Ora Banda Mining Limited (ASX: OBM) ("Ora Banda", "Company") is pleased to report on its activities for the December 2024 quarter – a period during which the Company demonstrated the robustness of its underground strategy with cashflow increasing over \$9 million despite spending over \$30 million on growth.

Riverina Underground operation achieved payback of its capital investment within 18 months of the portal being established and the Sand King Underground operations intersected first ore just four months after the portal was established.

Riverina Underground operation continued to deliver physicals which are in line with the required run-rate to achieve FY25 production guidance. As development progresses, the establishment of

more levels open will provide additional mining fronts and mining options as the year progresses. Total ounces mined for the quarter were 22,1870z at 4.4g/t including low grade material. Overall mined grade of 5.3g/t continues to reconcile above the Ore Reserve grade of 4.2g/t with the higher-grade lodes extending more than modelled.

The Sand King Underground mine achieved first development ore in December 2024 and remains on track to achieve first stoping ore in March 2025. The development ore will be batched through the Davyhurst mill commencing in February 2025. This will be achieved 14 months after the first drill hole targeting underground mineralisation was completed.

The Davyhurst mill had a strong quarter, processing 280kt of ore at a head grade of 2.9g/t. Riverina medium and high grade (average 4.9g/t) comprised only 41% of the feed, with the low-grade open pit legacy stockpiles and low-grade Riverina ore (together averaging: 1.5g/t) filling the remainder of the mill capacity. These low-grade feed sources are expected to be progressively replaced by higher grade Sand King material in H2 FY25 and FY26.

Managing Director's Comment

Ora Banda's Managing Director, Luke Creagh, said:

"It is a testament to the quality of Riverina Underground that it has paid itself back in just 18 months and is now delivering strong cash flows which will self-fund Ora Banda's production outlook towards 150koz in FY26.

"With Sand King Underground progressing on schedule, we have also reached an inflection point whereby the higher-grade feed from Sand King will progressively fill the Davyhurst mill, paving the way for production and cashflow to increase and costs to reduce.

"As the business strengthens and the results start to come through on our exploration programs, we will be in a position to rapidly advance any additional opportunities that exist in our portfolio".

Davyhurst Project

Processing

The Davyhurst mill continues to perform well, with a total of 280,409t milled at 2.9g/t for 22,973oz produced. Total tonnes milled increased 9% on prior quarter, however the depletion of the legacy open pit stockpiles resulted in a 15% reduction in head grade milled. This culminated in produced ounces being 6% down on prior quarter.

Drilling Programs

A total of \$5.5 million was spent on resource development and exploration activities during the quarter, driven by surface and underground programs at Riverina, which included:

- 5,231 surface diamond drilling metres;
- 6,558 surface reverse circulation metres; and
- 2,615 underground diamond drilling metres.

Two surface diamond drill rigs and one reverse circulation rig were complimented by a second underground diamond drill rig, to progress the Riverina south extension program. The focus during the March quarter is to continue to drill and define areas which require additional intersection points to achieve Mineral Resource definition and conversion.

The Sand King Underground diamond drill rig commenced operational grade control programs during the quarter, confirming multiple mineralised lodes per level, including high-grade lodes in addition to bulk tonnage opportunities, as announced on 19 December 2024.

Greenfields exploration activity and drilling across the tenement holding is expected to progress in the March quarter.

Gold Sold and AISC

Total gold sold for the quarter was 22,288oz, a 13% decrease from the previous quarter as the September quarter had benefited from a higher gold-in-circuit inventory. Processed grade for the quarter was 15% lower and in line with expectations with the processing of lower grade stockpiles combined with the Riverina ore.

AISC per ounce sold for the quarter was \$2,536/oz, an 11% increase from the prior quarter. Current quarter AISC/oz inclusive of \$116/oz of non-cash share-based payments and \$183/oz relating to the treatment of higher-cost open pit stockpiles mined in prior periods which are now depleted.
