

ASX Announcement

RocketDNA Expands Mining Contracts with xBot® Purchase Order From New Customer

HIGHLIGHTS

- RocketDNA secures a purchase order to deploy its xBot® solution for tailings dam monitoring at a major copper mine in South Australia
- Purchase order from new customer, WSP Australia Pty Ltd (WSP), part of a global engineering firm

24 October 2024, RocketDNA Ltd (ASX: RKT) (RocketDNA or the Company), a technology service company that leverages AI and Autonomous Drones to provide mission-critical services for enterprise customers, is pleased to announce it has secured a purchase order with WSP Australia Pty Ltd (**WSP**), to deploy its xBot® autonomous drone solution at a major copper mine in South Australia.

The deployment will support monitoring of tailings dam construction work and ongoing monitoring of tailings deposition. RocketDNA's xBot® will play a critical role in monitoring this project's progress and providing real-time data to ensure compliance and operational efficiency.

The purchase order from WSP covers the initial deployment and setup of RocketDNA's SurveyBot® solution. The purchase order's total value is AU\$243,960 which includes an upfront payment for the purchase of 1 SurveyBot®, PowerSkid, VHF radio hardware, site establishment; monthly operations for the first 6 months; and Starlink data for 12 months.

The SurveyBot® is an autonomous drone-in-a-box solution developed by RocketDNA to revolutionise data capture and analysis for industries such as mining, agriculture, and engineering. The SurveyBot® is designed to operate remotely, with minimal human intervention, and is controlled from RocketDNA's Remote Operating Centres. It offers advanced capabilities such as aerial surveying, volumetric reporting, and real-time imaging, providing critical data for site monitoring, stockpile assessments, and mining conformance. Integrated with AI tools, the SurveyBot® automates the processing and analysis of collected data, offering fast, accurate insights that improve operational efficiency and safety. This solution reduces the need for on-site surveys, minimising travel and human risk while delivering high-frequency, actionable data.

RocketDNA Ltd (ASX: RKT) is a multinational drone-based data service and technology provider, listed on the ASX, offering aerial surveying, mapping, security, surveillance, and asset inspection for enterprise customers in the mining, agricultural, and engineering sectors. Through fully-outsourced, AI-driven solutions, RocketDNA remotely operates drone systems, enabling customers to focus on ground operations while ensuring fast data turnaround. The company generates revenue through multi-year contracts and short-term projects with major clients, including Tier 1 and Tier 2 miners such as South32, Newmont, Vault Minerals, and Seriti Coal. RocketDNA operates primarily in Australia and Africa, with regional offices in Perth, Johannesburg, and Accra.
