

Announcement Update

Gorilla Gold Mines Ltd ('the Company' or 'Gorilla') refers to the announcement 'Mulwarrie Drilling Update' released on 4 April 2025 and provides the below additional information in relation to Figure 3 of the release.

MWEX012, 220 – 223m Massive QTZ vein. Diss sulphides

MWEX012, 223.5 – 225m Massive sulphides. Into major carbonate/ QTZ veining.

Figure 3 Photo of quartz veining with associated sulphide in MWEX012 (note: Assay results for the diamond portion of MWEX012 are not yet received, GG8 provides no guidance on estimated gold grade, there is no 1:1 correlation between gold grade and sulphide percentage, the interval 220-224 averaged 85% quartz-carbonate vein by volume, 5% biotite alteration, 5% pyrrhotite 5% altered country rock)

Assay results in relation to MWEX012 are expected within two to six weeks.

Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

This announcement has been authorised and approved for release by the Chief Executive Officer of the Company.
