West Australian gold company Focus Minerals (**ASX: FML**) (**Focus** or the **Company**) is pleased to provide its Quarterly Activities Report for the quarter ended 31 December 2024. Most of the Company's effort during the quarter was directed towards the Coolgardie Gold Operations (**CGO**).

Coolgardie Gold Project

The Coolgardie Gold Project (**Coolgardie**) covers 116.6km² of highly prospective tenements on the outskirts of the Coolgardie township in the Goldfields region. The Company's efforts are focused on optimising mining and processing ore from Greenfields Open Pit and planning the development of the Bonnie Vale Underground Mine.

CGO Production Activities

During the quarter under review substantial production progress was made:

Open Pit Mining:

- The Company moved 703,102 tonnes of materials from Greenfields, consists of 270,683 tonnes of ore from the Greenfields open pit along with 452,419 tonnes of waste.
- The Company has moved 25,496 tonnes of low-grade material from satellite deposits to supplement the ore from Greenfields.
- The Company has started surface preparation works for mining to commence at the Alicia pit.

Bonnie Vale Underground Mining

- All necessary site facilities and supporting infrastructure have been successfully established for ongoing operations.
- Successful mobilisation of mining vendor partner, Barmenco to site. Collaboration with Barmenco has commenced smoothly, bringing industry-leading expertise and capabilities to the project.
- First cutting of the portal and decline occurred during the quarter marking the official commencement of underground development. At the end of the quarter, 23 meters of the decline have been completed.

TMH Ore Processing:

- At TMH, the Company processed a record 351,553 tonnes of ore during the quarter, which is a great achievement considering the name plate capacity of the TMH plant is 1.2MT per annum.
- A total of 9,975 ounces of gold were sold at an average price of A\$4,132 per ounce. The Company has also received and sold silver credits of 654 ounces at spot prices.
- During the quarter the Company has processed a total of 64,613 tonnes of third-party ore on a toll basis. The toll milling arrangement is necessary to allow for the build-up of the Company's own ore stockpile from mining at Greenfields whilst keeping the TMH plant running to generate revenue.
- The Stage 3 lift of the tailings storage facility (TSF), along with the decant tower lift and associated tailings delivery pipework, has been successfully completed. This upgrade ensures mid-term capacity to support increased production rates prior to transitioning the Greenfields pit as an in-pit tailings facility, upon completion of mining activities at Greenfields.

Exploration Activities

During the quarter planning and budgeting were underway for 2025 programs. Assistance was also provided for mine development activities at Bonnie Vale including water bores and pilot holes for water bores.
