

LEADING GOLD EXPLORER

Exploration Focused - Discovery Driven

Corporate Presentation

3 September 2024

ASX: NVO / TSX: NVO / OTCQX: NSRPF

www.novoresources.com

Cautionary Statement

Nature of this document: This presentation is of a summary form only and therefore contains general background information about Novo Resources Corp (**Novo** or the **Company**) which may not be complete. It should be read in conjunction with, and full review made of, the Company's continuous disclosure documents lodged under the Company's profile on SEDAR+ at www.sedarplus.ca and on www.asx.com.au.

Not an offer: This presentation is for information purposes only and does not constitute an offer or invitation to sell or any solicitation of an offer to buy any securities in the Company. This presentation and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this presentation would be unlawful pursuant to securities or other relevant laws of that jurisdiction. By accepting, accessing or reviewing this presentation you represent and warrant that you are entitled to receive such presentation in accordance with applicable laws.

Not financial product advice: This presentation does not purport to contain all of the information that a prospective investor may require, and it is not intended to provide any legal, tax or investment advice. You should consider obtaining professional advice and carrying out your own independent investigations and assessments of the information in this presentation (including any assumptions) before acting.

Forward-Looking Statements: This presentation includes certain statements that constitute *forward-looking information* or *forward-looking statements* within the meaning of Canadian, United States and Australian securities laws (collectively, **forward-looking statements**). These forward-looking statements represent the Company's intentions, projections, expectations or beliefs concerning, among other things, future operating and exploration results or the Company's future performance. These forward-looking statements speak, and the presentation generally speaks, only at the date hereof. The projections, estimates and beliefs contained in such forward-looking statements necessarily involve known and unknown risks and uncertainties, and are necessarily based on assumptions, which may cause the Company's actual performance, results and achievements in future periods to differ materially from any express or implied estimates or projections. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Relevant factors which may affect the Company's actual performance, results and achievements include changes in commodity price, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, diminishing quantities or grades of reserves, political and social risks, changes to laws and regulations, environmental conditions, and recruitment and retention of personnel. These statements appear in a number of places in this presentation and include statements regarding the intent of the Company, or the beliefs or current expectations of the Company's management. When used in this presentation, words such as "intends", "expects", "will be", "underway", "targeted", "planned", "objective", "expected", "potential", "continue", "estimated", "would", "subject to" and similar expressions are intended to identify these forward-looking statements.

Cautionary Note Concerning Technical Disclosure and U.S. Securities Laws: This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. Unless otherwise indicated, all exploration results and resource and reserve estimates included in this presentation have been prepared in accordance with National Instrument 43-101 *Standards of Disclosure for Mineral Projects (NI 43-101)*. The definitions used in NI 43-101 are incorporated by reference from the Canadian Institute of Mining, Metallurgy, and Petroleum (**CIM** - Definition Standards adopted by CIM Council on May 10, 2014 (**CIM Definition Standards**)).

The U.S. Securities and Exchange Commission (**SEC**) adopted amendments to its disclosure rules to modernize the mineral property disclosure requirements for issuers whose securities are registered with the SEC under the Securities Exchange Act of 1934, as amended. These amendments became effective February 25, 2019 (**SEC Modernization Rules**) with compliance required for the first fiscal year beginning on or after January 1, 2021. The SEC Modernization Rules replace the historical disclosure requirements for mining registrants that were included in SEC Industry Guide 7, which has been rescinded. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources". Investors are cautioned that while the above terms are "substantially

similar" to the corresponding CIM Definition Standards, there are differences in the definitions under the SEC Modernization Rules and the CIM Definition Standards. Accordingly, there is no assurance any mineral resources that the Company may report as "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had the Company prepared mineral resource estimates under the standards adopted under the SEC Modernization Rules. Investors are also cautioned that while the SEC will now recognize "measured mineral resources", "indicated mineral resources" and "inferred mineral resources", investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as mineral reserves. Accordingly, investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources" or "inferred mineral resources" that the Company reports are or will be economically or legally mineable. Further, "inferred mineral resources" have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, investors are also cautioned not to assume that all or any part of the "inferred mineral resources" exist. In accordance with Canadian securities laws, estimates of "inferred mineral resources" cannot form the basis of feasibility or other economic studies, except in limited circumstances where permitted under NI 43-101. For the above reasons, information contained in this presentation describing the Company's mineral deposits may not be comparable to similar information made public by United States companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder. Similar principles will apply in respect to any reporting under the Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (the **JORC Code**) (see below).

Technical Information: Dr. Quinton Hennigh (P.Geo.), Mrs. Karen (Kas) De Luca (MAIG), Dr. Christopher Doyle (MAIG), Mr. Iain Groves (MAIG), and Mr. Alwin Van Roij (MAIG, MAusIMM) are the qualified persons, as defined in NI 43-101, who have reviewed, approved and verified the technical content of this presentation. They have sufficient experience, which is relevant to the style of mineralisation and activities being undertaken to qualify as a Competent Person as described by the JORC Code, 2012. They consent to the inclusion in this presentation of the matters based on their information in the form and context in which it appears.

Dr. Hennigh is the Company's Non-Executive Co-Chairman and a director. Mrs. De Luca is the Company's General Manager – Exploration. Dr. Doyle is the Company's Exploration Manager – Victoria. Mr. Groves is the Company's Principal Geologist - Technical & Generative. Mr. Van Roij is the Company's Exploration Manager – Pilbara. **Disclaimer:** No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this document, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom. The Company is under no obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

Reference to market announcements: Novo confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements referenced in this corporate presentation.

Unverified information: This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Acknowledgement of Country

We acknowledge the Traditional Owners of the land upon which we operate; the Palyku, Nyamal, Kariyarra, Ngarluma, Yinhawangka, Yindjibarndi, Yaburara and Mardudhunera, Puutu Kunti Kurrama people, the Pinikura peoples, and the Dja Dja Wurrung people.

We recognize their unique cultural heritage, beliefs and connection to these lands, waters and communities.

We pay our respects to all members of these Indigenous communities, and to Elders past, present and emerging. We also recognize the importance of continued protection and preservation of cultural, spiritual and knowledge practices.

As we value treating all people with respect, we are committed to building successful and mutually beneficial relationships with the Traditional Owners throughout our area of operations.

Exploration Focused – Discovery Driven

- ✓ Strong balance sheet, cash of A\$11.7M (C\$10.7M), and investments of ~A\$46.2M (C\$42.1M)
- ✓ Established growth strategy focused on discovering standalone gold projects with > 1 Moz development potential
- ✓ Dual listed on ASX and TSX with long term supportive shareholders
- ✓ Diverse and exciting portfolio of gold exploration and development assets across Western Australia and Victoria, led by the flagship Becher Project (Western Australia)
- ✓ Egina Joint Venture with De Grey Mining (ASX:DEG) is the most advanced and compelling growth opportunity centered around the Becher Project with De Grey to invest A\$25 million on exploration within 4 years
- ✓ Dedicated and disciplined project generation program underway with a focus on identifying assets that expand the Company's exploration portfolio in scale and quality
- ✓ Highly credentialed and experienced management and Board focused on delivering long-term shareholder value
- ✓ Novo is well-positioned for exploration success with the Pilbara (Western Australia) and Bendigo Tectonic Zones (Victoria) leading and proven tier-one gold provinces in Australia

Fundamentals for Gold Have Never Been Stronger

- The price and fundamentals of gold continue to strengthen in 2024, with spot price currently trading above US\$2,500
- Since the start of 2024, the gold price has increased by ~23%
- During times of strong inflation and rising interest rates, gold is seen as a leading commodity investment
- Recognised as a safe-haven investment in times of **geopolitical uncertainty**
- Australia is a **tier-one jurisdiction for early gold explorers**, known to have some of the best deposits in the world
- Novo has an **extensive gold exploration portfolio**, a strong balance sheet, and is in excellent position to benefit from increased value and investment in the gold sector

Focused on Delivering Shareholder Value

Drill rig at Nunyerry North (July 2024).

Portfolio Key to Shareholder Value

BALLA BALLA GOLD PROJECT

Emerging project focused on the Sholl Shear Zone

- Fertile structural setting covering a complex flexure in the Sholl Shear Zone
- Geophysical and satellite data sets delineated targets with AC drilling planned in Q4 2024

EGINA JV¹

Partnering with De Grey in the Egina Gold Camp

- RC and AC drilling with two rigs underway
- **Key results include 8 m @ 4.74 g/t Au (incl 3 m @ 11.88 g/t Au) from 9 m at Lowe**

KARRATHA DISTRICT

New drill targets defined

- Advancing several drill targets, including North Whundo, Railway Bore and East Well
- Maiden RC drilling program for 3,500 m is planned for early 2025

EAST PILBARA²

Expanding exploration into the East Pilbara

- Reconnaissance programs revisit porphyry and intrusion related targets at Miralga
- Rock chip samples at Gully Washer return peak results of **14.8 g/t Au, 10,083 g/t Ag, 3.8% Cu, 28.3% Pb and 3.6% Zn**

NUNYERRY NORTH³

Phase 2 drilling extends high grade Main Lode zone

- Phase 2 drill program for ~4,000 m drill metres completed in July 2024³
- **Standout results include 13 m @ 2.68 g/t Au, 11 m @ 2.20 g/t Au, and 17 m @ 1.85 g/t Au**

BELLTOPPER GOLD PROJECT⁴

Targeting Fosterville 'style' mineralization

- 2024 diamond drill program completed with six holes for 2,529 m, testing high priority targets
- **Key results include 5.6 m @ 3.14 g/t Au (incl. 2 m @ 11.15 g/t Au), 2 m @ 15.2 g/t Au, and 4.6 m @ 2.64 g/t Au**

Perth, WA, Australia

ESG Supports Exploration Delivery¹

Novo is committed to delivering value to our stakeholders by operating in a responsible and sustainable manner.

Our approach to sustainability is built around three key pillars, which integrate all aspects of our business:

Operating with Integrity:

We believe strong corporate governance is essential to the success of our business. We honour our commitments, and act in an ethical and transparent manner.

Valuing our People and Communities:

We seek to create an inclusive environment, and a culture that supports the health, safety and wellbeing of our employees. We respect culture, heritage and aim to make a positive contribution to the communities in which we operate.

Building Environmental Resilience:

We recognise the importance of environmental stewardship and seek to understand and manage our impact on the environment.

COMPELLING GOLD EXPLORATION ASSETS

Large Landholding in Leading Resources Province

- ~6,700 sq km of highly prospective ground in the **Pilbara** provides Novo with unique and exciting gold exploration and discovery potential
- In the Egina JV > 36,000 m RC/AC drilling completed at **Becher**¹ by De Grey to date in 2024, following up key results from 2023 incl 8 m @ 4.74 g/t Au (incl 3 m @ 11.74 g/t Au) from 96 m in RC drilling at Lowe. Results expected late Q3 2024
- Follow up RC drilling completed at **Nunyerry North**² extended the high-grade Main Lode to 500 m strike/plunge and intersected high-grade gold along the Estrid Fault. Standout results include: **13 m @ 2.68 g/t Au, 11 m @ 2.20 g/t Au, and 17 m @ 1.85 g/t Au**
- At the **Balla Balla Gold Project** newly defined targets focus on a major flexure in the **Sholl Shear Zone**, ready for AC drill testing in Q4 2024
- Targets have been delineated in the **Karratha District** with drill testing scheduled for 2025
- Expanding exploration into the East Pilbara with programs focused on porphyry and intrusion related targets at **Miralga**³, where rock chip samples at the Gully Washer prospect return peak results of **14.8 g/t Au, 10,083 g/t Ag, 3.8% Cu, 28.3% Pb and 3.6% Zn**

Egina Joint Venture with De Grey Mining

- The **Egina Gold Camp** is a contiguous tenement package, covering a series of structurally complex, gold-fertile corridors, transecting the Mallina Basin in the north and mafic / ultramafic sequences further south
- **+A\$2.2 Billion Western Australian¹ gold developer** De Grey Mining is a **cornerstone investor and exploration partner** for the Becher Project and adjacent tenements in the northern part of the Egina Gold Camp
- **De Grey to invest A\$25 million on exploration** at Becher and adjacent tenements within 4 years, to earn a 50% direct interest in the **Egina JV** (minimum spend of A\$7 million within 18 months (December 2024))²
- Combined Egina JV and De Grey tenure forms **a significant land position in the Mallina Basin covering ~2,500 sq km**
- **Egina JV tenements** considered highly prospective for significant intrusion-related gold deposits, with **similar attributes to mineralisation discovered at the 12.7 Moz Hemi Gold Project²**
- **De Grey completed over 10,500 m of drilling at Becher in Q4 2023, and over 36,000 m RC/AC to date in 2024** testing Heckmair, Irvine, Lowe and Whillans prospects. Results expected late Q3 2024
- RC and AC drilling will continue throughout 2024 as part of the Egina JV

Novo's Egina JV tenure, showing the Becher Area, in proximity to De Grey's Mallina Gold Project

Becher Results Support Exciting Growth Potential¹

- **Gold-base metal trend identified in RC drilling at Heckmair**, with a significant zone of base metal-gold mineralisation in the two RC holes targeting the corridor
- The gold-base metal corridor trends WNW through the Heckmair intrusion, with broad intervals of anomalous base metals and low-level gold mineralisation mapping **a fault to over 1.5 km in strike**

Heckmair cross section (619120E)

Heckmair Prospect showing lead (Pb) in bottom of hole samples, draped over aeromagnetic/gravity images

- **Heckmair drilling** results include:
 - **10 m @ 0.12 g/t Au, 29.7 g/t Ag, 0.3% Cu, 1.5% Pb and 1.8% Zn from 40 m**, including 3 m @ 0.20 g/t Au, 59.8 g/t Ag, 0.9% Cu, 2.4% Pb and 2.2% Zn from 47 m
 - **24 m @ 0.2 g/t Au, 13.2 g/t Ag, 0.1% Cu, 1.0% Pb and 0.1% Zn from 105 m**, including 6 m @ 0.48 g/t Au, 20.8 g/t Ag, 0.2% Cu, 1.4% Pb and 2.8% Zn from 105 m
- **RC drilling at Lowe** confirmed gold mineralisation associated with a deformed intrusive sill with best intercept:
 - **8 m at 4.74 g/t Au from 96 m, incl. 3 m @ 11.88 g/t Au from 100 m (MSRC0031)**

Southern Egina Gold Camp Prospectivity

- **Nunyerry North is the first of numerous priority exploration targets that have been identified along the main structural corridors within the southern part of the Egina Gold Camp**
- Exploration is progressing on conceptual gold targets along the major fault corridors where **programs will be prioritised in 2024**
- The southern portion of the Egina Gold Camp forms a contiguous group of **tenements covering ~1,000 sq km**, where the **Tabba Tabba Shear Corridor** strikes for > 60 km towards the Becher Project
- Significant parts of the corridor have shallow cover and is underexplored.
- Mineralisation already defined along these fertile structures, includes sediment-hosted gold and quartz vein related gold in sandstone, shale and gabbro
- Historical gold assay results from previous explorers are highly encouraging and include:
 - **8 m at 4.2 g/t Au, 8 m at 2.1 g/t Au** from costean sampling and **5 m @ 5 g/t Au from 5 m (ACN05)** in shallow percussion holes at Kilkenny.
 - **25.5 g/t Au and 32.3 g/t Au** from rock samples at Teichman Top, where several historic workings are also present.
- Conceptual targets focus on structural intersections of faults and shears within the Tabba Tabba Shear Corridor, particularly where folded stratigraphy and / or minor intrusions are noted

Tenure in the southern Egina Gold Camp, showing the interpreted location of Nunyerry North and other high priority orogenic gold targets

Nunyerry North – A High-Grade Gold Opportunity

- **High priority exploration target area**
- Located ~35 km from a major regional road providing good long-term logistics infrastructure
- 2023 Maiden RC program of 30 holes for 2,424 m tested approx. 200 m strike of high priority gold targets¹
- Key intercepts of mineralised quartz veining from PhotonAssay™ re-assays² include:
 - **6 m @ 6.12 g/t Au from 37 m (NC017)**
 - **11 m @ 2.52 g/t Au from 22 m (NC014)**
- 2024 RC drill program of 34 holes for 3,942 m completed with aim of extending known mineralisation in the Main Area and testing other more regional targets at Aurora West, along the Estrid Fault and the southern Porphyry Target
- 2024 program has **extended the high-grade Main Lode to ~500 m strike/plunge** and intersected high-grade gold along the **Estrid Fault**³

Broader Nunyerry North Project area with interpreted geology, showing 2023 and 2024 RC drill programs

Nunyerry North – RC Drilling Update¹

- Standout intercepts from the 2024 RC program include:
 - 13 m at 2.68 g/t Au from 66 m, including 3 m at 10.41 g/t Au from 66 m (NC046)
 - 11 m at 2.20 g/t Au from 84 m, including 1 m at 18.06 g/t Au from 86 m (NC046)
 - 17 m at 1.85 g/t Au from 25 m, including 7 m at 3.55 g/t Au from 25 m (NC063)
 - 9 m at 2.52 g/t Au from 87 m, including 2 m at 8.89 g/t Au from 92 m (NC061)
 - 2 m at 7.38 g/t Au from 42 m (NC051)
- Drilling at the Main Lode target area has extended known mineralisation by 250 m to ~ 500 m strike (see lower long section)
- High-grade gold results were returned from drilling along the Estrid Fault**
- Results from the Porphyry target includes best intercept of 7 m at 0.1 g/t Au, coinciding with elevated pXRF assays on RC powder of up to 0.21% Cu**
- No significant intercepts were returned from the Aurora West target testing potential offset to the basalt target horizon

Nunyerry North long section (looking NNW) showing m x g/t Au (downhole width) – upper 2023 drill program; lower combined 2023/24 drill program.

Egina Gold Camp & Balla Balla

- Evolving understanding of prospectivity at a district scale, based on improved knowledge of structural setting, assessment of high resolution geophysical and satellite data, in-house geochemical data and historical research
- Targeting interpreted fertile structural corridors under shallow cover, centered on the Tabbata Tabbata Shear Zone and the Sholl Shear Zone
- **Both areas are deemed highly prospective for intrusion related gold mineralisation and structurally hosted gold**
- Geophysical interpretation and historical research in H1 2024 has considerably advanced understanding of prospectivity and delineated new targets for follow up in 2024
- Novo has also executed a significant Determination Wide Aboriginal Heritage Protection Agreement with the Kariyarra Aboriginal Corporation, covering approximately 1,700 sq km of Novo's tenure in the Egina Gold Camp. This includes tenements under the Egina JV with De Grey and enables access to crucial land to undertake exploration activities.

Location of the Egina Gold Camp and Balla Balla Gold Project tenure with major structural corridors over aeromagnetic imaging

Balla Balla Gold Project

- **Emerging exploration project**, targeting interpreted fertile structural corridors under shallow cover, centered on the Sholl Shear corridor and associated structures
- Novo holds approximately 60 km of strike length at Balla Balla including a notable flexure of the Sholl Shear Zone and several important splay structures
- Over 1,200 sq km of tenements merged across a strike length of > 100 km over target area
- **Prospective for intrusion related gold mineralisation and structurally hosted gold**
- Geophysical interpretation and historical research has advanced understanding of prospectivity and delineated new targets for follow up in 2024
- **Planning for wide-spaced reconnaissance AC drilling under cover**, testing current structural and intrusion-related targets¹ – **scheduled to start in H2 2024**
- Novo has executed a significant Determination Wide Aboriginal Heritage Protection Agreement with the Kariyarra Aboriginal Corporation, enabling the grant of application E47/4703, critical to Novo's targeting strategy

Balla Balla Project geology showing the Sholl Shear Zone corridor and complex folded stratigraphy

Karratha District – New Drill Targets Defined

- Recent exploration in the **Karratha District** has advanced several drill targets, including North Whundo, Railway Bore and East Well¹
- **North Whundo** is the primary target at Karratha, defined by a significant 1.2 km long Cu-Pd-Au anomaly, with highly anomalous rock chip results including peak values of **4.1 g/t Au+Pt+Pd and 3.9 % Cu**. Mineralisation is near the contact of a large structurally complex, layered mafic/ultramafic intrusive complex and includes disseminated and stringer style mineralization.
- The **Railway Bore** Cu-Au target has returned peak rock chip results of **9.6 g/t Au, 11.9% Cu and 26 g/t Ag** and is an E-W trending complex array of malachite-bearing brecciated quartz veins and sericite-silica-sulphide altered suite of porphyritic felsic intrusions
- The **East Well** Cu-Au-Pd target is a **60 m wide > 200 ppm Cu** in soil anomaly trending over a strike of 450 meters. Anomalous Cu-Au (+/- Pt-Pd) mineralisation is associated with an E-W shear that defines the contact of a mafic intrusive suite and basement felsic volcanics and manifests as malachite-bearing brecciated and silica-altered gabbro with quartz-carbonate stockwork veining.
- A maiden RC drilling program for 3,500 m is planned to test these three prospects for Au and Au-Cu (+-Pt and Pd) mineralisation

Location of the Karratha District drill targets

Belltopper Gold Project¹

- Project located ~50 km south of Agnico Eagle's Fosterville Gold Mine in the Bendigo Tectonic Zone, where over 60 Moz Au were produced historically
- **Belltopper displays characteristics of the epizonal orogenic gold deposit class comparable to Fosterville**
- Multiple mineralisation styles and high-grade gold targets identified, within a corridor of alteration that hosts a network of gold reefs and the mineralised Belltopper Granite
- Key results from diamond drill program in Q1 2024 include:
 - **5.6 m @ 3.14 g/t Au from 219.8 m and 4.25 m @ 5.88 g/t Au from 274.75 m (incl. 2 m @ 11.15 g/t Au from 277 m) in BTD001 (Leven Star Reef)**
 - **2.0 m @ 15.2 g/t Au from 9 m in BTD004 (newly discovered reef)**
- Detailed re-logging and sampling from 11 historical diamond holes in priority target areas has delivered multiple new significant gold intercepts across a range of known and emerging targets. Key results are:
 - **6.0 m @ 4.37 g/t Au from 169 m (including 5.0 m @ 5.18 g/t Au from 169 m) in DDHMA1 on the Never Despair Reef.**
 - **2.0 m @ 7.19 g/t Au from 52 m (including 1.15 m @ 12.01 g/t Au from 52 m) in MD04 on the emerging Butchers Gully Fault**
- Current focus is on growing the pipeline of conceptual high-value shallow and deeper targets.

Battery Metals Upside Through Strategic JVs

- **Battery Metals Joint Ventures provides shareholders with exciting exposure to battery metals exploration success**
- **Harding Battery Metals JV¹**
 - Tenements proximal to Azure Minerals (ASX: AZS) Andover Lithium and Nickel Project and Artemis Resources (ASX:ARV) Carlow Castle gold – Copper – Cobalt Project
 - **A\$10 million agreement** completed with global lithium leader SQM for 75% ownership of five battery metals tenements with 12-month option over other tenements in the Pilbara
 - Novo retains 100% of the gold, silver, PGE, copper, lead and zinc mineral rights.
 - Novo is free carried for its 25% until a decision to mine

Harding Battery Metals JV Priority Tenements

Battery Metals Upside Through Strategic JVs

- **Quartz Hill JV¹**

- JV with Liatam Mining formed in addition to a \$1.8 million investment showing support for the exploration growth strategy
- **Novo retains a 20% interest in battery mineral rights**, 100% interest in all other rights (including gold/silver), a royalty right and is free-carried to the earlier of a Bankable Feasibility Study or A\$20 million expenditure
- **Liatam** intends to spend ~A\$6 million during 2024 to progress lithium exploration at the **Quartz Hill Joint Venture**
- Exploration to date extended known lithium mineralisation at the **Lepidolite Fields** LCT pegmatite swarm target with best results from surface sampling by Liatam of:
 - **2.71% Li₂O, and 828 ppm Cs₂O**
 - **2.37% Li₂O, 303 ppm Ta₂O₅ and 883 ppm Cs₂O**
 - **2.14% Li₂O, 615 ppm Ta₂O₅ and 1,195 ppm Cs₂O**
 - **1.98% Li₂O, 277 ppm Ta₂O₅ and 882 ppm Cs₂O**
 - **1.64% Li₂O, 651 ppm Ta₂O₅ and 2,390 ppm Cs₂O**
 - **1.24% Li₂O, 722 ppm Ta₂O₅ and 1,722 ppm Cs₂O**
- **~9,000 m RC Drilling** planned to test the ~ 6 km long and 0.8 km wide **Lepidolite Fields** LCT pegmatite swarm in H2 2024

- A second LCT pegmatite swarm was identified at **Quartz Hill West** and **The Gap** with best surface results of:

- **2.45% Li₂O and 589 ppm Cs₂O**
- **2.23% Li₂O, and 1,290 ppm Cs₂O**
- **1.22% Li₂O, 181 ppm Ta₂O₅ and 780 ppm Cs₂O**

Photo of pegmatite swarms at the Lepidolite Fields LCT Target (looking southeast)

A Leading Australian Gold Explorer

- ✔ Strong balance sheet, cash of A\$11.7M (C\$10.7M), and investments of ~A\$46.2M (C\$42.1M)
- ✔ Established growth strategy focused on discovering standalone gold projects with > 1 Moz development potential
- ✔ Dual listed on ASX and TSX with long term supportive shareholders
- ✔ Diverse and exciting portfolio of gold exploration and development assets across Western Australia and Victoria, led by the flagship Becher Project (Western Australia)
- ✔ Egina Joint Venture with De Grey Mining (ASX:DEG) is the most advanced and compelling growth opportunity centered around the Becher Project with De Grey to invest up to A\$25 million on exploration within 4 years
- ✔ Dedicated and disciplined project generation program underway, with a focus on identifying assets that expand the Company's exploration portfolio in size and scale
- ✔ Highly credentialed and experienced management and Board focused on delivering long-term shareholder value
- ✔ Novo is well-positioned for exploration success with the Pilbara (Western Australia) and Bendigo Tectonic Zones (Victoria) leading and proven tier-one gold provinces in Australia

ADDITIONAL TECHNICAL INFORMATION
