**SET TO DELIVER A
NEW ERA OF
GROWTH**

Corporate
Presentation

January 2025

Disclaimer and Cautionary Notices

This presentation has been prepared by Ironbark Zinc Limited ABN 93 118 751 027 (to be renamed Skylark Minerals Ltd) (**Skylark** or the **Company**). The information in this presentation remains subject to change without notice. The information in this presentation is of a general nature and does not purport to be complete, is provided solely for information purposes and should not be relied upon by the recipient. All financial information in this presentation is in Australian dollars (\$) or AUD) unless otherwise stated.

This presentation is not, and does not constitute, or form any part of, an offer to sell or issue, or the solicitation, invitation or recommendation to purchase any securities.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation does not purport to summarise all information that a recipient should consider when making an investment decision and should not form the basis of any decision by a recipient. Recipients should carry out their own investigations and analysis of Ironbark and verify the accuracy, reliability and completeness of the information contained in this presentation or any other form of communication to which the recipient is permitted to access while evaluating an investment in Ironbark.

Financial Information

The pro-forma financial information provided in this presentation is for illustrative purposes only and does not represent a forecast or expectation of Skylark's future financial condition or performance. It does not include all the presentation and disclosures, statements or comparative information as required by the Australian Accounting Standards or other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations act 2001 (Cth).

Certain figures, amounts, percentages, estimates, calculations of value and fractions provided in this presentation are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this presentation.

Past and Future Performance

Past performance information given in this presentation is given for illustrative purposes only and should not be relied upon as (and is not) an indication of future performance.

This presentation contains certain "forward-looking statements". The words "expect", "anticipate", "likely", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "forecast", "predict", "plan", "aim", "target" and other similar expressions that involve risks and uncertainties are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice and involve known and unknown risks and certainties and other factors which are beyond the control of Skylark, its Directors and management.

You are strongly cautioned not to place undue reliance on forward-looking statements. Forward-looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Actual results, performance or achievements may differ materially from those expressed or implied in such circumstances and any projections and assumptions upon which these statements are based.

No representation or warranty, express or implied, is made as to the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects returns or statements in relation to future matters contained in this presentation. The forward-looking statements are based on information available to Ironbark as at the date of the presentation. Except as required by law or regulation (including the ASX Listing Rules), none of Skylark, its representatives or advisers undertakes any obligation to provide any additional or updated information whether as a result of a change in expectations or assumptions, new information, future events or results or otherwise. Indications of, and guidance or outlook on, future earnings or financial position or performance are also forward-looking statements.

No new information

This presentation contains information extracted from ASX market announcements reported in accordance with the Listing Rules and JORC 2012 and are available for viewing at <https://ironbark.gl/investor-centre/asx-announcements/>. The Company confirms that it is not aware of any new information or data that materially affects the information included in any original ASX market announcement.

This presentation is authorised to be issued by the Managing Director

Corporate Overview

Skylark Minerals | Set to deliver a new era of growth

CAPITAL STRUCTURE

Shares on issue	70,309,787
Share Price	A\$0.29
Market Capitalisation (undiluted ¹)	A\$20.4M
Cash (at 31 December 2024 net of placement costs)	A\$9.5M
Implied Enterprise Value (undiluted)	A\$10.9M

OWNERSHIP STRUCTURE

Skylark Minerals represents a strategic evolution, emerging with a clear vision to deliver exceptional value in the global resources sector. Guided by a top-tier executive team and supported by a strong balance sheet with a capital structure designed for flexibility, **Skylark Minerals is set for success.**

Our dual-track strategy combines **rapid, acquisition-led expansion** with **targeted and systematic exploration**, driving the advancement of a portfolio of highly prospective natural resource assets.

Skylark Minerals is well-positioned to deliver sustainable growth and create significant value for all stakeholders.

1. Other securities on issue include: 1,843,326 listed SKMO listed options @ \$2.75 exp 7 November 2025; 400,000 unlisted Options @ \$1.25 exp 14 December 2026; 21,713,310 unlisted Options @ \$0.30 exp 3 July 2026; 21,713,171 unlisted Options @ \$0.40 exp 3 January 2028; 3,390,000 Tranche A Performance Rights @ \$0.30; 3,390,000 Tranche B Performance Rights @ \$0.40

Guided by a top-tier Board and Executive team

With a demonstrated track record of success

Most recently director and founding chief executive officer of Nord Gold S.E. Mr. Zelenski successfully lead the company from startup to a top fifteen gold mining enterprise with annual EBITDA of over US\$1 billion.

MR. NIKOLAI ZELENSKI | EXECUTIVE CHAIR

Previously Group Head of Business Development at Anglo American, Mr. Cahill has over 30 years' experience leading the full life cycle of major complex transactions in the natural resources sector.

MR. PAUL CAHILL | NON-EXECUTIVE DIRECTOR

Dr. Hess is a Member of the AusIMM and an experienced resources sector Executive and Director. He has served as Chairman of Ironbark since 2019.

DR. FRED HESS | NON-EXECUTIVE DIRECTOR

Mr. Segman brings extensive expertise in banking, construction, and property development. With a strong track record in building successful enterprises, he offers invaluable business acumen and strategic insight.

MR. DANNY SEGMAN | NON-EXECUTIVE DIRECTOR

Mr. Jardine has a background in Corporate Finance, Strategy Development and Minerals Marketing. His previous experience includes Board and Executive roles at several ASX-listed resource companies.

MR. MICHAEL JARDINE | MANAGING DIRECTOR

MR. ALEXANDER DOWNER
BOARD ADVISOR

MR. PETER BACCHUS
BOARD ADVISOR

Divestment of the Citronen Base Metals Project

Binding agreement reached to divest 100% of Citronen

TRANSACTION HIGHLIGHTS

- Will mark the conclusion of a 17-year presence in Greenland, **signifying a pivotal milestone in strategic evolution.**
- Divestment directly **aligns with the stated commitment to enhance the asset base and deliver value for shareholders.**
- Provides a **fresh foundation for the leadership team from which to launch the proven acquisition framework** targeting gold and precious metal opportunities.
- Proceeds from the **all-cash gross consideration of A\$1.4 million** will primarily support ongoing exploration at Skylark's project portfolio.
- **Completion is expected to occur within four months,** inclusive of a statutory three-month consultation period overseen by the Government of Greenland and is subject to the satisfaction of various conditions precedent typical for a transaction of this nature.

Skylark's Managing Director Mr Michael Jardine, said:

"Our journey in the Greenland mining industry has spanned nearly two decades, but with the sale of the Citronen Project, this chapter is coming to a close.

We have been working to enable the delivery of our turnaround strategy for some time, adding several exploration projects to the portfolio in the last twelve months and attracting an exceptional team of gold industry executives to the business. This transaction represents both a continuation of this transformation and a pivotal step to ensure that the forward concentration of the team can be on activity that provides maximum value potential.

On behalf of the Board and Executive team, I extend our best wishes to the new owners and look forward to following their progress. To our shareholders, both longstanding and new - stay tuned, our future holds tremendous promise".

Refer to IBG's ASX release on 17 December 2024, "Ironbark Zinc to Divest Citronen Project"

Our dual-track advancement strategy

Designed to enable sustainable growth and unlock significant value for our stakeholders.

A

Aggressive pursuit of gold sector acquisition opportunities to deliver transformational growth

RAPID, ACQUISITION-LED EXPANSION

- A revitalised strategy underpinned by a strong balance sheet and internal expertise, targeting opportunities across the gold and precious metals sector.
- Acquisition framework actively in use, with multiple projects shortlisted and due diligence well underway.
- Geographically diversified focus, with opportunities ranging from advanced-stage assets to early-stage exploration plays.
- Significant progress anticipated, with key announcements targeted for Q1 CY25.

B

Cost-effective, data-driven exploration focused on delivering new copper and critical mineral discoveries

TARGETED, SYSTEMATIC EXPLORATION

- Planning for the CY25 field programme at the Anderson Copper Project underway, focused on maximising discovery potential.
- Desktop targeting activities advancing to shape an initial fieldwork programme at the Perseverance Project, Minas Gerais, Brazil.
- New investment under consideration for the NSW Projects, supported by strong metal prices and strategic growth potential.
- CEI grant application submitted for Mt Isa; **OzEx** engaged to conduct a prospectivity study at Perseverance, with results anticipated in Q1 CY25.

A: Adopting the Nordgold model to deliver rapid success

From startup to a leading internationally diversified gold producer with annual EBITDA of over US\$ 1 billion

STAGE 1: ACQUISITION-LED GROWTH

- **Taborny** and **Suzdal mines** acquired in 2007.
- **High River Gold acquisition** in 2008 included the **Bissa Project** and **Taporko, Ironkinda and Berexitovy operating mines**.
- **Crew Gold acquisition** in 2010 added the **Lefa mine** to the portfolio.

STEP-CHANGE EXPANSION

STAGE 2 : NEW MINE DEVELOPMENT

- **Bissa mine** successfully achieved **first production in 2013**.
- Nearby **Bouly mine** **bought into production** in 2016, on schedule (13 months) and more than 10% under budget.
- **Gross mine** entered operation in 2018.

STAGE 3 : PRODUCTION EXPANSION

- **Pipeline of organic and inorganic growth initiatives strengthened.**
- **Total Nordgold Ore Reserves exceeded 15 million ounces by the end of 2020.**

FY2021 NORDGOLD HIGHLIGHTS

- Diversified operations across **four countries** and **two regions**.
- **More than 1.0 million ounces** of gold produced in 2021.
- **US\$ 552 million** in free cash flow generated in 2021.
- **Rapid payback, less than three-years** on newly constructed mines.

IMMENSE VALUE GENERATION DELIVERED THROUGH SENSIBLE ACQUISITIONS AND SUSTAINABLE PRODUCTION GROWTH

A: Rapid growth defined Nordgold's foundational years

Set to unlock an attractive new avenue for corporate transformation and value growth

ACQUISITION-LED GROWTH

Future gold sector acquisition opportunity pipeline to be built utilising deep industry experience and leveraging a vast professional network

NORDGOLD: PHASE 1 APPROACH

STEP-CHANGE EXPANSION

TRACK RECORD OF SUCCESS HIGHLIGHTS A DISTINCT COMPETITIVE ADVANTAGE

WELL-DEFINED FRAMEWORK FOR ESTABLISHING AN OPPORTUNITY PIPELINE

PROJECT STAGE	REGION	PRODUCTION	ORE TYPE	LOCATION	SOURCE
All gold sector projects considered excluding early exploration and pre-closure mines.	Initially targeting Africa, plus Central Asia, North America and Europe.	Target assets with existing or future economic production potential.	Prioritising non-refractory ores, suitable for CIL or Heap Leach processing. Open Pit preferred.	Proximity to established infrastructure highly desirable.	Public juniors, non-core assets of majors, regional private companies, and/or government projects.

B: Targeted, systematic exploration

Across an opportunity set diversified by development stages, geographies and commodities

CITRONEN | DIVESTMENT TERMS AGREED

Base Metals Project | Northern Greenland

Greenland, 100% SKM)

- Binding terms for the divestment of Citronen agreed
- Cash consideration A\$1.4m
- Settlement expected 1H 2025

1

SIMON-ANDERSON

Copper Projects | Mt Isa, Queensland

Australia, 80% SKM)

- Low-cost exposure to the copper market
- Located in a historic mining centre
- Proximate to Austral Resources Ltd (ASX: AR1) McLeod Hill Resource (1.7 Mt @ 0.6% Cu), 5,000 t/day heap leach and processing facility

2

PERSEVERANCE

Critical Minerals Project Minas

Gerais

Brazil, 100% SKM)

- Package of seven project areas northeast of Minas Gerais, Brazil
- Considered highly-prospective for lithium and lithium-related minerals

3

AUSTRALIAN BROWNFIELD EXPLORATION

Copper and Gold Exploration Projects | New South Wales, Australia

- Fiery Creek EL 6925 (100% SKM)
- Captains Flat EL 6381 (50% SKM, 50% Glencore)

B.1: Simon-Anderson Copper Projects

Historic mining area offering year-round copper exploration potential proximate to Mt Isa

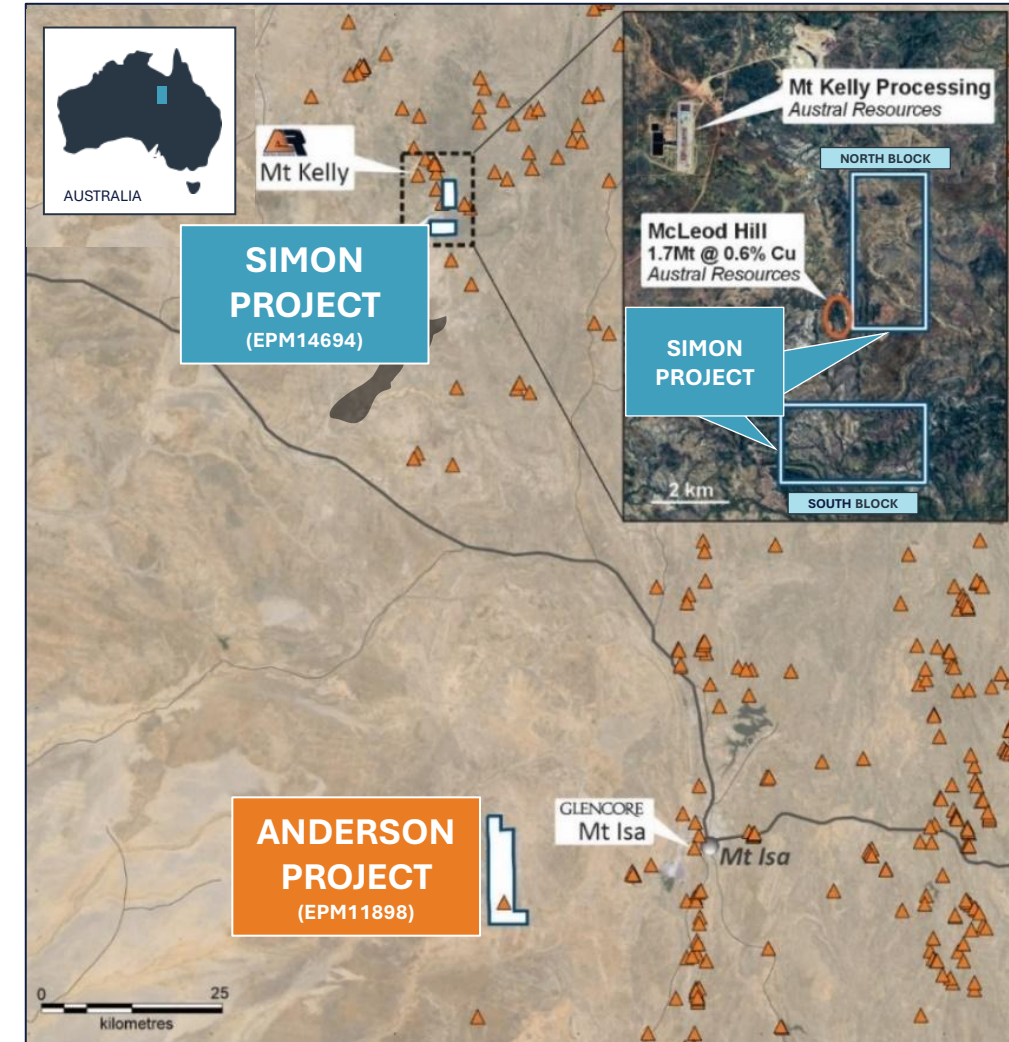

SIMON PROJECT

- Proximate to Austral Resources Ltd (ASX: AR1) McLeod Hill Resource (1.7 Mt @ 0.6% Cu¹), 5,000 t/day heap leach and processing facility.
- Historically underexplored considering its proximity to the McLeod Hill deposit, with no drilling conducted on the permit.
- Geology is considered favourable for copper mineralisation, with the Paradise Creek Formation and Fiery Creek Volcanics, and the McNamara and Mt Jeannett Fault systems all within the licence area. The key areas of interest are:
 - **North Block:** mineralisation along the Mt Jeanette Fault Zone.
 - **South Block:** within the Fiery Creek Volcanics along the McNamara Fault Zone.

ANDERSON PROJECT

- Stand-alone exploration licence covering a 15 km section of the prospective May Downs Fault approximately 30 km west southwest of Mt. Isa.
- Historic exploration focused on the Carters Ridge Copper Prospect in the southern area of the tenement which has had limited sampling or drilling conducted.
- Multiple untested geophysical anomalies identified in the northern section of the tenement, warranting further exploration.
- Permit is pegged along the track of possible mineralised segments of the May Downs Fault Zone cutting the permissive ferruginous and silicified dolomitic clastics (Gunpowder Creek Formation).

1. For full Mineral Resource Estimate details refer to AR1 ASX announcement dated 20 May 2024.

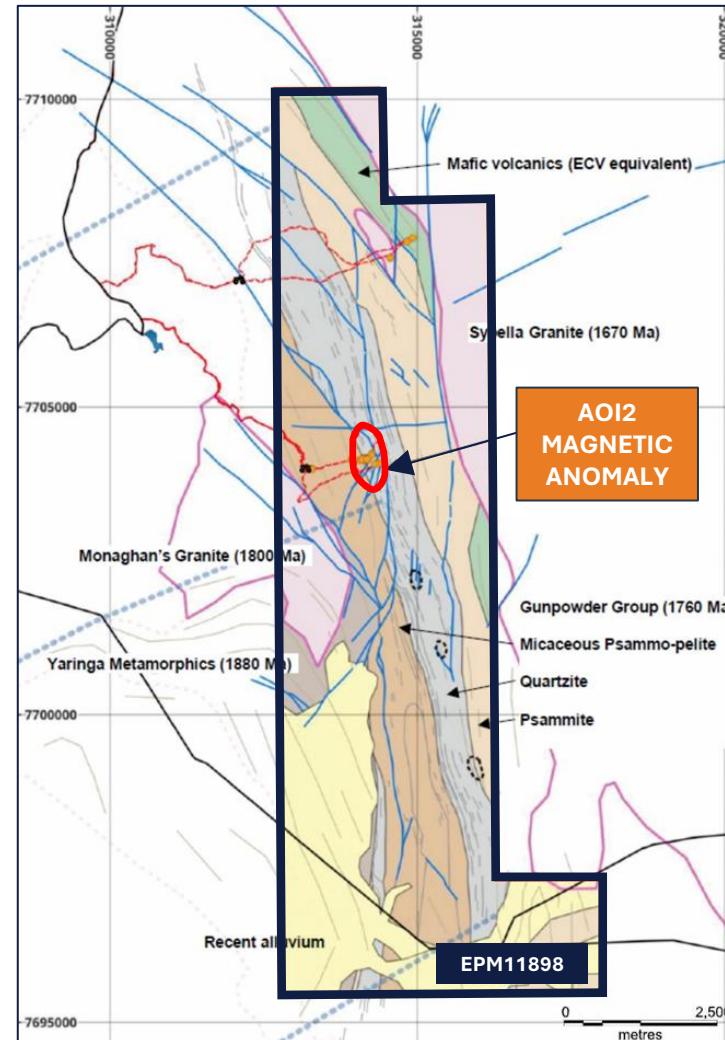

B.1: Simon-Anderson Copper Projects

Successful reconnaissance at the Anderson Project, geophysical modelling identifies multiple new targets

ANDERSON PROJECT

- Recent field reconnaissance confirms favourable geology present at the AOI2 magnetic anomaly at the Anderson Project.
- Magnetic modelling shows two shallow stacked lodes present, interpreted to reach within 170m of surface at the northern extent before plunging to the south.
- Induced polarisation survey in planning, to better understand the potential size and orientation of any sub-surface ore body, designed to maximise the probability of drilling success.

For additional detail refer to IBG's ASX release on 26 September 2024 "Ironbark Completes Geophysical Targeting Exercise on Anderson Cu Project, Mt Isa".

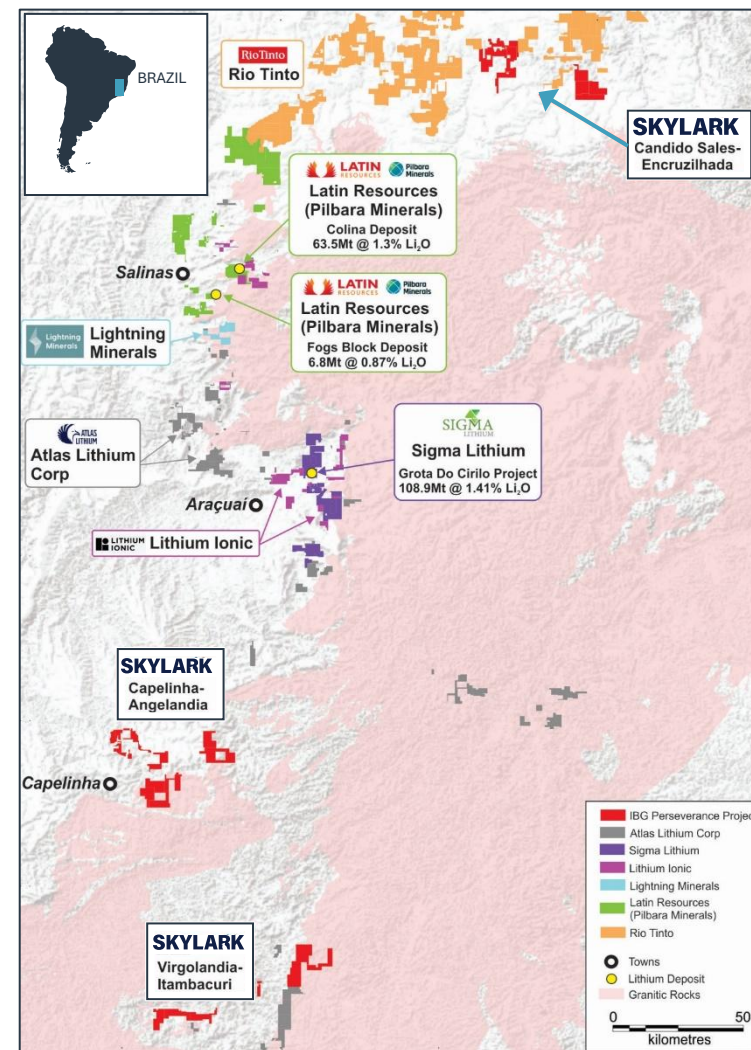

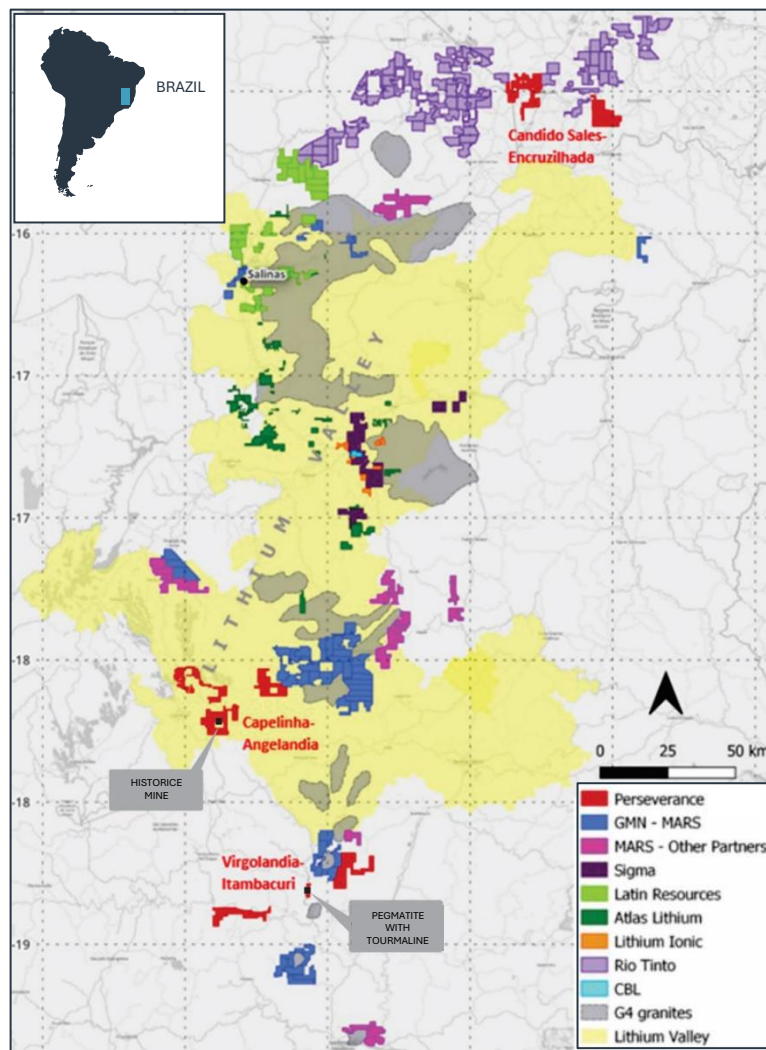

B.2: Perseverance Critical Minerals Project

Highly-prospective for lithium and lithium-related minerals + rare earth elements

PERSEVERANCE PROJECT

- Consists of seven key projects in northeastern Minas Gerais.
- Located within the geological extensions of the Lithium Valley, a politically defined area encompassing the towns of Salinas and Araçuaí, which are adjacent to the mines and JORC/NI43-101 compliant resources of CBL, Sigma Lithium and Latin Resources.
- Comprised of 27 tenements with a total area of approximately 52,000 ha.
- Numerous artisanal mines are situated within the tenement boundaries.
- The Araçuaí Orogen display a series of specific characteristics that make it prone to lithium mineralisation.
- Known mineralisation includes not only common pegmatite minerals but also occurrences of minerals indicative of LCT-type pegmatites.
- OzEx Prospectivity Study underway, with results due Q1 CY25.

B.3: Brownfield Copper and Gold Exploration Projects

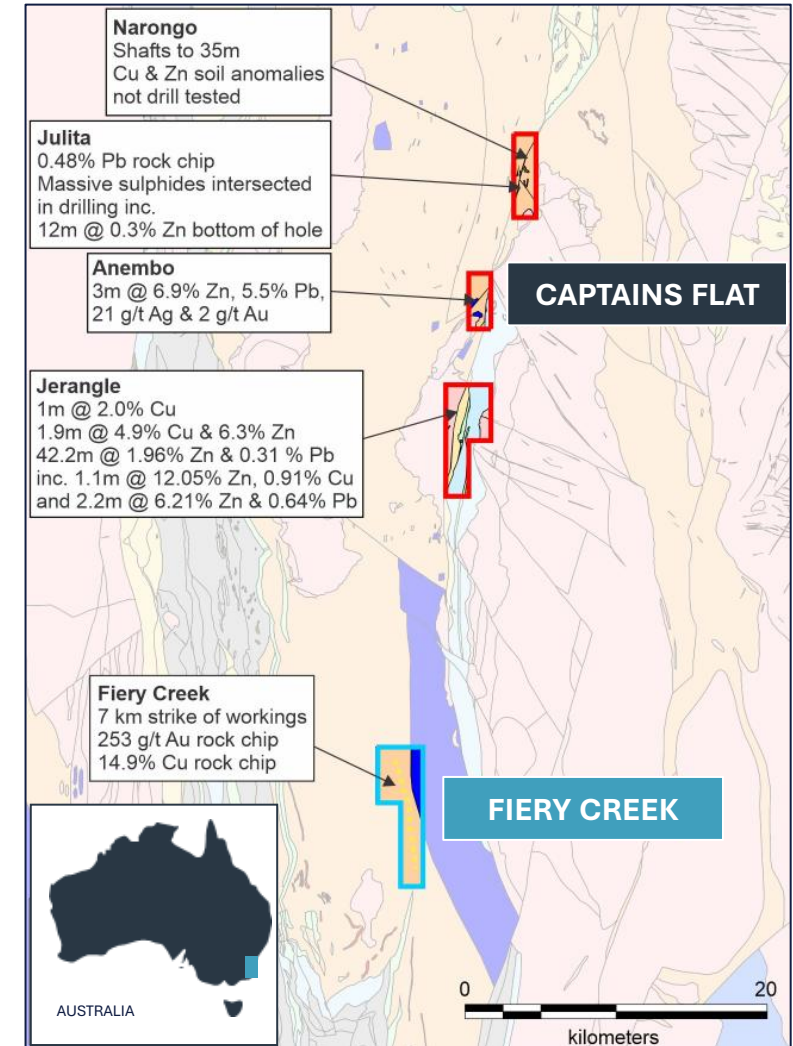

Copper and gold exploration in a historic New South Wales gold field

CAPTAINS FLAT

- Covering 31 km² and located 50 km southeast of Canberra and south of the old mining town of Captains Flat.
- Held in a joint venture with subsidiary of major diversified miner Glencore Plc (LSE: GLEN).
- Recorded historic production included 26.7 t silver, 16,100 oz of gold and 3,841 t of copper from just 114,560 t of ore.
- Mine was reopened in 1937 and up to the date of its closure in 1962 produced 406,418 t zinc, 243,851 t lead, 27,230 t copper, 7.4 Moz of silver and 220,000 oz of gold from over 4 Mt of ore.
- December 2024 field reconnaissance programme confirmed **geological characteristics at the Narongo Prospect are highly favourable for base metal mineralisation.**
- Planning for a follow-up field trip is underway, **with on-field activities scheduled for the second half of 2025.**

FIERY CREEK CU-AU PROJECT

- Located approximately 90km south-southeast of Canberra, approximately 5km along strike of the historic Cowarra Gold Mine.
- Includes the historic Fiery Creek and Macanally gold and copper workings from the early 1900's that extend for over 7km.
- Reported mining at the sites occurred to only 12m below surface.
- Rock chip sampling completed along the line of workings returned spectacular grades, which included:
 - **Peak gold results:** 253.0 g/t, 94.8 g/t, 91.5 g/t and 53.4 g/t.
 - **Peak copper results:** 14.9%, 7.6% and 6.6%.
- Future exploration work programmes to be evaluated.

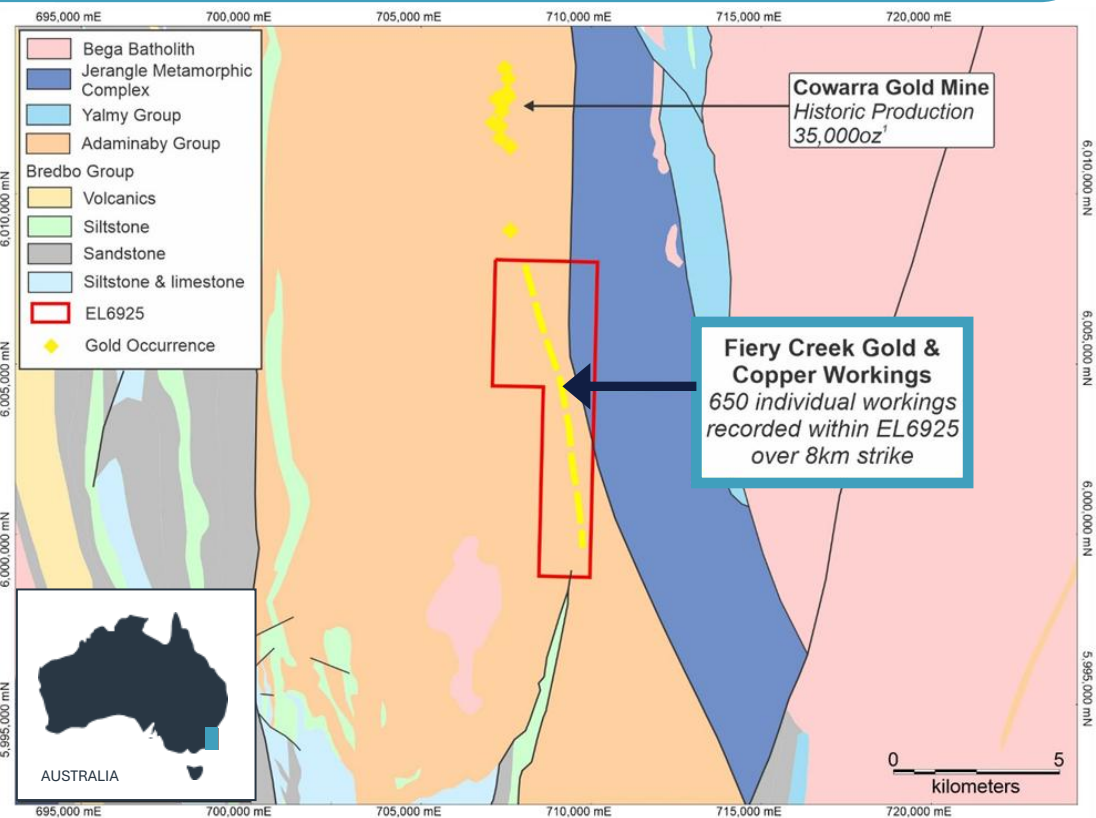

For additional detail refer to IBG's ASX release on 1 May 2013 "High-grade Gold and Copper Rock Chip Results". Skylark confirms that it is not aware of any new information or data that materially affects the information included in this announcement.

B.3: Brownfield Copper and Gold Exploration Projects

Fiery Creek geology and historic workings

GEOLOGY OF THE FIERY CREEK PROJECT¹

1. Image displays the line of historic workings within EL6925, located 5 km south of the historic Cowarra Gold Mine (1. Thompson, 1989). First disclosed by Ironbark on 16 December 2022, refer to IBG's ASX release "Fiery Creek Program - High Grade Copper found at surface"
2. Image lower left: Sample FR044: a malachite and azurite mineralised schist containing 7.56% copper and 3.07 g/t gold. Image lower right: Sample FR032: oxidised mullock sample from the Fiery Creek workings containing 253g/t gold. Refer to IBG's ASX release on 16 December 2022 "Fiery Creek Field Program Underway; High Grade Copper found at surface". Skylark confirms that it is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

EXAMPLE OF HISTORIC WORKINGS²

FR044: 7.56% Cu and 3.07 g/t Au

FR032: 253% g/t Au
