3. OPERATIONS AND FINANCIAL REVIEW

3.1. REVIEW OF OPERATIONS

Agadez Uranium Project – Niger (100%)

During the reporting period ENRG Elements Ltd (ENRG) continued to engage with the Minister of Mines and officials from the Mines Department in Niger and successfully secured a three-year renewal for the three (3) granted exploration permits comprising its Agadez Uranium Project (refer ASX Announcement dated 16 October 2024). The exploration permits, covering ~726km², were renewed without any relinquishment and are now valid through to October 2027.

On the 22 October 2024, the Company reported positive assay results from the trenching program across the Takardeit area within the Terzemazour 1 exploration permit. 19 of 106 samples assayed returned values over 10,000ppm (1%) U3O8, with 73 exceeding 500ppm U3O8 and significant assay results (all higher than 2.0% U3O8) included:

- 4TB020 - 58,396ppm U3O8 (5.84%)
- 4TB021 - 46,805ppm U3O8 (4.68%)
- 3TA015 – 41,902ppm U3O8 (4.19%)
- 3TB005 – 24,125ppm U3O8 (2.41%)
- 4TB017 – 22,671ppm U3O8 (2.27%)
- 4TB018 – 21,836ppm U3O8 (2.18%)

The results demonstrated continuity of higher-grade mineralisation associated with a braided fluvial paleochannel belt at the base of the Mousseden Formation and confirmed the previous rock chip sampling program in early 2023 (refer ASX Announcement dated 14 February 2023) which showed values above 0.5% U3O8 and up to 26.1% U3O8 in Takardeit East and 34.3%U3O8 in Takardeit North-East.

The trenching program consisted of five trenches at three sites for a total length of 157m, ranging in depth from 0.9 to 2.5m. For additional information refer to ASX announcements dated 24 April 2024 and 22 October 2024.

Results from the program will be used to plan future exploration activities and will form part any future Mineral Resource Estimate Update. The Agadez Project currently hosts an Inferred Mineral Resource of approximately 21.5Mlbs of contained U3O8 at 315ppm (175ppm cut-off grade) from surface to ~37m depth (refer ASX Announcement dated 26 April 2023).

The Company has applied for a Technical Assistance grant from the United States International Development Finance Corporation (“DFC”) to assist with the advancement of its Agadez Uranium Project in Niger. The Company is still waiting on the outcome of this application and there is no assurance that any grant funding will be obtained.

DIRECTORS' REPORT

Lake Lamont Uranium Project – Canada (100%)

During the half year, the Company progressed the Lamont Lake Uranium Project ("**Lamont Lake Project**") situated in North Saskatchewan, Canada.

The Project encompasses 4 x mineral claims covering an area of ~22km². It is situated in an area that based on historical drilling data, contains shallow uranium mineralisation, occurring from near-surface down to ~57m, with approximate grades of between 0.02% and 0.5%. The project encompasses a landholding of 11 x historic uranium occurrences, which include promising historical assays and geological data. Initial analysis of Lamont Lake indicates it has geological similarities to the Beaverlodge deposits area, located approximately 90km to the southeast.

During the reporting period ENRG's technical team reviewed historical exploration results and geological data associated with the new holding, and following the strategic review of the Company's assets and opportunities (refer ASX announcement dated 28 February 2025), the Board elected not to proceed with the Project and has commenced the transfer of the 4 x mineral claims back to the vendors.

Manitoba Lithium Projects – Manitoba, Canada (100%)

The Company is the holder of three (3) Mineral Exploration Licences over potential lithium targets at Handle Lake, Split Lake and Unwin Lake in Manitoba. As part of the Company's ongoing review of these projects, the Company determined to relinquish permit 1294A, relating to the Unwin Lake Project. The Company subsequently announced on 28 February 2025 that following a review of existing assets it has determined to relinquish the Licenses.

Taroudaji Lithium Project - Niger (100%)

The Company was the holder Taroudaji 2 Exploration Permit. As part of the Company's evaluation of this asset, the Company relinquished the permit subsequent to the half year end (refer ASX announcement dated 28 February 2025).

Ghanzi West Copper-Silver Project - Botswana (10%)

The Ghanzi-West Project comprises six (6) prospecting licenses located in the emerging world class Kalahari Copper Belt of Botswana covering a total area of ~2,600km², which ENRG holds a 10% interest.

London Stock Exchange ("**LSE**") listed Kavango Resources Plc (LSE: KAV) ("**Kavango**"), the 90% owner of the Ghanzi West Copper-Silver Project ("**Ghanzi West Project**") in Botswana's Kalahari Copper Belt, provided an update to its shareholders in October 2024 on its ongoing Phase 1 stratigraphic drill campaign on the Ghanzi West Project.

Kavango's announcements can be viewed via the London Stock Exchange website under code 'KAV' or Kavango's website (www.kavangoresources.com).

Virgo Project - Botswana (25%)

The Company retains a 25% interest in Alvis-Crest (Propriety) Limited ("**Alvis Crest**"), the holder of two prospecting licences in the Kalahari Copper Belt (PL 135/2017 and PL 162/2017) ("**Virgo Project**").

The Virgo Project is located in an emerging copper district in the Kalahari district in close proximity of some larger discoveries and covers an area of over 210km². The Virgo licenses lie within and adjacent to the highly prospective Central Structural Corridor and within 10km and 50km of the Zone 5 and Banana Zone copper projects respectively, known as the two largest copper projects on the Kalahari Copper Belt.

During the reporting period, the 75% owner of Alvis Crest, AIM listed Arc Minerals Limited (AIM:ARCM) ("**Arc**"), advised that prospecting licenses 135/2017 and 162/2017 have been extended for an additional two years until 30 September 2026. Arc also provided an update in relation to drilling results for PL 135/2017.

Arc's announcement can be viewed via the London Stock Exchange, Alternative Investment Market (AIM) website under code 'ARCM' or Arc's website (www.arcminerals.com).

DIRECTORS' REPORT

We have reviewed the accompanying half-year financial report of ENRG Elements Limited (the Company) which comprises the consolidated statement of financial position as at 31 December 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year ended on that date, notes comprising material accounting policy information and other explanatory information, and the directors' declaration of the consolidated entity comprising the Company and the entities it controlled at the half-year end or from time to time during the half-year.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of ENRG Elements Limited is not in accordance with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the consolidated entity's position as at 31 December 2024 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and *Corporations Regulations 2001*.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

The directors of ENRG Elements Limited are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility for the Review of the Half-Year Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2024 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
