Applicants outside Australia

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any of these restrictions. Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Shares.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

The Offer will only be extended and Application Forms will only be provided to specific parties on invitation from the Directors.

All of the Shares offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 3 for further information regarding the rights and liabilities attaching to the Shares.

1.3 Objective of the Offer

The primary purpose of this Prospectus is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus). Accordingly, the Company is seeking to raise only a nominal amount of \$580 under this Prospectus as the purpose of this Prospectus is not to raise capital.

The Company is not currently able to issue a cleansing notice under section 708A(5) of the Corporations Act due to its Shares having been suspended from trading on ASX for more than 5 trading days within the last 12 months. Accordingly, the primary purpose of this Prospectus is to remove any on-sale restrictions that may affect Shares that may be issued by the Company prior to the Closing Date of this Prospectus.

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

1.4 Application for Shares

Applications for Shares must be made by investors at the direction of the Company and must be made using the Application Form accompanying this Prospectus.

Payment for the Shares must be made in full at the issue price of \$0.058 per Share.

Completed Application Forms and accompanying cheques, made payable to "**Sprintex Limited**" and crossed "**Not Negotiable**", must be mailed or delivered to the Company at the address set out in the Application Form by no later than the Closing Date.

1.5 Minimum subscription

There is no minimum subscription.

1.6 Oversubscriptions

No oversubscriptions will be accepted by the Company.

1.7 Underwriting

The Offer is not underwritten.

1.8 Issue of Shares

As noted in Section 1.3, the primary purpose of the Prospectus is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus).

If the Directors decide to issue Shares under the Offer, the issue of Shares under the Offer will be issued in accordance with the ASX Listing Rules and will take place as soon as practicable after the Closing Date. Application moneys will be held in a separate subscription account until the Shares are issued. This account will be established and kept by the Company in trust for each Applicant. Any interest earned on the application moneys will be for the benefit of the Company and will be retained by the Company irrespective of whether any Shares are issued and each Applicant waives the right to claim any interest.

The Directors will determine the recipients of all the Shares. The Directors reserve the right to reject any application or to allocate any Applicant fewer Shares than the number applied for.

Where the number of Shares issued is less than the number applied for, the surplus monies will be returned by cheque as soon as practicable after the Closing Date. Where no issue of Shares is made, the amount tendered on application will be returned in full by cheque as soon as practicable after the Closing Date. Interest will not be paid on monies refunded.

The Company's decision on the number of Shares to be allocated to an Applicant will be final.

Holding statements for Shares issued under this Prospectus will be mailed as soon as practicable after the issue of Shares as soon as practicable after their issue.

1.9 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

1.10 Applicants outside Australia

The distribution of this Prospectus outside Australia may be restricted by law and therefore persons into whose possession this document comes should seek advice on and observe any such restrictions. Any failure to comply with these restrictions constitutes a violation of those laws.

The Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an Application to take up Shares on the basis of this Prospectus. The return of a duly completed Application Form will be taken to constitute a representation and warranty that there has been no breach of such laws and that all approvals and consents have been obtained.

This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

4. RISK FACTORS

4.1 Introduction

The Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors to consider the risk factors set out in this Section 4, together with information contained in this Prospectus.

The future performance of the Company and the value of the Shares may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 4, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 4 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

4.2 Company specific

RISK CATEGORY	RISK
Going Concern	The Company's financial report for the financial year ended 30 June 2024 (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern. The Company currently has more than sufficient funds to pay its debts as and when they fall due and has no current plans to raise further capital. However, it is highly likely that further funding will be required to meet the medium to long term working capital costs of the Company.
Research and development risks	<p>The Company can make no representation that any of its research into or development of new technologies or products will be successful, that any development milestones will be achieved, or that the products will be developed into products that are commercially exploitable.</p> <p>There are many risks inherent in the development of products in the automotive sector, particularly where the products are in early stages of development. Projects can be delayed or fail to demonstrate any benefit, or research may cease to be viable for a range of scientific and commercial reasons. Whilst the Company will continue product development and research on automotive technologies, and the use of substitute materials and processes used in the manufacture of its products, there is a risk that the development of new products will require costs beyond those budgeted and even if developed, there is no guarantee that the products can be successfully commercialised or exploited.</p>
Manufacturing risk	The Company regularly applies its technologies to products and applications that require the technology to be manufactured to a standard and at a cost acceptable to the industry, regulators and partners. There can be no guarantee that suitable manufacturers, manufacturing processes, techniques and materials can be found to a standard, cost or quality acceptable to the industry, market or partners. The Company has established manufacturing facilities in Malaysia and in China. Both facilities are wholly owned by the Company. This subjects the Company to associated regulatory, political and exchange rate risks. Whilst the Company has experience of operating in Malaysia and in China, the Directors have identified an experienced and qualified director who is

RISK CATEGORY	RISK
	resident in Malaysia, to serve as a director of the Malaysian entity, to assist in mitigating the risks associated with operating in a foreign jurisdiction. In China , Li Chen, non-executive director of the Company ,is a resident of China and is responsible for the operations of the Company's China manufacturing facility.
Product liability and uninsured risks	The Company may be exposed to potential product liability risks, which are inherent in the research and development, manufacturing, marketing and use of products in the automotive sectors. It will be necessary to secure insurance to help manage such risks. The Company may not be able to maintain insurance for product or service liability on reasonable terms in the future. In addition, the Company's insurance may not be sufficient to cover large claims, or the insurer could disclaim coverage on claims.
Protection of Intellectual Property Rights	<p>Securing intellectual property rights, in particular patents, is an integral part of securing potential product value from the outcomes of research and development. Competition in retaining and sustaining protection of intellectual property rights and the complex nature of automotive products can lead to expensive and lengthy patent disputes for which there can be no guaranteed outcome. The commercial value of the Company's intellectual property is dependent on legal protections. These legal mechanisms, however, do not guarantee that the intellectual property will be protected or that the Company's competitive position will be maintained. No assurance can be given that employees or third parties will not breach confidentiality agreements, infringe or misappropriate the Company's intellectual property or commercially sensitive information, or that competitors will not be able to produce non-infringing competitive products. Because the patent positions of companies with investments in automotive parts can be highly uncertain, and frequently involve complex legal and scientific evaluation, neither the breadth of claims allowed in patents nor their enforceability can be predicted. There can be no assurance that any patents the Company may own or control or license in the future will afford commercially significant protection of the technologies, or that any of the projects that may arise from the technologies will have commercial applications.</p> <p>It is possible that third parties may assert intellectual property infringement, unfair competition or like claims against the Company under copyright, trade secret, patent, or other laws. While the Company is not aware of any claims of this nature in relation to any of the intellectual property rights in which it has or will acquire an interest, such claims, if made, may harm, directly or indirectly, the Company's business. If the Company is forced to defend claims of intellectual property infringement, whether they are with or without merit or are determined in the Company's favour, the costs of such litigation may be potentially significant and may divert management's attention from normal commercial operations.</p>
Climate Risk	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the</p>

RISK CATEGORY	RISK
	<p>Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.</p>

4.3 Industry specific

RISK CATEGORY	RISK
Procurement and manufacturing risks and processes	<p>A number of the Company's suppliers are subject to the risks associated with operating in a foreign country. These risks may include economic, social or political instability or change, hyperinflation, currency non convertibility or instability, and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, licensing, export duties, repatriation of income or return of capital, environmental protection, safety, and labour relations, as well as government control over properties, or government regulations that require the employment of local staff or contractors, or require other benefits to be provided to local residents.</p> <p>Any future material adverse changes in government policies or legislation in Australia, Malaysia, China, Africa, the Middle East, Europe or the United States of America or in the Company's relationship with a supplier in one of these countries may affect the viability of the Company and its operations.</p> <p>Failures of equipment and machinery may result in production delays and lead to an inability of the Company to maintain supply which may have a negative impact on the Company's future operations, cash flows and viability.</p>
International Operations	<p>International sales and operations are subject to a number of risks, including:</p> <ul style="list-style-type: none"> (a) potential difficulties in enforcing agreements and collecting receivables through foreign local systems (b) potential difficulties in protecting intellectual property (c) increases in costs for transportation and shipping; and (d) restrictive governmental actions, such as imposition of trade quotas, tariffs and other taxes. <p>Any of these factors could materially and adversely affect the Company's business, results of operations and financial condition.</p>
Contractors and service providers	<p>The Directors are unable to predict the risk of financial failure, default, insolvency or other managerial failure by any of the contractors used by the Company in any of its activities; or insolvency or other managerial failure by any of the other service providers used by the Company for any activity.</p>
Market acceptance	<p>The global marketplace for most products is ever changing due to new technologies, new products, changes in preferences, changes in regulation and other factors influencing market acceptance or market rejection. This market volatility and risk exists despite the best endeavours of market research, promotion and</p>

RISK CATEGORY	RISK
	<p>sales and licensing campaigns.</p> <p>Accordingly, there is a risk that the Company may not be able to commercialise its new products or to retain a viable market for existing products, which could adversely impact the Company's operations.</p>
Loss of customers	<p>The Company has established important relationships through development of its business to date. The loss of one or more customers through termination or expiry of contracts may adversely affect the operating results of the Company.</p>
Product liability	<p>As with all products, there is no assurance that unforeseen adverse events or defects will not arise in the Company's products. Adverse events could expose the Company to product liability claims or litigation, resulting in the removal of regulatory approval for the relevant products and/or monetary damages being awarded against the Company. In such event, the Company's liability may exceed the Company's insurance coverage, if any.</p>
Foreign exchange	<p>The Company operates in a variety of jurisdictions, including, without limitation, Australia, the United States of America, Malaysia, China and Europe, and as such, the majority of the Company's sales, purchases and production are outside of Australia and are denominated in currencies other than Australian dollars. Any fluctuations in currency exchange rates may adversely or beneficially affect the Company's results or operations and cash flows. For example, the appreciation or depreciation of the US dollar relative to the Australian dollar would result in a foreign currency loss or gain. Any depreciation of currencies in foreign jurisdictions in which the Company operates may result in lower than anticipated revenue, profit and earnings of the Company. Further, the Company has decided to not put in place any hedges in relation to foreign exchange. This may result in the Company being exposed to exchange rate risk, which may have an adverse impact on the profitability or financial position of the Company. However, the Company sources the majority of its raw materials and parts in US dollars and with the exception of Australia, sells its products based on US dollar and Euro pricing, significantly reducing risks attributed to foreign exchange variations.</p>

4.4 General risks

RISK CATEGORY	RISK
Additional requirements for capital	<p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offers. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p>
Investment risk	<p>There are a number of risks associated with any stock market investment. The market price of Shares can be expected to rise and fall in accordance with general market conditions and factors and there can be no certainty that, following listing, an active market for the Shares will develop.</p> <p>The value of the Shares will be determined by the stock market and will be subject to a range of factors beyond the control of the Company or its Directors. These factors include movements in local</p>

RISK CATEGORY	RISK
	<p>and international stock exchanges, local interest rates and exchange rates, domestic and international economic and political conditions, government taxation, market supply, competition and demand and other legal, regulatory or policy changes.</p> <p>The trading price after listing may also be affected by the financial and operating performance of the Company.</p>
Share Market Risk	<p>The market price of Shares and other securities can be expected to rise and fall in accordance with general market conditions and factors specifically affecting Australian technology companies and technology companies with operations in the US.</p> <p>There are a number of factors (both national and international) that may affect the share market price and neither the Company nor its Directors have control of these factors.</p>
Management actions	<p>Directors of the Company will, to the best of their knowledge, experience and ability endeavour to anticipate, identify and manage the risks inherent in the activities of the Company, but without assuming any personal liability for the same, with the aim of eliminating, avoiding and mitigating the impact of risks on the performance of the Company and its security.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation point of view and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for Shares under this Prospectus.</p>
Force majeure events	<p>Acts of terrorism, an outbreak of international hostilities or fires, floods, earthquakes, labour strikes, pandemics, civil wars and other natural disasters may cause an adverse change in investor sentiment with respect to the Company specifically or the stock market more generally, which could have a negative impact on the value of an investment in the Shares.</p>
Economic	<p>General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's research, development and platform promotion activities, as well as on its ability to fund those activities.</p>
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>

RISK CATEGORY	RISK
Litigation risks	The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.
Dividends	Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.
Reliance on key personnel	The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.
Global Conflicts	<p>The current evolving conflict between Ukraine and Russia and Israel and Palestine (Ukraine and Gaza Conflicts) is impacting global economic markets. The nature and extent of the effect of the Ukraine and Gaza Conflicts on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by the Ukraine and Gaza Conflicts.</p> <p>The Directors are continuing to closely monitor the potential secondary and tertiary macroeconomic impacts of the unfolding events, including the changing pricing of commodity and energy markets and the potential of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the Ukraine and Gaza Conflicts, including limitations on travel and changes to import/export restrictions and arrangements involving the relevant countries may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>The Company is monitoring the situation closely and considers the impact of the Ukraine and Gaza Conflicts on the Company's business and financial performance to, at this stage, be limited. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain.</p>
