

# QUARTERLY REPORT TO 30 JUNE 2024

## HIGHLIGHTS

- **Received Primary Environmental Approval**

Audalia Resources Limited (ASX: **ACP**) is pleased to present its report for the June 2024 quarter.

### MEDCALF PROJECT

The Medcalf Project is a vanadium-titanium-iron project located some 470 kilometres south east of Perth near Lake Johnston, Western Australia. Together these licences cover a total area of 38 km<sup>2</sup>.

The Medcalf Project lies in the southern end of the Archaean Lake Johnston greenstone belt. This greenstone belt is a narrow, north-northwest trending belt approximately 110 km in length. ### Environmental Update

During the quarter, the Company received the primary environmental approval for the development of the Medcalf Project.

### Project Update

The Company is now focussed on securing the remaining regulatory approvals and permits required to support the development of the project, including mining approval for a mining, crushing and screening operation to produce a high grade titanium and vanadium ore to export to the Asian markets.

Audalia also plans to progress negotiations with potential offtake partners and seek to secure company or project level financing.

### Exploration Update

The Company plans to undertake a review of its exploration licences for the purposes of considering opportunities for its non-core tenements. The variable types of granites in the region give rise to the potential for lithium bearing pegmatites to be present. Exploration activities by other explorers in the area have identified lithium mineralisation.
