## Genesis meets guidance and accelerates organic growth strategy

Preparations underway to re-start the Laverton mill as part of fully-funded plan to hit 325,000oz pa target ahead of schedule, along with substantial all-in sustaining cost reduction to A\$1,600/oz

### HIGHLIGHTS

#### Sustainability

- Safety performance - TRIFR reduced to 8.3 from 10.4 in July 2023

#### Operations

- FY24 production of 134,451oz at an AISC of A\$2,356/oz, achieving FY24 guidance of 130-140,000oz at an AISC of A\$2,300 - 2,400/oz
- June quarter gold production of 34,617oz at an all-in sustaining cost (AISC) of A\$2,698/oz
- AISC includes additional sustaining capital (A\$14.2m or A\$423/oz) to establish long-life operations at Leonora (visibility now ~10 years)
- Commercial production declared at Admiral open pit effective 1<sup>st</sup> May 2024
- Closing ore stockpiles (inventory awaiting processing) increased to 314kt (up from 5kt at 30<sup>th</sup> June 2023)

#### Expedited development and growth

- Established 10-year group production outlook<sup>1</sup> totalling 3Moz (high confidence level with 91% in Reserves); Outstanding growth in the 5 years to FY29 with production rising to 325koz pa<sup>2</sup> and AISC falling to A\$1,600/oz
- Preparations underway to accelerate organic growth strategy; This is aimed at achieving the 325koz pa target and significantly lower AISC before FY29; Initiatives to expedite growth include:
  - Potential accelerated re-start of the Laverton mill - Recruitment advancing, purchase orders for A\$6.7m of long-lead plant items, mining on track to commence at the Hub high grade open pit during September quarter
  - Rapid development rates at Ulysses underground - Capital development advance of 646m to 30<sup>th</sup> June (57% ahead of schedule in the Five-year Plan) using surplus equipment and people from Gwalia i.e. sharing fixed costs
  - Early acquisition of the Leonora Lodge - Future-proofing accommodation for the workforce (260-room village) and enabling potential compression of the Tower Hill construction timeframe
- Forecast capital growth expenditure unchanged from the Five-year Plan; Accelerated growth strategy will see some costs brought forward

## Overview

Genesis Minerals Limited (ASX: GMD) produced 34,617oz at an all-in sustaining cost (AISC) of A\$2,698/oz in the June quarter 2024. This takes production for the 12 months to 30<sup>th</sup> June to 134,451oz at an AISC of A\$2,356/oz, **in line with FY24 guidance of 130-140,000oz at an AISC of A\$2,300 - 2,400/oz.**

During the quarter, 10,562t of third-party ore was processed at Leonora under a legacy short-term ore purchase agreement (OPA) with the Linden Gold Alliance. This OPA was completed in FY24 with no further third-parties processing obligations.

Surface ore stockpiles (inventory awaiting processing) increased significantly in Genesis' first 12 months of ownership to ~314,000t (up from ~5,000t at 30<sup>th</sup> June 2023). This is in line with Genesis' **long-term strategy to "future-proof" the business.**

## Outlook

In March 2024, Genesis announced updated **Group Resources of 15.2Moz and Group Reserves of 3.3Moz<sup>4</sup>**, 100% in the Leonora District. The Reserves support a **10-year group production outlook with total production of 3Moz.**

Figure 1. Group production and cost outlook

The 10-year outlook is **91% in Reserves** and conservatively **assumes no further exploration or M&A success**. After rising to **325koz in year 5 (FY29)**, production ranges from **320-350koz pa in years 6-10 (FY30-34)**.

Genesis is now focused on **accelerating production growth to 325koz pa and reducing AISC ahead of the Five-year Plan**. Initiatives to expedite growth include the potential earlier re-start of the Laverton mill, acceleration of underground development at Ulysses and ongoing early development works at Tower Hill.

With **A\$173.0 million cash and bullion** at 30<sup>th</sup> June 2024 and **no bank debt**, Genesis is **fully-funded to invest in new projects and infrastructure to deliver this growth ambition on an expedited timeline into the backdrop of a buoyant gold price.**

Genesis Managing Director Raleigh Finlayson said:

*"It was a highly successful quarter on all fronts. We met both production and cost guidance while laying the foundations to accelerate our organic growth strategy.*

*"This is designed to ensure we achieve our 325,000ozpa production target and reduce AISC to A\$1,600/oz ahead of the FY29 date contained in our five-year plan.*

*"We have successfully established a very large inventory which underpins forecast production of 3Moz over 10 years. We now want to unlock more of its value sooner to capitalise on this enviable position and the buoyant gold price. By accelerating our self-funded organic growth strategy, we can drive rapid growth in free cashflow generation, creating greater shareholder value in the process.*

*"We are very pleased with the way the pieces of the Genesis jigsaw are coming together".*

1. ASX announcement 21<sup>st</sup> March 2024 "Five-year Strategic Plan";

2. Refer to the PRODUCTION OUTLOOK (pages 11-18) in the ASX announcement 21<sup>st</sup> March 2024 "Growth strategy underpinned by robust Reserves" for the material assumptions relating to the production target; Genesis confirms that all the material assumptions underpinning the production target in that announcement continue to apply and have not materially changed. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised;

3. Cash and bullion is before payment of approximately A\$41m transaction costs in relation to the acquisition of St Barbara's Leonora assets, the acquisition of 100% of Dacian, and the acquisition of the Bruno-Lewis and Kyte projects (payment anticipated in 2024);

## Sustainability

No Lost Time Injuries (LTI) were reported in the June quarter, **resulting in FY24 being LTI-free** and therefore a LTIFR rate of 0.0.

The Group Total Recordable Injury Frequency Rate (TRIFR) reduced 20% from 10.4 in July 2023 to 8.3 in June 2024.

Table 2. June quarter 2024 group safety performance

	LTI	LTIFR	TRIFR
Group	0	0	8.3

An independent safety risk review was undertaken, identifying no critical exposures and providing recommendations for improvement of select existing control mechanisms.

A comprehensive risk register review was completed, including a review of the Group's top 10 risks with the Board Risk and Sustainability Committee.

The consolidation of Environmental monitoring data into a single system was completed, enabling improved visibility of data, trend analysis and performance reporting.

The second Leonora community briefing was conducted in June with 45 people in attendance, providing another opportunity for positive engagement regarding Genesis' activities and community considerations.

## Operations

Genesis produced **34.6koz** for the quarter (March quarter 30.5koz), generating **A\$39 million of mine operating cash flow**. **Net mine cash flow was A\$7 million after growth capital of A\$32 million**, progressing the Ulysses underground and Hub open pit development assets and including \$7.5 million payment for the early acquisition of the Leonora Lodge accommodation village.

### Mining

At **Gwalia underground 29.5koz at 5.2g/t was mined** (March quarter 25.0koz at 5.9g/t).

Focus remained on the priority South West Branch (SWB) stoping fronts between the 1700H and 1820H levels and ore drive development on the 1840H and 1860H levels to unlock high-grade "Heart of Gold" stopes in FY25.

Additional ore was sourced from South Gwalia Series, West Lode and Main Lode to maximise equipment utilisation between the 1140 and 1580 levels.

Total ore mined was 178kt, aligning with the 700 - 800kt pa targeted production rate.

Total development advance for the period was 772m with a 50/50 split between capital (1900 level infrastructure and Hoover decline) and operating.

Pleasingly, Gwalia's performance in Genesis' first 12 months of ownership has conformed with the due diligence estimates first released to the market in December 2022.

Table 3. Gwalia performance in line with due diligence

		FY24 actual	Due diligence*
Annual mining rate	kt pa	723	700 - 800
Annual gold production	koz pa	126	115 - 130

\*ASX announcement 12<sup>th</sup> December 2022 "Presentation - Creating a leading Australian gold house"

At **Admiral open pit 10.0koz at 1.2g/t was mined** (March quarter 7.8koz at 1.3g/t).

Ore production ramped up to 263kt for the quarter, successfully reaching approximately 50m depth at 30<sup>th</sup> June.

## Processing

The **Leonora mill** continued to successfully increase throughput performance during the June quarter with the addition of further Admiral material, processing 299kt of Genesis-owned ore at 3.7g/t with a metallurgical recovery of 94.2%.

Total ore milled in FY24 stands at 1.15Mt, the highest since FY15. Impressive month-on-month improvements placed processing rates on the cusp of achieving the 1.4Mt pa target at the end of the June quarter.

Figure 2. Ore milled (t) last 3 months

Plant sustaining works continued to focus on leach tanks, cyanide tanks and concrete foundations (required to establish long-life operations at Leonora, in line with the recently released 10-year group production outlook).

During the quarter, 10,562t of third-party ore was processed under a legacy ore purchase agreement (OPA) with Linden Gold Alliance, satisfying all legacy processing obligations at the Leonora mill.

## Surface ore stockpiles

Surface ore stockpiles (inventory awaiting processing) increased significantly in Genesis' first 12 months of ownership to ~314,000t (up from ~5,000t at 30th June 2023). This is in line with Genesis' **long-term strategy to "future-proof" the business.**

## Project development

### Laverton on the move

In May 2024, Genesis reported several “wins” that positively impact the Laverton assets:

Figure 4. Laverton on the move

Source: ASX Announcement 6<sup>th</sup> May 2024 “Corporate Presentation - ASPIRE 400”

The above accelerants will catalyse an **earlier re-start of the 3Mtpa Laverton mill i.e. in advance of the late FY25 start-up flagged in the March 2024 Five-year Plan.**

The mill has been on **“hot” care and maintenance since March 2023**, providing momentum for Genesis to make **strong early progress** on the re-start including:

- 45-50 people on site each day in July

Figure 5. Laverton mill re-start - Maiden pre-start meeting

- 
- Purchase orders made for A\$6.7m of long-lead plant and early refurbishment works
  - Refurbishment activities ~15% complete (originally planned for the September quarter)

*Figure 6. Laverton mill re-start - Scaffolding delivered*

- Contract commitments in place for all major re-start requirements, including gas, power, ore haulage and reagents
- Genesis Mining Services (GMS) second mobile equipment fleet ordered for the Hub high grade open pit with delivery slated for August i.e. mining on track to commence at the Hub during September quarter

*Figure 7. Hub open pit - Clearing site*

- Recruiting 166 roles across Laverton mill re-start and Hub mining (GMS); approximately 46% filled

**Details on the earlier timing of the re-start and impact on production and costs will be provided in the updated FY25 guidance in September.**

## ***Ulysses underground***

After cutting the access portal late in the March quarter, **development has been rapid** with capital development advance of 646m to 30<sup>th</sup> June (57% ahead of schedule in the Five-year Plan of 412m).

*Figure 8. Ulysses decline - New kid on the block*

Surplus equipment and people from Gwalia underground are being used to share fixed costs.

First delivery of development ore to the Leonora mill is anticipated in the September quarter 2024, ahead of schedule in the Five-year Plan. First stoping is anticipated in late 2024 / early 2025.

In parallel with current development activities, several mining opportunities are under evaluation including:

- Application of “high-speed” jumbo development (accommodated by excellent ground conditions / heading availability)
- Optimisation of pillar locations to improve mining recovery and stope productivity (less slot raises)
- Addition of 2 years of mine life (to 7 years) by mining open pit from underground

## ***Tower Hill project***

Tower Hill is a shallow high-grade deposit located just over 1km north of the Gwalia mine with a Reserve estimate of 15.4Mt @ 2.0g/t for 1.0Moz, located in one planned open pit.

Genesis continues to advance the project, aiming to **commence development in FY27** and **deliver first ore in FY28**.

Achievements during the quarter included:

- Progression of community and stakeholder engagement, including stakeholder impact assessments, community briefings and Shire meetings
- Strengthening of Genesis’ important relationship with the Darlot Native Title group, through collaborative on the ground discussions
- Early advice received from the Environmental Protection Authority (EPA, WA Government):

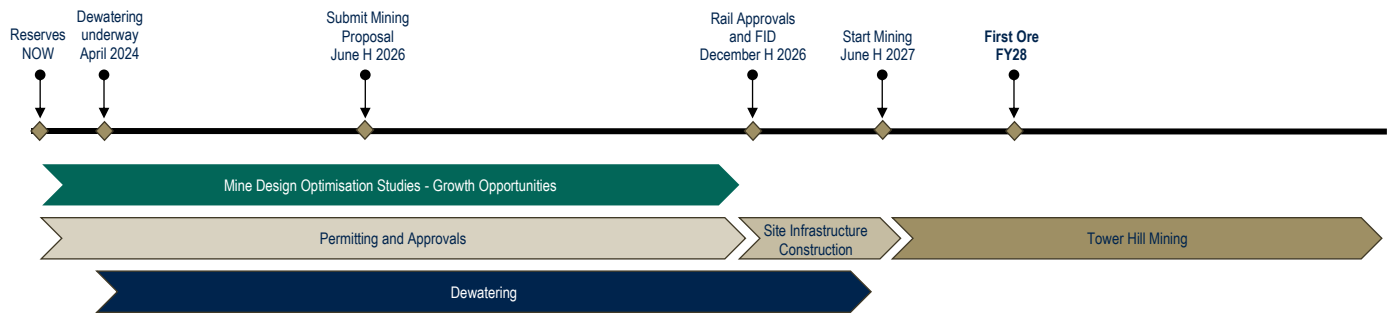

*“the EPA determined to not assess that proposal on the basis the matters could be largely managed through secondary approvals”*

**i.e. Tower Hill can be managed via the standard WA mining approval process**

- Dewatering of 660 million litres from the pit
- Advancement of technical work for development approvals, including mine design, geotechnical, noise, dust, and blast impact assessments, hydrology and hydrogeology studies
- Progression of approvals for termination of the rail line to the south of the planned pit with significant positive engagement with the State Government and several other stakeholders including Arc Infrastructure

Figure 9. Advancing Tower Hill

During the quarter the A\$7.5m acquisition of the Leonora Lodge was completed earlier than planned.

Leonora Lodge will provide accommodation for the workforce and facilitate compression of the Tower Hill construction timeframe.

Figure 10. Leonora Lodge

The decision to bring the acquisition forward was motivated by:

- Positive implications for the Tower Hill development timeframe stemming from the early advice from the EPA to not assess the project
- Stronger than expected cash position of Genesis heading into 30th June 2024

Further growth in the 1.0Moz Reserve is anticipated given significant extensional upside. Tower Hill has only been drill-tested to ~450m depth despite being immediately adjacent to the Gwalia mine (>2km depth). A second stage of drilling is planned to infill plus test high grade shoot extensions and parallel structures in this highly fertile system.

## Drilling

A\$2.6 million was invested on exploration activities in the June quarter, with drilling focused on:

- Gwalia underground
- Hub underground potential
- Bruno-Lewis open pit

### Corporate debt facility

As previously flagged, Genesis is well advanced in establishing a prudent corporate debt facility with a number of premium banking partners to provide balance sheet flexibility.

### Hedging

During the quarter, Genesis entered into the following hedge arrangements:

- Forward sales: 4,500 oz per quarter from Oct-24 to Sep-25 at an average of A\$3,666/oz
- Zero cost collars: 4,500 oz per quarter from Oct-25 to Sep-26 with a put strike price of A\$3,500/oz and a call strike price of A\$4,235/oz

The total hedging of 36,000 ounces represents ~9% of FY25 / 26 production in the Five-year Plan and ~1% of Reserves. No hedges were delivered into during the June quarter.
