METALS
LIMITED**

ASX ANNOUNCEMENT

31 July 2024

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 30 June 2024

Horseshoe Metals Limited (ASX: HOR) (**Horseshoe, HOR or the Company**) is pleased to present its Quarterly Activities Report for the period ending 30 June 2024.

HIGHLIGHTS

- **During the quarter Horseshoe continued to advance its WA copper strategy to generate near-term cash flow**
- **Significant early cash flow opportunity from DSO sales of existing high-grade copper stockpiles**
- **Discussions nearing completion with potential copper concentrate offtake partners**
- **Non-dilutive offtake funding options being pursued**
- **Copper & Gold Surface Material resource assessment nearing completion**
- **New opportunities continue to be assessed with a detailed review of oxide and sulphide copper targets within 200km radius of Horseshoe Lights**
- **Horseshoe Lights Copper-Gold Project existing resource base includes:**
 - **Current in situ resource 128,000 t Cu metal @ 1.0% (0.5% cut-off)**
 - **Current M15 stockpile resource 2650 t Cu metal @ 1.1%**
 - **Current Flotation tailings resource 6,800 t Cu metal @ 0.48% and 15,300oz Au at 0.34 g/t**
- **Development and sale options for gold only stockpiles under review**
- **Appointment of Mr Peter Walker as a Non-Executive Director and resignation of Mr Alan Still as a Non-Executive Director**

Commenting on Horseshoe's copper strategy, Director Kate Stoney said: "Horseshoe continues to advance its WA copper strategy, with our recent focus on finalising a copper concentrate offtake agreement that will facilitate the start-up of our DSO operation. We have been encouraged by the quality of the groups who have demonstrated an interest in securing the copper concentrate offtake from Horseshoe Lights and we look forward to concluding this process as quickly as possible."

Our team also continues to actively assess several new copper opportunities located within 200km of HSL, and we believe there is strong potential for further consolidation of quality assets and targets in this region.

We also welcomed Mr Peter Walker to the Board during the quarter and his experience and expertise will add significant value as we scale up our operations. The Board would also like to thank Mr Alan Still for his contributions during his tenure. We look forward to updating the market on our copper strategy as activity increases over the coming months."

Exploration & Development Summary

Western Australia

Horseshoe Lights Copper-Gold Project, Western Australia

(HOR: 100%)

Project Summary

The Horseshoe Lights Copper-Gold Project is the original Cu/Au VMS discovery in the Bryah Basin and is located approx. 60 km west of DeGrussa Copper Mine owned by Sandfire Resources (ASX: SFR).

Past production from Horseshoe Lights includes around **316,000 oz Au & 55 kt Cu metal** in two phases of mining and the deposit contains a current in situ resource **128 kt Cu metal @ 1.0% (0.5% cut-off) and 36,000 oz Au** (refer Table 1).

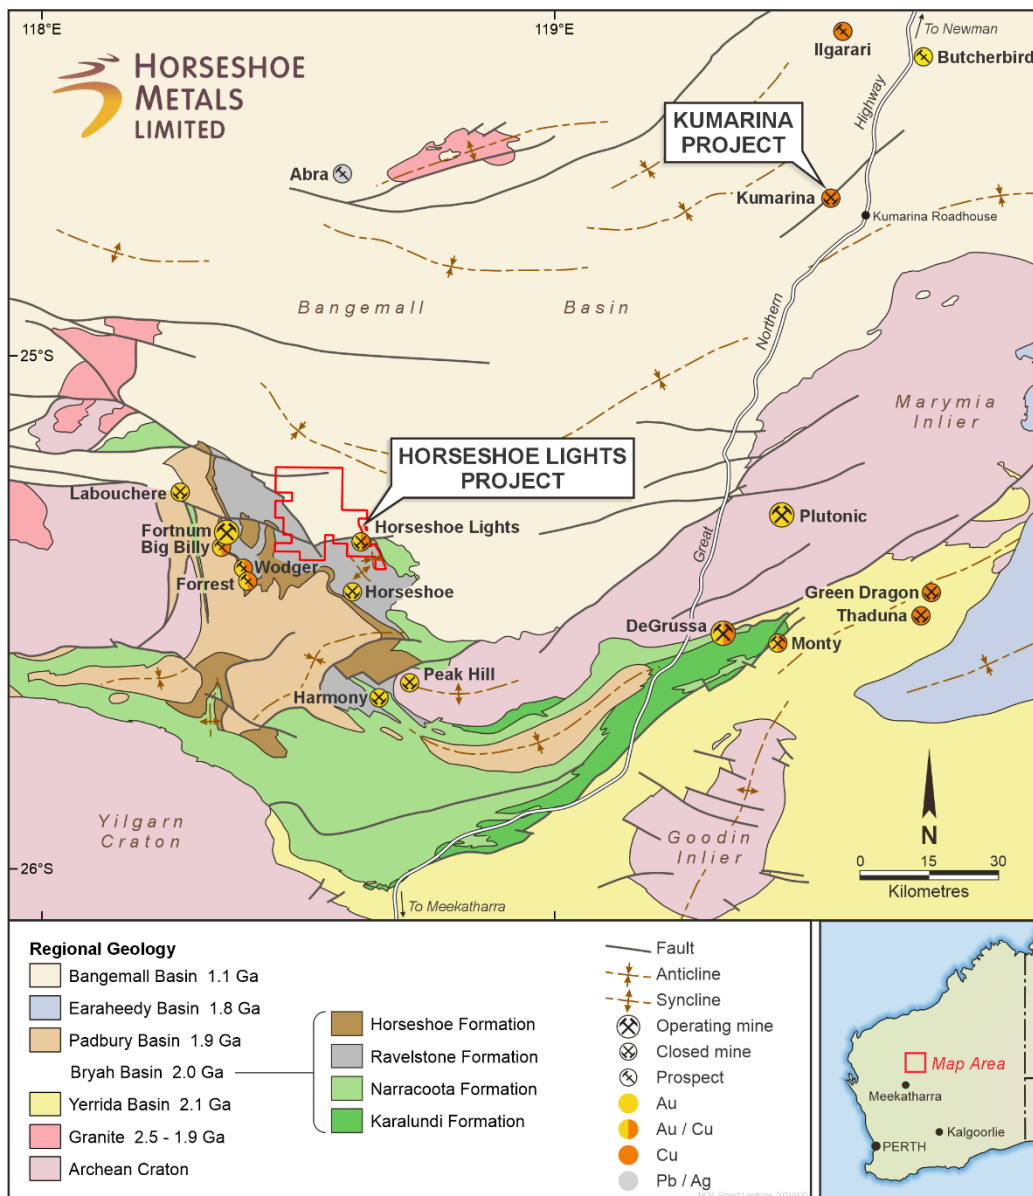

Figure 1: Location of Horseshoe Lights and Kumarina Projects, WA

June Quarter Activity Update: Horseshoe to pursue early cashflows from DSO copper

During the June quarter, Horseshoe continued to advance several key workstreams that will support the re-commencement of development activities at the Horseshoe Lights ('HSL') copper-gold system in WA.

Horseshoe's technical team also continued to assess several project opportunities located within an approx. 200km radius from the Horseshoe Lights Project, with a view to potentially consolidating new high quality regional assets and exploration targets.

A summary of the key activities completed during the quarter and planned activities for Q3 and Q4 2024 is outlined below.

Copper Surface Materials Discussion

Positive Offtake Discussions Nearing Completion

Horseshoe is pleased to report that positive discussions continue to be held with parties that have expressed interest in offtake of the DSO and potential future concentrates, including copper cement, produced at HSL.

In addition, non-dilutive staged offtake funding is being considered to provide capital for the proposed development sequence.

Surface Material Resource Estimate Underway

Significantly the copper phase of mining included early DSO copper production that has left subgrade and rehandle DSO material around the site. Areas identified and assessed as having future DSO potential include, M15, Subgrade and C20 stockpiles along with rehandle and surface pimple dumps located on the North Waste dump, Gold tailings and Southern low-grade stockpile (Figure 1 – see release dated 31 October 2023). The coarse material is easily scavenged utilising loaders and excavators equipped with sieve buckets.

A surface material resource assessment utilising historic sampling, drilling and detailed drone survey data is nearing completion. The assessment includes all surface copper and gold stockpiles, dumps and vat material.

Site activities are expected to re-commence this quarter as Horseshoe prepares for the start-up of its DSO operation.

HSL Copper Strategy: Next steps

The following activities are planned to further investigate the surface materials:

- *Additional RC and/or auger drilling of the North Dump, gold stockpiles, copper Low-grade oxide and Low-grade sulphide stockpile stockpiles*
- *Auger drilling of the gold and copper rehandle areas*
- *Acid leaching test work on oxide copper stockpiles and targets*
- *Gravity recovery test work on Copper Flotation and CIP tailings*
- *Detailed assessment of the recovery of high-grade chalcocite, digenite and covellite DSO remnant from the historic mining phases via mechanical scavenging and/or heavy media separation.*

Updates on the above activities will be provided as they progress this quarter.

Horseshoe West, Western Australia

(HOR: 100%)

The Horseshoe West tenements are located approximately 1.5 km west of the Company's existing Horseshoe Lights copper-gold deposit and are considered prospective for Horseshoe Lights style Volcanogenic Massive Sulphide (VMS) copper-gold and shear-zone hosted gold mineralisation.

Evaluation of existing geologic mapping and geophysics data sets is continuing with a view to determining priority copper and gold targets.

No active field work was undertaken during the June quarter.

Kumarina Copper Project, Western Australia

(HOR: 100%)

The Kumarina Project consists of a mining lease and mining lease application covering approximately 3.2 km². The Project is located 95 km north of Sandfire Resources NL's DeGrussa copper-gold mine in the Gascoyne region of Western Australia. The Company has applied for a mining lease (MLA52/1078) to cover the Rinaldi resource, contiguous with M52/27. The Company continues to progress a Project Agreement as part of the application process with the Native Title Party and its lawyers.

No active field work was undertaken during the June quarter.

South Australia

Glenloth Gold Project, South Australia

(EL6301 and rights to explore and develop ML5848, ML5849, ML5885 & MPL62)

The Glenloth Project is located in the Central Gawler Craton of South Australia. The project consists of a single exploration licence, EL 6301, which comprises two areas totalling 107 km². The larger eastern block *Glenloth* covers 81 km² and includes the Glenloth Goldfield and part of the Harris Greenstone Belt. The smaller western block *Old Well* takes in the northern trend of the 1.5M oz Tunkillia gold deposit located 6 km to the south, under development by Barton Gold Holdings Ltd (ASX:BGD). The Company also holds the rights to explore and develop ML 5848, ML 5849, ML 5885 and MPL 62 within the eastern block of EL 6301.

At Glenloth gold occurrences typically consist of relatively thin (ca. 1 m width), high-grade mineralised quartz veins, hosted by sheared and fractured Archaean to Paleoproterozoic Glenloth Granite, and contacts with dolerite dykes. A shallow Hiltaba Suite batholith has been proposed as the source of mineralisation. Six kilometres south of Old Well, the Tunkillia deposits (Areas 223, 191, 51) are characterised by a large hydrothermal system associated with the Yarlbrinda Shear Zone, which passes into the Old Well tenure.

Following on from the technical evaluation of the "Old Well" area completed last quarter consideration is being given to potential options with respect to advancement of this compelling target. No active field work was undertaken during the June quarter.

Corporate

The Company's Annual General Meeting was held on 30 May 2024, with all resolutions included in the Notice of Meeting being passed by shareholders.

During the quarter, the Company appointed Mr Peter Walker as a Non-Executive Director of the Company (refer ASX release 13 June 2024). Mr Walker is a highly experienced metallurgist with over 45 years of experience in project design, project development and operational roles, working across multiple commodities and internationally.

Listing Rule 5.3.5 disclosures

The amount of payments to related parties and their associates disclosed in section 6.1 of Appendix 5B accompanying this report was \$3,000. This consisted solely of payments of non-executive director's fees. Other payments to related parties and their associates have been deferred to later quarters as the Company seeks to preserve capital.

The Board of Directors of HOR has authorised this announcement to be given to the ASX.

About Horseshoe Metals Limited

Horseshoe Metals Limited (ASX:HOR) is a copper and gold-focused company with a package of tenements covering approximately 500 km² in the highly prospective Peak Hill Mineral Field, located north of Meekatharra in Western Australian and mineral interests in South Australia. The Company manages the Horseshoe Lights Project and the Kumarina Project in Western Australia, and the Glenloth Gold Project in South Australia.

About the Horseshoe Lights Project

The Horseshoe Lights Project includes the historic open pit of the Horseshoe Lights copper-gold mine which operated up until 1994, producing over 300,000 ounces of gold and 54,000 tonnes of contained copper including over 110,000 tonnes of Direct Shipping Ore (DSO) which graded between 20-30% copper.

The Horseshoe Lights ore body is interpreted as a deformed Volcanogenic Hosted Massive Sulphide (VMS) deposit that has undergone supergene alteration to generate the gold-enriched and copper-depleted cap that was the target of initial mining. The deposit is hosted by quartz-sericite and quartz-chlorite schists of the Lower Proterozoic Narracoota Formation.

Past mining was focused on the Main Zone, a series of lensoid ore zones, which passed with depth from a gold-rich oxide zone through zones of high-grade chalcocite mineralisation into massive pyrite-chalcopyrite. To the west and east of the Main Zone, copper mineralisation in the Northwest Stringer Zone and Motters Zone consists of veins and disseminations of chalcopyrite and pyrite and their upper oxide copper extensions. The table below summarises the total Mineral Resources for the Horseshoe Lights Project at the reporting date.

TABLE 1 HORSESHOE LIGHTS PROJECT SUMMARY OF MINERAL RESOURCES as at 30 June 2024									
Location	Category	Tonnes (Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Cu metal (tonnes)	Au metal (oz)	Ag metal (k oz)	
In-situ Deposit (0.5% Cu cut-off grade)	Measured	1.73	1.04	0.0	0.5	18,000	1,900	28.8	
	Indicated	2.43	0.95	0.0	0.7	23,200	3,400	52.2	
	Inferred	8.69	1.01	0.1	2.6	87,400	30,700	712.4	
	Total	12.85	1.00	0.1	1.9	128,600	36,000	793.4	
Flotation Tailings	Inferred	1.421	0.48	0.34	6.5	6,800	15,300	294.8	
M15 Stockpiles	Inferred	0.243	1.10	0.17	4.7	2,650	1,300	36.7	
Note: At 0% Cu cut-off grade unless otherwise stated						TOTAL	138,050	52,600	1,124.9

The above Mineral Resource Estimates all meet the reporting requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

About the Kumarina Project

The copper deposits at the Kumarina Project were discovered in 1913 and worked intermittently until 1973. The workings extend over nearly 5km as a series of pits, shafts and shallow open cuts. At the main Kumarina Copper Mine, the workings are entirely underground with drives from the main shaft extending for some 200 m in the upper levels and for about 100 m in the lower levels at a depth of 49m below surface.

Incomplete records post-1960s make it difficult to estimate the total copper production from the workings. However, indications are that the Kumarina Copper Mine was the second largest producer in the Bangemall Basin group of copper mines. Recorded production to the late 1960s is 481 t of copper ore at a high-grade of 37.0% Cu and 2,340 t at a grade of 17.51% Cu. An initial Mineral Resource Estimate for the Rinaldi deposit was completed by the Company in 2013 (see 30 June 2013 Quarterly Report announced on 31 July 2013). The total Measured, Indicated and Inferred Mineral Resource Estimate at the reporting date is shown in the table below.

TABLE 2
KUMARINA PROJECT
SUMMARY OF MINERAL RESOURCES
as at 30 June 2024

Location	Category	Tonnes (t)	Cu (%)	Cu metal (tonnes)
Rinaldi Prospect (0.5% Cu cut-off)	<i>Measured</i>	415,000	1.46	6,100
	<i>Indicated</i>	307,000	1.16	3,500
	<i>Inferred</i>	114,000	0.9	1,000
	Total	835,000	1.3	10,600

The Mineral Resource Estimate meets the reporting requirements of the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve

Forward Looking Statements

Horseshoe Metals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Horseshoe Metals Limited, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever. This announcement may contain forward-looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

Competent Persons Statement

The information in this report that relates to the Exploration Results and Mineral Resources at the Horseshoe Lights and Kumarina Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Geoscientists. Mr Fotios is a consultant to Horseshoe Metals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)’. Mr Fotios consents to the inclusion of the data in the form and context in which it appears.

The information in this report that relates to the Horseshoe Lights Project In-situ Mineral Resources is based on information originally compiled by Mr Dmitry Pertel, an employee of CSA Global Pty Ltd, and reviewed by Mr Fotios. This information was originally issued in the Company’s ASX announcement “40% increase in Copper Resource at Horseshoe Lights Copper/Gold Project”, released to the ASX on 5 June 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Horseshoe Lights Project surface stockpile Mineral Resources is based on information compiled by a previous employee of Horseshoe Metals Limited and reviewed by Mr Fotios. The information was previously issued in announcements released to the ASX on 26 February 2015 and 9 March 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Kumarina Project (Rinaldi Prospect) Mineral Resources is based on information compiled by or under the supervision of Mr Robert Spiers, an independent consultant to Horseshoe Metals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Fotios. The information was originally issued in the Company’s ASX announcement “Horseshoe releases Maiden Mineral Resource Estimate for Kumarina”, released to the ASX on 4 March 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
