About Alderan Resources Limited

Alderan Resources specialises in critical and precious metal exploration.¹ The Company has copper and gold projects in Utah, USA (Cactus, Detroit, White Mountain) with tenements held either directly or through option agreements via Alderan's USA subsidiaries, Volantis Resources Corp and Valyrian Resources Corp plus eight (8) lithium projects in Minas Gerais and Bahia, Brazil (see Figures 1-3). Alderan's objective is to rapidly discover, delineate and develop critical metal and gold deposits for mining. The Company's project portfolio has high potential for discovery as it lies in under-explored geological belts with similar geology to neighbouring mining districts. Our exploration plans also include reviewing and securing new high potential opportunities to upgrade our pipeline of projects.
