Ore milled through the Jaurdi mill continued at similar levels to the previous quarter.

Throughput in July/August was affected by:

- High viscosities of Panel 3 clay ore and Geko stockpiles; and
- July rainfall 60% above long-term average.

Despite lower mill utilization in September the introduction of MacPhersons ore in late August and improved weather conditions positively impacted gold production. A 30% increase in gold production from 3,930 ozs in the June quarter to 5,230 ozs in the September quarter. The Jaurdi mill performs well on the MacPhersons ore.

The production guidance for the December quarter is 6,500 ozs.

Mining at MacPhersons Reward Project continued with:

- Focus on MacPhersons Central;
- Additional ore outside the current ore reserve being evaluated for extraction at current gold prices;
- The major pre strip is complete and waste/ore volumes in the Central pit are now 3/1.

Beacon Minerals Executive Chairman and Managing Director Graham McGarry commented:

“Our gold production increase in the September quarter reflects improved weather conditions in August/September and the introduction of MacPhersons ore to the Jaurdi Mill. We look forward to providing the full quarterly activities report shortly.”
