Activities Report for the Quarter Ended 30 September 2024

The Board of Black Cat Syndicate Limited ("Black Cat" or the "Company") is pleased to report on activities during the quarter ended 30 September 2024.

HIGHLIGHTS (all amounts are in Australian dollars unless otherwise stated)

Paulsens Gold Operation (100%):

- During the quarter, refurbishment works on the processing facility progressed well, activities to date have been extremely
 productive with the project on time and budget. Commissioning is planned for December 2024.
- Underground selective mining commenced in July 2024 as part of the high-grade stockpile strategy¹. Key activities
 included:
 - ~440m of mineralisation developed by early October 2024 with drives successfully extending further than expected.
 - Load and haul equipment mobilised to site and commenced bringing high-grade material to surface.
 - Due to the success of this strategy, additional miners mobilised to site in October 2024 and planning commenced to extend the high-grade selective mining strategy for the life of the mine. This additional feed will potentially reduce any unused processing capacity.
- ROM pad sampling and clean-up identified additional mineralised material over an area of ~21,000m² with average grab samples of 2.76g/t Au on surface². This material combined with the existing low-grade stockpile (11kt @ 1.6g/t Au) will provide substantial feed for commissioning.
- A comprehensive structural review and reprocessing of seismic data highlighted numerous near-mine targets that include the Hangingwall Zone, Raisebore Vein, Footwall Gabbro and the Paulsens West Seismic target³.
- Subsequent to the end of the quarter, the Big Sarah tenement was granted and an additional 1,522km² of prospective ground in the area was acquired⁴. Big Sarah produced ~220oz @ 52.6g/t Au pre-1940 and has never been drilled.

Kal East Gold Project (100%):

- Mining activity commenced at Myhree in June 2024, starting with site set-up and establishment, onboarding of personnel and with 24-hour operations underway from 25 July 2024⁵.
- First Ore was mined on 26 July 2024 and the programme continued throughout the quarter ahead of schedule, culminating
 in the first gold doré from Myhree being poured, a significant milestone for the Company⁶.
- During the quarter ~78kt of Ore was mined (~2,249oz), ahead of schedule and first gold was poured at the end of the quarter.

Corporate:

- The second tranche of the June 2024 capital raise was approved by shareholders on 25 July 2024.
- In August 2024, in line with a recommendation from directors, shareholders overwhelmingly voted against an issue of subscription securities to Sundy Service Group Co. Ltd, which resulted in the termination of the Sundy Subscription Agreement⁷.
- Leeuwin Capital Partners progressed sourcing a secured debt facility during the quarter. The Company executed a term sheet with Nebari Natural Resources Credit Fund II LP (Nebari) who successfully completed technical due diligence during the quarter. Subsequent to the end of quarter, Nebari's Investment Committee approved the facility, however, due to the \$80M equity placement announced on 29 October 2024, the Company chose not to progress the secured debt facility before a final contract was agreed.
- Cash as of 30 September 2024 was ~\$18M.
- Tony Polglase resigned as a non-executive director effective from 25 July 2024. Tony's experience and insights during
 his tenure were greatly appreciated.
- Davide Bosio (effective 1 October 2024) and Richard Laufmann (effective 15 October 2024) were appointed as non-executive directors. Davide and Richard bring a wealth of experience to the business with backgrounds in the capital/strategic management and the gold/resources sectors, which will benefit the Company as it increases production.
- On 29 October 2024, the Company announced an \$80M placement (before costs) to accelerate and increase gold production – more gold, sooner. The placement also allows the Company to complete the restart of Paulsens without using debt, thereby reducing costs, covenants and security pledges on the business, and without hedging.

PAULSENS GOLD OPERATION 100%

Paulsens is a dewatered, ventilated and well maintained high-grade underground mine with a 450ktpa processing facility and operational camp and infrastructure. With historical production of ~1Moz (@ 1,000oz/vertical metre) and a known plunge length of >2.7km.

- During the quarter, refurbishment works of the processing facility progressed safely and efficiently. Productivity is high
 with the project on time and on budget. Commissioning is on track for December 2024.
- Underground contractor Cream Mining continued to undertake selective mining as part of the high-grade stockpile strategy⁸. Other key activities include:
 - Load and haul equipment was delivered to site and surface haulage and stockpiling commenced.
 - Support activities including installation of secondary ventilation fans, mine services and escapeway rehabilitation.
 - Jumbo ground support was undertaken to prepare additional locations for future selective mining. By the end of the quarter several new headings were available for development.
 - Mining commenced in July 2024, culminating in ~440m of development being completed by early October 2024.
 - The high-grade stockpile will be processed after the mill is commissioned on existing, low-grade stockpiles.
- Selective mining is proving highly successful with drives continuing further than expected, and more stopes exposed.
 Therefore, additional miners commenced in October 2024. Additionally, planning is underway to extend the high-grade
 selective mining strategy for the life of the mine. This additional feed will potentially reduce any unused processing
 capacity.
- ROM pad sampling and clean-up identified additional mineralised material over an area of ~21,000m² with average grab samples of 2.76g/t Au on surface9. This material combined with the existing low-grade stockpile (11kt @ 1.6g/t Au) will provide substantial feed for commissioning.
- A comprehensive structural review was completed that included detailed surface mapping and the compilation of historical
 and new underground plan mapping. In addition, the 2018 3D seismic data was reprocessed and further reviewed. This
 work highlighted numerous near-mine targets that include the Hangingwall Zone, Raisebore Vein, Footwall Gabbro and
 the Paulsens West Seismic target¹⁰.
- Big Sarah was historically mined for ~220oz @ 52.6g/t Au pre-1940, during the same period as Paulsens, which produced ~840oz @ 9.5g/t Au, and Belvedere, which produced ~435oz @ 8.5g/t Au. The Big Sarah tenement, with less exploration than Paulsens and Belvedere, was granted during the quarter facilitating the commencement of surface activities. In addition, a regional Au-Ag-Sb-Cu prospectivity review was completed, resulting in ~1,522km² of prospective ground adjacent to Big Sarah being acquired, doubling the size of the greater Paulsens project area to ~3,190km².
- Recruiting continued successfully during the quarter with many high-calibre employees coming on board.
- Various unrelated parties continued to occupy the Paulsens camp during the quarter providing a steady source of rental income.

KAL EAST GOLD PROJECT 100%

Kal East contains a significant Resource of ~1.3Moz at 2.1g/t Au within 50km of Kalgoorlie.

- On 20 May 2024, a turn-key funding, development and processing agreement with Mineral Mining Services (MMS) for an open pit at Myhree was announced that includes:
 - MMS to provide all funding, people and equipment to mine and haul Ore to Paddington;
 - Ore Sale agreement with Paddington with deliveries commencing in September 2024;
 - Production forecasts include a minimum of 52koz @ 2.2g/t Au (existing Ore Reserves); and
 - Following recovery of start-up costs, the first \$30M of cashflow generated will be received by Black Cat. Thereafter, MMS and Black Cat will share profits.
- Mining activity commenced at Myhree in June 2024 and activities advanced rapidly including¹¹:
 - Completion of site set-up and establishment and onboarding of personnel; and
 - 24-hour operations, which started on 25 July 2024.
- Stage 1 of the 2 stage Myhree open pit achieved first Ore ahead of plan with first Ore being mined and stockpiled on 26 July 2024.
- The programme continued throughout the quarter ahead of schedule, culminating in the first gold doré from Myhree being poured, a significant milestone for the company with Myhree being discovered by Black Cat just after listing in 2018¹².
- During the quarter ~78kt of Ore was mined, ahead of schedule, with multiple Ore parcels constructed, including:
 - MYSP001 (13,790t @ 1.18g/t Au for 523oz): 100% hauled to and partially processed at Paddington, 50% prepayment received in respect of first gold doré production.
 - MYSP002 (27,387t @ 1.96g/t Au for 1,726oz): >50% hauled to Paddington.
 - MYSP003 (37,251t assays pending): stockpiled.

Figure 1: First Ore being loaded at the Myhree open pit (pink >3.0g/t Au, blue <3.0g/t Au).

COYOTE GOLD OPERATION 100%

Coyote, located in the Tanami region of Western Australia, is hosted within a parasitic anticline within the larger folded Coyote sequence. Gold is hosted both within the fold hinge and the limbs as stratigraphic parallel gold veins. Veins generally range in scale from 1cm to 10cm, and often form as swarms, frequently hosting bonanza gold grades. Mineralisation occurs within multiple stratigraphic horizons and is open along strike, down plunge and at depth. The current Resource totals 645koz @ 5.5g/t Au, including the Coyote Central Resource of 430koz @ 8.5g/t Au – one of Australia's highest grade gold deposits.

- Care and maintenance activities continued safely throughout the quarter.
- Regional exploration activities included data review and planning for fieldwork.

SUMMARY OF DRILLING

No drilling activities were undertaken during the quarter.

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Assuming the completion of the secured debt, Black Cat is fully funded and the key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation has commenced the mill refurbishment stage, with a plan to be in production by the end of 2024. Paulsens has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous highgrade targets in the surrounding area.

Kal East Gold Project: comprises ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway¹. Separately and in the future, Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The 800ktpa processing facility will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.
