Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Options.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Options issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Shares contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of Constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5.2 Company specific

RISK CATEGORY	RISK
Nature of mineral exploration and exploitation	<p>Possible future development of the Projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.</p> <p>If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected geological formations, unexpected changes in the aquifers, flooding and extended interruptions due to inclement or hazardous weather conditions, fires, explosions or accidents.</p> <p>No assurance can be given that the Company will achieve commercial viability through the exploration or development of its Projects. The success of the Company will also depend upon the Company having access to sufficient capital to develop its assets, including its ability to maintain Tenements and obtain all required approvals for its activities. In the event the various exploration programs prove to be unsuccessful this could lead to a diminution in the value of the Tenements which in turn would have an adverse impact on the value of the Shares, a reduction in the cash reserves of the Company and possible relinquishment of the Tenements.</p>

RISK CATEGORY	RISK
Mineral Resource estimate	The Company's Mineral Resource estimates are made in accordance with the 2012 edition of the JORC Code and the Guidelines for Resource and Reserve Estimation for Brines adopted by JORC in April 2019 Mineral resources are estimates only. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.
Inability to abstract brine volume	The Company has utilised specialist consultants in determining its ability to abstract brine from the aquifers, but there is a risk that the Company will be unable to abstract the brine at the predicted rates that are required to establish a full scale commercially viable operation. This can occur due to low permeability of aquifer material, variability in the mineralisation and continuity of the various aquifer layers. As a result, pumping rates may be lower than expected, or require additional bores and/or trenches. Each bore is likely to have a specific life expectancy and will eventually run dry as the brine is extracted. This life expectancy may be variable and shorter than expected.
Variability in brine	Brine deposits may be variable due to the geological layering of the host rock, the location within the palaeo-drainage system, inflows of other waters carrying other impurities or fresh water, all of which may affect the brine chemistry across the deposit. Added to this, there is also the potential for dilution after rainfall which may influence changes in the chemistry of brine recovery. These variability factors may cause different evaporation rates, alternative salt evaporites being formed in the evaporation ponds and require additional pumping volumes due to lower grades.
Inclement weather and natural disasters	The Company's exploration activities are subject to a variety of risks and hazards which are beyond its control, including hazardous weather conditions such as excessive rain, flooding and fires. Severe storms and high rainfall leading to flooding and associated damage may result in disruption to exploration activities including field work, evaporation trials, scouring damage to trenches and roadways. Rainfall may also impact and cause dilution of the mineralisation and/variability in the brine deposit.
Additional requirements for capital	The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing to develop its business. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

RISK CATEGORY	RISK
Climate Risk	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.</p>
Related Party Risk	<p>The Company has a number of key contractual relationships with related parties. If these relationships breakdown and the related party agreements are terminated, there is a risk that the Company may not be able to find a satisfactory replacement.</p> <p>Further, the operations of the Company will require involvement of related parties and other third parties. With respect to these persons and despite applying best practice in terms of pre-contracting due diligence, the Company is unable to completely avoid the risk of:</p> <p>(a) financial failure or default by a participant in any agreement to which the Company may become a party; and/or</p> <p>(b) insolvency, default on performance or delivery by any operators, contractors or service providers.</p> <p>There is also a risk that where the Company has engaged a contractor who is a related party, the contract between the contractor and the Company may terminate for reasons outside of the control of the Company. This may then result in the termination of the contract between the Company and the contractor and the impact the Company's position, performance and reputation.</p>
Exploitation, exploration and mining licences	<p>In the event the Company successfully delineates economic deposits on any Tenement, it will need to apply for a mining lease to undertake development and mining on the relevant Tenement. There is no guarantee that the Company will be granted a mining lease if one is applied for and if a mining lease is granted, it will also be subject to conditions which must be met.</p>

RISK CATEGORY	RISK
Commodity price volatility	If the Company achieves success leading to mineral production, the revenue of the Company will be derived from the sale of commodities which will expose the Company to commodity price and exchange rate risk. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. Such factors include (but are not limited to) the supply and demand for commodities such as SOP, forward selling activities, technological advancements and other macroeconomic factors that may affect either commodity prices or exchange rates.
Failure to secure native title agreement for mining of Lake Throssell and Drummond Basin	The Company has in place a native title exploration agreement in respect of the relevant exploration licences forming part of the Lake Throssell Potash Project and Drummond Basin Project. However, the Company will be required to negotiate and execute a formal agreement to enable production to occur at its projects. The completion of this process may have impacts on timing of development activities at the projects or may not be achieved which may result in the tenement not being able to be mined.

5.3 Industry specific

RISK CATEGORY	RISK
Geological, exploration and development	The exploration, development and mining of mineral resources is a high risk, high-cost exercise with no guarantee of success. These activities take place over an extended period of time and are often subject to increases, often material, in the costs and timing associated with these activities. Factors beyond the control of the Company may result in the Company's failure to find and/or to be able to economically develop any mineral projects and therefore there is no guarantee as to the financial success of any such activities.
Operational and technical	<p>The operations of the Company will be subject to a number of factors which may include, amongst others:</p> <ul style="list-style-type: none"> (a) failure to discover any economic mineral deposits; (b) technical difficulties associated with the actual development and mining of the minerals; (c) failure of the minerals mined to achieve projected grades and recoveries; (d) technical difficulties associated with the processing and recovery of the minerals from the abstracted brine and the production of a saleable product; (e) adverse events outside the Company's control involving the environment or acts of force majeure; (f) increased competition within the industry for access to skilled personnel, equipment, contractors and/or consultants and raw materials in order to carry out the Company's activities; and (g) a viable transport solution to get product to market including access to infrastructure.
Results of studies	Subject to the results of exploration and evaluation programs to be undertaken, the Company intends to progressively undertake a number of studies in respect of the Projects. These studies may include scoping, prefeasibility and feasibility

RISK CATEGORY	RISK
	<p>studies. These studies will be completed within parameters designed to determine the economic feasibility of the Projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study). Even if a study confirms the economic viability of the Projects, there can be no guarantee that any Project will be successfully brought into production as assumed or within the estimated parameters in the feasibility study (e.g. operational costs and commodity prices) once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds to complete the study, if required.</p>
Rehabilitation risk	<p>Trigg has self-reported an incident to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) on 2 March 2023, identifying a breach of condition on tenement E 38/3065, where clearing occurred outside of the approved areas for three programs of work. Subsequently, the Company has been found in breach of a further environmental condition on tenement E 38/3065, where disturbance has not been rehabilitated within the six-month timeframe.</p> <p>In response to the self-reported incident, the Company has developed an Environmental Management Plan, Approvals Strategy and Disturbance Tracking Sheet to assist in rectifying the non-compliance and ensure prevention of future occurrences. The Company estimates the costs for a work program to rehabilitate the disturbances to be approximately \$355,900.</p> <p>There is a risk that if the Company is unable to complete the remediation works as planned that penalties may be imposed on the Company by DEMIRS and the remediation cost may exceed the current estimates.</p>

5.4 General risks

RISK CATEGORY	RISK
Economic	<p>General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p>
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities.

RISK CATEGORY	RISK
	<p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>
Litigation risks	<p>The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.</p>
Dividends	<p>Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.</p>
Reliance on key personnel	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.</p>
Economic conditions and other global or national issues	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.</p>

5.5 Speculative investment

The risk factors described above, and other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Options.

Prospective investors should consider that an investment in the Company is highly speculative.

There is no guarantee that the Options offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Options.

Before deciding whether to subscribe for Options under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
