RAVENSTHORPE GOLD PROJECT (WESTERN AUSTRALIA) (ownership – 100%)

Medallion Metals Limited (ASX:MM8, the Company or Medallion) is pleased to report on activities at its projects during the December 2024 quarter.

Forrestania Opportunity

Medallion has entered into an Exclusivity Agreement with IGO Ltd (ASX: IGO) that grants Medallion a period of exclusivity in which to negotiate a proposed acquisition of certain assets of the Forrestania Nickel Operation, including the Cosmic Boy Process Plant (Proposed Transaction) and associated infrastructure. The exclusivity period is 9 months, with the ability to extend for up to a further 3 months (Exclusivity Period).

Medallion believes there can be significant value unlocked from bringing FNO’s infrastructure together with Medallion’s established resources at its 100% owned Ravensthorpe Gold Project (RGP), situated 160km south of FNO by a predominantly bitumen sealed road (Figure 1).

Figure 1: Location of Forrestania Nickel Operations and the Ravensthorpe Gold Project (global resource metrics shown)

Forrestania presents an opportunity to reduce the RGP development timeframe, capital, operating risk and importantly, improve the environmental credentials of RGP through reducing disturbance by taking advantage of the established infrastructure at FNO.

Scoping Study

During the quarter, Medallion report the results of the initial Scoping Study for RGP with processing at Forrestania (the Project) (Study).

The Study was premised upon the completion of the Proposed Transaction with IGO. Study results confirm the Project as a technically and commercially robust development opportunity, generating strong cashflows and offering returns on investment which are attractive relative to the risks identified through the Study process.

All figures presented below are approximate. All dollars are Australian Dollars (\$) unless stated otherwise.

Study Highlights:

- Initial production inventory of **2.7Mt @ 3.9 g/t Au & 0.6 % Cu for 342 koz Au & 16 kt Cu contained**
- Total initial metal production of **336 koz Au & 13 kt Cu**
- Mine life 5.5 years generating pre-tax cashflows averaging **\$90 million per annum** under base case assumptions
- **Pre-tax free cash flow of \$498 million** assuming A\$3,615/oz Au, A\$5.54/lb Cu (base case)
- **Pre-tax free cash flow of \$637 million** assuming A\$4,000/oz Au, A\$6.15/lb Cu (spot)
- Forecast average **All-In-Sustaining-Cost (AISC) of A\$1,845/oz** of Au produced (net of by-product credit)
- **Total pre-production capital cost of \$73 million** inclusive of mine establishment and process plant modifications
- **Pre-tax NPV₁₀ of \$329 million & IRR 129%** (base case)
- **Pre-tax NPV₁₀ of \$429 million & IRR 169%** (spot)
- **Payback period: 12 months (base case), 9 months (spot)**
- Establishment of proven & industry standard process route of gravity-flotation-CIL (Deflector analogy) at Forrestania to deliver **high gold recovery (98%) and copper recovery (80%)** to saleable products over the Project life
- **Significant potential to enhance Project returns through increased throughput rate and mine life extension**

Potential Upside Drivers:

- RGP Mineral Resource conversion and extensions (15km drill program well advanced);
 - Initial production inventory represents 44% of existing sulphide Mineral Resource (gold content)
 - Deposit shallowly drilled, Mineral Resource extends to 330 metres, deepest hole 415 metres below surface
- Commercialisation of RGP oxide/transitional Mineral Resources (10.3 Mt @ 1.6 g/t Au for 520 koz Au), Trilogy deposit Mineral Resources (5.6 Mt @ 0.9 g/t Au, 54.4 g/t Ag, 1.2 % Cu, 2.4 % Pb, 1.4 % Zn)¹
- Redeployment of surplus mine infrastructure at Forrestania to Ravensthorpe to reduce pre-production capital
- Ability to commercialise gold deposits within economic trucking distance of Cosmic Boy

For further information regarding the Study, refer to the Company's ASX announcement dated 17 December 2024.

Forrestania Growth Strategy

In addition to RGP, multiple strategic growth opportunities present themselves through the establishment of gold processing capability at FNO. The Forrestania greenstone belt is a historically significant gold producing region, which includes the Bounty Gold Mine (Bounty) (historical production approximately 1.4Moz at 5.1 g/t gold) and remains highly prospective for gold with multiple deposits and prospects situated within economic trucking distance of Cosmic Boy.

During the quarter, the Company announced it had lodged applications for mining tenements totalling approximately 32 thousand hectares, extending from a position immediately north along strike from Bounty,

¹ Refer to Appendix 1 for further information relating to RGP and Trilogy Mineral Resource Estimates.

stretching north and around the southern and eastern flanks of the Parker Dome intrusion (Parker Dome Project). The majority of the mining tenement applications are located between 50-100km from Cosmic Boy Processing Plant and associated infrastructure (Figure 2).

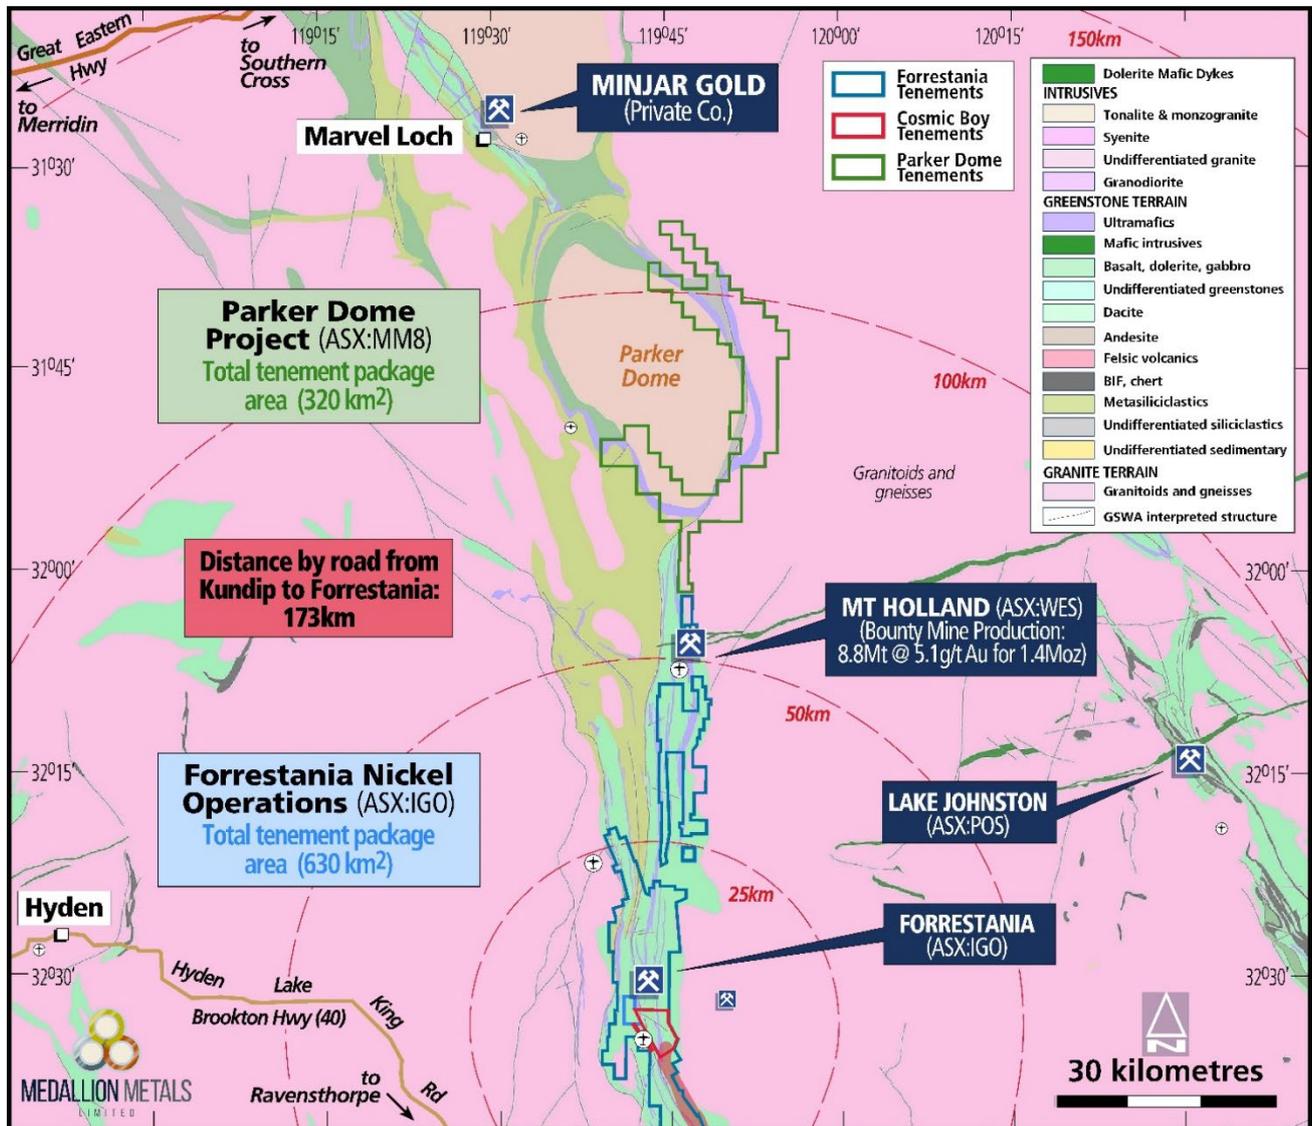

Figure 2: Location of Parker Dome Project

Medallion continues to review numerous strategic growth opportunities in the Forrestania region. For further information about the Parker Dome Project tenement applications, refer to the ASX announcement dated 19 December 2024.

KMC Drilling

During the reporting period, Medallion initiated and significantly advanced a 15,000 metre drill program to grow the high-grade sulphide underground resource at KMC in terms of both size and confidence. A Reverse Circulation (RC) drill rig completed approximately 10,000 metres of RC drilling during the quarter and demobilised from site at the conclusion of that work program. A Diamond (DD) drill rig commenced drilling in late December 2024. Medallion anticipates having completed approximately 15,000m of drilling by April 2025.

Multiple assay results from the RC drill component of the drill program were reported during the quarter. Highlights from the Gem deposit include;

- 3m @ 3.8g/t Au, 0.3% Cu, 0.7g/t Ag (12.6g/t AuEq) from 62m (DD24KP1210)

For further information in relation to Harbour View drilling results, refer to ASX announcements dated 28 November 2024 and 5 December 2024.

Given the “in-fill” nature of the bulk of the drill program, the ability to consistently intercept both the Gem and Harbour View deposits at interpreted positions is encouraging and bodes well for mine planning and execution. In addition to confirming the grade and continuity of the deposits, numerous drill holes have overperformed the current model both in terms of grade and thickness as well as intercepting lodes not previously interpreted illustrating the significant upside potential of the mineralised system at KMC.

Assay results above 10 gram x metres on a AuEq basis are shown in Figure 3.

With the RC component of the program completed, assay results remain outstanding and will continue to be reported as and when they become available.

Diamond drilling continues at KMC. In addition to the in-fill objective, the diamond component of the program seeks to improve QA/QC through twinning of certain historical drill holes in addition to collecting sample mass for metallurgical testwork. The Company will sequentially aim to complete drilling at Gem in the first instance

followed by Harbour View allowing updated MREs to be undertaken. Gem and Harbour View represent the first 3 years of the Scoping Study mine plan. An updated underground MRE for these deposits is anticipated to be released in the first half of 2025. The updated MRE will form the basis of a Bankable Feasibility Study (BFS) which will in turn inform a Final Investment Decision (FID) into the proposed development of the Project.

RAVENSTHORPE CAMP

Medallion’s 89-person Worker Accommodation Village (Camp) located in the regional centre of Ravensthorpe remained under sub-lease during the quarter to Galaxy Lithium Australia Pty Ltd (Galaxy), a subsidiary of Arcadium Lithium Plc (ASX: LTM) and the operator of the Mt Cattlin Lithium Mine (Mt Cattlin).

The sub-lease term was 18 months, commencing on 1 October 2023 and concluding on 31 March 2025. As consideration, Galaxy has paid Medallion \$2.2 million over three equal instalments. With Mt Cattlin transitioning to care and maintenance during 2025, control of the Camp will revert to Medallion at the conclusion of the sub-lease. Galaxy requested Medallion bring forward conclusion of the sub-lease to 31 January 2025 and Medallion has agreed to that request with no reimbursement of pre-paid sub-lease payments.

Medallion will regain full access and control of accommodation and catering services at the Camp on 1 February 2025. This will enable the Company to carry out planned exploration, development and other activities at RGP on an increasing basis through 2025.

CORPORATE

Placement

The Company completed a two-tranche placement to raise approximately \$5 million before costs (Placement) during the quarter.

The Placement comprised of the issue of:

- 63,319,106 ordinary shares (Tranche 1) at an issue price of 5 cents per share, placed under the Company's ASX Listing Rule 7.1 and 7.1A capacity; and
- 36,680,894 ordinary shares (Tranche 2) at the same issue price as the Tranche 1, subject to shareholder approval.

Tranche 1 was completed in August 2024 and Tranche 2 was completed in October 2024 following shareholder approval at General Meeting of shareholders held on 30 September 2024.

Drilling Consideration

During the quarter the Company entered into an agreement with its drilling contractor Topdrill Pty Ltd (Topdrill) which allows the Company at its election to settle portions of drilling invoices through the issue of equity.

Total consideration which can be settled via equity issuance is capped at \$1 million and shares issued to Topdrill under these arrangements will be escrowed for 6 months.

Medallion issued 1,421,315 ordinary shares to the total deemed value of \$121,921 to Topdrill during the period. Approximately \$0.88 million of capacity remains under the arrangement with Topdrill.

Cash Position

As at 31 December 2024, Medallion held approximately \$3.0 million in cash (30 September 2024: \$3.8 million). The attached Appendix 5B provides further details regarding cash movements.

Antares Metals Limited (formerly NickelSearch Limited)

Medallion holds approximately 16 million shares in Antares Metals Limited (ASX: AM5, Antares). Medallion's holding in Antares had a market value of approximately \$0.2 million as at the end of the quarter. Antares has recently undergone a transformational acquisition of mineral tenure located in North Queensland which is believed to be prospective for copper and uranium (Mt Isa North Project). Further information regarding Antares and its activities can be found at: <https://antaresmetals.com.au/>

Strategic Growth Opportunities

Medallion is actively reviewing multiple strategic growth opportunities which could be value accretive to shareholders should the Company be successful in completing the Proposed Transaction and establishing gold processing capability at FNO. These proposals and negotiations are incomplete, indicative and non-binding in nature and are subject to confidentiality. Medallion will advise the market as soon as possible should any proposal or negotiation result in legally binding documentation.

MARCH 2025 QUARTER

Drilling Results

At the time of writing the Company has completed approximately 11,000 metres of the planned 15,000 metre drill program at KMC. Visual and assay results from drilling are expected to continue to flow over the March 2025 quarter.

Environmental Approvals

In October 2024, Medallion commenced seeking Primary Approvals which would allow mining to commence at RGP with ore to be hauled to Forrestania for processing. Primary Approvals are being sought concurrently with continuing negotiations with IGO in order to minimise the RGP development timeframe.

The key legislative requirements relevant to the proposed development are (Primary Approvals):

- Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) (Commonwealth);
- Environmental Protection Act 1986 (EP Act) (WA); and
- Mining Act 1978 (Mining Act) (WA).

The RGP tenements which host the Mineral Resources have been extensively mined for over a century and are heavily degraded over extensive areas where the proposed development would take place.

The Company's referral under the EPBC Act was validated in early January 2025. A decision on the assessment pathway is anticipated to be handed down during the current quarter. Refer to the ASX announcement dated 8 January 2025 for further information in relation to EPBC Act referral progress.

FNO Transaction

Medallion will continue to advance permitting and studies considering the development of RGP in conjunction with continued due diligence and advancing legally binding documentation in relation to the Proposed Transaction over the coming quarters.

This announcement is authorised for release by the Board of Medallion Metals Limited.
