#### **Ministerial Endorsement Received**

On 10<sup>th</sup> December, VHM was pleased to advise that it had received endorsement of its Environment Effects Statement (**EES**) for the Company's Goschen Project from the Victorian Minister for Planning, the Hon. Sonya Kilkenny (**Minister**).

The recommendation places VHM in a favourable position to accelerate investment discussions and develop strategic partnerships as the Company progresses to FID and then development of the Goschen Project. The recommendation is the result of extensive technical, environmental, and social studies conducted over several years and follows a rigorous evaluation process.

The Company's achievement in obtaining Ministerial endorsement of Goschen's EES is a major step forward in the initiation of a new rare earth and minerals sands project in Victoria.

The Company thanks the Hon. Sonya Kilkenny and other key decision-making authorities involved in the outcome of the Goschen EES assessment.

#### **Mining Licence Application**

Following the receipt of Ministerial Endorsement for the EES, the Goschen Mining Licence application will now be assessed by Resources Victoria for approval, and the Ministerial terms will inform the further development of the Goschen Project's Work Plans for subsequent approval by Resources Victoria.

## The Goschen Project

The Goschen Project is a Tier 1 integrated rare earth and mineral sands project with globally significant mineral assemblage, positioned to commence production which will deliver on the Australian Government's Critical Minerals Strategy.

VHM has worked diligently in accelerating the Goschen Project towards production and has completed extensive development works to ensure the Company can proceed to production following receipt of its Mining Licence, Work Plan and necessary development licences that underpin FID.

The key attributes of the Goschen Project include:

- Significantly de-risked project: Received endorsement of its Environment Effects Statement (EES) from the Victorian Minister for Planning
- Located in Northwest Victoria, a stable jurisdiction: Ready access to infrastructure, with
  the state government recently releasing its critical minerals roadmap which outlines the government's vision to support development of a world leading critical minerals industry
- Clear pathway to production: Mining licence approval and work plan submissions are well
  underway, a final investment decision (subject to financing) is expected by mid-2025, early
  engineering works are progressing to enable construction to commence in late 2025, with first
  production planned in second half of 2026
- **Significant Reserves:** Initial 20+ year mine life making the Goschen Project a multi-generational project, with significant reserves providing potential for further expansion
- **Simple operating methodologies:** Comprising shallow-pit mined via truck-shovel with conventional gravity/spirals and floatation processing flowsheet

- **Dual commodity asset:** Will generate revenue from two independent product streams with rare earths and zircon and titanium
- Compelling mineral assemblage and mineralisation: A unique orebody with both light (NdPr) and heavy (DyTb) rare earths mineralised in sands
- Rigorous environmental and social standards applied: Victorian EES process completed
- 100% land ownership: VHM has acquired all land required for the Goschen Project footprint<sup>1</sup>

#### **Mineral Resources and Reserves**

The Company's current Mineral Resources and Reserves (see Appendix 1) stands at:

- 892.1 million tonne Mineral Resource Estimate (MRE)
- 210.2 million tonne Ore Reserve
- 649,000 tonne Total Rare Earth Oxide (TREO) and Y<sub>2</sub>O<sub>3</sub>

- 1. Mineral resources reported at a cut-off grade of 1.0% THM
- 2. Mineral resources reported at a cut-off grade of 1.75% THM
- 3. Mineral resources reported at a cut-off grade of 1.0% TVHM (THM \* VHM)
- 4. Mineral assemblage, via QEMScan particle analysis, is reported as a percentage of in-situ THM content
- 5. In-situ TREO Grade is calculated by THM Grade (2.95%) multiplied by TREO Grade (2.43%)
- 6. Combined mineral resource at a cut-off grade of 1% THM for Area1 and Area 3 and 1% TVHM for Nowie, Area 2 and Area 4
