About APC

APC holds a 100% interest in the West Arunta **Nexus Project (Nexus)**, located approximately 1,000kms east-southeast of Port Hedland in Western Australian. Comprising of two exploration licenses across an area of approximately 500km² Nexus is an early stage exploration opportunity surrounded by globally significant and emerging rare earth and critical mineral element deposits. The West Arunta is WA's most exciting exploration frontier with strong potential to hold sedimentary, IOCG, SEDEX & carbonatite hosted mineral deposits.

APC holds a 100% interest in the **Lake Wells Gold Project (LWGP)**, located approximately 500kms northeast of Kalgoorlie, in Western Australia's Eastern Goldfields. Forming part of the project areas on listing the LWGP was held under an earn-in joint-venture by a third-party between 2018 – 2022. The opportunity to consolidate the data set generated during the JV with existing data has generated a new exploration model with several untested, highly prospective targets.

APC holds a 100% interest in the **Laverton Downs Project (LDP)**, located 5kms north of Laverton, in Western Australia's Eastern Goldfields. The LDP is prospective for nickel and other base metal sulphides and is located in the prominent gold bearing Lancefield sequence trending north of Laverton town site.
