<p>What are the risks of a further investment in the Company?</p> <p>Potential investors should be aware that subscribing for Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in Section 4, including (but not limited to) risks in respect of:</p> <p>(a) Future capital and funding requirements: The Company will require further financing in the future, in addition to amounts raised under the Offers. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the current market price or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities. Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, the Company may be required to reduce the scope of its activities, which could have a material adverse effect on the Company's activities and could affect the Company's ability to continue as a going concern. The Company may undertake additional offerings of Shares and of Securities</p>				Section 4

Key information	Further information
<p>convertible into Shares in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.</p> <p>(b) Exploration, development and operating risks and costs: The prospects of the Company should be considered in light of the risks, opportunities, expenses and difficulties frequently encountered by companies at a similar stage of production and development. The Company's initiatives may not proceed to plan, with potential for delay in the timing of exploration and development activities.</p> <p>There can be no assurance that exploration and development will result in the discovery of further mineral deposits. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.</p> <p>The future exploration and development activities of the Company and the future development of mining operations at the Company's projects (or any future projects that the Company may acquire an interest in) may be affected by a range of factors, including:</p> <ul style="list-style-type: none"> • geological, metallurgical and hydrological conditions; • limitations on activities due to seasonal weather patterns; • lack of availability or shortages of equipment, spare parts and consumables; • access to appropriately skilled labour, competent operation and managerial employees, contractors and consultants; • unanticipated operational and technical difficulties, mechanical failure of operating plant and equipment, industrial and environmental accidents; • industrial action, disputes or disruptions; • industrial and environmental accidents; • increases in costs and cost overruns; • financial failure, or default by any future alliance or service provider to the Company which may require the Company to face unplanned expenditure; • native title process; • changing government regulations; and • other factors beyond the control of the Company. <p>In addition, the construction of any proposed development may exceed the expected timeframe or cost for a variety of reasons out of the Company's control. Any delays to project development could adversely affect the Company's operations and financial results and may require the Company to raise further funds to complete the project development and commence operations.</p> <p>(c) Sovereign risk: The Company's projects in Canada are subject to the risks associated in operating in a foreign country. These risks may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.</p>	

Key information	Further information
<p>Any future material adverse changes in government policies or legislation in foreign jurisdictions in which the Company has projects that affect foreign ownership, exploration, development or activities of companies involved in exploration and production, may affect the viability and profitability of the Company.</p> <p>(d) Native title, First Nations and Aboriginal Heritage: In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas of First Nations owned land exist. Where such rights exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.</p> <p>(e) Reliance on key personnel: The Company's future depends, in part, on its ability to attract and retain key personnel. It may not be able to hire and retain those personnel at compensation levels consistent with its existing compensation and salary structure. The Company's future also depends on the continued contributions of its executive management team and other key management and technical personnel, the loss of whose services would be difficult to replace. In addition, any inability of the Company to attract appropriately qualified personnel could have a material adverse effect on the Company's business.</p> <p>(f) Land access risk: Land access is critical for exploration and exploitation to succeed. It requires both access to the mineral rights and access to the surface rights.</p> <p>Minerals rights may be negotiated and acquired. In all cases, the acquisition of prospective exploration and mining licences is a competitive business in which proprietary knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential. The Company may not be successful in acquiring or obtaining the necessary licences to conduct exploration or evaluation activities outside of the mineral tenements that it owns.</p> <p>(g) Tenure, access and grant of licences / permits: The Company's operations are subject to receiving and maintaining licences and permits from appropriate governmental authorities. There is no assurance that delays will not occur in connection with obtaining all necessary grants or renewals of licences / permits for the proposed operations, additional licences / permits for any possible future changes to operations, or additional permits associated with new legislation.</p> <p>Prior to any development on any of its properties, subsidiaries of the Company must receive licences / permits from appropriate governmental authorities. There is no certainty that the Company will hold all licences / permits necessary to develop or continue operating at any particular property.</p>

1. Details of the Offers

1.1 The Offers

As announced on 14 March 2025, the Company is offering Eligible Shareholders pursuant to this Prospectus an opportunity to subscribe for new Shares (**New Shares**) pursuant to a partially underwritten non-renounceable pro rata entitlement offer to raise up to approximately \$4 million (before costs) at \$0.04 per New Share, together with 1 new free attaching unquoted Option (**New Option**) for every 4 New Shares subscribed for and issued (**Entitlement Offer**).

(a) Entitlement Offer

- (i) The Entitlement Offer is open to Eligible Shareholders only. Under the Entitlement Offer, Eligible Shareholders will have the opportunity to subscribe for New Shares in the Company on the basis of 1 New Share for every 3.85 existing Shares held on the Record Date, together with 1 New Option for every 4 New Shares subscribed for and issued (**Entitlement**). Any Entitlements not taken up in full pursuant to the Entitlement Offer will be offered for subscription under the Top-Up Offer (see Section 1.1(b)).
- (ii) The New Shares (including any Shares issued on exercise of the New Options) will rank equally in all respects with the Company's Shares on issue at the Prospectus Date. Please refer to Section 5.1 for further information regarding the rights and liabilities attaching to the Shares. The New Options will be issued on the terms in Section 5.2.
- (iii) Fractional Entitlements will be rounded up to the nearest whole number.
- (iv) The options available to Eligible Shareholders in respect to the Entitlement Offer is detailed in Section 2.
- (v) Eligible Shareholders are Shareholders on the Record Date who:
 - (A) are registered as the holder of Shares in the Company as at 4:00pm (AWST);
 - (B) have a registered address in Australia or, subject to the restrictions outlined in Sections 1.13 to 1.20 (inclusive), New Zealand, Singapore, Hong Kong, the United Kingdom, Canada (British Columbia, Ontario and Québec provinces), the United States, the European Union (excluding Austria) and South Korea, as noted on the Company's share register, or are a Shareholder that the Company has otherwise determined is eligible to participate in the Entitlement Offer; and
 - (C) are eligible under all applicable securities laws to receive an offer under the Entitlement Offer.
- (vi) All Shareholders who do not satisfy the criteria to be Eligible Shareholders, are Ineligible Shareholders. Ineligible Shareholders are not entitled to participate in the Entitlement Offer, unless the Company otherwise determines.
- (vii) The restrictions upon eligibility to participate in the Entitlement Offer arise because the Company has determined, pursuant to section 9A(3)(a) of the Corporations Act and Listing Rule 7.7.1(a), that it would be unreasonable to extend the Entitlement Offer to Ineligible Shareholders. This decision has been made after taking into account the number of non-resident Shareholders in

Australia, New Zealand, Singapore, Hong Kong, the United Kingdom, Canada (British Columbia, Ontario and Québec provinces), the United States, the European Union (excluding Austria) and South Korea on the Company's share register, the relatively small number and value of New Shares and New Options to which those Shareholders would otherwise be entitled and the potential costs of complying with legal and regulatory requirements in the jurisdictions in which the Ineligible Shareholders are located in relation to the Entitlement Offer.

- (viii) The number of New Shares and New Options to which an Ineligible Shareholder would be entitled under the Entitlement Offer will not be issued to such Shareholder and, instead, will be offered for subscription under the Top-Up Offer.
- (ix) The Company, in its absolute discretion, may extend the Entitlement Offer to any Shareholder if it is satisfied that the Entitlement Offer may be made to the Shareholder in compliance with all applicable laws. The Company, in its absolute discretion, reserves the right to determine whether a Shareholder is an Eligible Shareholder or an Ineligible Shareholder. To the maximum extent permitted by law, the Company disclaims all liability in respect of such determination.

(b) **Top-Up Offer**

- (i) Any Entitlements not taken up pursuant to the Entitlement Offer will be offered for subscription under the Top-Up Offer.
- (ii) Eligible Shareholders who have applied for their Entitlement in full may apply for additional New Shares and New Options (**Top-Up Securities**) under the Top-Up Offer, subject at all times to the Directors' discretion to scale back applications under the Top-Up Offer and otherwise in accordance with the allocation policy set out in this Section 1.1(b) and 1.2.
- (iii) Eligible Shareholders wishing to apply for Top-Up Securities must consider whether or not the issue of the Top-Up Securities applied for would breach the Corporations Act, the Listing Rules or any other relevant regulation or law having regard to their own circumstances and should seek professional advice where necessary.
- (iv) Top-Up Securities will only be offered to the extent there are sufficient New Shares and New Options from Eligible Shareholders who do not take up their Entitlements in full or from the Entitlements of Ineligible Shareholders.
- (v) The Directors reserve the right to allocate Top-Up Securities at their sole discretion.
- (vi) The Board may elect to cap the number of Top-Up Securities that are allotted to Eligible Shareholders under the Top-Up Offer.
- (vii) In allocating Top-Up Securities, the Directors may have regard to the following (non-exhaustive) factors:
 - (A) the number of New Shares and New Options that an Eligible Shareholder is entitled to subscribe for pursuant to its Entitlement relative to the number of Top-Up Securities that it has applied for under the Top-Up Offer;
 - (B) the total number of Top-Up Securities available for subscription under the Top-Up Offer;

- (C) the number of Shares held by an Eligible Shareholder after completion of the Entitlement Offer;
 - (D) identifying any Eligible Shareholders who are potential long term or cornerstone investors of the Company;
 - (E) the timelines of the bid by particular Eligible Shareholders;
 - (F) the overall level of demand under the Entitlement Offer; and
 - (G) ensuring an appropriate Shareholder base for the Company going forward.
- (viii) The Board may scale back allocations for Top-Up Securities prior to allotting and issuing those Top-Up Securities. The Board anticipates that should it receive applications for Top-Up Securities in excess of the number of Top-Up Securities available for subscription under the Top-Up Offer, it will cap or scale back allocations for Top-Up Securities on a pro-rata basis having regard to each Eligible Shareholder's holding in Shares as at the Record Date.
- (ix) In any event:
- (A) no Top-Up Securities will be issued to an Eligible Shareholder which would, if issued, result in them (together with their associates) increasing their voting power in the Company above 20%; and
 - (B) no Top-Up Securities will be issued if their issue would contravene any law.
- (x) There is no guarantee that Eligible Shareholders will receive the number of Top-Up Securities applied for. The Company's decision on the number of Top-Up Securities to be allocated to an Eligible Shareholder will be final. It is a term of the Top-Up Offer that, should the Company scale back Applications for Top-Up Securities in accordance with the allocation policy described above, the Eligible Shareholder will be bound to accept such lesser number of Top-Up Securities allocated to them.
- (xi) In the event of a scale back, the difference between the Application Monies received, and the number of Top-Up Securities allocated to the Eligible Shareholder multiplied by the Offer Price, will be refunded by the Company, without interest, following allotment.
- (xii) Directors John Young, Cameron Henry and Patrick Murphy have committed (either in their personal capacities or via their associated entities) to sub-underwrite up to an aggregate of \$450,000 of the Offers. Accordingly, they will each abstain from participating in discussions concerning the allocation and scale back of Top-Up Securities under the Top-Up Offer.

Step 4	Shortfall	<p>If, following the allocation of Shortfall to the Underwriters in accordance with Step 3 there remains Shortfall, the Directors reserve the right to place Shortfall at their discretion during the three month period following the Closing Date to sophisticated or professional investors identified by the Company, provided that no investor will be entitled to increase their voting power in the Company above 20% through the allocation of Shortfall.</p> <p>In exercising this discretion, the Board will take into consideration a number of factors, including the recommendations of the Underwriters and ensuring the Company has an appropriate and optimal Shareholder base, which may be achieved through the introduction of new investors.</p>

Eligible Shareholders may either:

- (a) take up all of their Entitlement (refer to Section 2.2);
- (b) take up all of their Entitlement (refer to Section 2.2) and also apply for Top-Up Securities (refer to Section 2.3);
- (c) take up part of their Entitlement (refer to Section 2.4); or
- (d) allow their Entitlement to lapse, if they do not wish to participate in the Entitlement Offer (refer to Section 2.5).

2.2 Eligible Shareholders wishing to accept Entitlement in full

If you wish to take up all of your Entitlement, you are required to make payment via BPAY® if you are an Australian resident, or Electronic Funds Transfer (**EFT**) if you are an Eligible Shareholder resident in a jurisdiction other than Australia. Payment must be received no later than 5:00pm (AWST) on the Closing Date. Note that when paying by BPAY® or EFT you are **not** required to submit the Application Form but are taken to make the statements on that form and in this Prospectus.

2.3 Eligible Shareholders wishing to participate in the Top-Up Offer

If you are an Eligible Shareholder and you wish to apply for Top-Up Securities, you are required to apply for more New Shares and New Options than the number shown on the Application Form. To do this, make a payment for more than your Entitlement via BPAY® or EFT. The excess will be taken to be an Application for as many Top-Up Securities as your Application Monies will pay for in full. Any Top-Up Securities applied for pursuant to the Top-Up Offer will be issued in accordance with the allocation policy described in Sections 1.1(b) and 1.2. Payment must be received no later than 5:00pm (AWST) on the Closing Date. Note that when paying by BPAY® or EFT you are not required to submit the Application Form but are taken to make the statements on that form and in this Prospectus.

2.4 Eligible Shareholders wishing to take up only part of their Entitlement

If you only wish to take up part of your Entitlement you are required to make payment via BPAY® if you are an Australian resident, or EFT if you are an Eligible Shareholder resident in a jurisdiction other than Australia. If you wish to take up only part of your Entitlement, payment must be made by following the instructions on the Application Form for the number of New Shares and New Options you wish to take up. If the Company receives an amount that is less than the Offer Price multiplied by your Entitlement, your payment may be treated as an Application for as many New Shares and New Options as your Application Monies will pay for in full.

Payment must be received no later than 5:00pm (AWST) on the Closing Date. Note that when paying by BPAY® or EFT you are not required to submit the Application Form but are taken to make the statements on that form and in this Prospectus.

2.5 Entitlements not taken up

If you do not wish to accept any of your Entitlement, you are not obliged to do anything. The number of Securities you hold and the rights attached to those Securities will not be affected should you choose not to accept any of your Entitlement.

2.6 Consequences of not accepting all or part of your Entitlement

If you do not accept all or part of your Entitlement in accordance with the instructions set out above, those New Shares and New Options for which you would have otherwise been entitled under the Entitlement Offer (including New Shares and New Options that relate to the portion of your Entitlement that has not been accepted) may be acquired by Eligible Shareholders under the Top-Up Offer or by the Underwriters in accordance with the Joint Underwriting Agreement.

By allowing your Entitlement to lapse, you will forgo any exposure to increases or decreases in the value of the New Shares and New Options had you taken up your Entitlement and you will not receive any payment or value for all or that part of your Entitlement. Your interest in the Company will also be diluted.

2.7 How to pay (via BPAY® or EFT)

If you wish to participate in the Entitlement Offer and are resident in Australia, you must make your payment by BPAY®

If you are an Eligible Shareholder and are resident in a jurisdiction other than Australia, your Application may be made through Electronic Funds Transfer (**EFT**) using the payment details on your personalised Application Form.

Cash, cheques, bank drafts and money order payments will not be accepted. Receipts for payments will not be issued.

The Company will treat Applicants as applying for as many New Shares and New Options as their Application Monies will pay for in full. If an Eligible Shareholder's payment will pay for more than their full Entitlement, the Company will treat the Eligible Shareholder as applying for their full Entitlement and the excess will be taken to be an Application for Top-Up Securities pursuant to the Top-Up Offer.

Any Application Monies received from Eligible Shareholders for more than their final allocation will be refunded except for where the amount is less than \$1.00 in which case it will be donated to a charity chosen by the Company. No interest will be paid on any Application Monies received or refunded. Application Monies received from Eligible Shareholders will be held on trust until such time as the New Shares and New Options are issued or the Application Monies are refunded.

To the fullest extent permitted by law, each Eligible Shareholder agrees that any Application Monies paid by them to the Company will not entitle them to any interest against the Company and that any interest earned in respect of Application Monies will belong to the Company. This will be the case, whether or not all or none (if the Entitlement Offer is withdrawn) of the New Shares and New Options applied for by a person are issued to that person.

You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions.

Please make sure to use the specific Biller Code and unique Reference Number which is provided on your personalised application form.

If Eligible Shareholders have more than one holding, they must login separately for each holding and use the unique Reference Number specific to the relevant holding. Alternatively, if Eligible Shareholders have requested an Application Form and have more than one holding, they will receive separate forms for each holding. If Eligible Shareholders do not use the correct Reference Number specific to that holding, or inadvertently use the same Reference Number for more than one of their holdings, their Application will be recorded against the holding associated with Reference Number they use. It is your responsibility to ensure your Customer Reference Number (CRN) or unique Payment Reference is quoted, as per the instructions on your personalised application form. If you fail to quote your CRN or unique Payment Reference correctly, your payment may not be allocated to your holding and or application will not be accepted. If you need assistance, please contact the Company's Share Registry, Automic.

You should be aware that your financial institution branch may implement earlier cut-off times with regard to electronic payment and you should therefore take this into consideration when making payment. It is your responsibility to ensure that your BPAY® or EFT payment is received by no later than the relevant date by which funds are required to have been received.

Your BPAY® or EFT application cannot be withdrawn once received, except for in the limited circumstances provided for under the Corporations Act. No cooling off period applies.

2.8 Warranties made on Acceptance

 - 33,000,000 Shares subject to voluntary escrow for 12 months ending on 2 October 2025.
- Assumes that:
 - the Entitlement Offer is fully subscribed and no further Shares are issued and none of the existing Options or Performance Rights vest and are converted into Shares prior to the Record Date or the Closing Date;
 - Shareholder approval is obtained at the General Meeting for the issue of the Underwriter Options and Sub-Underwriting Options; and
 - the Underwritten Amount is fully sub-underwritten pursuant to agreements between the Underwriters and sub-underwriters.
- These numbers may vary due to rounding up of Entitlements and may increase as a result of the rounding of Entitlements.
- Subject to the allocation policy outlined in Section 1.2, Securities not issued to Eligible Shareholders under the Entitlement Offer and Top-Up Offer will be issued to the Underwriters (or their respective nominees) in accordance with the Joint Underwriting Agreement.

3.2 Effect on control of the Company and impact of underwriting

Section 606(1) of the Corporations Act prohibits a person, unless an exception applies, from increasing their voting power in the Company:

- from 20% or below to above 20%; or
- from a starting point of above 20% and below 90%.

One of the exceptions to section 606(1) is where that increase occurs as a result of an issue under a disclosure document to an underwriter or sub-underwriter to the issue. Notwithstanding this exception, the Company notes that no investor or existing Shareholder is anticipated to hold a voting power of 20% or more as a result of the Offers.

The Underwriters presently have no Shares in the Company, and have not indicated an intention of acquiring Shares in the Company prior to the Record Date.

The Underwriters have agreed to underwrite the Entitlement Offer and the Top-Up Offer in respect of any New Shares and New Options which have not been validly applied for under the Entitlement Offer and the Top-Up Offer (i.e. the “Shortfall”) up to a value of \$3,000,000.

The Underwriters’ maximum potential relevant interest and voting power in the Company under several scenarios are set out in the table below, and are based on the assumption that no Shares other than those offered under the Offers are issued prior to completion of the Offers.

Participation in the Entitlement Offer and Top-Up Offer by Eligible Shareholders	Total Shares on issue on completion	Total Shares held by Underwriter		Underwriter voting power	
		Canaccord	Bell Potter	Canaccord	Bell Potter
100% subscribed by Eligible Shareholders	489,726,668	0	0	0%	0%
75% subscribed by Eligible Shareholders	489,726,668	12,621,822	12,621,822	2.58%	2.58%
50% subscribed by Eligible Shareholders	489,726,668	25,243,643	25,243,643	5.15%	5.15%
25% subscribed by Eligible Shareholders	488,995,740	37,500,000	37,500,000	7.67%	7.67%
0% subscribed by Eligible Shareholders	463,752,097	37,500,000	37,500,000	8.09%	8.09%

The Underwriters have entered into a number of sub-underwriting agreements for the total amount of its underwriting commitment, including with Directors John Young, Cameron Henry and Patrick Murphy (either in their personal capacities or via their associated entities) who have committed to sub-underwrite up to an aggregate of \$450,000 of the Offers. Refer to Section 5.5 for further information.

Accordingly, neither the Offers nor the underwriting are considered likely to have a material effect on the control of the Company.

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement, they must have regard to section 606 of the Corporations Act. Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in section 606 as a result of acceptance of their Entitlement should seek professional advice before completing and returning their Application Form.

No New Shares will be issued to any Shareholder or Applicant pursuant to this Prospectus if, in the view of the Directors, to do so would increase that Shareholder's or Applicant's voting power in the Company above 20% or otherwise result in a breach of the Listing Rules, the Corporations Act or any other applicable law.

3.3 Substantial Shareholders

Based on available information as at the Prospectus Date and to the extent known by the Company, those persons which together with their associates have a voting power in 5% or more of the Shares on issue are set out below:

Substantial Shareholder	Shares ¹	Voting power ²	Entitlement (New Shares)	Entitlement (New Options)
EcoPro Innovation Co., Ltd and its associated entities	64,000,000	16.46%	16,623,377	4,155,845
Hans J. Mende ^{3,4}	37,450,001	9.63%	9,727,273	2,431,819
AMCI Australia Pty Ltd (AMCI Australia) and its controlling entities/persons ⁴	36,459,524	9.38%	9,470,007	2,367,502
LG Energy Solution, Ltd. and its associated entities	21,739,130	5.59%	5,646,528	1,411,632

Notes:

1. The shareholdings listed above are as disclosed to the Company by Shareholders in substantial holding notices. Information regarding substantial holdings that arise, change or cease after the date of the substantial holding notices disclosed to the Company, or in respect of which the relevant announcement is not available on the ASX's website (www.asx.com.au), is not included above.
2. Assumes 388,752,097 Shares on issue at the Prospectus Date.
3. Hans J. Mende is considered to be a substantial shareholder by virtue of sections 608(1) and 608(3) of the Corporations Act, being a relevant interest held in 990,477 Shares held directly by Hans J. Mende and 36,459,524 Shares held by AMCI Australia (of which Hans J. Mende is the trustee of the 2005 Kirmar Trust which controls more than 20% of the voting power in AMCI Group, LLC (Series 22), the controlling company of AMCI Australia).
4. The voting power of Hans J. Mende includes the Shares held by AMCI Australia, meaning the above voting powers and Entitlements should not be aggregated in assessing the total voting power and Entitlements of these Shareholders.

3.4 Dilution

Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted (as compared to their holdings and number of Shares on issue as at the Prospectus Date). Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Shareholding as at Record Date	Voting power at Record Date	New Share Entitlement	Shareholding if Entitlement not taken up	Voting power on completion of Offers
Shareholder 1	20,000,000	5.14%	5,194,806	20,000,000	4.08%
Shareholder 2	10,000,000	2.57%	2,597,403	10,000,000	2.04%
Shareholder 3	5,000,000	1.29%	1,298,702	5,000,000	1.02%
Shareholder 4	2,500,000	0.64%	649,351	2,500,000	0.51%

The above table also assumes that no other Shares are issued or equity securities converted into Shares prior to the Record Date or the Closing Date.

3.5 Pro forma consolidated statement of financial position

The Company has included below:

- (a) the reviewed consolidated statement of financial position of the Company as at 31 December 2024 (**Balance Date**);
- (b) the unaudited significant changes since the Balance Date;
- (c) the unaudited effects of the Offers (assuming the Entitlement Offer is fully subscribed and approximately \$4,000,000 (before costs) is raised), including the estimated expenses of the Offers (refer to Section 5.15 for further details); and
- (d) the unaudited pro forma statement of financial position of the Company at the Balance Date adjusted to reflect paragraphs (b) and (c).

The statements of financial position have been prepared to provide Shareholders with information on the assets and liabilities of the Company and the pro forma assets and liabilities of the Company as noted below. The historical and pro forma information is presented in abbreviated form and does not include all of the disclosures required by the Australian Accounting Standards applicable to annual financial statements.

4. Risk factors

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entity have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Shareholders should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

4.1 Specific risks relevant to the Company

(a) Future capital and funding requirements

The Company will require further financing in the future, in addition to amounts raised under the Offers.

Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the current market price or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, the Company may be required to reduce the scope of its activities, which could have a material adverse effect on the Company's activities and could affect the Company's ability to continue as a going concern.

The Company may undertake additional offerings of Shares and of Securities convertible into Shares in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(b) Conflicts of interest

Certain Directors are also directors and officers of other companies engaged in mineral exploration and development and mineral property acquisitions. Accordingly, mineral exploration opportunities or prospects of which these Directors become aware may not necessarily be made available to the Company in the first instance. Although these Directors have been advised of their fiduciary duties to the situations that could arise in which their obligations to, or interests in, the Company, there exists actual and potential conflicts of interest among these persons.

(c) Exploration, development and operating risks and costs

The prospects of the Company should be considered in light of the risks, opportunities, expenses and difficulties frequently encountered by companies at a similar stage of production and development. The Company's initiatives may not proceed to plan, with potential for delay in the timing of exploration and development activities.

There can be no assurance that exploration and development will result in the discovery of further mineral deposits. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration and development activities of the Company and the future development of mining operations at the Company's projects (or any future projects that the Company may acquire an interest in) may be affected by a range of factors, including:

- (i) geological, metallurgical and hydrological conditions;
- (ii) limitations on activities due to seasonal weather patterns;
- (iii) lack of availability or shortages of equipment, spare parts and consumables;
- (iv) access to appropriately skilled labour, competent operation and managerial employees, contractors and consultants;
- (v) unanticipated operational and technical difficulties, mechanical failure of operating plant and equipment, industrial and environmental accidents;
- (vi) industrial action, disputes or disruptions;
- (vii) industrial and environmental accidents;
- (viii) increases in costs and cost overruns;
- (ix) financial failure, or default by any future alliance or service provider to the Company which may require the Company to face unplanned expenditure;
- (x) native title process;
- (xi) changing government regulations; and
- (xii) other factors beyond the control of the Company.

In addition, the construction of any proposed development may exceed the expected timeframe or cost for a variety of reasons out of the Company's control. Any delays to project development could adversely affect the Company's operations and financial results and may require the Company to raise further funds to complete the project development and commence operations.

(d) **Preliminary economic assessment risk**

On 7 December 2023, the Company announced the preliminary economic assessment to assess the business case for the development of a mine and concentrator at both of the Seymour Lithium Project and Root Lithium Project and development of a Lithium Conversion Facility.

On 21 February 2025, the Company announced a standalone Preliminary Economic Assessment to assess the business case for the standalone development of the Seymour Lithium Project.

The Preliminary Economic Assessments are based on lower-level technical and economic assessments and is insufficient to support estimation of Ore Reserves or to provide assurance of an economic development case at this stage, or certainty that the conclusions of the Preliminary Economic Assessment will be realised.

(e) **Litigation risks**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.

The Company is party to commercial arbitration proceedings with Sandstorm Gold Ltd (**Sandstorm**), which is seeking a declaration that an unregistered 1.5% net smelter royalty is binding against the "Seymour Property" which is located at the Seymour Lake Project (**Arbitration**). On 5 March 2025, the arbitrator ruled that the royalty runs with the land and is therefore binding on the Seymour Property. The Arbitration did not include a claim for damages.

The Company's IPO prospectus in 2021 disclosed the above royalty, and another third party net smelter royalty in the amount of 1.5%. The Company has not disclosed the royalties in its PEA in December 2023. The Company doesn't consider the royalty interests to be material to the PEA.

The parties are required to agree as to costs of the Arbitration, the potential amount of which is not currently agreed.

The Company is not otherwise currently engaged in any material litigation.

4.2 Risks relevant to the mining industry

(a) Tenure, access and grant of licences / permits

The Company's operations are subject to receiving and maintaining licences and permits from appropriate governmental authorities. There is no assurance that delays will not occur in connection with obtaining all necessary grants or renewals of licences / permits for the proposed operations, additional licences / permits for any possible future changes to operations, or additional permits associated with new legislation.

Prior to any development on any of its properties, subsidiaries of the Company must receive licences / permits from appropriate governmental authorities. There is no certainty that the Company will hold all licences / permits necessary to develop or continue operating at any particular property.

(b) Land access risk

Land access is critical for exploration and exploitation to succeed. It requires both access to the mineral rights and access to the surface rights.

Minerals rights may be negotiated and acquired. In all cases, the acquisition of prospective exploration and mining licences is a competitive business in which proprietary knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential. The Company may not be successful in acquiring or obtaining the necessary licences to conduct exploration or evaluation activities outside of the mineral tenements that it owns.

Access to land for exploration and evaluation purposes can be obtained by:

- (i) private access and compensation agreement with the landowner;
- (ii) purchase of surface rights; or
- (iii) through judicial rulings.

However, access rights to licences can be affected by many factors, including:

- (i) travel restrictions, quarantining procedures or other impediments to the free movement of personnel;
- (ii) surface title land ownership negotiations, which are required before ground disturbing exploration activities can commence within the jurisdiction in which the Company operates;
- (iii) permitting for exploration activities, which are required in order to undertake most exploration and exploitation activities within the jurisdiction in which the Company operates; and
- (iv) natural occurrences, including inclement weather, volcanic eruptions, lahars and earthquakes.

All of these issues have the potential to delay, curtail and preclude the Company's operations. While the Company will have the potential to influence some of these access issues, and retains staff to manage those instances where negotiations are required to gain access, it is not possible for the Company to predict the extent to which the above-mentioned risks and uncertainties may adversely impact the Company's operations.

(c) **Native title, First Nations and Aboriginal Heritage**

In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas of First Nations owned land. Where such rights exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Company understands the importance of establishing and maintaining positive relationships with all affected by any future exploration activities, particularly with the Indigenous peoples whose lands we may operate on. The Company is committed to continuing its engagement with the local First Nation community in Canada, and other areas where the Company may operate, to work together in a spirit of mutual respect, collaboration and understanding.

The Directors will closely monitor the potential effect of First Nation owned land and seek such consents as are required or desirable to comply with these obligations.

(d) **Access to sufficient used and new equipment**

The services provided by the Company are dependent on access to used and new mining equipment.

In the event that the Company has difficulty in securing adequate supplies of mining equipment at appropriate prices, or if the quality of the equipment is not acceptable or suitable, its ability to perform or commence new projects may be adversely affected. This difficulty may have an adverse impact on the financial performance and financial position of the Company.

(e) **Maintenance of equipment risk**

The Company's equipment will require maintenance and replacement over time.

Future operating and financial performance could be adversely affected because maintenance and repair costs may be higher than estimated, it must be undertaken

earlier than anticipated, or if there is a significant operational failure requiring unplanned maintenance expenditure. Future operating and financial performance could be adversely affected because market values of used equipment may fluctuate and are generally lower as a piece of equipment ages. In addition, the cost of the new equipment used may increase and, therefore, the Company may need to access replacement equipment. Any such cost increases could materially and adversely impact the operating and financial performance of the Company.

(f) **Reliance on key personnel**

The Company's future depends, in part, on its ability to attract and retain key personnel. It may not be able to hire and retain those personnel at compensation levels consistent with its existing compensation and salary structure. The Company's future also depends on the continued contributions of its executive management team and other key management and technical personnel, the loss of whose services would be difficult to replace. In addition, any inability of the Company to attract appropriately qualified personnel could have a material adverse effect on the Company's business.

(g) **Insurance and uninsured risks**

The Company faces various risks in conducting its business and may lack adequate insurance coverage or may not have the relevant insurance coverage. Although insurance is maintained in line with industry practice, no assurance can be given that such insurance will be available in the future on commercially reasonable terms or that any cover will be adequate and available to cover any or all claims.

(h) **Commodity price and exchange rate risks**

To the extent the Company is involved in mineral production, the revenue derived through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate risks. The prices of lithium and other minerals, fluctuate widely and are affected by numerous factors beyond the control of the Company, for example, industrial and retail supply and demand, exchange rates, inflation rates, changes in global economies, confidence in the global monetary system, forward sales of metals by producers and speculators as well as other global or regional political, social or economic events.

Future serious price declines in the market values of lithium and other minerals, could cause the development of, and eventually the commercial production from, the Company's projects and other properties to be rendered uneconomic. Depending on commodity prices, the Company could be forced to discontinue production or development and may lose its interest in, or may be forced to sell, some of its properties. Even as commercial quantities of lithium and other minerals are produced, there is no assurance that a profitable market will exist for those minerals.

Further, international prices of various commodities are denominated in United States dollars. In contrast, the income and expenditure of the Company are, and will be taken into account in Australian dollars and Canadian dollars. Consequently, the Company is exposed to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar and the Canadian dollar, as determined in international markets.

In addition to adversely affecting any potential future reserve estimates of the Company and its financial condition, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. A reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if a project is ultimately determined to be economically viable, the

need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

(i) Risk of adverse publicity

The Company's activities will involve mineral exploration and mining and regulatory approval of its activities may generate public controversy. Political and social pressures and adverse publicity could lead to delays in approval of, and increased expenses for, the Company's activities. The nature of the Company's business attracts a high level of public and media interest and, in the event of any resultant adverse publicity, the Company's reputation may be harmed.

(j) Third party risk

The operations of the Company will require involvement of a number of third parties, including suppliers. With respect to these third parties, and despite applying best practice in terms of precontracting due diligence, the Company is unable to completely avoid the risk of:

- (i) financial failure or default by a participant in any joint venture to which the Company may become a party; and
- (ii) insolvency, default on performance or delivery by any operators, contractors or service providers.

These contracts typically contain provisions providing for early termination of the contracts upon giving varying notice periods and paying varying termination amounts. The early termination of any of these contracts, for any reason, may mean that the Company will not realise the full value of the contract, which is likely to adversely affect the growth prospects, operating results and financial performance of the Company.

(k) Occupational health and safety

Site safety and occupational health and safety outcomes are a critical element in the reputation of the Company and its ability to retain and be awarded new contracts in the resources industry. While the Company has a strong commitment to achieving a safe performance on site and a strong record in achieving safety performance, a serious site safety incident could impact upon the reputation and financial performance of the Company.

Additionally, laws and regulations, as well as the requirements of customers, may become more complex and stringent or the subject of increasingly strict interpretation and enforcement. Failure to comply with applicable regulations or requirements may result in significant liabilities, suspended operations and increased costs. Industrial accidents may occur in relation to the performance of the Company's services. Accidents, particularly where a fatality or serious injury occurs, or a series of accidents, may have operational and financial implications for the Company, which may negatively impact the financial performance and future potential of the Company.

(l) Management of growth

There is a risk that management of the Company will not be able to implement the Company's growth strategy. The capacity of management to properly implement and manage the strategic direction of the Company may affect the Company's financial performance.

(m) **Technology and information systems**

The Company relies on the effective and efficient operation of information technology, software systems, communications technology and other systems and equipment for its operations, including technology and systems provided by third parties. If any of these systems, software or technologies fail to operate effectively, or new systems or significant upgrades are required, the Company could suffer interruption to its services and loss of data which could lead to financial loss and damage to its reputation.

Service interruption may be as a result of issues, including hardware, software or system failures, computer viruses, third party service failures, cyber-attacks or other cyber incidents. Further, failure of the Company's disaster recovery arrangements to operate effectively could also result in financial loss and damage to the reputation of the Company.

(n) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include appropriate provisions for material risks and uncertainties and are considered fit for purpose for the activities of the Company. If risks and uncertainties prove to be greater than expected, or if unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

(o) **Sovereign risk**

The Company's projects in Canada are subject to the risks associated in operating in a foreign country. These risks may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

Any future material adverse changes in government policies or legislation in foreign jurisdictions in which the Company has projects that affect foreign ownership, exploration, development or activities of companies involved in exploration and production, may affect the viability and profitability of the Company.

(p) **Environmental and social risks**

The operations and proposed activities of the Company are subject to Provincial and Federal laws and regulations concerning the environment. The current or future operations of the Company, including exploration and development activities and commencement of production on the Company's projects, require permits from various governmental authorities. Such operations are governed by laws and regulations that govern prospecting, mining, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety, and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs and delays in production as a result of needing to comply with applicable laws, regulations and permits. There can be no assurance that all permits that the Company requires for future, exploration, development, construction and operation of mining facilities and the conduct

of mining operations will be obtainable on reasonable terms or that such laws and regulations would not have an adverse effect on the operations of the Company.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Although the Company believes that it is in compliance in all material respects with all applicable environmental laws and regulations, there are certain risks inherent to its activities, such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to extensive liability.

Government authorities may, from time to time, review the environmental bonds that are placed on permits. The Directors are not in a position to state whether a review is imminent or whether the outcome of such a review would be detrimental to the funding needs of the Company.

Further, the Company may require approval from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations, which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments in such respect which could have a material adverse effect on the Company's business, financial condition and results of operations. There is also a risk that the Company's operations and financial position may be adversely affected by the actions of environmental groups or any other group or person opposed in general to the Company's activities and, in particular, the exploration and mining by the Company within the Province of Ontario.

(q) Grant of future authorisations to explore and mine

If the Company discovers an economically viable mineral deposit that it then intends to develop, it will, among other things, require various approvals, licences and permits before it will be able to mine the deposit. There is no guarantee that the Company will be able to obtain all required approvals, licenses and permits. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.

(r) Mine development

Possible future development of mining operations at the Company's projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production on one of its projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company.

No assurance can be given that the Company will achieve commercial viability through the development of its projects.

The risks associated with the development of a mine will be considered in full should the Company's projects reach that stage and will be managed with ongoing consideration of stakeholder interests.

(s) **Resource estimation risks**

Whilst the Company has identified a Mineral Resource Estimate at its Root Lithium Project and Seymour Lithium Project and intends to further undertake exploration activities with the aim of upgrading the confidence level of the resource at these projects, no assurance can be provided that this can be economically extracted. The calculation and interpretation of resource estimates are by their nature expressions of judgment based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly through additional fieldwork or when new information or techniques become available. This may result in alterations to development and mining plans, which may in turn adversely affect the Company's operations.

The Company has disclosed exploration targets. Exploration targets are conceptual in nature and are used where there has been insufficient exploration to estimate a mineral resource. Investors are cautioned that it is uncertain whether further exploration will result in the estimation of a mineral resource on the exploration targets.

(t) **Metallurgy**

Metal and/or mineral recoveries are dependent upon the metallurgical process that is required to liberate economic minerals and produce a saleable product and by nature contain elements of significant risk such as:

- (i) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate;
- (ii) developing an economic process route to produce a metal and/or concentrate;
and

changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

4.3 Risks relevant to the Offers

(a) **Underwriting risk**

The Company has entered into the Joint Underwriting Agreement under which the Underwriters have agreed to partially underwrite the Entitlement Offer and Top-Up Offer up to the Underwritten Amount, subject to the terms and conditions of the Joint Underwriting Agreement. If certain conditions are not satisfied or certain events occur, the Underwriters may terminate the Joint Underwriting Agreement. Termination of the Joint Underwriting Agreement may have a material adverse impact on the proceeds raised under the Offers. Termination of the Joint Underwriting Agreement could materially adversely affect the Company's business, cash flow, financial condition and results. See Section 5.3 for further details of the Joint Underwriting Agreement.

(b) **Option risk and dilution**

Options are, by their nature, only of value at times when the exercise price is lower than the price of the underlying Shares. There is no guarantee that the New Options offered under this Prospectus will, at any particular time, have an exercise price which is lower than the price of the Shares.

There is a risk that the New Options may expire at a time when they have little or no value.

On completion of the Offers (assuming the Entitlement Offer is fully subscribed), there will be approximately 25,243,643 New Options on issue. If exercised, these Options will be converted into Shares, thereby causing the shareholdings of Shareholders to be diluted by ~4.90% (based on the number of Shares on issue on completion of the Offers). However, each New Option has an exercise price of \$0.06 which means that the Company will receive additional funds of approximately \$1.5 million (before costs) upon exercise of the New Options, assuming all New Options the subject of the Offers are issued and subsequently exercised. There is no certainty that New Options, if issued, will be exercised in full, or at all.

4.4 General risks

(a) **Climate change**

Climate change is a risk the Company has considered, particularly related to its operations in the mining industry. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

(b) **General economic climate**

Factors such as inflation, currency fluctuations, interest rates, legislative changes, political decisions and industrial disruption have an impact on operating costs. The Company's future income, asset values and share price can be affected by these factors and, in particular, by exchange rate movements.

(c) **Securities investments**

Applicants should be aware that there are risks associated with any securities investment. The prices at which the Company's Shares trade may be above or below the Offer Price and may fluctuate in response to a number of factors. Further, the stock

market is prone to price and volume fluctuations. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the Shares, regardless of the Company's operational performance.

(d) Government and legal risk

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company.

(e) Force majeure

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. Significant catastrophic events – such as war, acts of terrorism, pandemics, loss of power, cyber security breaches or global threats – or natural disasters – such as earthquakes, fire or floods or the outbreak of epidemic disease – could disrupt the Company's operations and interrupt critical functions, or otherwise harm the business. To the extent that such disruptions or uncertainties result in delays or cancellations of the deployment of the Company's products and solutions, its business, results of operations and financial condition could be harmed.

(f) Taxation

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for Shares under this Prospectus.

(g) Unforeseen risk

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

4.5 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus.

Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

5. Additional information

5.1 Rights and liabilities attaching to Shares

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

(a) General meeting and notices

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Ranking of Shares

At the date of this Prospectus, all Shares are of the same class and rank equally in all respects. Specifically, the Shares issued pursuant to this Prospectus will rank equally with existing Shares.

(c) Voting rights

Subject to any rights or restrictions, at general meetings of Shareholders or classes of shareholders:

- (i) every Shareholder present and entitled to vote may vote in person or by attorney, proxy or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder, has one vote for every fully paid Share held and a fraction of one vote for each partly paid up Share held, equal to the proportion which the amount paid up on that Share (excluding amounts credited) is to the total amounts paid up and payable (excluding amounts credited) on that Share.

(d) Dividend rights

Subject to the rights of the holders of any shares with special rights to dividends, the Directors may determine or declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid is of the total amounts paid and payable in respect of such Shares.

No dividend carries interest against the Company and the declaration of Directors as to the amount to be distributed is conclusive.

The Company must not pay a dividend unless the Company's assets exceed its liabilities immediately before the dividend is declared and the excess is sufficient for the payment of the dividend. The Directors may capitalise any profits of the Company and distribute

that capital to the Shareholders, in the same proportions as the Shareholders are entitled to a distribution by dividend.

(e) **Variation of rights**

If at any time the share capital is divided into different classes of shares, the rights attaching to the Shares may only be varied by the consent in writing of the holders of three-quarters of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares in that class.

(f) **Transfer of Shares**

Shares can be transferred upon delivery of a proper instrument of transfer to the Company or by a transfer in accordance with the ASX Settlement Operating Rules. The instrument of transfer must be in writing, in the approved form, and signed by the transferor and the transferee. Until the transferee has been registered, the transferor is deemed to remain the holder, even after signing the instrument of transfer.

In some circumstances, the Directors may refuse to register a transfer if upon registration the transferee will hold less than a marketable parcel. The Board may refuse to register a transfer of Shares upon which the Company has a lien. The Company must refuse to register a transfer of Shares where the Corporations Act, Listing Rules or ASX Settlement Operating Rules or a law about stamp duty requires the Company to do so.

(g) **Future increase in capital**

The issue of any Shares is under the control of the Board of the Company as appointed from time to time. Subject to restrictions on the issue or grant of Securities contained in the Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing Share or class of shares), the Directors may issue Shares and other Securities as they shall, in their absolute discretion, determine.

(h) **Rights on winding up**

If the Company is wound up, the liquidator may with the sanction of special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5.2 Terms and conditions of New Options

- (h) **(Restrictions on transfer of Shares):** If the Company is required but unable to give ASX a notice that complies with section 708A(5)(e) of the Corporations Act, or such a notice for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, Shares issued on exercise of the Options may not be traded until 12 months after their issue unless the Company, at its sole discretion, elects to issue a prospectus pursuant to section 708A(11) of the Corporations Act. The Company is authorised by the holder to apply a holding lock on the relevant Shares during the period of such restriction from trading.

under the Corporations Act or the ASX Listing Rules where such rights cannot be excluded by these terms.

- (n) **(Adjustments for reorganisation):** If there is any reorganisation of the issued share capital of the Company, the rights of the Option holder will be varied in accordance with the Listing Rules.
- (o) **(Entitlements and bonus issues):** Subject to the rights under paragraph (p), holders will not be entitled to participate in new issues of capital offered to shareholders such as bonus issues and entitlement issues.
- (p) **(Adjustment for bonus issues of Shares):** If the Company makes a bonus issue of Shares or other securities to existing Shareholders (other than an issue in lieu or in satisfaction of dividends or by way of dividend reinvestment):
 - (i) the number of Shares which must be issued on the exercise of an Option will be increased by the number of Shares which the holder would have received if the holder had exercised the Option before the record date for the bonus issue; and
 - (ii) no change will be made to the Exercise Price.
- (q) **(Return of capital rights):** The Options do not confer any right to a return of capital, whether in a winding up, upon a reduction of capital or otherwise.
- (r) **(Rights on winding up):** The Options have no right to participate in the surplus profits or assets of the Company upon a winding up of the Company.
- (s) **(Takeovers prohibition):**
 - (i) the issue of Shares on exercise of the Options is subject to and conditional upon the issue of the relevant Shares not resulting in any person being in breach of section 606(1) of the Corporations Act; and
 - (ii) the Company will not be required to seek the approval of its members for the purposes of item 7 of section 611 of the Corporations Act to permit the issue of any Shares on exercise of any of the Options.
- (t) **(No other rights)** An Option does not give a holder any rights other than those expressly provided by these terms and those provided at law where such rights at law cannot be excluded by these terms.
- (u) **(Amendments required by ASX)** The terms of the Options may be amended as considered necessary by the Board in order to comply with the ASX Listing Rules, or any directions of ASX regarding the terms provided that, subject to compliance with the Listing Rules, following such amendment, the economic and other rights of the holder are not diminished or terminated.
- (v) **(Constitution)** Upon the issue of the Shares on exercise of any Options, the holder will be bound by the Company's Constitution.

5.3 Joint Underwriting Agreement

(a) General

The Company is party to the Joint Underwriting Agreement with Canaccord and Bell Potter, pursuant to which Canaccord and Bell Potter have agreed to partially underwrite the Entitlement Offer and the Top-Up Offer up to the value of \$3,000,000.

Pursuant to the Joint Underwriting Agreement, to the extent that there remains any New Shares and New Options which have not been validly applied for under the Entitlement Offer and the Top-Up Offer (i.e. the “Shortfall”), the Underwriters have agreed to subscribe for the Shortfall up to a maximum of 75,000,000 New Shares (and 18,750,000 New Options).

The Joint Underwriting Agreement contains certain customary:

- (i) conditions precedent that must be satisfied or waived before the Underwriters are obliged under the Joint Underwriting Agreement to, among other things, underwrite the Entitlement Offer and the Top-Up Offer;
- (ii) representations and warranties relating to the Entitlement Offer and the Company's operations, in favour of the Underwriters; and
- (iii) undertakings in favour of the Underwriters including in relation to the conduct of the Entitlement Offer and business of the Company.

The Joint Underwriting Agreement is subject to generally customary termination events which are summarised below.

(b) **Fees**

In accordance with the Joint Underwriting Agreement and the Joint Lead Manager Mandate (see Section 5.4 below), the Company is required to pay or satisfy the following fees to the Underwriters (or their respective nominees) in their Respective Proportion:

- (i) a management fee equal to 2% of the gross amount raised under the Offers;
- (ii) a selling/underwriting fee equal to 4% of the gross amount raised under the Offers; and
- (iii) the issue of the Underwriter Options, subject to the receipt of Shareholder approval at the General Meeting,

(collectively, the **Joint Underwriting Fee**).

In addition to the Joint Underwriting Fee, the Company has agreed to issue up to 18,750,000 unquoted Options subject to the same terms as the New Options under the Offers to the sub-underwriters appointed by the Underwriters (**Sub-Underwriting Options**), on the basis of 1 Sub-Underwriting Option for every 4 New Shares sub-underwritten. The issue of the Sub-Underwriting Options is subject to and conditional on the receipt of Shareholder approval at the General Meeting.

All third party broker fees and sub-underwriting and co-manager fees, excluding the issue of the Sub-Underwriting Options, are to be paid by the Underwriters in their Respective Proportions.

(c) **Expenses and indemnity**

In addition to the Joint Underwriting Fee, the Company will pay, or reimburse the Underwriters for all out of pocket costs reasonably incurred by the Underwriters in connection with or incidental to the Entitlement Offer, including but not limited to:

- (i) reasonable legal costs of Australian counsel, capped at a maximum of \$20,000 (excluding GST);

- (ii) all other reasonable costs and expenses including:
 - (A) marketing and communication costs, printing, couriers, postage and other distribution costs; and
 - (B) travel (provided all air travel is of an economy class standard) and accommodation expenses relating to the Entitlement Offer; and
- (iii) any stamp duty or similar taxes (but excluding any income tax of the Underwriters) payable in respect of the Entitlement Offer,

provided that the consent of the Company will be obtained prior to incurring any individual costs in excess of \$2,000.

The Joint Underwriting Agreement also contains an indemnity from the Company to the Underwriters that is considered standard for an agreement of this type.

(d) **Termination events**

The Underwriters may terminate their obligations under the Joint Underwriting Agreement under the following circumstances:

- (i) **(Material Adverse Change)** Any Material Adverse Change occurs.
- (ii) **(Listing)** The Company ceases to be admitted to the official list of ASX or the Shares cease to be quoted on ASX, or it is announced by ASX or the Company that such an event will occur.
- (iii) **(ASX approval)** Unconditional approval (or conditional approval, provided such condition would not cause or contribute to a Material Adverse Change) by ASX for official quotation of the New Shares is refused or is not granted by the time required to conduct the Entitlement Offer in accordance with the Timetable or, if granted, is modified (in a manner which would cause or contribute to a Material Adverse Change) or withdrawn.
