About Si6

Si6 is a supply-critical metals and minerals explorer with base and precious metals project in the Limpopo Mobile Belt in Botswana, a district known for hosting major nickel and copper producing operations. The Company’s portfolio contains an advanced Ni-Cu-Co-PGE resource at Maibele North and drilled high-grade Cu-Ag discoveries at Airstrip and Dibete. The project contains nickel sulphide mineralisation related to ultramafic intrusions within mobile belt rocks and is broadly similar in style to other ultramafic intrusion-related mobile belt nickel discoveries such as IGO’s Nova Bollinger (ASX: IGO), Chalice Mining’s Julimar (ASX:CHN) and the globally significant Thompson Belt in Canada. It currently hosts a resource of 2.4Mt @ 0.72% Ni and 0.21% Cu + PGMs + Co + Au.

Si6 has a joint venture to acquire 50% of a portfolio of rare earth elements, lithium, gold, base and precious metals in Brazil including licences in the “Lithium Valley” and Poços de Caldas in the state of Minas Gerais, globally known as prolific lithium and rare earth elements districts respectively.

Si6 owns 100% of the Monument Au-Ni project located near Laverton in Western Australia. This project currently has a JORC compliant (2012) Inferred resource of 3.257 Mt @ 1.4 g/t for 154,000 ounces Au. (inferred resources calculated by CSA Global in 2021 to JORC 2012 compliance using a 0.5 g/t cut-off grade; see 2 August 2021 ASX announcement “Mineral Resources Estimate declared for Monument Gold Project “for further information).
