

ASX ANNOUNCEMENT

September 2024 Quarterly Report

Exploration Activities ongoing at Edmund Basin; Due Diligence continuing on several Key Project Opportunities

KEY POINTS

Exploration

- Initial low-cost surface mapping and geochemistry surveys completed over several IOCG and structurally hosted gold targets at the East Abra Project
- Ground activities included mapping, collecting rock chips, soils and shallow auger samples over a number of target areas

Project Generation

- The Company is actively undertaking technical and financial due diligence on several high-quality project opportunities, both domestically and abroad
- Bellavista is seeking complementary projects that have the potential to host World-class deposits and represent accretionary value to shareholders

Corporate

- Recognising the immense scale of the Brumby Deposit and surrounding district, Bellavista continues to engage several interested parties regarding potential funding and development solutions.

Bellavista Resources Limited (ASX: BVR) (“Bellavista” or the “Company”) is pleased to present its September 2024 Quarterly Report. The Bellavista team is dedicated to delivering shareholder value through well-executed exploration and value-accretive corporate transactions.

Bellavista has secured a strong land position, in a highly prospective mineral province in Western Australia, capable of hosting giant to super-giant critical and strategic mineral deposits. The Company has so far completed field programs of drilling, geophysics, mapping and sampling as part of its initial program and budget, since listing on the ASX in May 2022.

Exploration Overview

Geological Setting

The Edmund Basin Projects cover approximately 140km of strike of the northern margin, with an additional 30km of strike on the East Abra Project on the southern margin of this highly prospective basin. The Projects include the Brumby Deposit, Vernon Base Metals, Vernon Nickel/PGE, Gorge Creek and East Abra. The properties are prospective for Large to Super-Large base metal deposits, Abra-style IOCG Cu-Pb-Ag-Au deposits, sulphide related Nickel/PGEs deposits in Mafic/Ultramafic Intrusions and possible sediment-hosted Nickel and Uranium.

Field Activity

During the quarter, Bellavista continued to pursue a low-cost approach to the work on its Edmund Basin Projects, whilst seeking interest from potential funding and development partners for Brumby and potentially the surrounding projects.

A field program has been undertaken consisting of mapping, geochemical surveys, rock chip sampling, soil sampling grid surveys and shallow auger drilling where thin cover is present.

The initial work is at East Abra, targeting potential IOCG systems, structurally-controlled gold and possible sedimentary-hosted mineralisation in a large antiform intruded by granites and with mapped evidence for felsic extrusive activity within the project tenure.

Despite initial delays due to unseasonal rain events this year, the field team successfully executed the planned exploration activities during the third quarter of 2024. The program

targeted key geological features identified through geophysical and conceptual modelling, marking the first modern exploration campaign in this district.

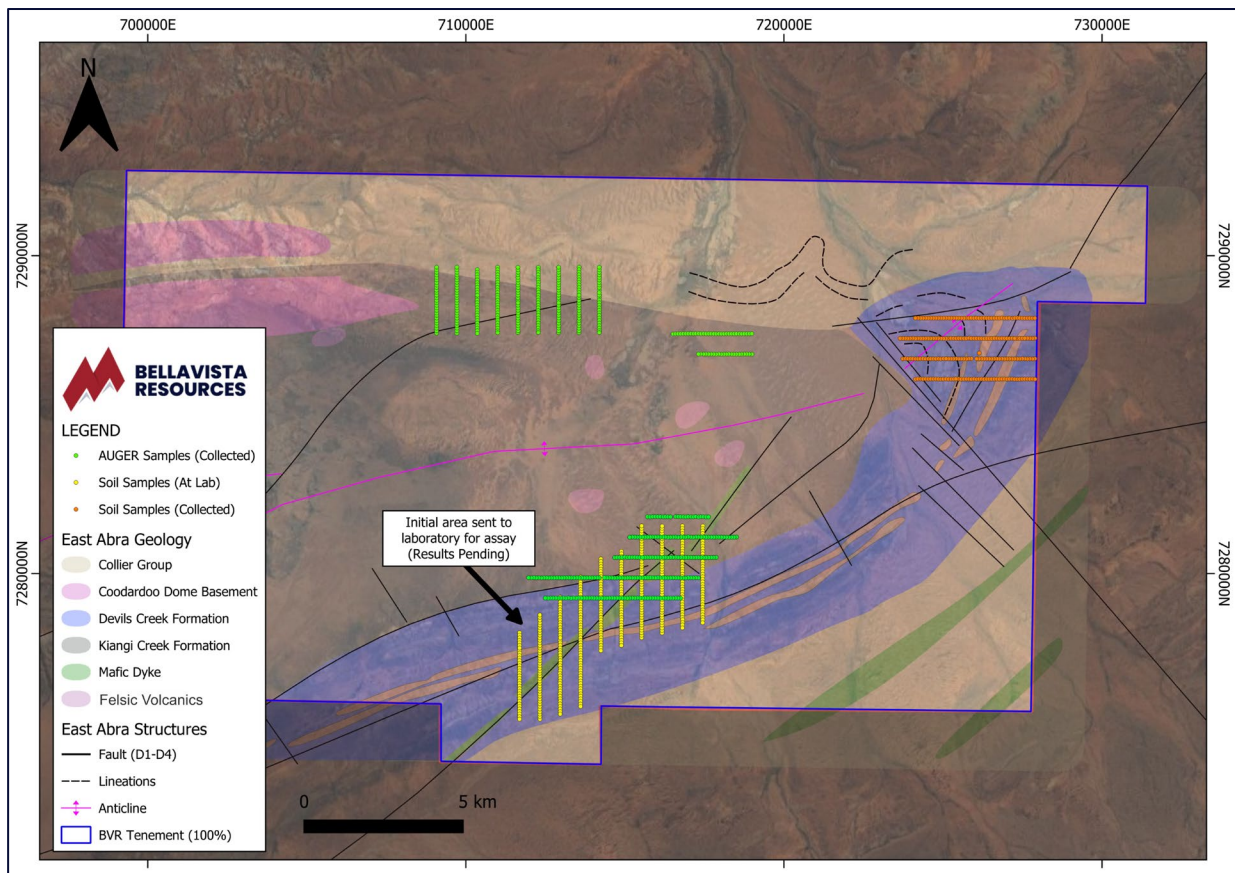

Figure 2: Map showing the location of collected samples across the East Abra project area.

Samples collected from the field are now with the laboratory, and the Company is awaiting assay results. Bellavista anticipates these results to be received in the 4th Quarter 2024.

New Project Due Diligence

Bellavista is seeking complementary project opportunities that appeal to our financial backers and represent accretionary value to shareholders.

The Company is actively undertaking technical due diligence on several high-quality project opportunities, both domestically and abroad. The projects are initially vetted by our technical committee and are dominated by advanced precious and base metal opportunities, which show the potential to host World-class deposits.

Bellavista's Board and Management look forward to keeping the market and stakeholders informed of any material progress on this process.

Corporate

During the Quarter, the Company announced the resignation of Non-Executive Director, Michael Naylor. A founder and supportive major shareholder of Bellavista, Mr Naylor will continue to contribute as a Corporate Consultant. The Company will continue to benefit from his extensive

expertise and industry insights in the resources sector. Mr Naylor was pivotal in recent successful project acquisitions by Andean Silver (ASX: ASL) and Firefly Metals (ASX: FFM).

About Bellavista Resources

Bellavista Resources Ltd (ASX: BVR) is an emerging mineral exploration company focused on finding world-class deposits. The Bellavista team is dedicated to delivering shareholder value through well-executed exploration and value-accretive corporate transactions. Currently, the asset portfolio consists of tenure prospective for sedimentary hosted base metals, IOCG and sulphide related precious and base metal deposits in the Upper-Gascoyne Region of Western Australia

The Edmund Basin Projects cover approximately 170km of strike of this highly prospective basin. The Projects include Brumby Deposit, Vernon Base Metals, Vernon Nickel/PGE, Gorge Creek and East Abra. The properties are prospective for Large to Super-Large sedimentary base metal deposits, IOCG Cu-Ag-Au deposits, sulphide related Nickel/PGEs deposits in sediments sourced from Mafic/Ultramafic Intrusions and possible sediment hosted Uranium.

Forward Looking Statements

Various statements in this announcement constitute statements relating to intentions, future acts and events. Such statements are generally classified as “forward looking statements” and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. 8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: Yes. Discretionary exploration activities have been reduced in line with current strategic intentions to seek interest from potential funding and development partners.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: Yes. The Board monitor working capital requirements on an ongoing basis and have a successful history of accessing additional capital as and when required.	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes. Refer 8.8.2.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.
