1. Investment Summary

The information set out in this section is not intended to be comprehensive and should be read in conjunction with the full text of this Prospectus.

1.1 The Entitlement Offer

This Prospectus is for the non-renounceable, pro-rata rights issue of approximately 97,871,108 Loyalty Options at an offer price of \$0.003 per Loyalty Option (**Offer Price**), on the basis of 1 Loyalty Option for every 3 Shares held by Eligible Shareholders as at the Record Date, to raise approximately \$293,613 before costs (**Entitlement Offer**);

Each Loyalty Option has an exercise price of \$0.10 (**Exercise Price**) and will expire on 31 July 2027 (**Expiry Date**).

The Entitlement Offer is an offer to Eligible Shareholders only.

The Entitlement Offer is fully underwritten by Westar Capital.

The total price paid for the Shares issued upon the exercise of the Loyalty Options (**Resulting Shares**) is \$0.103 (being the aggregate of the Offer Price and the Exercise Price, per Resulting Share). This compares to the 10 day average volume-weighted average price for the Shares being \$0.044 as at 18 July 2024.

On the same date as announcing the Entitlement Offer, the Company applied to the ASX for the Loyalty Options to be granted Official Quotation on the ASX. Official Quotation of the Loyalty Options is expected to occur on or about 14 August 2024.

The Directors may at any time decide to withdraw this Prospectus and the offer of Loyalty Options made under this Prospectus, in which case the Company will return all applications moneys (without interest) within 28 days of giving notice of such withdrawal.

1.2 Eligible Shareholders

The Entitlement Offer is an offer to Eligible Shareholders only, being Shareholders who the Company is satisfied that the Entitlement Offer is permitted, and who:

- (a) are the registered holder of Shares as at 5.00pm (Perth time) on the Record Date; and
- (b) have a registered address in Australia and New Zealand.

1.3 Minimum Subscription

There is no minimum subscription to the Entitlement Offer. The Entitlement Offer is fully underwritten.

1.4 Purpose of the Entitlement Offer

The Directors intend to apply the proceeds from the Entitlement Offer for the purposes of:

- (a) exploration activities on the Company's existing projects, including the Ravensthorpe Lithium Project, the Lake Rebecca Gold Project and the Chifley Gold Project;
- (b) the costs of the Entitlement Offer; and
- (c) general working capital purposes.

The proceeds from the Entitlement Offer are proposed to be allocated in the following manner as at the date of this Prospectus:

Proposed Use of Funds ²	Entitlement Offer Amount
Exploration activities on the Company's existing projects	\$200,000
Estimated costs of the Entitlement Offer ¹	\$87,000
Working capital ³	\$6,613
Total (maximum raising)	\$293,613

¹ Assumes that the Entitlement Offer is fully subscribed. Refer to section 8.14 for further details relating to the estimated costs of the Entitlement Offer.

² The proposed use of funds from the Entitlement Offer are subject to change without notice and may be impacted by any exploration results received after the date of this Prospectus.

³ The allocation of funds towards working capital will vary depending on the progress of the appeal to the refusal by DEMIRS to grant the NVCP permit application for the Ravensthorpe Lithium Project. Refer to sections 1.5 and 4.2 for further details.

However, in the event that circumstances change, or other better opportunities arise, the Directors reserve the right to vary the proposed uses to maximise the benefit to Shareholders.

1.5 Investment Highlights

The proceeds from the Entitlement Offer will be used predominantly for exploration activities on the Company's existing projects, particularly the Ravensthorpe Lithium Project. As advised to the market on 8 April 2024 the Western Australian Department of Energy, Mines, Industry Regulation and Safety (**DEMIRS**) has advised the Company that it has refused to grant the Native Vegetation Clearing Permit (**NVCP**) permit application required to clear access for tracks and drill pads which would enable certain planned drilling to progress at the Ravensthorpe Lithium Project.

The Company does not agree with the DEMIRS decision and is appealing the decision with the Western Australian Office of the Appeals Convenor (**Appeals Convenor**). The Appeals Convenor considers appeals in the context of the formal requirements of the *Environmental Protection Act 1986 (WA)* (**EPA**), including the clearing principles in Schedule 5 of the EPA, relevant planning instruments and any other matters considered relevant. On completing its investigation, the Appeals Convenor will provide a report to the relevant Minister, whose decision is final and is not subject to appeal.

Proceeds from the Entitlement Offer will also be directed to exploration activities for the Lake Rebecca Gold Project and the Chifley Gold Project.

1.6 Risk Factors

Investing in the Company involves risk. Exploration and evaluation for minerals is generally considered a high-risk activity, and the worst case scenario is that most or all of the investment could be lost.

There are a range of factors, both specific to the Company and of a general nature, which may affect the future operating and financial performance of the Company. Some of these factors can be mitigated by appropriate commercial action. However, many are outside the control of the Company, dependent on the policies adopted and approaches taken by regulatory authorities, or cannot otherwise be mitigated.

Prior to making any decision to subscribe for Loyalty Options, you should carefully consider the risk factors set out below. If you are still unsure about subscribing for Loyalty Options, you should first seek advice from your stockbroker, accountant, financial or other professional adviser.

The following sets out a summary of some of the key risks relevant to the Company and its operations:

Risk	Details
Permit Risk	<p>The rights to mineral permits carry with them various obligations which the holder is required to comply with in order to ensure the continued good standing of the permit and, specifically, obligations in regard to minimum expenditure levels and responsibilities in respect of the environment and safety. Failure to observe these requirements could prejudice the right to maintain title to a given area and result in government action to forfeit a permit or permits. There is no guarantee that current or future exploration permit applications or existing permit renewals will be granted, that they will be granted without undue delay, or that the Company can economically comply with any conditions imposed on any granted exploration permits.</p> <p>The Company is currently appealing a decision by DEMIRS with the Appeals Convenor whereby the Company was advised that DEMIRS has refused to grant the NVCP permit application required to clear access for tracks and drill pads which would enable certain planned drilling to progress at Ravensthorpe Lithium Project.</p> <p>The Appeals Convenor will consider the appeal and provide a report to the relevant Minister, whose decision is final and is not subject to appeal. There is no guarantee the Company will be successful with its appeal.</p>
General Economic Conditions	<p>Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that economic climate include the general level of economic activity, interest rates, inflation, supply and demand, industrial disruption and other economic factors. The price of commodities will also be of particular relevance to the Company. These factors are beyond the control of the Company and the Company cannot, with any degree of certainty, predict how they will impact on the Company.</p>
Commodity Price and Exchange Risks	<p>Any substantial decline in the price of gold, lithium or other minerals could have a material adverse effect on the Company.</p> <p>Furthermore, international prices of gold and lithium are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.</p>
Climate Change	<p>The operations and activities of the Company are subject to changes to local or international compliance regulations related to climate change mitigation efforts, specific taxation or penalties for carbon emissions or environmental damage and other possible restraints on industry that may further impact the Company. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.</p> <p>Climate change may also cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns, incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.</p>

Risk	Details
Management Actions	<p>Directors of the Company will, to the best of their knowledge, experience and ability (in conjunction with their management) endeavour to anticipate, identify and manage the risks inherent in the activities of the Company, but without assuming any personal liability for the same, with the aim of eliminating, avoiding and mitigating the impact of risks on the performance of the Company and its operations.</p> <p>The success of the Company is currently largely dependent on the performance of its Directors and officers.</p> <p>There is no assurance that the Company can maintain the services of its Directors and officers, or other qualified personnel required to operate its business. The loss of the services of these persons could have a material adverse effect on the Company and its prospects.</p>
Force Majeure	<p>The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.</p>
Project Delay	<p>To the extent that operational, construction and development activities are delayed for any of the production or development projects in which the Company is the operator or is to be granted management rights, this may affect the total development costs and the timing and level of proceeds derived from the operation which may have a material adverse effect on the Company.</p>
Exploration and Development	<p>By its nature, mineral exploration and development are high risk undertakings. While the Company has attempted to reduce this risk by selecting projects that are highly prospective, there is still no guarantee of success. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. It is impossible to ensure that the exploration or development programmes planned by the Company will result in profitable commercial mining operations. The circumstances in which a mineral deposit becomes or remains commercially viable depend on a number of factors. These include the particular attributes of the deposit, such as size, grade and proximity to infrastructure, as well as the Company successfully obtaining all necessary consents and approvals and the successful design, construction and operation of gathering, processing and transportation facilities. A combination of these factors may result in projects not being developed, or operations becoming unprofitable. Delays or difficulties in obtaining relevant approvals, or obtaining conditional or limited approvals, may interfere with the Company's operations which could materially impact the business, financial position and performance of the Company. Furthermore, should the Company be unable to secure new exploration areas and resources, there could be a material adverse effect on the Company's prospects for mineral exploration and its success in the future.</p>
Environmental Risk	<p>The Company's operations and projects are subject to the laws and regulations of all jurisdictions in which it has interests and carries on business, regarding environmental compliance and relevant hazards.</p> <p>These laws and regulations set various standards regulating certain aspects of health and environmental quality and provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted. Significant liability could be imposed on the Company for damages, clean-up costs, or</p>

Risk	Details
	<p>penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of property acquired by the Company or its subsidiaries, or noncompliance with environmental laws or regulations.</p> <p>The Company proposes to minimise these risks by conducting its activities in an environmentally responsible manner, in accordance with applicable laws and regulations and where possible, by carrying appropriate insurance coverage.</p> <p>There is also a risk that the environmental laws and regulations may become more onerous, making the Company's operations more expensive. Amendments to current laws, regulations and permits governing operations and activities of mineral exploration companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new properties.</p>
Resources and Reserve Estimates	<p>Resource and reserve estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may alter when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates may change. Accordingly, the actual resources may materially differ from these estimates and assumptions and no assurances can be given that the resource estimates and the underlying assumptions will be realised. This could result in alterations to development and mining/extraction plans, which may, in turn, affect the Company's operations and ultimately the Company's financial performance and value.</p>
Ukraine and Gaza Conflicts	<p>The current conflict between Ukraine and Russia (Ukraine Conflict) and Israel and Palestine (Gaza Conflict) is creating and is likely to continue to create impacts to the global economic markets that are unpredictable. The nature and extent of the effect of the Ukraine Conflict and the Gaza Conflict on the performance of the Company remains unknown.</p> <p>The Directors are continuing to monitor the potential secondary and tertiary macroeconomic impacts of the unfolding events, including the changing pricing of commodity and energy markets and the potential of cyber activity impacting governments and businesses.</p> <p>Further, any governmental or industry measures taken in response to the Ukraine Conflict and the Gaza Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving the relevant countries, may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>While the Company has not assumed any ongoing direct business with Ukrainian, Belarusian, Russian, Israeli or Palestinian companies, the indirect impacts of the conflicts may have unpredictable indirect consequences on the Company's future business. It is expected that the situation will continually evolve, and the consequences are therefore inevitably uncertain.</p>

Risk	Details
Economic Conditions and Other Global or National Issues	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities. General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.</p>
Litigation Risk	<p>All industries, including the mining industry, may be subject to legal claims whether or not they have merit. The Company maintains Directors' and Officers' liability insurance. The Company has also provided an indemnity for each Non-Executive Director and Executive Director to the maximum extent permitted by law, against any liability for legal costs incurred in respect of liability incurred by them, as or by virtue of their holding office as, and acting in the capacity of, an officer of the Company, except where the liability arises out of conduct involving lack of good faith or in breach of the law.</p> <p>Whilst the Company is not aware of any current or proposed litigation against it, the Company may be subject to litigation and other claims and disputes in the course of its business, including employment disputes, contractual disputes, indemnity claims and occupational and personal claims. Such litigation, claims and disputes, including the costs of settling claims and operational impacts, could cause the Company to incur unforeseen loss, costs or expenses (including loss, cost or expense that is not covered by insurance policies), could occupy a significant amount of management's time and attention and could materially adversely affect the Company's business, operating and financial performance. In addition, even if the Company was to ultimately prevail in any such litigation, claim or dispute, it could suffer reputational damage, which could have an adverse effect on the Company's business, operating or financial performance.</p>
Occupation Health and Safety	<p>Workplace incidents may take place for various reasons, including as a result of non-compliance with safety rules and regulations. The Company may be liable for personal injuries or fatalities that are suffered by the Company's employees, contractors or other persons under applicable occupational health and safety laws. If the Company is liable under applicable laws, in whole or part, it may be subject to significant penalties. The Company may be subject to liability to pay compensation, and this may materially and adversely affect the Company's financial position and profitability. The potentially hazardous nature of mineral processing means that health and safety regulations impact the activities of the Company. Any injuries, accidents or other relevant events that occur on the Company's operation site could result in legal claims, potential delays or halt that could adversely impact the Company.</p>
Labour Shortages and Industrial Disputes	<p>There is a risk that the Company may need to pay higher than expected costs to acquire or retain the necessary labour for its operations. This could result in a material and adverse increase in costs and/or development projects being delayed or becoming uneconomic and not proceeding as planned. The Company will also be exposed to the risk that industrial disputes may arise (for example, in relation to claims for higher</p>

Risk	Details
	wages or better conditions) which might disrupt some of its operations and lead to increases in project costs and delays.
Cyber Risk	The integrity, availability and confidentiality of data within the Company's information and operational technology systems may be subject to intentional or unintentional disruptions (for example, from a cyber security attack). Given the current size of the Company's business, the Company engages a third party IT support company who have robust processes and technology, supported by specialist cyber security skills to prevent, detect, respond and recover from such attacks should one occur.
Regulatory Risk	Legislative or regulatory changes in jurisdictions in which the Company operates, including property or environmental regulations, could have an adverse impact on the Company.

Further details regarding risks which may affect the Company in the future are set out in section 6.

1.12 Lead Manager

Westar Capital has been appointed as the Lead Manager to the Entitlement Offer. Further details of the terms of appointment of the Lead Manager are set out in section 7.1.

1.13 Underwriter

The Entitlement Offer is fully underwritten by Westar Capital, subject to the terms and conditions of the Underwriting Agreement. Please refer to section 7.2 for further details in relation to the Underwriting Agreement.

The Underwriter is not a related party of the Company for the purposes of the Corporations Act, the Company notes that Neville Bassett, who is a Director of the Company, is also Chairman of the Underwriter (however, Mr Bassett does not control the Underwriter). Notwithstanding this relationship between the Company and the Underwriter, the Board considered that no prior Shareholder approval to entry into the Underwriting Agreement was required and that entering into the Underwriting Agreement was at arm's length terms and appropriate in the circumstances.

Westar Capital will, subject to the Underwriting Agreement not being terminated, subscribe for (or nominate other persons, including sub-underwriters to subscribe for) the Loyalty Options under the Entitlement Offer not otherwise subscribed for by Eligible Shareholders under the Entitlement Offer (**Shortfall Securities**).

Any Shortfall Securities issued to the Underwriter will be issued pursuant to ASX Listing Rule 7.2 (Exception 2) and accordingly, Shareholder approval will not be required for that issue.

It is important to note that Westar Capital will be acting for, and providing services to, the Company in relation to the Entitlement Offer and will not be acting for or providing services to Shareholders. The engagement of Westar Capital as the Underwriter by the Company is not

intended to create any agency or other relationship between Westar Capital and Shareholders. It is noted that the Sub-Underwriter has agreed with the Underwriter to sub-underwrite up to 10% of the Entitlement Offer (refer to section 7.3).

1.14 **Shortfall**

Any Loyalty Options under the Entitlement Offer that are not subscribed for will form the Shortfall. The offer to issue Shortfall is a separate offer under the Prospectus (**Shortfall Offer**). The Shortfall Offer will be on the same terms and conditions as the Entitlement Offer, except as set out in this Prospectus, and will remain open for up to 3 months from the Closing Date. The issue price for each Loyalty Option to be issued under the Shortfall Offer will be \$0.003 (the same Offer Price as under the Entitlement Offer).

The Directors reserve the right to offer and issue Shortfall Securities at their absolute discretion, subject to any restrictions imposed by the Corporations Act or the ASX Listing Rules.

In the event that there is a Shortfall and the Directors exercise this discretion, the allocation of the Shortfall Securities will be determined by Westar Capital in consultation with the Directors. If required, the Directors intend to actively work with Westar Capital during, and after, the Entitlement Offer in order to secure commitments and subsequently to place, any Shortfall Securities not subscribed for by Eligible Shareholders, noting that the Entitlement Offer is fully underwritten.

1.15 **Shortfall and Dilution of Shareholder's Interests**

Eligible Shareholders should be aware that to the extent that they do not accept their Entitlements in full, a Shortfall will arise and all or part of any Shortfall may be placed by Westar Capital, in consultation with the Directors, to existing Shareholders or new investors.

The issue of Shortfall Securities will not result in any immediate dilution of each Shareholders' interest in the Company. Whilst not all Shortfall Securities may be exercised, the interests of Shareholders will be diluted gradually as a result of the exercise of those Shortfall Securities.

Acceptance of Entitlements or placement of any Shortfall may also result in existing Shareholders or new investors significantly increasing their interest in the Company or obtaining a substantial interest in the Company upon exercise of any Loyalty Options issued under the Entitlement Offer or Shortfall Offer.

2. Details of the Entitlement Offer

2.1 The Entitlement Offer

The Entitlement Offer is a non-renounceable, pro-rata entitlement offer of approximately 97,871,108 Loyalty Options at an offer price of \$0.003 per Loyalty Option, on the basis of 1 Loyalty Option for every 3 Shares held by Eligible Shareholders as at the Record Date, to raise approximately \$293,613 before costs.

There are currently approximately 93,282,570 Existing Options on issue in the Company. If any of the Existing Options are exercised prior to the Record Date, additional Loyalty Options will be offered under this Prospectus. If all Existing Options on issue at the date of this Prospectus were exercised prior to the Record Date, the Company's issued Shares would increase by 93,282,570 Shares, resulting in a further 31,094,190 Loyalty Options being offered pursuant to this Prospectus. This would increase the Company's total Shares on issue prior to the Entitlement Offer to 386,895,893 and on completion of the Entitlement Offer the total number of Shares on issue in the Company would be 386,895,893 Shares.

The Entitlement Offer is an offer to Eligible Shareholders only.

The Entitlement Offer is fully underwritten by Westar Capital.

The total price paid for the Shares issued upon the exercise of the Loyalty Options (**Resulting Shares**) is \$0.103 (being the aggregate of the Offer Price and the Exercise Price, per Resulting Share). This compares to the 10 day average volume-weighted average price for the Shares being \$0.044 as at 18 July 2024.

On the same date as announcing the Entitlement Offer, the Company applied to the ASX for the Loyalty Options to be granted Official Quotation on the ASX. Official Quotation of the Loyalty Options is expected to occur on or about 14 August 2024.

The Directors may at any time decide to withdraw this Prospectus and the Entitlement Offer made under this Prospectus, in which case the Company will return all Acceptance Moneys (without interest) within 28 days of giving notice of such withdrawal.

2.2 Eligible Shareholders

The Entitlement Offer is an offer to Eligible Shareholders only, being Shareholders who the Company is satisfied that the Entitlement Offer is permitted, and who:

- (a) are the registered holder of Shares as at 5.00pm (Perth time) on the Record Date; and
- (b) have a registered address in Australia and New Zealand.

2.3 Allotment and Allocation Policy

Loyalty Options issued pursuant to the Entitlement Offer will be allotted in accordance with the ASX Listing Rules and timetable set out in section 2.4 of this Prospectus.

In the case that there is less than full subscription by Eligible Shareholders of their Entitlements under the Entitlement Offer, the Directors reserve the right to offer and issue Shortfall Securities at their absolute discretion, subject to any restrictions imposed by the Corporations Act and the ASX Listing Rules. In the event that there is a Shortfall and the Directors exercise this discretion, the allocation of the Shortfall Securities will be determined by Westar Capital in consultation with the Directors and otherwise subject to the Corporations Act and the terms of the Underwriting Agreement.

Any Shortfall will be issued within three months after the Closing Date at an issue price being not less than the Offer Price (with the exception of any Shortfall Securities to be issued to the Underwriter or Sub-Underwriter which will be issued within 15 Business Days after the Closing Date).

No Loyalty Options will be allotted or issued on the basis of this Prospectus later than 13 months after the date of issue of this Prospectus.

If granted, Official Quotation of the Loyalty Options will commence as soon as practicable after allotment of the Loyalty Options to Applicants. It is the responsibility of the Applicants to determine their allocation of Loyalty Options prior to trading.

The fact that ASX may grant Official Quotation to the Loyalty Options is not to be taken in any way as an indication of the merits of the Company or the Loyalty Options now offered for subscription.

If ASX does not grant Official Quotation of the Loyalty Options offered pursuant to this Prospectus, or if the Company does not meet the minimum requirements to be granted Official Quotation of the Loyalty Options, then those Loyalty Options will still be issued, however, will not be quoted on ASX.

The Company will not issue certificates to Shareholders with respect to the Loyalty Options. After allotment of the Loyalty Options, those who are issuer sponsored holders will receive an issuer sponsored statement and those who are CHESS holders will receive an allotment advice.

The CHESS statements, which are similar in style to bank account statements, will set out the number of Loyalty Options allotted to each successful applicant pursuant to this Prospectus. The statement will also advise holders of their holder identification number or security holder reference number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further statements will be provided to holders which reflect any changes in their holding in the Company during a particular month.

2.7 **Minimum Subscription**

2.9 **Underwriting**

2.10 **Option Holders**

Option Holders will not be entitled to participate in the Entitlement Offer unless they:

- (a) have become entitled to exercise their Existing Options under the terms of their issue and do so prior to the Record Date; and
- (b) participate in the Entitlement Offer as a result of being an Eligible Shareholder at 5.00pm (Perth time) on the Record Date.

If all holders of Existing Options elect to exercise their Existing Options prior to the Record Date, and are eligible to participate in the Entitlement Offer, a further 31,094,190 (approximately) Loyalty Options may be issued under this Prospectus. Details of the Existing Options are set out in section 5.

2.11 Overseas Shareholders

The Company has not made investigations as to the regulatory requirements that may prevail in the countries outside of Australia and New Zealand in which the Company's Shareholders reside.

This Prospectus and accompanying forms do not, and are not intended to, constitute an offer of Loyalty Options in any place outside of Australia and New Zealand in which, or to any person to whom, it would not be lawful to make such an offer or to issue the Entitlement Offer or that form.

The distribution of this Prospectus in places outside Australia and New Zealand may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe those restrictions. Any failure to comply with those restrictions may violate applicable securities laws.

The Company has decided that it is unreasonable to make offers under this Prospectus to Shareholders with registered addresses outside of Australia and New Zealand (**Ineligible Shareholders**) having regard to the number of Shareholders in those places, the number and value of the Loyalty Options they would be offered and the legal and regulatory requirements in those places and costs of complying with those requirements. Accordingly, the Entitlement Offer is not being extended to Ineligible Shareholders, and does not qualify for distribution or sale by Ineligible Shareholders and no Loyalty Options will be issued to Ineligible Shareholders.

In particular, this Entitlement Offer is not made in the United States or to persons (including nominees or custodians) acting for the account or benefit of a person in the United States, or to any person who is ineligible under applicable securities laws in any country to receive an offer under the Prospectus without any requirement for a prospectus to be lodged or registered.

2.12 Notice to Nominees and Custodians

Persons acting as nominees, trustees or custodians for other persons must not take up any Entitlements on behalf of, or send any documents related to the Entitlement Offer to, any person in any jurisdiction where it is unlawful to do so, or to any person that is acting for the account or benefit of a person in any jurisdiction where it is unlawful to do so. By applying for Loyalty Options under this Prospectus, including by submitting an Entitlement and Acceptance Form, a nominee, trustee or custodian represents and warrants this is the case.

Nominees and custodians that hold Shares should note that the Entitlement Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities.

Where any nominee, trustee or custodian is acting on behalf of a foreign person, that person, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Entitlement Offer is compatible with applicable foreign laws.

2.13 Relevant Interest in Voting Shares

- (a) As the Loyalty Options do not grant the holders any voting rights (see section 8.3 below) those Eligible Shareholders who elect to take up their Entitlement under the Entitlement Offer will not, as a result of the Entitlement Offer, acquire a relevant interest in issued voting Shares in the Company as contemplated under section 606(1) of the Corporations Act.
- (b) However, if the Loyalty Options are exercised, the holders will be issued Resulting Shares. Section 606(6) of the Corporations Act provides that, upon conversion of the Loyalty Options to Resulting Shares, the holders will acquire a relevant interest in voting shares in the Company for the purposes of section 606(1).

- (c) A sale nominee has not been appointed by the Company under section 615 of the Corporations Act in relation to the Entitlements held by those foreign Shareholders who are not Eligible Shareholders. Eligible Shareholders will not be able to rely on the rights issue exemption to takeover restrictions as provided by item 10 of section 611 of the Corporations Act.
- (d) Accordingly, Eligible Shareholders should carefully consider the prohibitions set out in Part 6.1 of the Corporations Act when electing to take up their Entitlement under the Entitlement Offer. Any exercise of Loyalty Options must not result in the holder's voting power in the Company increasing:
 - (1) from 20% or below to more than 20%; or
 - (2) from a starting point that is above 20% and below 90%,unless the acquisition complies with an exception set out in section 611 of the Corporations Act.
- (e) In particular, if:
 - (1) the holder's voting power in the Company in the 6 months prior to the exercise of the Loyalty Options was at least 19%; and
 - (2) the exercise of Loyalty Options would not result in the holder increasing its voting power by more than 3%, then the acquisition of a relevant interest in voting shares pursuant to the exercise of Loyalty Options will not be a breach of the Corporations Act.

2.14 **Electronic Prospectus**

An electronic version of this Prospectus is available on the Company's website at www.bulletinresources.com.

The Entitlement and Acceptance Form may only be distributed together with a complete and unaltered copy of the Prospectus. The Company will not accept a completed Entitlement and Acceptance Form if it has reason to believe that the investor has not received a complete paper copy or electronic copy of the Prospectus or if it has reason to believe that the Entitlement and Acceptance Form or electronic copy of the Prospectus has been altered or tampered with in any way.

While the Company believes that it is extremely unlikely that in the offer period the electronic version of the Prospectus will be tampered with or altered in any way, the Company cannot give any absolute assurance that it will not be the case. Any investor in doubt concerning the validity or integrity of an electronic copy of the Prospectus should immediately request a paper copy of the Prospectus directly from the Company.

A completed and lodged Entitlement and Acceptance Form, or a payment made through BPAY or EFT, constitutes a binding offer to acquire Loyalty Options on the terms and conditions set out in this Prospectus and once lodged or paid, cannot be withdrawn. If the Entitlement and Acceptance Form is not completed correctly it may still be treated as a valid application for Loyalty Options. The Directors' decision whether to treat an acceptance as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final.

By completing your personalised Entitlement and Acceptance Form with the requisite Acceptance Money or making a payment by BPAY or EFT, you will also be deemed to have acknowledged, represented and warranted on behalf of each person on whose account you are acting that:

During the past three years Mr Muller has also served as a director of listed company, Atlantic Lithium Limited (ASX: A11).

5. Effect of the Entitlement Offer on the Company

5.1 Financial Position

To illustrate the effect of the issue on the Company, the pro-forma consolidated balance sheet has been prepared based on the half year financial report as at 31 December 2023.

The pro-forma balance sheet shows the effect of the Entitlement Offer and as if the Entitlement Offer (under this Prospectus) had been made on 31 December 2023.

The accounting policies adopted in preparation of the pro-forma consolidated balance sheet are consistent with the policies adopted and as described in the Company's financial statements for the half year ended 31 December 2023.

The significant effects of the Entitlement Offer (assuming the Entitlement Offer is fully subscribed and no Existing Options are exercised) will be to:

- (a) increase cash reserves by approximately \$206,600 to \$8,261,900 (after cash expenses of the Entitlement Offer which are estimated to be \$87,000) assuming a \$0.003 per Loyalty Option offer price;
- (b) no increase in the number of issued ordinary Shares; and
- (c) increase the number of Options on issue from 93,282,570 to 191,153,678 as a result of Loyalty Options issued pursuant to this Prospectus.

Notes:

- This figure is calculated by subtracting the costs of the Entitlement Offer (\$87,000) from the funds raised from the issue of Loyalty Options available under the Entitlement Offer (\$293,613) based on the following assumptions:
 - All Loyalty Options available under the Entitlement Offer (97,871,108) will be issued at the Offer Price of \$0.003 per Loyalty Option; and
 - The costs of the Entitlement Offer will not exceed \$87,000.

5.2 Capital Structure

The Share capital structure of the Company immediately following the Entitlement Offer, on the basis that the Entitlement Offer is fully subscribed (excluding rounding of Entitlements), will be as follows:

	Shares		Options	
	Number	%	Number	%
On issue at the date of this Prospectus	293,613,323	100%	93,282,570	49%

Total:	293,613,323	100%	191,153,678	100%

Notes:

- If any of the Existing Options are exercised prior to the Record Date, additional Loyalty Options will be issued under the Entitlement Offer under this Prospectus. If all Existing Options on issue as at the date of this Prospectus were exercised prior to the Record Date, the Company's issued Shares would increase by 93,282,570 resulting in a further 31,094,190 Loyalty Options being issued pursuant to this Prospectus. This would increase the Company's total Shares on issue after completion of the Entitlement Offer to 386,895,893 Shares.

As at the date of this Prospectus, the Company has a total of 93,282,570 Existing Options on issue:

Number of Options Issued	Holder	Exercise Price	Expiry Date
71,532,570	Listed Option holders	\$0.10	30 September 2024

3,250,000	Employees	\$0.185	30 November 2025
7,000,000	Directors	\$0.25	30 November 2026

The Option capital structure of the Company immediately following the Entitlement Offer, on the basis that the Entitlement Offer is fully subscribed and no Existing Options are exercised, will be as follows:

	Number
Existing Options on issue at the date of this Prospectus	93,282,570
Maximum number of Loyalty Options issued under the Entitlement Offer	97,871,108
Total	191,153,678

In the event of a Shortfall, Westar Capital, in consultation with the Directors, reserve the right to place the Shortfall Securities at their sole discretion subject to the provisions of the Underwriting Agreement, the Corporations Act and the ASX Listing Rules.

5.3 Substantial Shareholders

Based on available information, the following are details of those Shareholders who hold more than 5% of the Shares prior to the date of this Prospectus:

Substantial Holder	Number of Shares	%
Goldfire Enterprises Pty Ltd	70,586,271	24.04%

Prospectus investors should note that Goldfire Enterprises Pty Ltd is a related entity of Director Robert Martin. Mr Martin (or his associates) intend to take up his full Entitlement under the Entitlement Offer.

As no Shares are issued under the Entitlement Offer, there is no immediate impact on Shareholder interests in the Company as a result of the Entitlement Offer. Accordingly, on completion of the issue of securities under the Entitlement Offer, the interests of substantial Shareholders of the Company are expected remain as follows:

Substantial Holder	Number of Shares	%
Goldfire Enterprises Pty Ltd	70,586,271	24.04%

Goldfire Enterprises Pty Ltd will as a result of acceptance of its full Entitlement increase the number of Options its holds in the Company from 18,357,272 to 41,886,029.

The Directors confirm that no other person will acquire through participation in the Entitlement Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Entitlement Offer.

5.4 Effect on Control of the Company

As at the date of this Prospectus, the Underwriter does not hold a relevant interest in any of the Company's securities and accordingly, does not hold voting power in the Company.

Prospective investors should be aware that the extent to which securities are issued pursuant to the Underwriting Agreement could result in the Underwriter acquiring voting power in the Company. The Underwriter is not a related party of the Company for the purposes of the Corporations Act.

The Underwriting Agreement allows the Underwriter to enter into sub-underwriting agreements to pass on some or all of its obligations to subscribe for shortfall under the Entitlement Offer pursuant to the Underwriting Agreement.

In the event that there is a Shortfall under the Entitlement Offer, the sub-underwriting arrangements will have the effect of decreasing the number of Loyalty Options to be subscribed for by the Underwriter.

For illustrative purposes, the Underwriter's present relevant interest may change under several scenarios, depending on the level of participation by investors in the Entitlement Offer:

Event	Shares Held by Underwriter¹	Total Shares on Completion of the Entitlement Offer²	Voting Power of Underwriter (%)³	Loyalty Options Held by Underwriter
Date of Prospectus	Nil	Nil	Nil	Nil
Completion of the Entitlement Offer				
Entitlement Offer fully subscribed by Eligible Shareholders	Nil	293,613,323	Nil	Nil
Entitlement Offer 75% subscribed by Eligible Shareholders	Nil	293,613,323	Nil	24,467,777 ⁴
Entitlement Offer 50% subscribed by Eligible Shareholders	Nil	293,613,323	Nil	48,935,554 ⁴
Entitlement Offer 25% subscribed by Eligible Shareholders	Nil	293,613,323	Nil	73,403,331 ⁴
Entitlement Offer 0% subscribed by Eligible Shareholders	Nil	293,613,323	Nil	97,871,108 ⁴

Notes:

1. *Shares held by Underwriter pursuant to underwriting the Entitlement Offer under the Underwriting Agreement.*
2. *Includes 293,613,323 Shares on issue as at the date of this Prospectus.*
3. *As this Entitlement Offer is only for Loyalty Options there is no change in the voting power of the Company.*
4. *Does not take into account any Loyalty Options sub-underwritten by the Sub-Underwriter which would further reduce the relevant interest of the Underwriter.*

The above example scenarios show the potential effect of the underwriting of the Entitlement Offer by the Underwriter. However, it is unlikely that no investors will subscribe for Loyalty Options under the Entitlement Offer and as set out above, the Underwriter may enter into sub-underwriting agreements.

The Underwriter has advised that it has entered into a sub-underwriting for up to 10% of the Entitlement Offer, being a maximum of \$29,361.33. This sub-underwriter is Sonya Kathleen Poli <S K Poli Family A/C>, an entity controlled by Ms Sonya Poli (the wife of Mr Paul Poli) and is therefore a related party of the Company (but is not an associate of or controlled by Mr Poli).

The Directors and the Underwriter will ensure that the allocation of the Shortfall Securities will be undertaken in a manner so as not to exacerbate a potential unacceptable control event.

5.5 Dilution

As no Shares are issued under the Entitlement Offer, there is no immediate dilution of a Shareholder's interest in the Company as a result of the Entitlement Offer.

Assuming that all Loyalty Options are issued and exercised (and no other Existing Options are exercised), Shareholders who do not participate in the Entitlement Offer will have their holdings diluted. Given the terms of the Entitlement Offer, the maximum possible dilution to an Eligible Shareholder's interest in the Company would be 25%.

Additionally, the Entitlement Offer is not being extended to Shareholders with registered addresses outside of Australia and New Zealand and the holdings of those Shareholders in the Company will be diluted by approximately 25% in the event that all Loyalty Options are issued and exercised (and no other Existing Options are exercised).

6. Risk Factors

6.1 Introduction

There are risks which may impact on the operating and financial performance of the Group and, therefore, on the value of the Loyalty Options offered under this Prospectus. Some of these risks can be mitigated by the Group's systems and internal controls, but many are outside of the control of the Group and the Board. There can be no guarantee that the Company will achieve its stated objectives or that any forward-looking statements will eventuate. There are also general risks associated with any investment in shares.

More specifically, the risks are that:

- (a) the price at which the Applicant is able to sell the Loyalty Options is less than the price paid due to changes in market circumstances;
- (b) the Applicant is unable to sell the Loyalty Options;
- (c) the Company is placed in receivership or liquidation making it reasonably foreseeable that Shareholders could receive none, or only some of their initial investment; and
- (d) the Company fails to generate sufficient profit in order to pay dividends.

In the event of insolvency, the holders of fully paid ordinary shares would not normally be liable to pay money to any person. An exception could occur where a distribution, such as a dividend, has been made to Shareholders in circumstances where the Company was unable at that time to meet the solvency test set out in the Corporations Act. In that case, a liquidator may call for a return of such distributions.

Potential investors should therefore carefully consider all associated risks before applying for Loyalty Options under this Prospectus and should consider their personal circumstances (including financial and taxation issues) and seek advice from their stockbroker, accountant, financial or other professional advisers before deciding whether to invest.

A number of material risk factors which may adversely affect the Group and the value of the Loyalty Options offered under this Prospectus are set out in this section. This is not an exhaustive list and there may be other factors which have an adverse effect on the Group and the value of the securities offered under this Prospectus.

6.2 General Risks

- (a) General Economic Conditions

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that economic climate include the general level of economic activity, interest rates, inflation, supply and demand, industrial disruption and other economic factors. The price of commodities will also be of particular relevance to the Company. These factors are beyond the control of the Company and the Company cannot, with any degree of certainty, predict how they will impact on the Company.

- (b) Equity Market Risk

Securities listed on the stock market, and in particular securities of mining and exploration companies, including the Company, can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general.

General factors that may affect the market price of securities include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation (including any changes adopted to address climate change issues), changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

(c) Commodity Price and Exchange Risks

Any substantial decline in the price of gold could have a material adverse effect on the Company.

Furthermore, international prices of gold and lithium are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets

(d) Climate Change

The operations and activities of the Company are subject to changes to local or international compliance regulations related to climate change mitigation efforts, specific taxation or penalties for carbon emissions or environmental damage and other possible restraints on industry that may further impact the Company. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

Climate change may also cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns, incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

(e) Management Actions

Directors of the Company will, to the best of their knowledge, experience and ability (in conjunction with their management) endeavour to anticipate, identify and manage the risks inherent in the activities of the Company, but without assuming any personal liability for the same, with the aim of eliminating, avoiding and mitigating the impact of risks on the performance of the Company and its operations.

The success of the Company is currently largely dependent on the performance of its Directors and officers.

There is no assurance that the Company can maintain the services of its Directors and officers, or other qualified personnel required to operate its business. The loss of the services of these persons could have a material adverse effect on the Company and its prospects.

(f) Force Majeure

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(g) Ukraine and Gaza Conflicts

The current conflict between Ukraine and Russia (**Ukraine Conflict**) and Israel and Palestine (**Gaza Conflict**) is creating and is likely to continue to create impacts to the global economic markets that are unpredictable. The nature and extent of the effect of the Ukraine Conflict and the Gaza Conflict on the performance of the Company remains unknown.

The Directors are continuing to monitor the potential secondary and tertiary macroeconomic impacts of the unfolding events, including the changing pricing of commodity and energy markets and the potential of cyber activity impacting governments and businesses.

Further, any governmental or industry measures taken in response to the Ukraine Conflict and the Gaza Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving the relevant countries, may adversely impact the Company's operations and are likely to be beyond the control of the Company.

While the Company has not assumed any ongoing direct business with Ukrainian, Belarusian, Russian, Israeli or Palestinian companies, the indirect impacts of the conflicts may have unpredictable indirect consequences on the Company's future business. It is expected that the situation will continually evolve, and the consequences are therefore inevitably uncertain.

(h) Economic Conditions and Other Global Issues

General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities. General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.

(i) Litigation Risk

All industries, including the mining industry, may be subject to legal claims whether or not they have merit. The Company maintains Directors' and Officers' liability insurance. The Company has also provided an indemnity for each Director to the maximum extent permitted by law, against any liability for legal costs incurred in respect of liability incurred by them, as or by virtue of their holding office as, and acting in the capacity of, an officer of the Company, except where the liability arises out of conduct involving lack of good faith or in breach of the law.

Whilst the Company is not aware of any current or proposed litigation against it, the Company may be subject to litigation and other claims and disputes in the course of its business, including employment disputes, contractual disputes, indemnity claims and occupational and personal claims. Such litigation, claims and disputes, including the costs of settling claims and operational impacts, could cause the Company to incur unforeseen loss, costs or expenses (including loss, cost or expense that is not covered by insurance policies), could occupy a significant amount of management's time and attention and could materially adversely affect the Company's business, operating and financial performance. In addition, even if the Company was to ultimately prevail in any

such litigation, claim or dispute, it could suffer reputational damage, which could have an adverse effect on the Company's business, operating or financial performance.

(j) Occupation Health and Safety Risk

Workplace incidents may take place for various reasons, including as a result of non-compliance with safety rules and regulations. The Company may be liable for personal injuries or fatalities that are suffered by the Company's employees, contractors or other persons under applicable occupational health and safety laws. If the Company is liable under applicable laws, in whole or part, it may be subject to significant penalties. The Company may be subject to liability to pay compensation, and this may materially and adversely affect the Company's financial position and profitability. The potentially hazardous nature of mineral processing means that health and safety regulations impact the activities of the Company. Any injuries, accidents or other relevant events that occur on the Company's operation site could result in legal claims, potential delays or halt that could adversely impact the Company.

(k) Labour Shortages and Industrial Disputes

There is a risk that the Company may need to pay higher than expected costs to acquire or retain the necessary labour for its operations. This could result in a material and adverse increase in costs and/or development projects being delayed or becoming uneconomic and not proceeding as planned. The Company will also be exposed to the risk that industrial disputes may arise (for example, in relation to claims for higher wages or better conditions) which might disrupt some of its operations and lead to increases in project costs and delays.

(l) Cyber Risk

The integrity, availability and confidentiality of data within the Company's information and operational technology systems may be subject to intentional or unintentional disruptions (for example, from a cyber security attack). Given the current size of the Company's business, the Company engages a third party IT support company who have robust processes and technology, supported by specialist cyber security skills to prevent, detect, respond and recover from such attacks should one occur.

(m) Competition Risk

The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

(n) Legislative Change

Changes in government regulations and policies may adversely affect the financial performance or the current and proposed operations generally of the Company. It is possible that the current system of exploration and mine permitting in Western Australia may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(o) Unforeseen Expenses

While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

(p) Regulatory Risks

Legislative or regulatory changes in jurisdictions in which the Company operates, including property or environmental regulations, could have an adverse impact on the Company.

6.3 Risks Specific to an Investment in the Company

In addition to the general risks noted in section 6.2, Applicants should be aware of risks specific to an investment in the Company, which may include, but are not limited to those risks described below.

(a) Permit Risk

The rights to mineral permits carry with them various obligations which the holder is required to comply with in order to ensure the continued good standing of the permit and, specifically, obligations in regard to minimum expenditure levels and responsibilities in respect of the environment and safety. Failure to observe these requirements could prejudice the right to maintain title to a given area and result in government action to forfeit a permit or permits. There is no guarantee that current or future exploration permit applications or existing permit renewals will be granted, that they will be granted without undue delay, or that the Company can economically comply with any conditions imposed on any granted exploration permits.

The Company is currently appealing a decision by DEMIRS with the Appeals Convenor whereby the Company was advised that DEMIRS has refused to grant the NVCP permit application required to clear access for tracks and drill pads which would enable certain planned drilling to progress at Ravensthorpe Lithium Project.

The Appeals Convenor will consider the appeal and provide a report to the relevant Minister, whose decision is final and is not subject to appeal. There is no guarantee the Company will be successful with its appeal.

(b) Exploration and Development

By its nature, mineral exploration and development are high risk undertakings. While the Company has attempted to reduce this risk by selecting projects that are highly prospective, there is still no guarantee of success. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. It is impossible to ensure that the exploration or development programmes planned by the Company will result in profitable commercial mining operations. The circumstances in which a mineral deposit becomes or remains commercially viable depend on a number of factors. These include the particular attributes of the deposit, such as size, grade and proximity to infrastructure, as well as the Company successfully obtaining all necessary consents and approvals and the successful design, construction and operation of gathering, processing and transportation facilities. A combination of these factors may result in projects not being developed, or operations becoming unprofitable. Delays or difficulties in obtaining relevant approvals, or obtaining conditional or limited approvals, may interfere with the Company's operations which could materially impact the business, financial position and performance of the Company. Furthermore, should the Company be unable to secure new exploration areas and resources, there could be a material adverse effect on the Company's prospects for mineral exploration and its success in the future.

(c) Project Delay

To the extent that operational, construction and development activities are delayed for any of the production or development projects in which the Company is the operator or

is to be granted management rights, this may affect the total development costs and the timing and level of proceeds derived from the operation which may have a material adverse effect on the Company.

(d) Contractual Arrangements

The Company is a party to a number of material contracts and may be advanced in the finalisation of other contracts. Failure by any other party to a contract with the Company to comply with their obligations could have a material adverse effect on the Company. Additionally, the failure by the Company to finalise and execute contracts presently under negotiation or to finalise conditions arising under existing conditional material contracts could have a material adverse effect on the Company.

To the extent that a third party defaults in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal actions may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms.

(e) Environmental Risks

The Company's operations and projects are subject to the laws and regulations of all jurisdictions in which it has interests and carries on business, regarding environmental compliance and relevant hazards.

These laws and regulations set various standards regulating certain aspects of health and environmental quality and provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted. Significant liability could be imposed on the Company for damages, clean-up costs, or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of property acquired by the Company or its subsidiaries, or non-compliance with environmental laws or regulations.

The Company proposes to minimise these risks by conducting its activities in an environmentally responsible manner, in accordance with applicable laws and regulations and where possible, by carrying appropriate insurance coverage.

There is also a risk that the environmental laws and regulations may become more onerous, making the Company's operations more expensive. Amendments to current laws, regulations and permits governing operations and activities of mineral exploration companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new properties.

(f) Tenure and Native Title Risks

Interests in exploration and mining tenements in Australia are governed by State legislation and are evidenced by the granting of leases or licences. Each lease or licence is for a specific term and carries with its annual expenditure and reporting conditions as well as other conditions requiring compliance. These conditions include the requirement, for exploration licences, for reduction in the area held under licence from time to time unless it is considered that special circumstances apply. Consequently, the Company could lose title to, or its interest in, its tenements if licence conditions are not met or if expenditure commitments are not met.

It is possible that, in relation to tenements in which the Company has an interest or may acquire such an interest, there may be areas over which legitimate native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to obtain the consent of any relevant land owner, or to progress from the exploration phase to the development and mining phases of the operation, may be adversely affected.

It is possible that there will exist on the Company's mining tenements, areas containing sacred sites or sites of significance to Aboriginal people subject to the provisions of the *Aboriginal Heritage Act 1972* (WA), the *Northern Territory Aboriginal Sacred Sites Act 1989* (NT), the *Aboriginal Heritage Act 1988* (SA), the *Aboriginal Relics Act 1975* (Tas) or the *Aboriginal Cultural Heritage Act 2003* (Qld), or areas subject to the *Native Title Act 1993* (Cth) in Australia. As a result, land within the tenements may be subject to exploration, mining or other restrictions as a result of claims of Aboriginal heritage sites or native title.

(g) Resource and Reserve Estimates

Resource and reserve estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may alter when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates may change. Accordingly, the actual resources may materially differ from these estimates and assumptions and no assurances can be given that the resource estimates and the underlying assumptions will be realised. This could result in alterations to development and mining/extraction plans, which may, in turn, affect the Company's operations and ultimately the Company's financial performance and value.

(h) Production and Cost Estimates and Forecasts

The Company undertakes its business planning using a range of estimates and forecasts using information available to it at that point in time. These plans include estimates of future production and of the cash costs and capital costs of that production. The ability of the Company to achieve production targets, or meet operating or capital expenditure budgets or estimates cannot be assured. Actual costs of production may be impacted by factors such as variations in ore grade, mine operating conditions, including geotechnical conditions, metallurgical recoveries, labour costs and availability, as well as accidents, poor performance and general economic factors. A failure to realise estimated forecasts and plans could have a material adverse impact on the Company's financial and operating performance.

(i) Operational and Technical Risks

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades and/or resources in exploration and mining, operational and technical difficulties encountered in mining and extraction, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical or recovery problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes, and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

(j) Results of Studies

Subject to the results of exploration and testing programs to be undertaken, the Company may progressively undertake a number of studies in respect to its projects. These studies may include scoping, pre-feasibility, definitive feasibility and bankable feasibility studies.

These studies will be completed within parameters designed to determine the economic feasibility of the projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study).

Even if a study confirms the economic viability of the projects, there can be no guarantee that the projects will be successfully brought into production as assumed or within the estimated parameters in the feasibility study (e.g. operational costs and commodity prices) once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds.

The Sub-Underwriter has agreed to sub-underwrite up to 10% of the Entitlement Offer, being up to a maximum of \$29,361.33, in accordance with the terms of the Sub-Underwriting Agreement.

As at the date of this Prospectus, the Sub-Underwriter does not hold any Shares in the Company.

The maximum total shareholding of the Sub-Underwriter upon completion of the Entitlement Offer assuming the Sub-Underwriter receives its maximum sub-underwriting commitments is set out in the table below.

Sub-Underwriter	Shares Held as at the Date of this Prospectus ¹	Options Held as at the Date of this Prospectus ^{1, 2}	Voting Power as at the Date of this Prospectus (Undiluted) ¹	Options Held on Completion ^{1, 2, 3}	Shareholding on Completion (Undiluted) ¹	Voting Power on Completion (Undiluted) ^{1,}
Sonya Kathleen Poli <S K Poli Family A/C>	Nil	8,911,472	Nil	9,787,111 Loyalty Options 8,911,472 Existing Options	Nil	Nil

Notes:

1. This does not include the 3,870,000 Shares held by Mr Paul Poli + Mrs Sonya Kathleen Poli <The P Poli Super A/C> and does not include the 1,000,000 Shares and 122,224 BNRO Options exercisable at \$0.10, expiring 30 September 2024 held by Mrs Sonya Kathleen Poli <Matthew Dylan Poli A/C> and Mrs Sonya Kathleen Poli <Sarah Ashleigh Poli A/C> for and on behalf of Mr and Ms Poli's children.

 - c. 2,911,472 BNRO Options exercisable at \$0.10; expiring on 30 September 2024.
3. This assumes that the Sub-underwriter takes up the full amount of the sub-underwriting commitment of 10% of the Entitlement Offer.

As no Shares are issued under the Entitlement Offer, there is no immediate impact on Shareholder interests of the Sub-Underwriter in the Company as a result of the Entitlement Offer.

The Sub-Underwriting Agreement is on standard market terms with a 3% fee payable under the Sub-Underwriting Agreement.

Any Shortfall Securities issued to the Sub-Underwriter will be issued pursuant to ASX Listing Rule 10.12 (Exception 2) and accordingly, Shareholder approval will not be required for that issue.
