

Patriot Renames the Corvette Project Shaakichiuwaanaan (shaa-gi-chi-waa-naan) Project

July 31, 2024 – Vancouver, BC, Canada

August 1, 2024 – Sydney, Australia

Highlights

- Patriot is proud to announce the re-naming of the Corvette Project to the Shaakichiuwaanaan Project (pronounced Shaa-gi-chi-waa-naan), as proposed by the Chisasibi elders and members of the Tallyman's family.
- A logo has been developed for the Project, designed in collaboration with the Tallyman's family.
- Since 2022, more than 200 communication activities have taken place with various Chisasibi leadership, land users, community members, entrepreneurs and organizations, reflecting a high level of broad community participation in consultation processes to date.
- The contribution of Cree community members to direct site activities includes drilling operations, civil works, camp operations and road construction. More than 105 First Nations workers have worked on the Project to date during 2024.
- Environmental baseline data collection is conducted by a Cree enterprise (Niigaan), with Cree field staff.
- The Grand Opening of Patriot's office in Chisasibi will take place in August 2024.
- Patriot remains on schedule for a Mineral Resource Estimate update for the Shaakichiuwaanaan Project in August 2024, including both the CV5 and CV13 spodumene pegmatites.

Alix Drapack, Patriot's Executive Vice President of ESG, comments: *"The decision to change the name of the Corvette Project to the Shaakichiuwaanaan Project reflects Patriot's commitment to build a strong relationship with the Cree Nation of Chisasibi and the Tallyman's family. The Company acknowledges, highly values and respects Cree traditional territory and their connection to the land."*

"Introducing a Cree language reference to the Project name presents a great opportunity to share Cree culture through the storyline the name represents. In this way, Patriot can further share Cree culture with the broader Patriot stakeholder community," she added.

Patriot Battery Metals Inc. (the "Company" or "Patriot") (TSX: PMET) (ASX: PMT) (OTCQX: PMETF) (FSE: R9GA) is pleased to announce the renaming of the Corvette Project to the Shaakichiuwaanaan Project. The Cree word, Shaakichiuwaanaan, means climbing a hill or a mountain and refers to three hills/mountains in the vicinity of the Project.

The 100%-owned Shaakichiuwaanaan Property (the “Property” or “Project”) is located in the Eeyou Istchee James Bay region of Quebec. Specifically, all of Patriot’s drill exploration activities have been located on trapline CH39, on the traditional territory of the Cree Nation of Chisasibi.

Photo looking north-west of CV5 showing the three mountains/hills – the basis of the word Shaakichiuwaanaan.

More than 200 communication activities have taken place with various Chisasibi leadership, land users, entrepreneurs, organizations and community members since 2022. Patriot’s ESG team visits the community in person, approximately every six weeks. During several of the communications sessions with the Tallyman’s family and the community-at-large, the idea of renaming the Project was both suggested and discussed. Patriot asked for input from the Tallyman and the elders of the community and the recommendation was to use the Cree word, Shaakichiuwaanaan, in reference to the Project.

Building on this recommendation, a logo has been developed for the Project in collaboration with the Tallyman’s family, including symbols important to the Cree such as a goose, a teepee and Cree syllabics.

Patriot Battery Metals Inc. is a hard-rock lithium exploration company focused on advancing its district-scale 100% owned Shaakichiuwaanaan Project (formally known as the Corvette Project) located in the Eeyou Istchee James Bay region of Quebec, Canada, and proximal to regional road and powerline infrastructure. The Shaakichiuwaanaan Project hosts the CV5 Spodumene Pegmatite with a current Mineral Resource Estimate that ranks as the largest lithium pegmatite resource in the Americas based on contained lithium carbonate equivalent (LCE), and one of the top 10 largest lithium pegmatite resources in the world. Additionally, the Shaakichiuwaanaan Project hosts

multiple other spodumene pegmatite clusters that remain to be drill tested, as well as significant areas of prospective trend that remain to be assessed.
