

Kal East – Gold Acceleration & Expansion Underway

Black Cat Syndicate Limited (“**Black Cat**” or the “**Company**”) is pleased to advise that the strategy to accelerate and expand gold production from the 100% owned Kal East Gold Operation (“**Kal East**”) is underway.

HIGHLIGHTS

Black Cat’s gold acceleration and expansion strategy includes expediting a processing solution for Kal East. This involves accelerating the construction (or acquisition) of an enlarged processing facility (up from 0.8Mtpa to 1.2-1.5Mtpa) utilising currently owned mills. Major activities commenced are outlined below.

- Processing facility:
 - MACA Interquip Mintrex (“**MACA**”) has been awarded the engineering study to expand the fully approved Kal East processing facility design from 800ktpa¹ up to 1.2-1.5Mtpa.
 - Engineering has commenced and will utilise both of the Company’s already owned ball mills and supporting infrastructure in an expanded design.
 - Project acceleration will target the ordering of long lead items in early 2025 and commencement of on ground works during the March 2025 quarter.
- Mining studies and approvals:
 - Mining studies are underway to reoptimise open pit and underground mines to feed an expanded processing facility. In addition, previous mine designs used a gold price of A\$2,500/oz and will be optimised to reflect the current gold price environment.
 - Metallurgical testwork will be reviewed to suit an expanded processing facility design and additional feed from redesigned mines.
 - Baseline studies and approvals are being progressed as required to reflect the increased production scenario.
- Drilling to commence:
 - Extensional and infill drilling to feed an expanded processing facility, including baseloads from Fingals (open in all directions) and Trojan (1km long by 20m wide) will commence at the start of 2025.

Black Cat’s Managing Director, Gareth Solly, said: “With the Paulsens processing plant refurbishment tracking on time and on budget we are pleased to further our relationship with MACA Interquip Mintrex through the study and engineering phase of expanding the Kal East processing facility. Our gold acceleration strategy is all about more gold, sooner and having our own processing facility operating at up to 1.5Mtpa in early 2026 is integral to that.”

COMPETENT PERSON'S STATEMENT

The information in this announcement that relates to geology, exploration results, drill planning, Exploration Targets, and Resources was compiled by Mr. Iain Levy, who is a Member of the AIG and an employee, shareholder and option/rights holder of the Company. Mr. Levy has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Levy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the exploration results, Mineral Resources, and Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource and Reserve estimates with that announcement continue to apply and have not materially changed.

The Company confirms that all material assumptions underpinning the production targets, or the forecast information derived from the production targets, included in the original ASX announcements dated, 8 May 2024, 9 May 2024 and 15 May 2024 continue to apply and have not materially changed.

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat is fully funded and the key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation has commenced the mill refurbishment stage, with a plan to be in production by the end of 2024. Paulsens has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area.

Kal East Gold Project: comprises ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway². Separately, Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The processing facility, with throughput up to 1.5Mtpa, will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.

Notes on Resources:

1. The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
2. All tonnages reported are dry metric tonnes.
3. Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
4. Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
5. Resources are reported inclusive of any Reserves.
6. Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.
