

17 July 2024

Dear Shareholder,

Invitation to Shareholder Briefings in Brisbane, Sydney, Melbourne, and Perth (22 July – 1 Aug 2024)

We are delighted to invite you to a series of shareholder briefings where we will update you on our upcoming exploration activities, including the Hidden Bay drilling program.

We are nearing the completion of the \$4.1 million placement and rights issue facilitated by CPS Capital and RM Capital. This crucial funding will enable us to commence our maiden drilling program at Hidden Bay and advance the Surprise Creek Project with an airborne survey and subsequent drilling.

Robin Wilson, our Technical Director, will be present to offer an in-depth overview of the projects and share the excitement surrounding our upcoming Hidden Bay drilling program.

With uranium demand on the rise due to anticipated supply shortages and geopolitical uncertainties affecting global supply chains, now is a pivotal moment for uranium exploration. Canada's Athabasca Basin, renowned for being the world's richest uranium source, has had considerable exploration success over the past decade and holds potential for significant new discoveries.

We encourage you to attend one of the following presentations to learn more about these exciting developments.

Town Halls
