RESPONSE TO ASX PRICE QUERY

In reference to your letter of 8 May 2024 regarding the change in the price of OZZ's securities from an intraday low of \$0.032 yesterday, 7 May 2024, to an intraday high of \$0.057 today and the significant increase in the volume of OZZ's securities traded today. The response to your five queries are as follows:

1. **Is OZZ aware of any information concerning it that has not been announced to the market which, if known by some in the market, could explain the recent trading in its securities?**

No, the Company is not aware of any information concerning it that has not been announced to the market.

2. **If the answer to question 1 is "yes":**

- a) **Is OZZ relying on Listing Rule 3.1A not to announce that information under Listing Rule 3.1?**

Please note that the recent trading in OZZ's securities would suggest to ASX that such information may have ceased to be confidential and therefore OZZ may no longer be able to rely on Listing Rule 3.1A. Accordingly, if the answer to this question is "yes", you need to contact us immediately to discuss the situation.

Not applicable.

- b) **Can an announcement be made immediately?**

Not applicable.

Please note, if the answer to this question is "no", you need to contact us immediately to discuss requesting a trading halt (see below).

- c) **If an announcement cannot be made immediately, why not and when is it expected that an announcement will be made?**

Not applicable.

3. **If the answer to question 1 is "no", is there any other explanation that OZZ may have for the recent trading in its securities?**

In the Company's March 2024 Quarterly Activities Report, announced 29 April 2024, the Company noted the following as part of its current exploration program:

- Mt Davis – During the quarter a detail review of previous results was conducted as well as planning and preparation for gridding of a soil and rock chip sampling campaign to be conducted early next quarter.
- Leonora - During the quarter a detail review of previous results was conducted as well as planning and preparation for gridding of a soil and rock chip sampling campaign to be conducted early next quarter targeting remaining extensions of the Greenstones on E37/1365 and E37/1287. Pending results and exploration success could see a geophysical survey over target areas conducting an Induced Polarisation (IP) survey.
- Vickers Well - During the quarter a planning and preparation for reconnaissance of the tenure to be able to conduct soil and rock chip sampling campaign to be conducted early next quarter.

The soil and rock chip sampling campaign was completed on 23 April 2024.

In response to additional queries raised regarding the soil sampling campaign:

- a) **Please advise whether any samples of the soil and rock chip sampling campaign that the Company undertook have been sent to the laboratory? If yes, please provide the exact date on which the samples were sent to the laboratories.**

The Company undertook soil and rock chip sampling which has been completed. Samples were provided to the two separate laboratories on Monday 6 May 2024.

- b) **Please advise whether the Company is expecting any results from the laboratories in relation to its soil and rock chip sampling campaign and if yes, please advise when the results are expected to be provided to the Company. Please provide detailed information in relation to the timing of these results.**

Samples are currently with two laboratories with results are expected to be available in 2-4 weeks, being 20 May 2024 to 3 June 2024.

- c) **Please advise when the soil sampling was completed and when the soil and rock chip samples were sent to the laboratories.**

The soil and rock chip sampling campaign was completed 23 April 2024. Samples dropped to the respective laboratories following the receipt of formal quotes on 6 May 2024.

- d) **Please advise what arrangements (if any) OZZ has in place to maintain confidentiality of its assay results? Please provide detailed information.**

The Company confirms there has been not breach of confidentiality and remains confident of security of the samples by adopting the following procedure in conjunction with its contractors and laboratories (who are bound by contractual confidentiality provisions)

- All geological samples are collected by Company Representatives in the field. These samples are collected in numbered sample bags for analysis. Company Representatives have custody of the samples which are then securely transported to the various certified testing laboratories for analysis.
- The Company Representatives receive the assay results and maintain confidentiality when reviewing and interrogating the assay datasets.
- The results are then shares with the Competent Person for review and approval and to the Board for review and release.

4. **Please confirm that OZZ is in compliance with the Listing Rules and, in particular, Listing Rule 3.1.**

Yes.

5. **Please confirm that OZZ's responses to the questions above have been authorised and approved in accordance with its published continuous disclosure policy or otherwise by its board or an officer of OZZ with delegated authority from the board to respond to ASX on disclosure matters.**

I confirm that the above responses are authorized by the Board of Directors.
