27 May 2024

# Paulsens Progress Update - May 2024

Black Cat Syndicate Limited ("Black Cat" or "the Company") is pleased to provide a further update on recent activities at the 100% owned Paulsens Gold Operation ("Paulsens").

#### REFURBISHMENT

Recent processing facility refurbishment activities include ongoing repairs of readily fixable items and preparation for full mobilisation of MACA Interguip. Other activities include:

- Placement of long lead time orders including a new power station switchboard.
- Preparation for arrival of new mill liners in June 2024.
- Upgrades and repairs to high voltage (11kV) cables in readiness for connection to new generators.
- Completion of cataloguing existing stores and consolidation of stock items into the main warehouse.
- Removal of the mill motor and power station transformers for off-site inspection and testing.

An engineering video of the planned works can be found <a href="https://example.com/here">here</a> (or scan the QR code)

#### SITE ESTABLISHMENT

Recent site establishment and operational readiness activities at Paulsens include:

- Review and preparation for mobilisation of workforce levels required for the processing facility refurbishment and selective mining activities.
- Commencement of camp upgrades with significant improvements to the IT/communications systems, camp rooms and laundry facilities.
- Upgrade of the village fire suppression system and the sourcing of critical spares for the waste-water treatment system.
- Upgrades to the potable water plant including replacement pumps, new membranes, housings and fittings.
- Reinstallation of refurbished Roma valves into the underground main water pipelines.
- Management of occupancy by multiple third parties at the village which continues to provide a stream of rental income.

#### **SECURED DEBT UPDATE**

As previously announced, the Company has appointed Leeuwin Capital Partners ("Leeuwin") as debt advisor in order obtain debt as part of the plan to accelerate the restart of Paulsens. The process is proceeding as planned with the following key milestones being targeted:

- End of June 2024 credit approved terms received; and
- End of July 2024 funding received.

Black Cat's Managing Director, Gareth Solly, said: "We continue to make good progress on refurbishment work with significant upside evident in the condition of the processing facility. Ordering the new power station switchboard completes long lead time orders for the processing facility.

Upgrades to the camp are underway to support the high demand for third-party occupancy and in advance of production restarting. The secured debt process is proceeding as planned and we are confident key milestones will be met.

Work has also commenced on upgrades to underground mine services and ongoing progress with the high-grade stockpile strategy will be reported in more detail separately."

### SNAPSHOT – PAULSENS GOLD OPERATION

>1,900km<sup>2</sup> of Highly Prospective Ground, 100% Owned by Black Cat

#### High-Grade 1,000oz per Vertical Metre Producer

- Paulsens underground is comprised of >2.7km of known mineralisation: including the historically mined Main Zone; the under drilled
  Eastern Zone; an unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target. Paulsens has produced ~1Moz (at 1,000oz
  per vertical metre) principally from the Main Zone. The recently discovered 175m plunge/120m vertical extension to the Main Zone
  has the potential to extend mine life and has been justified for development in the May 2024 Restart Study.
- Paulsens underground is one of Australia's highest-grade gold deposits with a current Resource of 406koz @ 9.5g/t Au (76% Measured & Indicated).
- The May 2024 Restart Study¹ includes planned production of 177koz Au over the first 4.2 years with an All-in Sustaining Cost ("AISC") of \$1,882/oz and Operating Cashflow (after all capital and before tax) of \$201M.

### Quality Infrastructure, Only Gold Processing Facility in 400km Radius, Fully Approved

- Strategically important location being the only gold processing facility in a 400km radius.
- Well maintained, 450ktpa processing facility, on care and maintenance since 2018 and requiring minimal restart capital.
- +128-person camp and village substantially rented out to third parties.
- Mine and advanced Resources on Mining Licences, minimal barriers to restart.
- Underground mine fully dewatered and ventilated.
- Excellent access with sealed road and gas pipeline within 7km.
- · Approvals in place.

### Significant Opportunities at All Stages - Multi-metal Potential

- · Paulsens is an under-explored orogenic gold region with numerous gold and base metal anomalies.
- There is also significant open pit/underground potential at Belvedere, located only 5km from the processing facility. Belvedere is a
  Paulsens-style target with >2.5km of mineralised strike. To date, minimal drilling has identified a shallow Resource of 30koz @ 6.6g/t
  Au, part of which is in the May 2024 Restart Study.

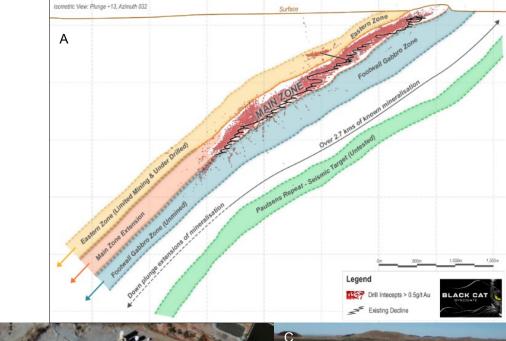

Figure 1:A. Schematic isometric long-section looking towards the north showing >2.7km of known mineralisation comprised of: Main Zone (~1Moz mined @ 1,000oz per vertical metre), under-drilled Eastern Zone, unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target;

1B. Aerial view of Paulsens processing facility and site offices; and

1C. Paulsens village and camp

#### REFURBISHMENT

Refurbishment activities in 2024 have involved the following:

- Assessment to better plan for the major refurbishment work thereby minimising future cost, time and risk;
- Repair those items that are readily fixable;
- Order long lead time items to facilitate installation;
- Consolidate, catalogue and utilise existing stores; and
- Prepare the facility for accelerated instalment of replacement components.

Substantial progress has been made by conducting these activities resulting in the selection of MACA Interquip as the preferred contractor to undertake the major refurbishment works which will commence upon receipt of the funding.

These activities have also resulted in a revised cost for the processing facility refurbishment based on work completed to date and reduced scope of work in some areas (e.g., positive condition report on the fine ore bin).

A comparison of the estimated refurbishment cost in the November 2023 Restart Study (ASX 21 November 2023) shows an estimated cost reduction from \$19.5M to \$18.3M.

Specific activities undertaken in May 2024 include:

- Placement of long lead time orders including a new power station switchboard.
- Preparation for arrival of new mill liners in June 2024.
- Upgrades and repairs to high voltage (11kV) cables in readiness for connection to new generators.
- Completion of cataloguing existing stores and consolidation of stock items into the main warehouse.
- Removal of the mill motor and power station transformers for off-site inspection and testing.

### SITE ESTABLISHMENT

Recent site establishment and operational readiness activities across Paulsens include:

- Review and preparation for mobilisation of workforce levels required for the processing facility refurbishment and selective mining activities.
- Commencement of camp upgrades with significant improvements to the IT/communications systems, camp rooms and laundry facilities.
- Upgrade of the village fire suppression system and the sourcing of critical spares for the waste-water treatment system.
- Upgrades to the potable water plant including replacement pumps, new membranes, housings and fittings.
- Reinstallation of refurbished Roma valves into the underground main water pipelines.
- Management of occupancy by multiple third parties at the village which continues to provide a stream of rental income.

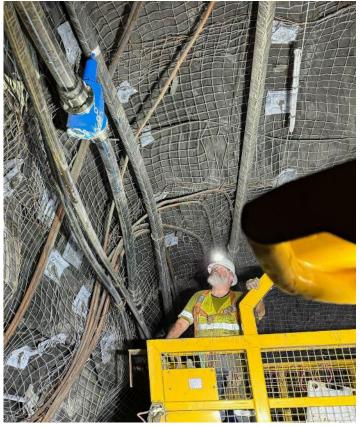

Figure 2: Refurbished Roma valves being reinstalled in the Paulsens decline

### **PLANNED ACTIVITIES**

As at the date of this announcement, the proposed activities and timing for the Company over the coming months includes:

31 May 2024: \$6M Convertible Notes funding date

Jun 2024: Shareholder meeting for \$30M equity placement

Jun - Jul 2024: Commencement of open pit mining at Myhree

Jun - Jul 2024 Completion of Secured Debt Facility

Jun - Aug 2024: Completion of \$30M equity placement

Jul - Sep 2024: Myhree Ore haulage and processing commences

For further information, please contact: Gareth Solly Managing Director +61 458 007 713 admin@bc8.com.au

This announcement has been approved for release by the Board of Black Cat Syndicate Limited.

### **COMPETENT PERSON'S STATEMENT**

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the exploration results, Mineral Resources, and Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource and Reserve estimates with that announcement continue to apply and have not materially changed.

The Company confirms that all material assumptions underpinning the production targets, or the forecast information derived from the production targets, included in the original ASX announcements dated, 18 July 2023 and 8 May 2024 continue to apply and have not materially changed.

### **ABOUT BLACK CAT SYNDICATE (ASX: BC8)**

Key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation is currently on care and maintenance, has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5q/t Au for 645koz with numerous high-grade targets in the surrounding area.

Kal East Gold Project: comprises ~1,070km<sup>2</sup> of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz.

Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The 800ktpa processing facility will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.

### Coyote Gold Operation

- Landholding ~940sqkm
- Gold Resources: 3.7Mt @ 5.5g/t for 645koz
- Mill: 300ktpa only mill in Western Tanami region (expandable); operational +180 person camp
- Historical Production: >35kozpa (211koz @ 4.9 g/t)
- C&M, multiple open pits & underground potential

#### **Paulsens Gold Operation**

- Landholding ~1,910sqkm
- Gold Resources: 4.3Mt @ 4.0g/t for 548koz
- Critical/Base Metals: 14kt Sb, 19kt Pb, 1.6kt Cu, 1.5Moz Ag
- Mill: 450ktpa regionally strategic location; +128 person camp Historical Production: ~75kozpa (1,003koz @ 6.9 g/t mined)
- C&M, multiple open pits & underground potentia

### Kal East Gold Project

- Landholding ~1,070sqkm
- Gold Resources: 18.8Mt @ 2.1g/t for 1,294koz
- Proposed Mill: ~800ktpa designed, permitted, components acquired; spare 700ktpa mill to expand to 1.5Mtpa
- Historical Production: ~600koz
- Pre-development, open pit & underground potential

Strategic Landholding ~3.920 km<sup>2</sup>

**Gold Resources** 2.5Moz @ 2.9 g/t Au

Milling Capacity 1.55Mtpa (expandable to 2Mtpa)

Potential Pathway to +150kozpa

Operation	Paulsens	Kal East	Coyote	Strategy
Land Size	~1,910 km²	~1,070 km²	~940 km²	>3,900 km <sup>2</sup> - prime discovery potential

#### Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012
- All tonnages reported are dry metric tonnes.
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- 5. Resources are reported inclusive of any Reserves
- Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Resources are:
