

5,000+ METER PRE-DRILL TRENCHING PROGRAM COMPLETE

Highlights

- 5,160-meter pre-drill trenching program has been completed.
- A total of 22 trenches ranging in length from 70 meters and up to 600 meters have been tested with samples collected.
- Assay assemblage will test for Niobium and Rare Earth Elements (REE).
- Trenching assays will enhance drill location targeting and improve the understanding around the correlation between the Kameelburg carbonatite magnetic signature and associated content of REE and Niobium derived from the rock chip and soil surveys that have been conducted.
- Diamond drilling is progressing well with 4 holes completed to date utilising Aldoro's company owned diamond rigs. Drill core assays have been expedited.

Aldoro Resources Ltd ("Aldoro", "The Company") (ASX: ARN) is pleased to advise that the expanded pre-drill trenching program has been completed. A total of 5,160 meters of the carbonatite was trenched across a total of 22 trenches ranging in length from 70 meters and up to 600 meters.

A summary of the trench locations over the carbonatite and trench length is as follows:

Trench ID	North End		South End		Length
	Northing	Easting	Northing	Easting	
Trench 1	7702390	630550	7702320	630550	70

The Company undertook the trenching program with the aim of evaluating the geochemical anomalies in addition to providing more reliable information for current diamond drill program. All samples will be tested for Niobium and Rare Earth Element content.

To save time and shareholder funds the company will utilise XRF assays for the later trenches. Correlation between XRF readings and lab assays have been very good and within an acceptable tolerance limit.

The current diamond drilling program is progressing well with 4 holes completed to date utilising Aldoro's own diamond drilling rigs. The use of these diamond rigs has driven significant cost savings versus contractor quotes whilst also providing flexibility to manipulate hole depth and direction.

Diamond core is currently being cut and dispatched for expedited assay. All diamond hole assays will be undertaken by laboratory assay.
