What is the big problem?

The challenge

- **Overwhelming volume of data:** over 24 billion hours of CCTV video footage are generated every day, creating an enormous data challenge
- **Missed events:** The vast amount of footage and limited human focus and availability can lead to important events being missed
- **Restricted number of security personnel:** Limited number of security guards available, which can constrain the ability to respond to incidents quickly

How does our AI fix the big problem?

The solution

We deliver advanced event detection, reducing false alarms and enhancing security efficiency.

- **Self-learning AI:** Switch icetana on, 24 hours later the AI is working and continuously improving. No configuration needed
- **Real-time event detection:** Stay ahead of security incidents with immediate alerts
- **Scalability:** Ideal for large networks and multiple sites, surpassing competitors in large-scale deployment efficiency

Video surveillance

Market size and growth*:

CAGR: 13.7% (2024-2028)

1 billion+ CCTV cameras 2024, over 6 billion in 2030
