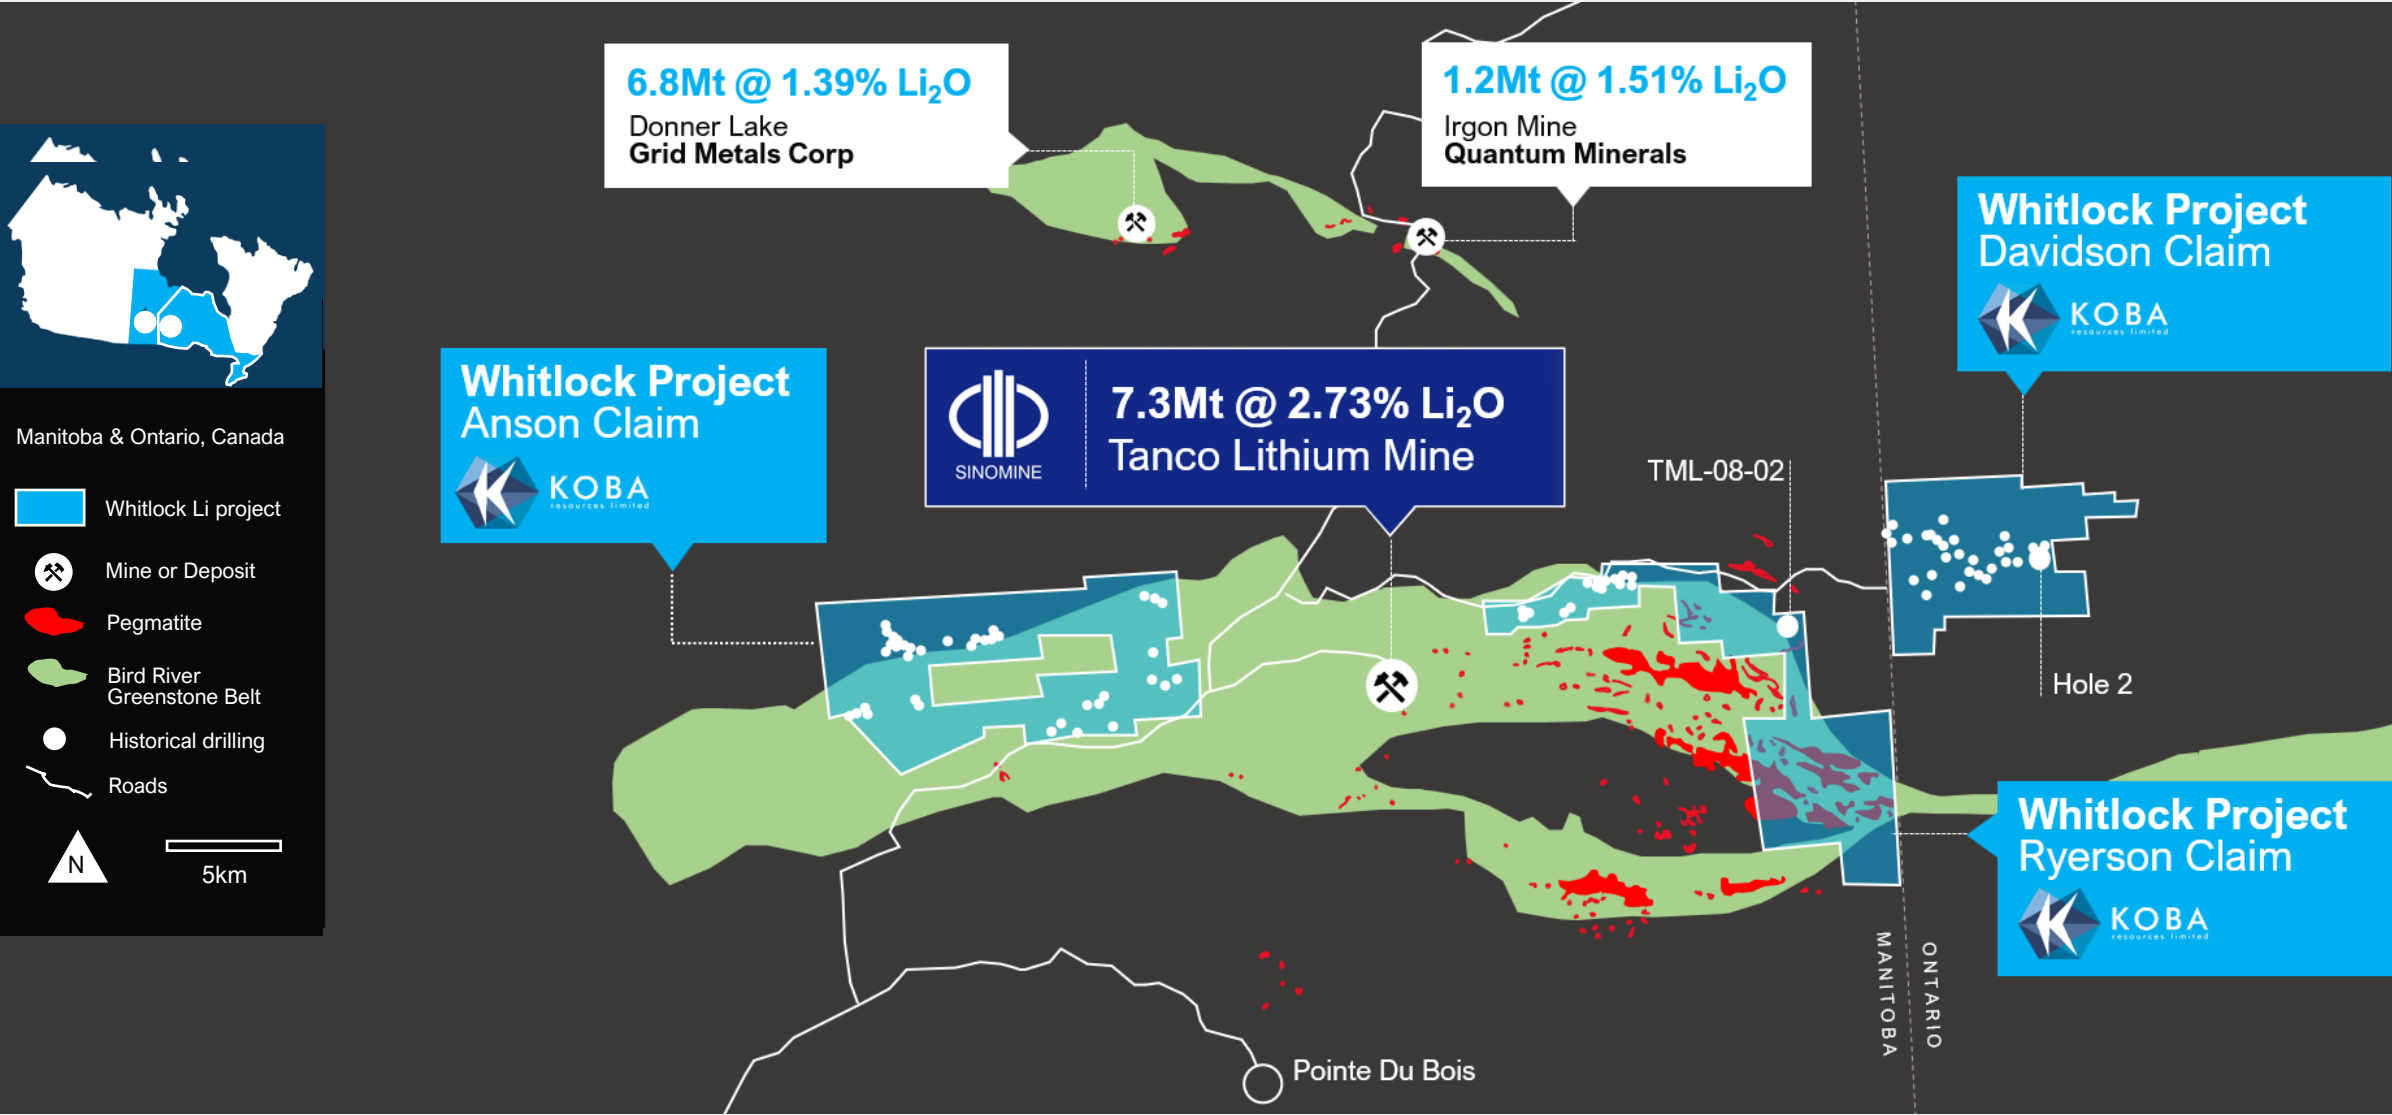

Whitlock Lithium Project.

Within the Prolific Ontario-Manitoba Lithium Province.

Whitlock Lithium Project

Surrounded by lithium deposits

Whitlock Lithium Project.

Extensive network of mapped pegmatites.

Discovered three prospects with lithium-bearing pegmatites during 2023 exploration programs.

- **Blue Moon Prospect** returned assays up to 3,806ppm Cs_2O , 731ppm Ta_2O_5 , 0.15% Li_2O and 0.63% SnO_2 . Pegmatites outcrop over 70m of strike and 3m thick at surface.
- **Beaver Tail Prospect** returned assays up to 0.16% Li_2O from outcropping stacked pegmatites that extend over 1.2km of strike with widths up to 40m.
- **Lynx Prospect** returned grades up to 0.22% Li_2O and 178ppm Ta_2O_5 from a single rock chip sample.

JB1 Lithium Project.

Quebec, Canada

Located in the world class James Bay lithium province near significant deposits.

- 12km west of the Critical Elements' Rose Lithium Deposit - 34.2Mt @ 0.9% Li₂O.
- 30km southeast of Alkem's James Bay Lithium Deposit – 110.2Mt @ 1.3% Li₂O.
- 18km east of Cygnus Metals' Pontax Lithium Deposit - 10.1Mt @ 1.0% Li₂O.

Major lithium discoveries in the James Bay lithium province include:

- Corvette Project - resource 109.2Mt @ 1.4% Li₂O
- Adina Project – resource 59Mt @ 1.12% Li₂O.
