Forward-Looking Statements

Certain statements in the presentation are or may be "forward-looking statements" and represent the Company's intentions, projections, expectations or beliefs concerning, among other things, future operating and exploration results or the Company's future performance. These forward-looking statements speak, and the presentation generally speaks, only at the date hereof. The projections, estimates and beliefs contained in such forward-looking statements necessarily involve known and unknown risks and uncertainties, and are necessarily based on assumptions, which may cause the Company's actual performance and results in future periods to differ materially from any express or implied estimates or projections.

General Disclaimer

The information in this presentation remains subject to change without notice. This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Not an Offer

This presentation is for information purposes only. The presentation does not comprise a prospectus, product disclosure statement or other offering document under Australian law. The presentation does not constitute or form part of any invitation, offer for sale or subscription or any solicitation for any offer to buy or subscribe for any shares in Boab Metals Limited.

No Liability

Boab Metals Limited has prepared this document based on information available at the time of preparation. No representation or warranty, express or implied is made as to the fairness, accuracy or completeness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, Boab Metals Limited, its related bodies corporate and the officers, directors, employees, advisers and agents of those entities do not accept any responsibility or liability for any loss arising from the use of the presentation or its contents or otherwise arising in connection with it.

Compliance Statement

The Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the 'JORC Code') sets out minimum standards, recommendations and guidelines for Public Reporting in Australasia of Exploration Results, Mineral Resources and Ore Reserves.

Information included in this presentation relating to Exploration Results has been extracted from the ASX Announcements titled "Metallurgical Testwork improves Metal Recovery and Concentrate Grades at the Norton Deposit" dated 22 May 2024", "Amended Drilling Announcement" dated 4 September 2023", "Assays Confirm Further Positive Outcome for Sorby" dated 23 January 2023, "High-Grade Lead-Silver Confirmed at Beta Deposit" dated 1 February 2022, and "Sorby Hills DFS Metallurgical Testwork Results" dated 19 November 2021 available to view at www.boabmetals.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in these announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the form in which they were first presented.

Information included in this presentation relating to Mineral Resources has been extracted from the Mineral Resource Estimate dated 17 December 2021, available to view at www.boabmetals.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Mineral Resource Estimate and that all material assumptions and technical parameters underpinning the estimates, continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the Mineral Resource Estimate.

Information included in this presentation relating to Ore Reserves, Production Targets and Financial Forecasts has been extracted from the Sorby Hills Definitive Feasibility Study and dated 19 January 2023, available to view at www.boabmetals.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Ore Reserve Statement and that all material assumptions and technical parameters underpinning the estimates, production targets and financial forecasts continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the Ore Reserves Statement.

Share Price History

- **ASX-listed base and precious metals** developer and explorer.
- **Advancing toward Final Investment Decision** on Sorby Hills.
- Board & Management team with a **proven track record in development**.
- **Top 20 shareholders hold 37% of issued capital.**

Sorby Hills JV Project

(75% owned by Boab Metals)
A near term producer of Lead and Silver

- Located 50km **northeast of Kununurra** in the East Kimberley Region of Western Australia (Tier 1 Jurisdiction)
- **High quality 47.3Mt Mineral Resource**
  - **1.5Mt contained Lead at 3.1%**
  - 0.2Mt contained Zinc at 0.4%
  - **53Moz contained Silver at 35 g/t**
- **Significant** near mine and greenfields **exploration upside**
- 150km by existing **sealed roads** to the **Wyndham Port**
- **Definitive Feasibility Study complete**
- **Conventional** **open pit** mining and **flotation** process plant producing a **high-grade Lead-Silver concentrate**
- Initial **production target** underpinned by **83% Reserves**
- **Heads of Agreement** to secure **clean energy** from the **Ord River Hydroelectric Plant**
- **Process Plant Front End Engineering & Design** **complete**
- **Offtake** negotiations **nearing completion** and **Engagement with Financiers** ongoing
- Project advancing toward a Final Investment Decision

Sorby Hills JV Partnership

Boab Metals Ltd (75% interest)

Henan Yuguang Gold and Lead Co., Ltd

(25% contributing interest)

- **Yuguang Gold and Lead Co., Ltd** ("**Yuguang**") is **Asia's largest electrolytic lead producer** and China's largest Silver producer.[1]
- **Initially invested in Sorby Hills Joint Venture in 2010**.
- **Listed on the Shanghai Stock Exchange** (600531).
- **Market Capitalisation over A$1.5 billion.[2]**
- 3,600 Employees.[1]
- **Yuguang Lead and Silver products are London Metal Exchange** ("**LME"**) and the London Bullion Market Association ("**LBMA**") registered.
- Committed to environmental protection and development through improvement and innovation.

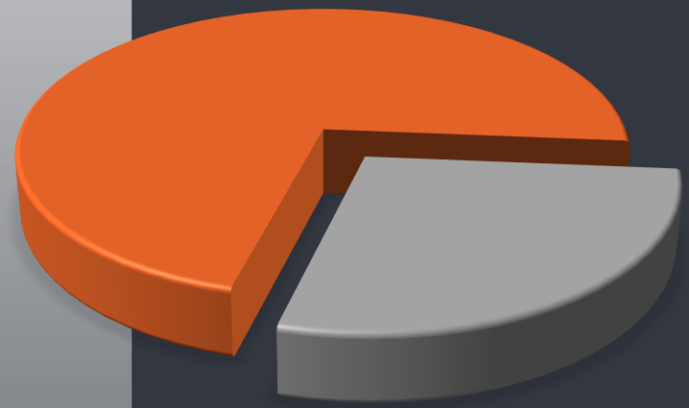
Lead
543 thousand payable tonnes
A$1,790 Million Revenue

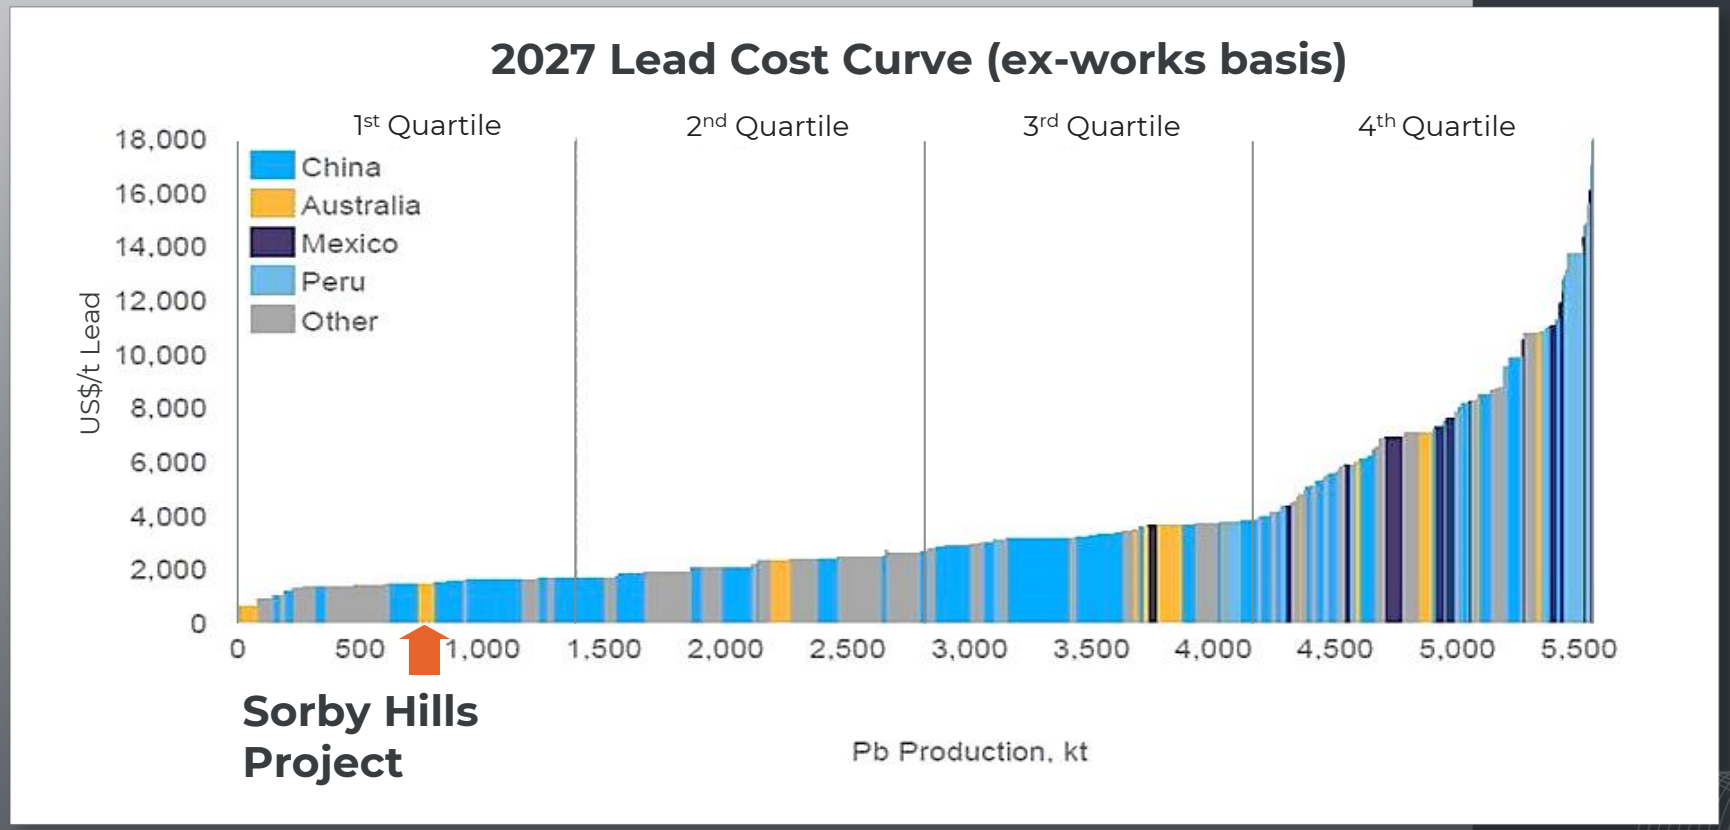


Silver
17.2 million payable ounces
A$692 Million Revenue

Sorby Hills Project

Confirmed Low-Cost producer

Independently confirmed as a 1st Quartile Project on the Global Lead cost curve



- Forecast Project ex works Operating Costs covered by a historically non-volatile Lead Price.
- **The Sorby Hills Project Operating margin is therefore highly leveraged to Silver price.**

CRU, Independent Market Consultant Report for Boab Metals' Sorby Hills Pb-Ag Project (Sept 2023).

Silver

The most conductive metal on earth

Strong demand for use in solar cells and the electronic components of electric vehicles

- Silver's traditional role as a **storer of wealth** is complemented by its **increasing industrial demand.**
- The use of **Silver in solar cells has increased nearly 150%** (8.3% CAGR) to 127Moz over the past 10 years[1].
- Sorby Hills and Boab Metals offers **rare ASX exposure to Silver metal demand.**

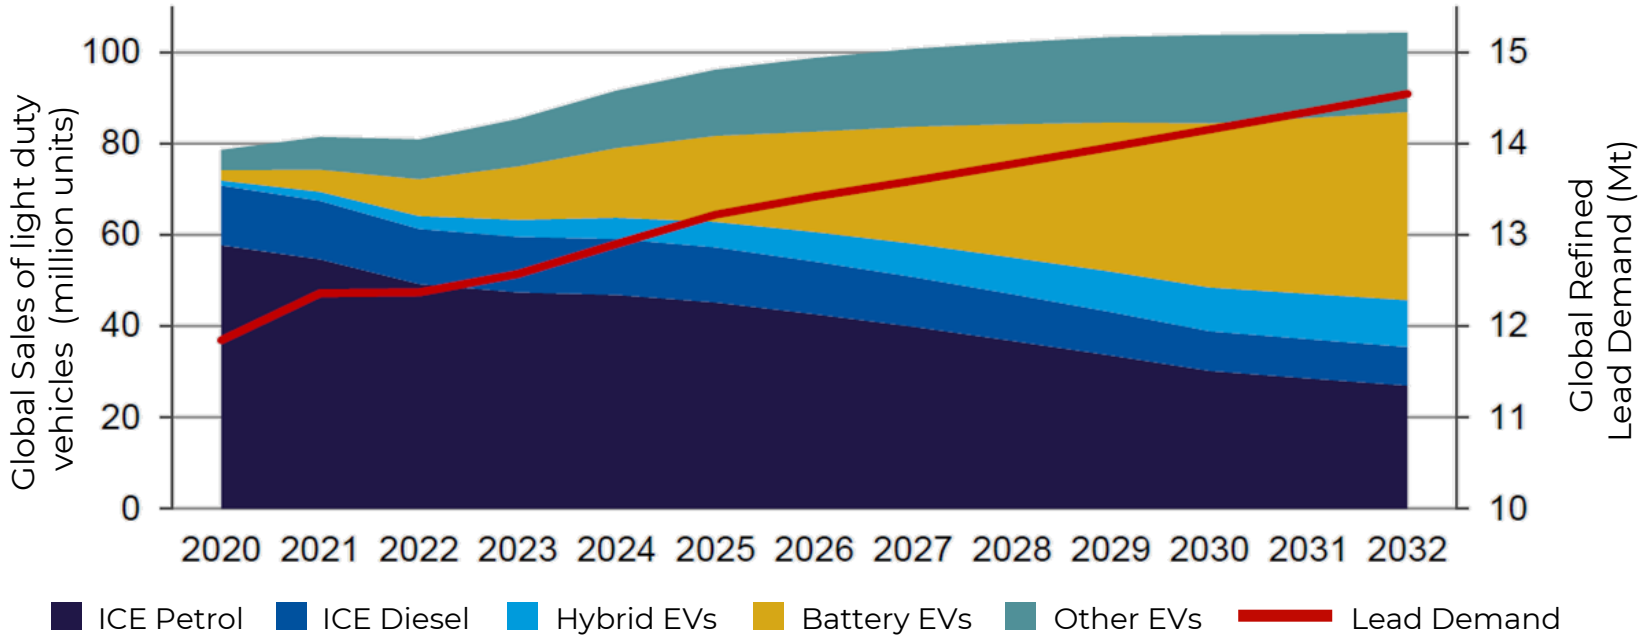
1. www.silverinstitute.org/silver-supply-demand/

Sorby Hills Project

Supplying the proven Battery Metal

Lead demand growth underpinned by mature and emerging vehicle technologies

Forecast Light Vehicles Sales versus Lead Demand[1]



"…. low voltage 12V lead-based batteries will continue to be used for starter and auxiliary functions in most internal combustion engine vehicles (ICE) and new electric vehicles[1] ….."

Sorby Hills Project
Project Optimisation Workstreams

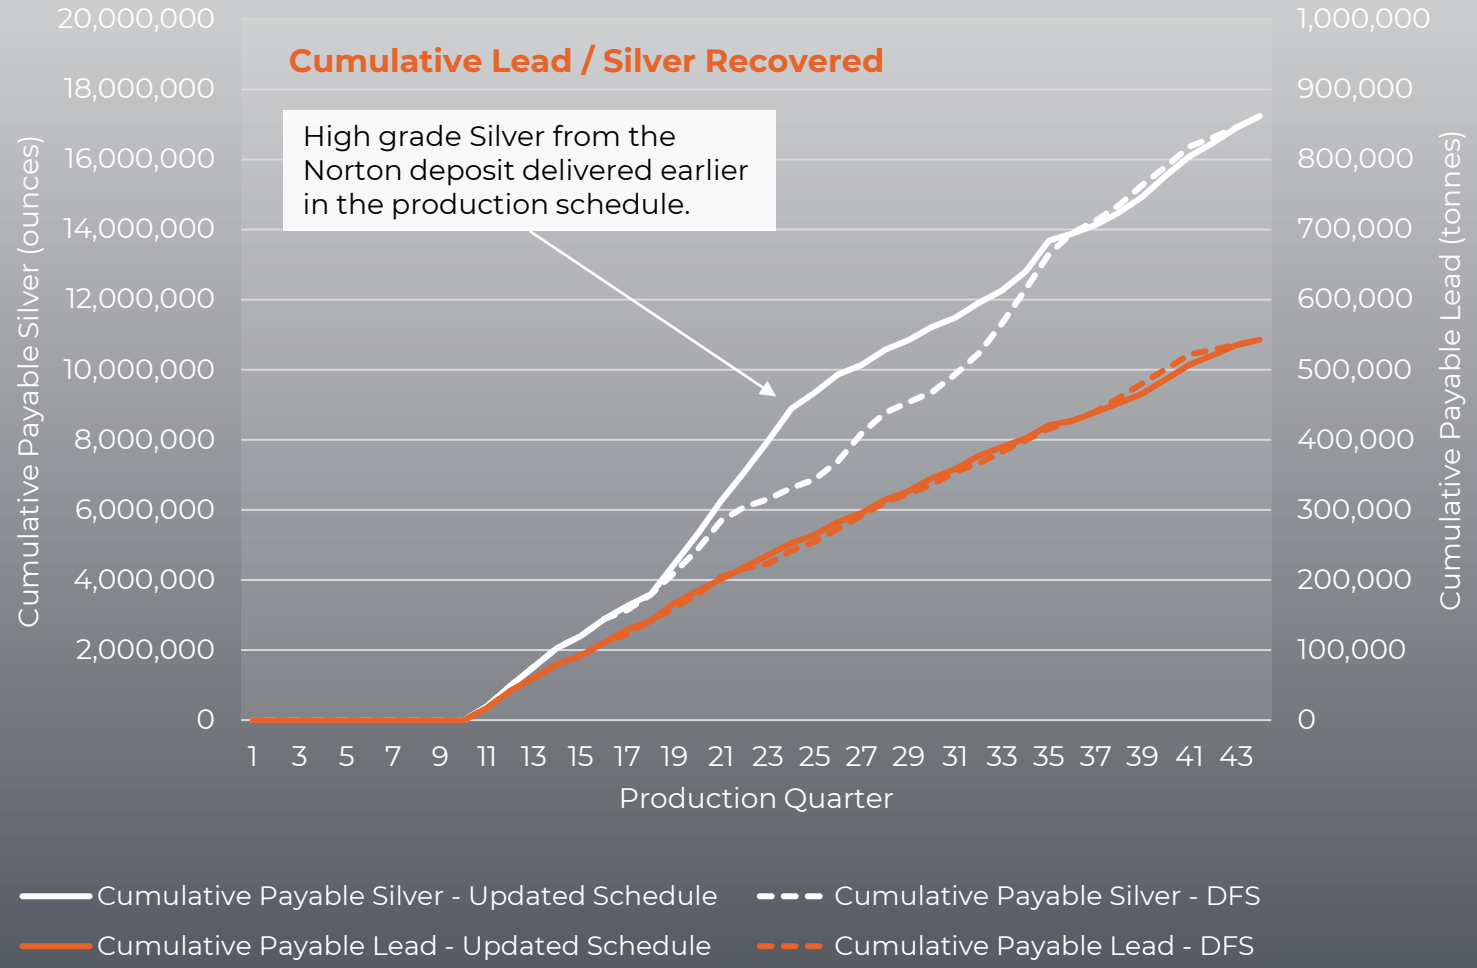
Boab is undertaking a series of **Project Optimisation Workstreams** in conjunction with Front-End Engineering and Design ("**FEED**") to explore opportunities further improve Project economics ahead of a Final Investment Decision.

- ✓ **Revenue Brought Forward**: an updated mine plan and tailings strategy has been adopted allowing the higher-grade Norton deposit to be mined earlier and further derisking project execution;
- ✓ **Process Plant FEED completed, Capex Unchanged**: updated tendered pricing for the process plant from GR Engineering Services ("GRES") based on the FEED outcomes and current raw material and labour costs;
- ✓ **Enhanced Metal Recoveries at Norton**: interim metallurgical test work has delivered a 5% increase in lead recovery at the Norton Deposit and increase concentrate grades at that deposit from 56.9% to 59.5%;
- ✓ **Improved Earthworks and Mining Pricing** The mining and bulk earthworks contracts were tendered for the DFS at the height of post COVID inflation. The Company has received tenders from three groups, two of which represent an improvement on the pricing adopted for the DFS.

The results of the **Project Optimisation Workstreams will be incorporated into a FEED Study expected to be completed and released to the market in Q2 2024.**

Sorby Hills Project

Updated Mine Plan and Tailings Strategy to enhance Metal Production



The DFS tailings strategy incorporated both above-ground tailings storage within an integrated waste landform ("**IWL**") and in-pit tailings deposition.

Boab has determined that the initial footprint of the IWL is sufficient to support additional raises that will provide capacity for approximately 6 years of above-ground tailings storage.

The **updated strategy** allows for **higher grades from the Omega and Norton pits** to replace the lower grade ore from the Omega South Pit - which was to be used for tailings deposition from Year 5 - in the production schedule.

Sorby Hills Project

Metallurgical Testwork to enhance metal recoveries

- Incorporating the interim results of flotation variability tests from additional post DFS drill core samples delivers:
  - **5% increase in Norton Deposit lead recovery**
  - Confirms Norton silver recovery at 78%
  - **Improves Norton fresh ore concentrate grade from 56.9% Pb to 59.5% Pb**
- Improved metallurgy **supports a future re-optimisation of the Norton pit shell to extend mine life.**

Summary of DFS vs Updated Metal Recoveries		
Ore Type	**Avg. Pb Recovery**	**Avg. Ag Recovery**
Norton Deposit - DFS	78%	78%
Other Deposits - DFS	93%	83%
Overall Average – DFS	91%	82%
Norton Deposit – Updated	**83%**	**78%**
Overall Average - Updated	**92%**	**82%**

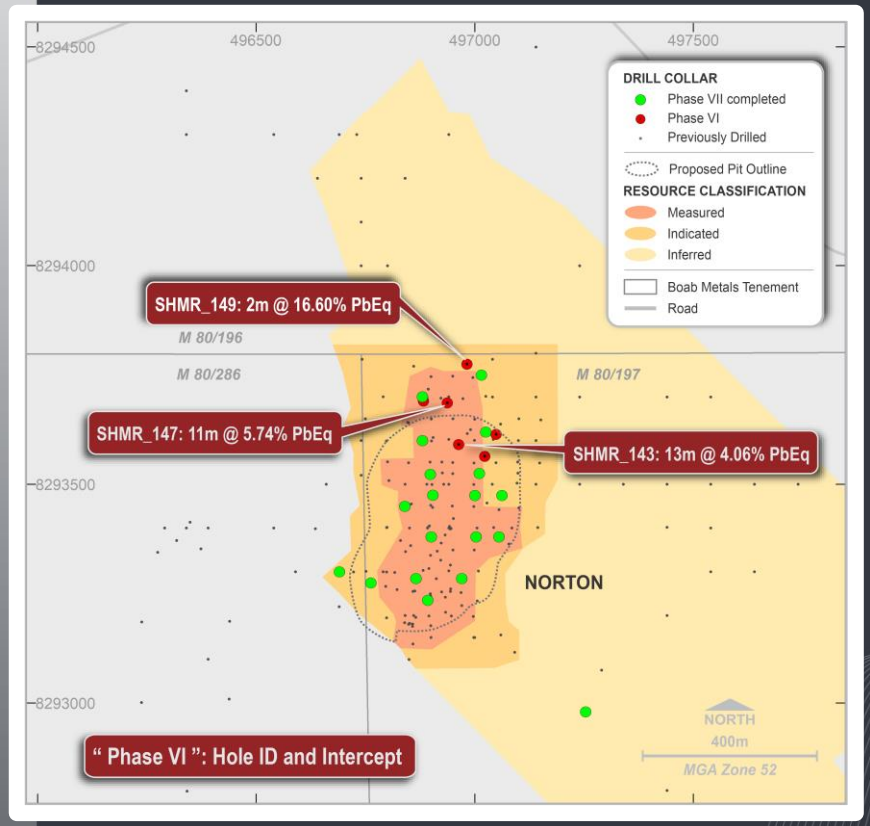


Figure: Location of previous drilling and Phase VII drilling relative to an outline of the currently proposed Norton Deposit open pit design.

Sorby Hills Project
Development Ready

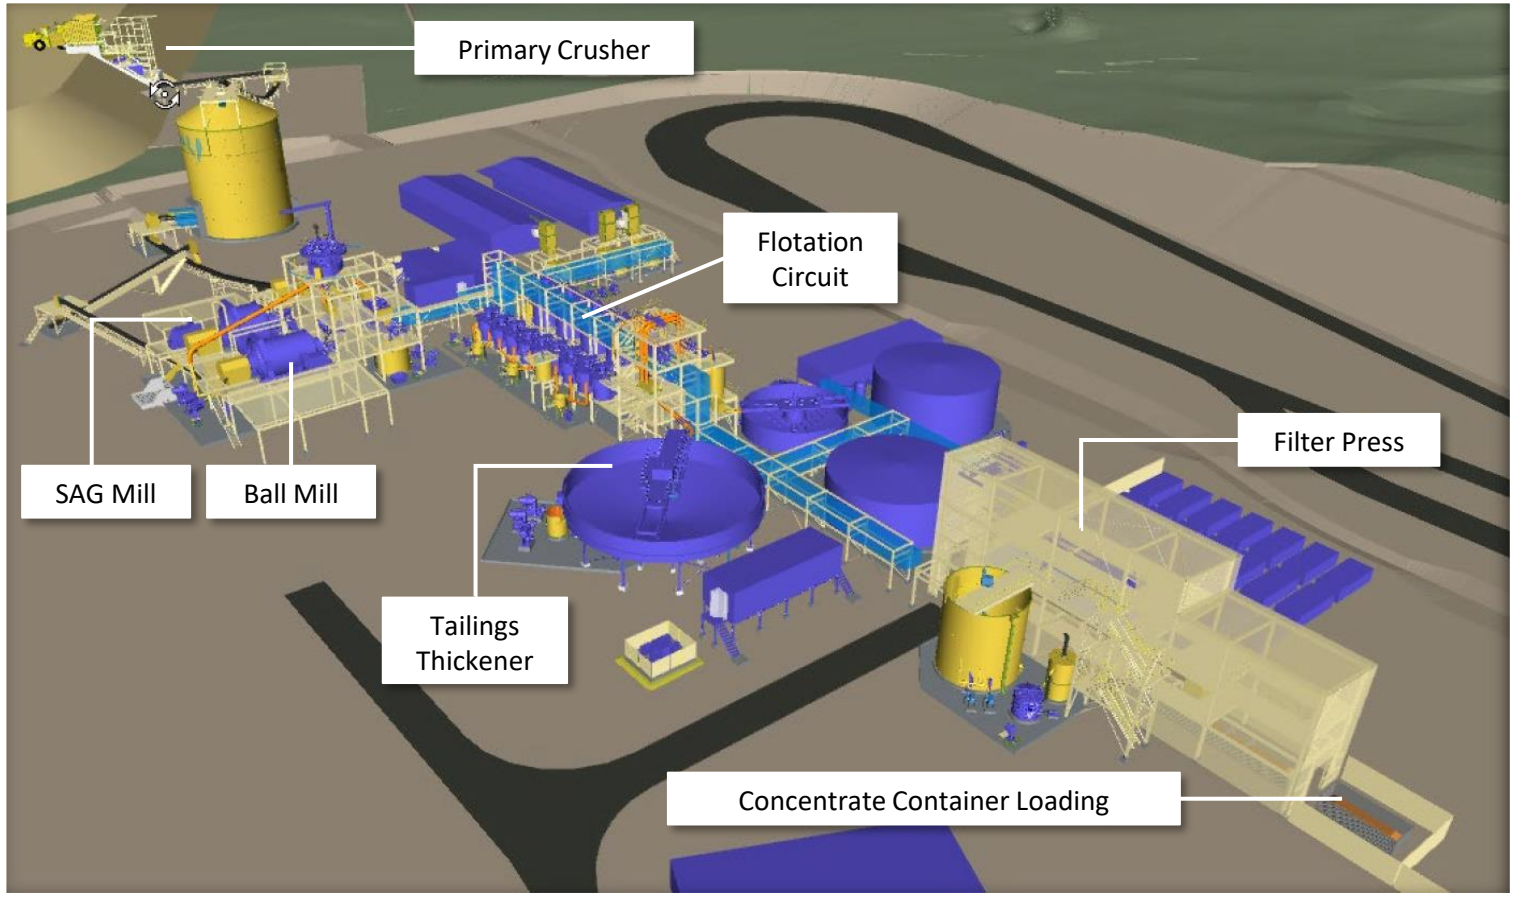

Figure: 3D Model of the Sorby Hills Process Plant produce by GRES during FEED.

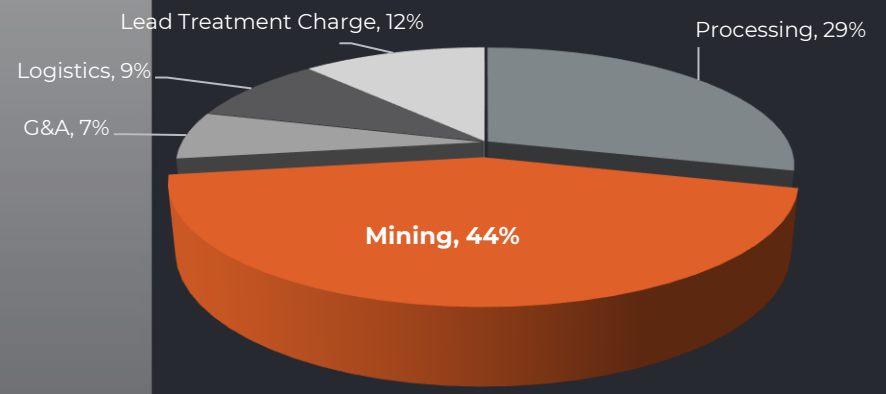
- GRES has recently completed **FEED Workstreams.**
- FEED output has resulted in:
  - **detailed plant design and; optimised site layout;**
  - the issue of tender packages for **long-lead items; and**
  - **updated EPC pricing consistent with EPC pricing adopted in the DFS.**
- Options to reduce costs have been identified by GRES.
- EPC Contract Award upon FID.
- In parallel, opportunities to further de-risk project execution and development timelines are being investigated by Boab.

Sorby Hills Project

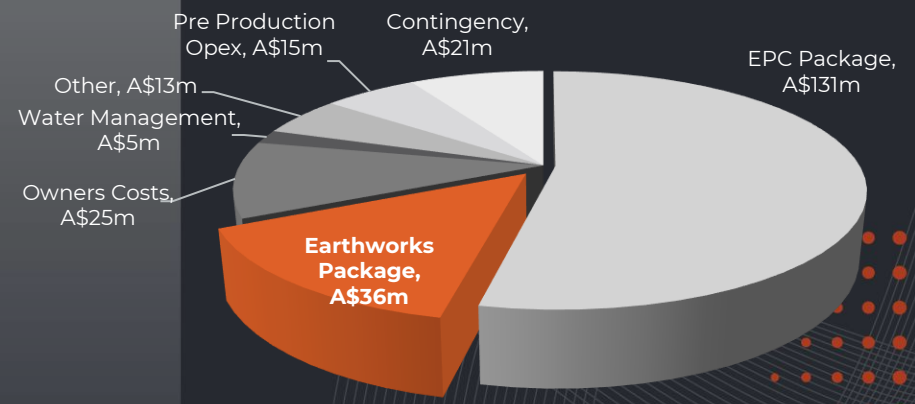
Refreshed tenders to reprice bundled mining and earthworks contract packages

- Mining comprised 44% of the DFS Operating Costs.
- Earthworks Packages comprised nearly 15% of the DFS Pre-Production Capex.
- DFS Tenders were received in 2022 during the height of post-COVID inflation.
- Retendering for the Earthworks Package based on an optimised site layout and bundling with the Mining Package has been completed.
- Tenders received from 3 groups with 2 out of the 3 being equal to or lower cost than the tenders received for the DFS.

DFS C1 Operating Costs (%)



DFS Pre-production Capital Costs (A$m)



Sorby Hills Project

Significant Intercepts post Mineral Resource Estimate 2021

Phase V – 15 holes not yet included in Mineral Resource Estimate

- **SHRC_123** (Beta): **27m @ 3.47% Pb & 37g/t Ag from 34m:**
  - Incl. 3m @ 7.04% Pb & 95g/t Ag from 35m; 5m @ 5.60% Pb & 44g/t Ag from 45m; and 6m @ 4.50% Pb & 49g/t Ag from 55m.
- **SHRC_124** (Beta)**:** 17m @ 3.51% Pb & 46g/t Ag from 49m:
  - Incl. 8m @ 6.93% Pb & 90g/t Ag from 57m.
- **SHRC_129** (Wildcat): 6m @ 5.37% Pb & 21g/t Ag from 12m down hole.

Phase VI – 28 holes not yet included in mineral Resource Estimate

- **SHRC_157** (Beta): **7m @ 19.17% PbEq, (16.23% Pb & 82g/t Ag)** from 72m
  - Incl. 3m @ 41.38% PbEq, (35.26% Pb & 174g/t Ag) from 72m.
- **SHRC_136** (Beta): **20m @ 7.39% PbEq, (5.58% Pb & 52g/t Ag)** from 65m
  - Incl. 8m @ 13.86% PbEq, (10.49% Pb & 96g/t Ag) from 77m.
- **SHRC_151** (Beta): 5m @ 5.13% PbEq, (3.70% Pb & 41g/t Ag) from 45m.
- **SHRC_149** (Norton): **2m @ 16.64% PbEq, (10.92% Pb & 163g/t Ag)** from 103m
- **SHRC_147** (Norton): 11m @ 5.74% PbEq, (3.84% Pb & 54g/t Ag) from 86m.
- **SHRC_143** (Norton): 13m @ 4.06% PbEq, (2.82% Pb & 35g/t Ag) from 95m.

Phase VII – 21 holes not yet included in Mineral Resource Estimate

- **SHSD_171** (Norton): **11m @ 17.63% PbEq (10.98% Pb & 189 g/t Ag)** from 82m
- **SHSD_174** (Norton): **11.6m @ 20.23% PbEq (8.78%Pb & 325 g/t Ag)** from 74m
- **SHSD_164** (Norton)**: 6m @ 9.92% PbEq (3.92% Pb & 170g/t Ag)** from 101m

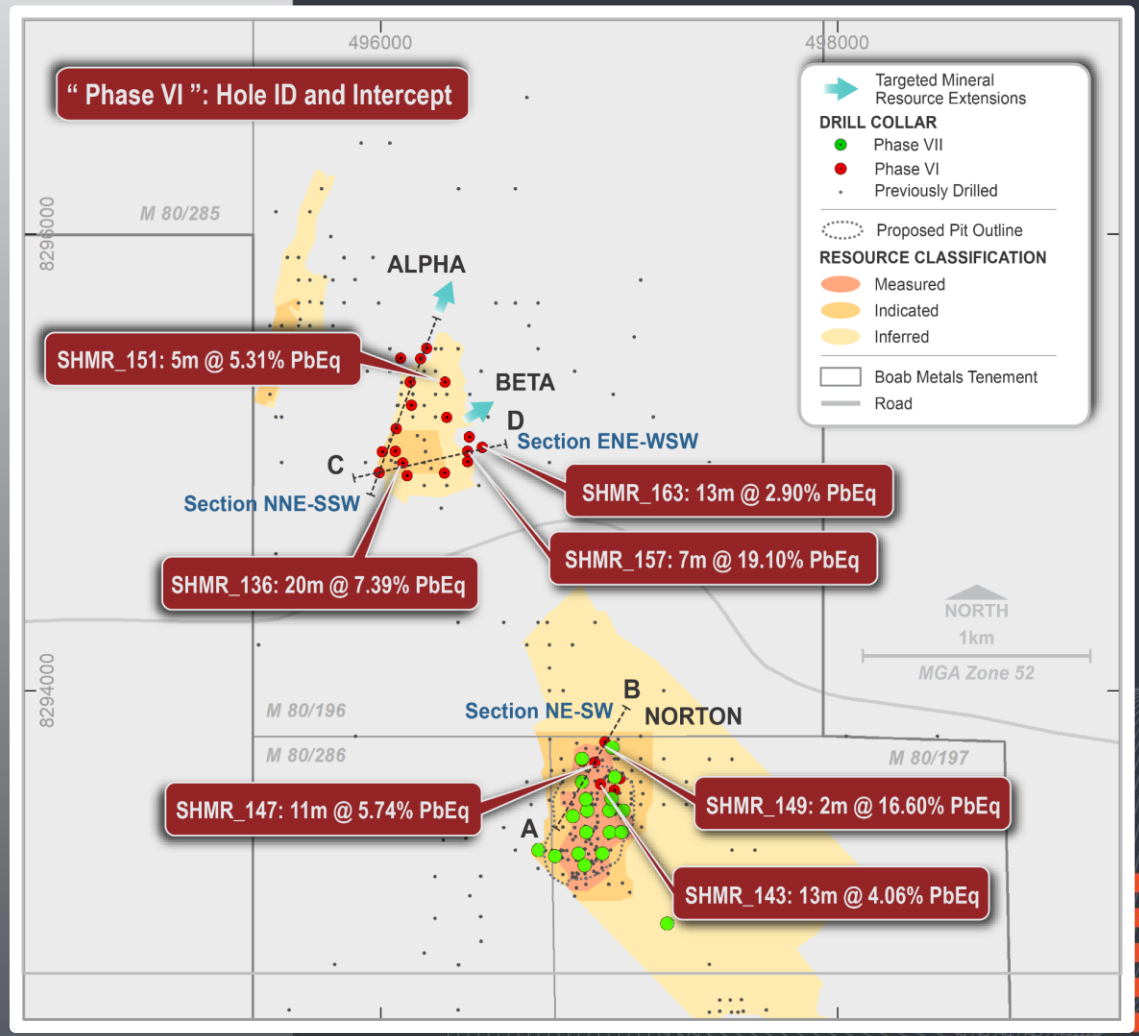


Figure: Location of drill holes not yet included in the Sorby Hills Mineral Resource

Sorby Hills Project
Keep Seismic Target

Potential Discovery located 2km from the existing Sorby Hills Deposits

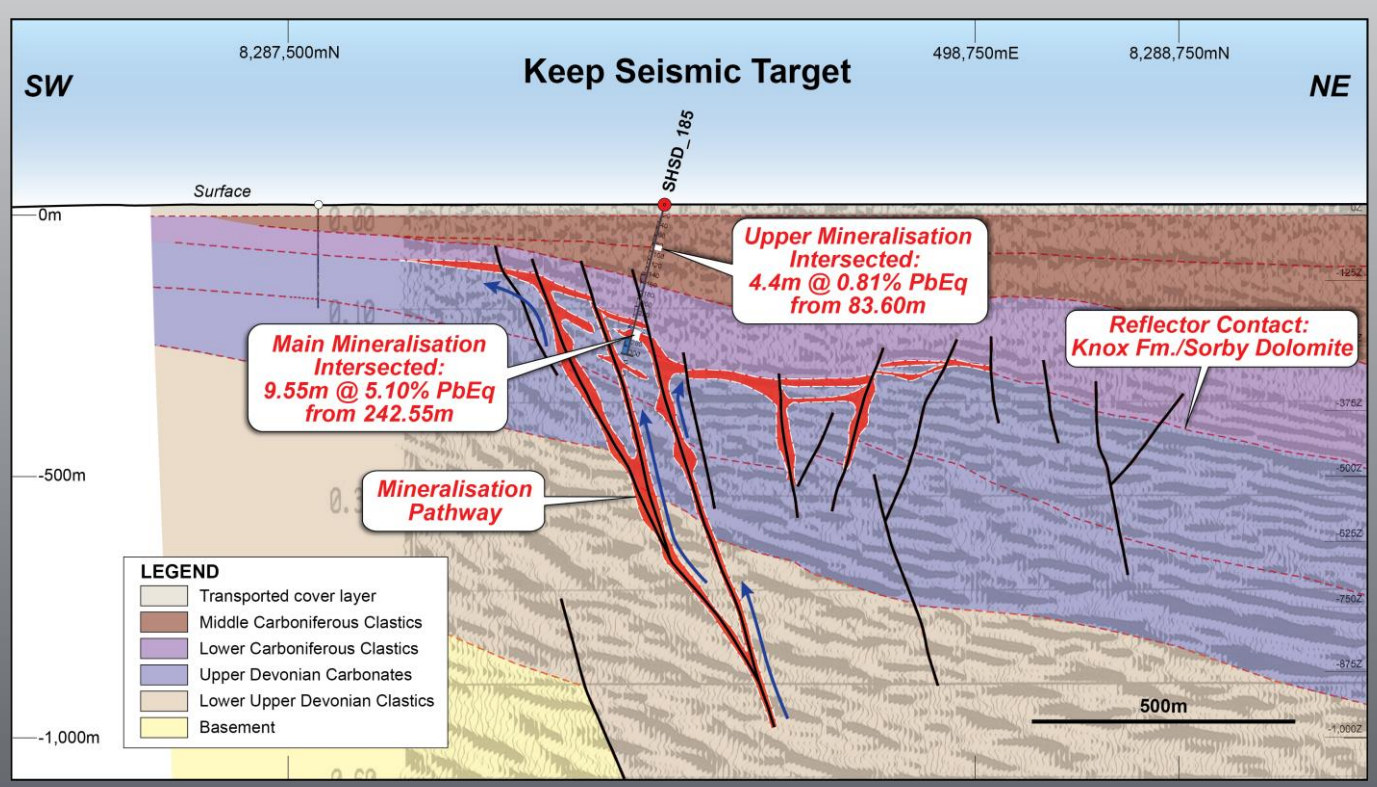

*Figure: Section of the **Keep Seismic Target** showing the interpreted structural and stratigraphic setting for the original drill hole.*

Keep Seismic Target

- 1st drill hole indicates potential for a new discovery (**2 km south of existing Sorby Hills Reserves**).
- ***New Zone*** *located within favourable structural and stratigraphic setting with potential* for extensive development of mineralisation.
- "more life" in a proven district.

Intersected

- **Lower (Main) Mineralised Zone:** replacement-type, stratiform MVT zinc & lead sulphide layers and disseminated mineralisation.
  - **9.55m @ 5.1% PbEq from 243m**

Upcoming Field Season

- Step-out drill program to test the potential for an economic mineral deposit.

Sorby Hills Project
Strategic Growth Opportunities

Vision to establish a long-life presence in the east Kimberley Region

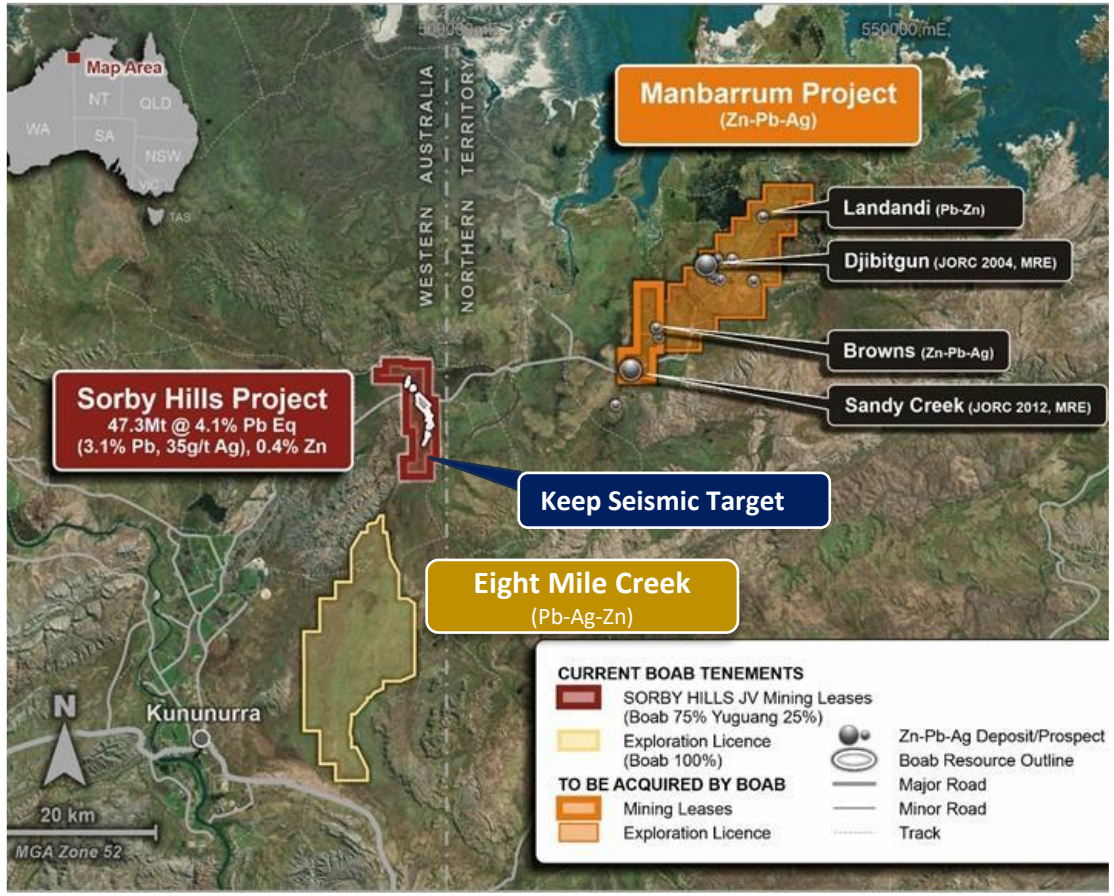

Figure: Location of the Manbarrum and Eight Mile Creek Project relative to Sorby Hills.

Manbarrum Zn-Pb-Ag Project

- **located 25km east of the Sorby Hills Project.**
- **Mineral Resources declared at two prospects which are zinc and silver dominated.**
- 175km^2 of prospective tenements (including two granted mining leases) covering **geology related to that found at Sorby Hills.**
- Extensive but only shallow-depth exploration in the past; need for new targeting approach and deeper exploration (100 to 200m below surface).
- **Two targets priority** delineated in favourable structural and stratigraphic positions.
- **Conceptual open pit mining studies completed by** CSA Global in 2018.

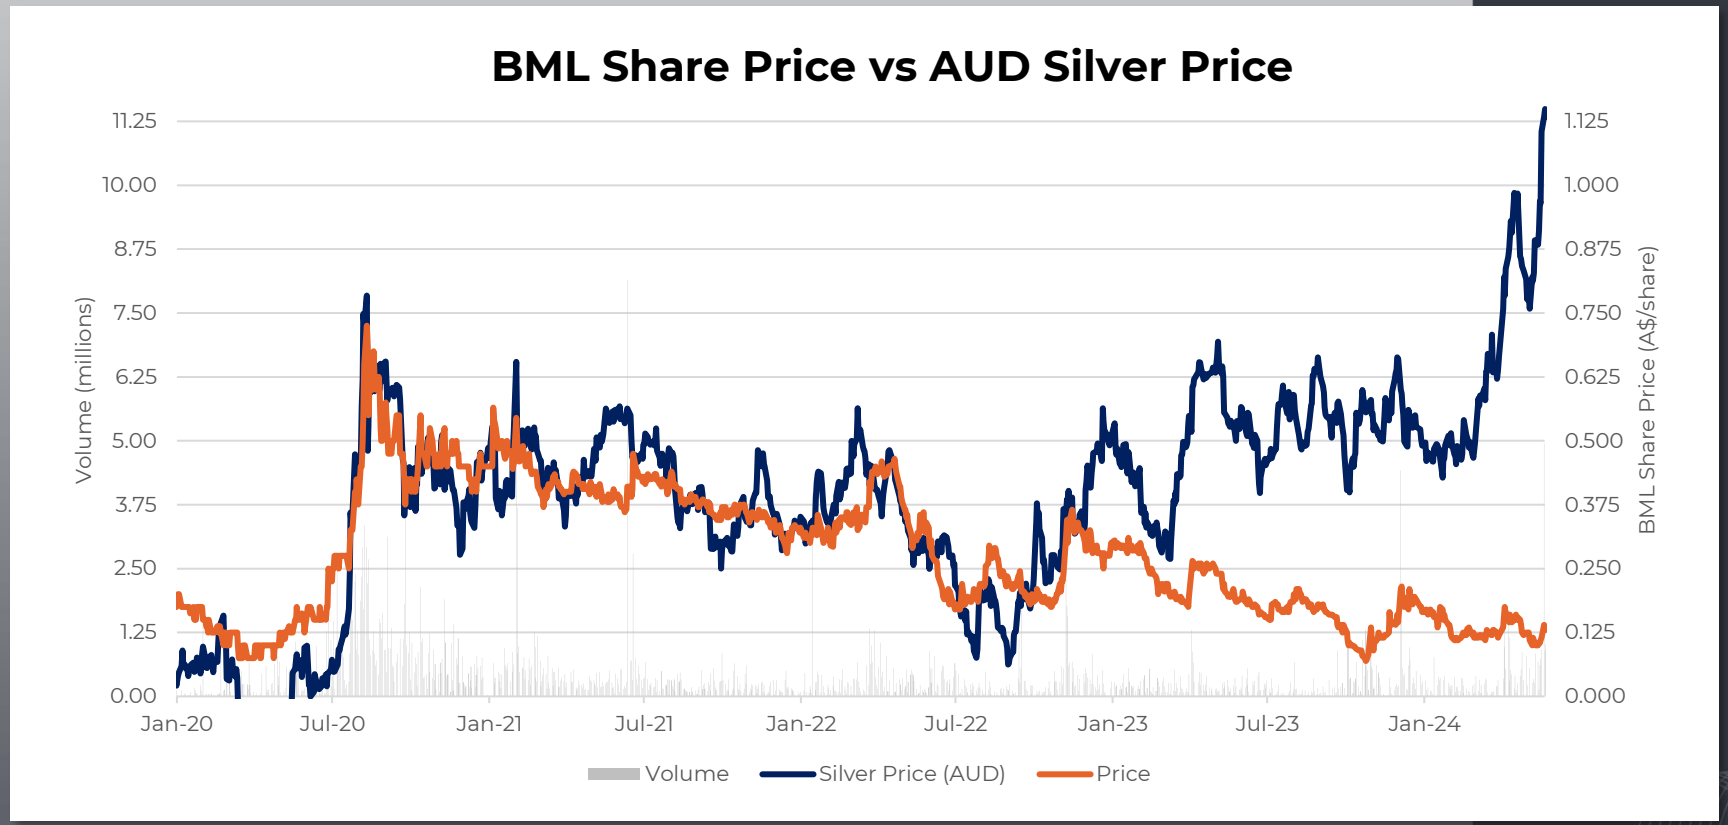
Eight Mile Creek Project

- 30km of along-strike geology, **highly prospective for deposits similar to Sorby Hills.**
- **Scout drilling has confirmed favourable stratigraphic setting and fluid traps.**
- The **success at the Keep Seismic Target has** opened the door for more bold exploration.

Sorby Hills Project

Delivering Silver Exposure to Investors

The Sorby Hills Project and Boab Metals offer rare ASX exposure to Silver Price movements



- Boab's share price has historically demonstrated a strong correlation with the A$ price of Silver.
- Since the beginning of 2023, there has been a divergence in this historic correlation.
- **Given the Sorby Hills' leverage to the Silver price, a trend reversion is anticipated as the Project progresses to FID and first production.**

Source: Bloomberg 10 April 2024

Boab Metals
Investment Opportunity

- **22% - DFS vs PFS NPV**
- **35% - Boab Share Price[1]**
- **29% - Median ASX Materials[2]**
- **12% - Lead Price[1]**
- **36% - Silver Price[1]**

2. www.marketindex.com.au 22 May 2024

Near Term News Flow and Ongoing Activities

- Incorporate the results of Optimisation Workstreams into a **FEED Study – target for release Q2 2024**.
- Execute **Offtake Agreement(s)**.
- **Assess opportunities to further de-risk project execution and development timelines.**
- **Aggressive drill program** to test potential for an economic deposit at the Keep Seismic Target.
- **Progress approvals** EPA 45c amendment, Works Approvals. EPBC (controlled action) assessment on preliminary documentation only.
- **Continue engagement with potential financers**.
- **Secure credit approved offer(s)** from financiers.
- **Reach a Final Investment Decision**.

Thank You

Board and Technical Team

Board and Management with a **proven track record** in exploration and development

Gary Comb
Chairman

Engineer with over 30 years' experience in the Australian mining industry, with a strong track record in successfully commissioning and operating base metal mines.

Simon Noon
Managing Director and CEO

Experienced mining executive with a strong background in management, capital raising and operating JV's with mid to top tier miners in a variety of commodities.

Richard Monti
Non-Exec. Director

Geologist with over 30 years' experience in technical, commercial, marketing and finance within the exploration and mining industry.

Andrew Parker
Non-Exec. Director

Lawyer with significant experience in the exploration and mining industry. Wealth of expertise in corporate advisory, strategic consultancy and raising capital.

Technical Team

Richard Flanagan – Principal Project Engineer

Mining engineer with extensive experience across a wide range of commodities, including several world class Silver-Lead-Zinc deposits and covers management roles across feasibility studies, development, commissioning and operations.

Simon Dorling - Exploration Manager

Geologist with more than 26 years' experience in exploration, development and the mining of base metals, precious metals, energy minerals and industrial minerals.

Sorby Hills Definitive Feasibility Study
Capital Cost Breakdown

Tendered Pricing for 75% of Capital Costs to reduce the risk of pre-FID cost escalation.

Process Plant EPC comprises:
- $82.9M - Supply Cost
- $41.6M - Installation Cost
- $5.8M - Freight Cost

A$20M Contingency.

A$21M Owner Costs including operational readiness items such as critical spares and build-up of owner's team.

Competitive **C1 cash cost of US$0.39/lb payable Pb** (including Silver Credits).

~80% of Mining Costs underpinned by tendered pricing with opportunities for further schedule and cost optimisation through the contracting process.

Opportunity to reduce Process costs through the optimisation of back-up power requirements.

Opportunity to reduce Logistics costs via application of concessional loading for road haulage.

Item	Total (A$M)	Unit Costs	
		A$/t ore	US$/lb payable Pb
Mining	591	32.4	0.34
Processing	391	21.4	0.22
G&A	88	4.8	0.05
Logistics	121	6.6	0.07
Lead Treatment	159	8.7	0.09
C1 Costs (ex Credits)	**1,351**	**73.9**	**0.77**
Net Silver Credits	(660)	(36.1)	(0.38)
C1 Costs	**690**	**37.8**	**0.39**
Royalties	94	5.2	0.05
Sustaining Capital	55	3.0	0.03
AISC	**840**	**46.0**	**0.48**

Unit Operating Costs based on 18.3Mt of Ore, 543kt of Payable Lead, average exchange rate of AUD:USD 0.68 and average Silver price of US$27.4/oz.

Boab Metals

Establishing Deep Roots within the Local Community

Boab is extremely proud to be the Naming Rights Sponsor of the Ord Valley Muster for 2023 and beyond.

- Sense of community plays a key role in economic and social well-being of stakeholders across the east Kimberley Region.
- The Ord Valley Muster has been a highlight of the Kimberley community calendar for 20 years.

Boab is an enthusiastic supporter and active contributor to the Teach Learn Grow program.

- Boab Metals has been partnering with Teach Learn Grow (TLG) since 2021 in the delivery of their Rural Program which supports one-on-one tutoring and mentorship to students in East Kimberley schools.

Metal Equivalent Calculations

The contained metal equivalence formula is based on the Sorby Hills DFS including:

- Lead Price US$2,253/t; and
- Silver Price US$27.4/oz.

Pb Lead Equivalent Calculations

- Silver recovery of 82% (weighted average of oxide and fresh Ag recoveries); and
- Silver Payability rate of 95%.

Ag Silver Equivalent Calculations

- Lead recovery of 91% (weighted average of oxide and fresh Pb recoveries); and
- Lead Payability rate of 95%.

It is Boab's opinion that all elements included in the metal equivalent calculation have a reasonable potential to be recovered and sold. The formula used to calculate lead equivalent grade is:

$$\textit{Metal Eq (percent)} = G_{pri} + (G_{pri} \times [\sum_i R_i S_i V_i G_i]/(R_{pri} S_{pri} V_{pri} G_{pri}))$$

*where **R** is the respective metallurgical metal recovery rate, **S** is the respective smelter return rate, **V** is metal price/tonne or ounce, and **G** is the metal commodity grade for the suite of potentially recoverable commodities (**i**) relative to the primary metal (**pri**).*

Metal equivalents are highly dependent on the metal prices used to derive the formula. Boab notes that the metal equivalence method used above is a simplified approach. The metal prices are based on the DFS values adopted and do not reflect the metal prices that a smelter would pay for concentrate nor are any smelter penalties or charges included in the calculation.

Owing to limited metallurgical data, zinc grades are not included at this stage in the lead equivalent grade calculation.

DFS Macroeconomic Assumptions

Assumption	Unit	FY2023	FY2024	FY2025	FY2026	FY2027+
Lead Price	US$/t	2,259	2,268	2,269	2,254	2,251
Silver Price	US$/oz	24.8	25.8	26.4	27.3	27.5
Exchange Rate	A$:US$	0.70	0.70	0.70	0.69	0.68
