About icetana AI

icetana AI produces AI video analytics software to help security and IT teams manage large scale surveillance networks.

Security operators often have thousands of cameras to monitor and IT teams need to configure these camera streams. icetana AI offers a practical solution.

Its AI technology learns what's normal for each camera, identifying and reporting any unusual or potentially dangerous events in real time.

Designed to handle large scale surveillance networks, icetana AI's technology eliminates the need for individual camera stream configurations or rule-setting.

The company provides AI video analytics software, hardware, and cloud solutions, serving diverse industries including guarding services, retail, hospitality, public safety, transportation, education, and large enterprise.

icetana AI has a global footprint, with its AI solution used across 30+ clients, 75+ sites, and 16,000+ cameras and 15+ countries.
