

# Kali Metals lists on the Frankfurt Stock Exchange

## Highlights

- Kali Metals Limited (**ASX: KM1**) ("**Kali Metals**" or "**the Company**") dual lists on the Frankfurt Stock Exchange under ticker code **60B**
- The Frankfurt Stock Exchange listing broadens the Company's exposure to the European investment community
- The Company joins a growing list of other ASX dual listed companies on the Frankfurt Stock Exchange, and appoints AXINO Media GmbH ("**AXINO**") to assist with promotional marketing

Kali Metals is pleased to announce the Company has dual listed on the Frankfurt Stock Exchange (Open Market), under the ticker code **60B**. The Frankfurt listing will expand the Company's investor reach and increase its exposure to European markets.

The Frankfurt Stock Exchange is the third largest exchange in Europe and the twelfth largest in the world by market cap. The Open Market is a secondary trading exchange in Germany. More than 8,500 foreign companies are listed and tradable in the Open Market trading segment and more than 100 million people are living in the German speaking countries.

To assist in promotional marketing, the Company has engaged an investor relations group in Germany, AXINO Media GmbH<sup>1</sup>. AXINO supports companies like Kali Metals in attracting important shareholder groups. AXINO has worked with a number of Australian listed companies to increase trading volumes on the Frankfurt Stock Exchange.

The Company looks forward to working with AXINO team and welcoming new European investors.

**About Kali Metals Limited**

Kali Metals' (ASX: KM1) portfolio of assets represents one of the largest and most prospective exploration packages across Australia's world leading hard-rock lithium fields. Kali's 3,854km<sup>2</sup> exploration tenure is located near existing, emerging, and unexplored lithium and critical minerals regions in WA including the Pilbara and Eastern Yilgarn and the Lachlan Fold Belt in NSW and Victoria.

Kali Metals has a team of well credentialed professionals who are focused on exploring and developing commercial lithium resources from its highly prospective tenements and identifying new strategic assets to add to the portfolio. Lithium is a critical component in the production of electric vehicles and renewable energy storage systems. With the rapid growth of these industries, the demand for lithium is expected to increase significantly in the coming years. Kali Metals is committed to playing a key role in meeting this demand and powering the global clean energy transition.
