

Jameson Resources

*June 2024
Quarterly Update*

About Jameson Resources

Sustainable growth to maximise enterprise value

- Jameson is an ASX listed pure steelmaking coal developer
- Primary focus is its flagship asset, the Crown Mountain Hard Coking Coal (HCC) Project
- Actively considering steelmaking coal opportunities in developed countries that are development ready, or close to

ESG leadership key to success

- Engaging with all stakeholders to enable delivery of sustainable outcomes where possible
- Strong focus on reducing carbon intensity

Experienced Board and management team with proven track record

- Greenfield coal project approvals, development and operation
- Extensive regulatory and First Nations engagement experience
- Project financing, capital markets and M&A

Equity raising to progress Crown Mountain Project

OFFER STRUCTURE

JAL has received binding commitments to raise approximately \$5.25m at 3.0c per share via a two tranche share placement:

- **Tranche 1** - approximately \$1.6m raised by issue of approximately 53.3 million shares to existing shareholders and sophisticated investors under the Company's existing placement capacity
- **Tranche 2** – approximately \$3.65m raised by issue of approximately 121.7 million shares to existing shareholders and sophisticated investors subject to to shareholder approval at 2 August 2024 Extraordinary General
- Directors of the Company have committed to subscribe for the following shares in Tranche 2:
 - Nicole Hollows Chair 500,000 shares
 - Steve Van Barneveld, Non-Executive Director 200,000 shares; and
 - Michael Gray Managing Director 1,500,000 shares

The issue of these shares will also be subject to shareholder approval at the EGM

OFFER PRICE

- Fixed price of A\$0.03 per New Share, which represents:
 - 3% discount to the last closing price of A\$0.031
 - 3% discount to the 30-day volume weighted average trading price of A\$0.31

KEY DATES

- Tranche one placement settlement 14 June 2024 and allotment 18 June 2024
- Tranche two placement settlement subject to approval of shareholders at 2 August EGM

USE OF FUNDS

- Technical studies in response to Information Requests from Indigenous Nations, regulators and the public during the recent Public and Technical Review of the Crown Mountain Project's comprehensive Environmental Assessment application
- Progressing the Project's Environmental Effects Assessment and development of fish habitat and wildlife offset plans for submission to regulators
- Continued engagement with Indigenous Nations in relation to the EA process and ongoing negotiation of long-term engagement and partnership agreements
- NWP administration, project management and corporate overheads and JAL corporate costs.

Board Renewal – July 2024

Retirement

- On 30 June 2024, **Mr Joel Nicholls** retired as a Non-Executive Director of Jameson. Joel was a Director since Sep 2016 and had been instrumental in driving the progress of the environmental assessment application for the Crown Mountain Project and acted as an Executive Director prior to the appointment of our current Managing Director
- The Board wishes to thank Joel for his invaluable contribution to Jameson during his time as a Director.

Appointment

- On 1 July 2024, **Mr Mike McDonald**, KC joined the Board as a Non-Executive Director based in British Columbia, Canada
- Mike McDonald is of Cree descent, a member of the Peguis First Nation in Manitoba and was appointed Queen's Counsel (now King's Counsel) in 2017
- Throughout his professional life, he has been a trusted legal advisor to Indigenous and business leaders in and outside of the Indigenous context in forestry, energy, mining, construction, environmental, and real estate contexts with extensive experience with Environmental Assessments.

June Quarter Highlights

- **EA Review**

- All submissions received from the public and technical review of the Environmental Impact Statement and Environmental Assessment Application (EIS/A) for the Project (the Project)
- Initial responses to submissions completed and additional fieldwork and assessment to enable finalisation of responses to requests for additional information and/or clarification on effects assessment raised in those submissions
- Responses to all Information Requests expected by end of March quarter 2025

- **Indigenous Engagement** - continued progress of engagement with key Indigenous Nations to advance their assessment of the EIS/A and development of long-term relationships to support Project development
- **Customer Engagement** – update meetings on the Project’s development with key Indian, Japanese and Korean steelmakers.

Unique Investment Opportunity

- The Crown Mountain Hard Coking Coal Project continues to be the only steelmaking coal development project in Canada that has reached the joint Federal and Provincial Environmental Review Phase
- The location and scale of the Project provides a unique opportunity for the development of a premium steelmaking coal project with a substantially reduced environmental footprint than that of historical and current coal production in Canada and other key producer locations.

Crown Mountain – Proposed Development Timeline

- EA approval is critical path towards project development
- EA assessment is being coordinated by a unique Joint Assessment and Engagement Plan (JAEP) developed by Provincial and Federal Governments in conjunction with Indigenous Nations
- Development timeline estimated on best estimate approach to regulatory approvals with some contingency to provide above minimum statutory timelines specified in JAEP
- Timeline remains subject to progress of regulatory milestones and requests for extension can result in delays
- Timeline assumes no commitment to pre-development capital until after Final Investment Decision
- Opportunities may exist to compress timetable and bring forward first production subject to progress with offtake partners, project funding and undertaking pre-development capital works

Jameson Resources - *a new era in steelmaking coal*

To develop new projects needs the Right Project and a new way of doing business!
Jameson's overarching goal is to create a positive legacy for a new era for steelmaking coal

✓ The Right Commodity	<ul style="list-style-type: none"> • Steel - a critical enabler of a low carbon future - infrastructure, renewables, electric vehicles • Steelmaking coal - strong long term price forecasts due to falling production and lack of new supply
✓ The Right Product	<ul style="list-style-type: none"> • Premium low-volatile hard coking coal - sought by global steelmakers to accelerate decarbonisation through increased blast furnace
✓ The Right Project	<ul style="list-style-type: none"> • Shallow low strip-ratio open-pit resource • Small project footprint in self-contained catchment enables sustainable environmental management
✓ The Right Location	<ul style="list-style-type: none"> • Greenfield Project, Brownfield location - currently supplies c90% of Canadian steelmaking coal • Glencore/Nippon Steel spending US\$9 Billion to acquire the adjacent operations from Teck Resources
✓ The Right Infrastructure	<ul style="list-style-type: none"> • Direct access to existing established infrastructure with surplus capacity for exports • Exports via Vancouver provide direct access to all Asian markets
✓ The Right ESG Strategy	<ul style="list-style-type: none"> • Discrete catchment providing potential ability to recycle water, capture Selenium and manage water quality • Mine plan designed to enable accelerated rehabilitation from Year 2 of production • Strategy to establish net environmental benefit through regional vegetation and habitat offsets
✓ The Right Engagement	<ul style="list-style-type: none"> • Landmark Consent and Process Agreement with the primary Indigenous Nation in the Elk Valley • Engagement and Assessment Agreements with other Indigenous Nations
✓ The Right Team	<ul style="list-style-type: none"> • Jameson management team in Australia and Canada with substantial track record in regulatory processes, indigenous and stakeholder engagement and value creation in successful greenfield coal development, financing and operations

Key Risks

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, which may be higher than the risks associated with an investment in other companies. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. Many of these risk factors are beyond the control of the Company and its directors because of the nature of the business of the Company. The following summary, which is not exhaustive, represents some of the major risk factors which potential investors need to be aware of.

- **Investment risk** - There are a number of risks specific to the Company and of a general nature which may affect the future operating and financial performance of the Company and the value of an investment in the Company, including and not limited to the Company's capital requirements, the potential for shareholders to be diluted, risks associated with the reporting of resources estimates, budget risks, underwriting risk and operational risk. An investment in new shares is subject to known and unknown risks, some of which are beyond the control of the Company. The Company does not guarantee any particular rate of return or the performance of the Company.
- **Regulatory Approval risk** – Progress of the Crown Mountain Hard Coking Coal Project remains dependent on obtaining and maintaining regulatory approvals. Jameson is actively engaged with Federal and Provincial regulators, policymakers, Indigenous Nations and surrounding communities to ensure that potential regulatory changes and the impact on project development are well understood. Jameson actively engages and involves Indigenous Nations in the Crown Mountain Project's assessment including communicating the potential impacts and benefits of the Project.
- **Financial Sustainability risk** - Increasing regulatory requirements under the EA Application framework have resulted in a longer time than anticipated to prepare and lodge the EA Application which has resulted in the potential date for FID also being later than originally anticipated. This, together with the need for Jameson to fund 80% of costs until such time as Bathurst exercises its discretion in relation to the Tranche Two Option, means Jameson will need to raise additional funds to support the ongoing approval process and remain a going concern.
- **Climate Change risk** - The Crown Mountain Project is in the EA Approval phase. It is essential we understand the potential baseline impact on the climate from our operations, when commenced. Work is underway to assess the baseline and determine realistic and measurable strategies that could serve to reduce the carbon footprint of our Crown Mountain operations. The Company will be required to manage our environmental footprint and climate change and this will form part of the Company's risk management program.
- **Resource and Reserve Risk** - Resources estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Additionally, resource estimates may change over time as new information becomes available.
- **Production and Costs Estimates** - The Company's ability to achieve its expected operating and capital expenditure estimates cannot be assured. In particular, there are risks associated with the estimates detailed in Bankable Feasibility Study (July 2020) and Product Optimisation Study (Aug 2021). Since the BFS and Product Optimisation Study were completed, inflationary cost pressures would result in increased capital and operating costs. Similarly, there has been a substantial increase in forecast coal price in that period. This could impact the Company's ability to develop and or operate the proposed Project.
- **Development risk** – Possible future development of Crown Mountain is dependent on a number of factors including, but not limited to, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, and contracting risk from third parties providing essential services. There can be no guarantee the proposed developments and evaluations will be completed on time, on budget, or support an economic development of the proposed projects.
- **Cyber Security risk** - Jameson IT management is outsourced. The outsourced provider has systems in place to manage cyber-security risk and uses the Australian Cyber-Security Centre's Essential 8 approach as the framework to support mitigating this risk.
- **Commodity Price and Foreign Exchange risk** - The value of the Company's assets and the economic viability of its operations may be affected by fluctuations in commodity prices and exchange rates, specifically the USD denominated gold price and the AUD / USD exchange rate. These prices can fluctuate rapidly and widely and are affected by numerous factors beyond the control of the Company. These factors can affect the value of the Company's assets and the supply and demand characteristics of coal and may have an adverse effect on the viability of the Company's exploration and development activities, its ability to fund those activities and the value of its assets.

Disclaimer

This presentation has been prepared by the Company based on information from its own and third-party sources and is not a disclosure document. No party other than the Company has authorised or caused the issue, lodgement, submission, despatch or provision of this presentation, or takes any responsibility for, or makes or purports to make any statements, representations or undertakings in this presentation.

Except for any liability that cannot be excluded by law, the Company and its related bodies corporate, directors, employees, servants, advisers and agents (together, **Affiliates**) disclaim and accept no responsibility or liability for any expenses, losses, damages or costs incurred by you relating in any way to this presentation including, without limitation, the information contained in or provided in connection with it, any errors or omissions from it however caused (including by negligence), lack of accuracy, completeness, currency or reliability or you or any other person placing any reliance on this presentation, its accuracy, completeness, currency or reliability.

This presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. It is provided for information purposes and is not an invitation nor offer of shares or recommendation for subscription, purchase or sale in any jurisdiction. This presentation does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. Each recipient must make its own independent assessment of the Company before acquiring any shares in the Company.

NOT INVESTMENT ADVICE

Each recipient of the presentation should make its own enquiries and investigations regarding all information in this presentation including but not limited to the assumptions, uncertainties and contingencies which may affect future operations of the Company and the impact that different future outcomes might have on the Company and form their own views as to what information is relevant to such decisions and made their own investigations in relation to any additional information. The information in this presentation does not contain information which would be required in a disclosure document or prospectus prepared in accordance with the requirements of the Corporations Act. This presentation does not constitute investment or financial product advice (nor tax, accounting or legal advice) or any recommendation to acquire new Shares and does not and will not form any part of any contract for the acquisition of new Shares. Information in this presentation is not intended to be relied upon as advice to investors or potential investors and has been prepared without taking account of any person's individual investment objectives, financial situation or particular needs. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own investment objectives, financial situation and needs and seek legal, accounting and taxation advice appropriate to their jurisdiction. The Company is not licensed to provide financial product advice in respect of its securities.

FINANCIAL DATA

All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. The information contained in this presentation may not necessarily be in statutory format. Amounts, totals and change percentages are calculated on whole numbers and not the rounded amounts presented.

FORWARD LOOKING STATEMENTS AND FORECASTS

This presentation contains certain “forward-looking statements” and comments about future matters. Forward-looking statements can generally be identified by the use of forward-looking words such as, “expect”, “anticipate”, “likely”, “intend”, “should”, “could”, “may”, “predict”, “plan”, “propose”, “will”, “believe”, “forecast”, “estimate”, “target”, “outlook”, “guidance” and other similar expressions and include, but are not limited to, the outcome and effects of the Placement and the use of proceeds. Indications of, and guidance or outlook on, future earnings or expenditure or financial position or performance, are also forward-looking statements. You are cautioned not to place undue reliance on forward-looking statements. Any such statements, opinions and estimates in this presentation speak only as of the date hereof, are preliminary views and are based on assumptions and contingencies subject to change without notice, as are statements about market and industry trends, projections, guidance and estimates. Forward-looking statements are provided as a general guide only.

There can be no assurance that actual outcomes will not differ materially from these forward-looking statements. Any such forward looking statement also inherently involves known and unknown risks, uncertainties and other factors and may involve significant elements of subjective judgement and assumptions that may cause actual results, performance and achievements to be materially greater or less than estimated (refer to the “Key Risks” section of this presentation). These factors may include, but are not limited to, obtaining environmental approvals and the time and conditions attached to the same, changes in commodity prices, foreign exchange fluctuations and general economic factors, increased capital costs and operating costs, the speculative nature of exploration and project development (including the risks of obtaining necessary licenses and permits, diminishing quantities or grades of reserves and the ability to exploit successful discoveries), general mining and development operation risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, geological and geotechnical events, and environmental issues, the recruitment and retention of key personnel, industrial relations issues and litigation.

Except as required by law or regulation the Company undertakes no obligation to finalise, check, supplement, revise or update forward-looking statements or to publish prospective financial information in the future, regardless of whether new information, future events or results or other factors affect the information contained in this presentation.
