

ASX Announcement

8 July 2024

REGIS GROWS CASH AND BULLION BY A RECORD \$109 MILLION IN JUNE QUARTER

Regis Resources Limited (ASX: RRL, “Regis”) is pleased to announce the following unaudited business update for the June 2024 quarter and the full financial year ended 30 June 2024.

- **106.4koz** of total Group gold production for the June 2024 quarter.
- **417.7koz** of total Group gold production for FY24 which is within Group FY24 production guidance.
- **Record cash and bullion position of \$295M** at 30 June 2024, **up a record \$109M** from \$186M at 31 March 2024.

Production vs Guidance (koz)	Q4 FY24 Actual	FY24 Actual	FY24 Guidance
Duketon	75.6	290	280 - 305
Tropicana	30.8	128	135 - 150
Group	106.4	418	415 - 455

During the quarter, operational performance across Duketon and Tropicana continued to recover from the major rain events that occurred in March. Duketon produced 75.6koz of gold resulting in FY24 gold production of 289.9koz which is within its FY24 production guidance range. Tropicana, which experienced more significant impacts from the rain, has had a slower recovery and produced 30.8koz of gold resulting in FY24 gold production of 127.8koz which is below its FY24 production guidance range.

With a solid Group production of 106.4koz of now fully unhedged gold in the quarter and the previously disclosed \$20M tax refund received early in the quarter, Regis saw very strong growth in its quarterly cash and bullion balance, which was up a record \$109M from 31 March 2024 to its highest ever position of \$295M at 30 June 2024.

Group production for FY24 was 417.7koz of gold and within the FY24 Group production guidance range.

Regis will provide further commentary on its operational and financial performance, including FY25 production and cost guidance, when it releases its full June quarterly report on 25th July 2024. Regis will host its Quarterly Results conference call at 9:00am AWST / 11:00am AEST on the same day.
