

Paulsens Gold Operation – Progress Update

Black Cat Syndicate Limited (“**Black Cat**” or the “**Company**”) is pleased to provide an update on progress at the 100% owned Paulsens Gold Operation (“**Paulsens**”).

HIGHLIGHTS

The commissioning of the processing facility has progressed safely, efficiently and to plan. The focus has now turned to processing the higher-grade material. Recent activities include:

- Completion and commissioning of the elution circuit with first gold poured from the CIL circuit.
- Efficient gold recovery, averaging >92% to date, on low-grade commissioning stockpiles.
- ~39kg of gold bars poured to date, with the processing facility moving to weekly gold pours.
- High-grade Ore now being fed into the processing circuit as commissioning winds down.
- Delivery of additional mobile mining equipment, including: a second DL421 jumbo drill; a DL431 production drill; 2 x Cat R1700 loaders; and 2 x TH663 dump trucks. Commissioning of these units is underway.
- Delivery and commissioning of the bulk emulsion explosive system for the underground is underway.
- Selective mining is ongoing with first stoping expected in February 2025.
- Preparation of diamond drilling platforms in advance of underground grade control and extensional drilling; to commence in early February 2025.

Black Cat's Managing Director, Gareth Solly, said: “It's been a positive start to the year for Black Cat with strong recoveries and first gold from the CIL circuit. The commissioning of the processing facility at Paulsens is advancing well and expected to be completed in February 2025, at around the same time the first high-grade stopes will be mined.”

Paulsens Gold Operation – Progress Update

ONGOING PROGRESS

All activities on site have been conducted safely and efficiently with no incidents. Commissioning of the newly arrived underground equipment has commenced, and the focus has shifted from refurbishment to optimisation of production.

One of the recovery improvement initiatives undertaken during refurbishment was the conversion of the leach and carbon-in-pulp (CIP) circuit to a full carbon-in-leach circuit (CIL). Results already indicate improved recoveries of gold from low-grade stockpiles. Following the successful commissioning of the elution circuit, the high-grade underground Ore is now being introduced into the processing facility.

Commissioning of the new fleet of underground mining equipment has commenced following their delivery to site. The fleet now consists of 2 x DL421 jumbo drills, 1 x DL431 production drill, 2 x R1700 loaders and 2 x TH663 dump trucks.

Paulsens Gold Operation – Progress Update

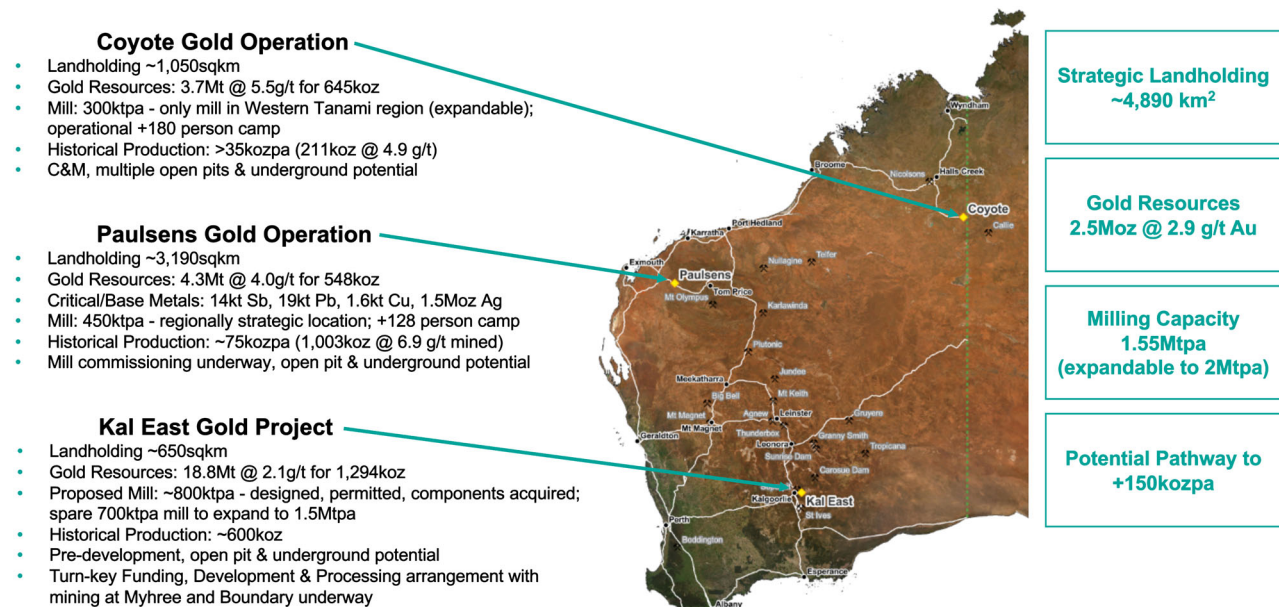

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat is fully funded and the key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation has commenced commissioning and will move to full production in early 2025. Paulsens has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area.

Kal East Gold Project: comprises ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway¹. Separately, Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The processing facility, with throughput up to 1.5Mtpa, will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.

Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
- All tonnages reported are dry metric tonnes.
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- Resources are reported inclusive of any Reserves.
- Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.
