

PRE-DRILL TRENCHING PROGRAM EXPANDED AT KAMEELBURG

Highlights

- The initial 7 pre-drill trenches over the Kameelburg carbonatite have been completed with samples dispatched for expedited assay.
- The pre-drill sampling program has been expanded with an additional 15 trenches pegged with sampling having already commenced.
- Trenching assays will enhance drill location targeting and improve the understanding around the correlation between the Kameelburg carbonatite magnetic signature and associated content of REE and Niobium derived from the rock chip and soil surveys that have been conducted.
- The expanded trench sampling program is expected to be completed over the next week.

Aldoro Resources Ltd ("**Aldoro**", "**The Company**") (**ASX: ARN**) is pleased to advise that the initial trench sampling program comprising of 7 trenches over the Kameelburg carbonatite has been completed with samples dispatched for expedited assay.

To enhance the understanding of the conformity of the carbonatite prior to drilling the Company has undertaken to expand the trenching program with an additional 15 trenches to be sampled ranging in length from 75 meters and up to 250 meters.

The purpose of the trenching program is to evaluate the geochemical anomalies in addition to providing more reliable information for our forthcoming drilling program. It is expected the expanded trenching program will be completed within the next week.

Authorised for and on behalf of the Board,

Sarah Smith
Company Secretary

About Aldoro Resources

Aldoro Resources Ltd is an ASX-listed (**ASX: ARN**) mineral exploration and development company. Aldoro has a portfolio of critical minerals including rare earth, lithium, rubidium and base metal projects. The Company's suite of projects include the Kameelburg REE & Niobium Project in Namibia, the Wyemadoo lithium-rubidium-tungsten project, the Niobe lithium-rubidium-tantalum project and the Narndee Igneous Complex project in Western Australia.
