

ASX Release

9 December 2024

Western Margin Drilling Program update.

Noble Helium Limited (ASX:NHE) is pleased to advise that BoreXpert has now received all required clearances to allow the importation of the drilling rig and associated equipment into Tanzania. Borexpert plan to mobilise the rig to site in mid-January subject to safe access conditions.

BoreXpert have advised that VAT deferral has now been granted by the Tanzanian Revenue Authority. This was the final clearance required to allow the importation of the rig and associated equipment into Tanzania. Subject to safe access conditions, BoreXpert will now clear customs and move the rig to site in mid-January, where it will be set up and readied to begin the drilling program once weather conditions permit.

Shaun Scott Managing Director and CEO said: *"While we are disappointed with this delay, with this final clearance BoreXpert can move the rig to site and setup ready to drill as soon as conditions allow. The move and setup will all be covered under the fixed mobilisation fee and positions us to move quickly to execute on this potentially significant shallow drilling program while managing the risk of delays and additional costs due to significant weather events."*

This announcement has been authorised for release on ASX by Noble Helium's Board of Directors.
