

09 April 2025

Livium diversifies recycling offering through agreement with global logistics leader DB Schenker

HIGHLIGHTS

- Livium has signed an Agreement with DB Schenker, a global leading logistics company, to provide storage services for new and used batteries along with recycling services
- This Agreement diversifies Livium's recycling offering into complimentary and value add services with no additional infrastructure required
- Under the Agreement, Livium has exclusive rights to provide battery recycling services
- The Agreement commenced on 4 April 2025, has a 1-year term and allows the provision of services in Australia

Livium Ltd (ASX: LIT) ("**Livium**" or the "**Company**") is pleased to announce that its wholly owned subsidiary Envirostream Australia Pty Ltd ("**Envirostream**"), a leader within the Australian battery recycling industry has signed a battery storage and recycling agreement ("**Agreement**") with Schenker Australia Pty Ltd, ("**DB Schenker**"), one of the world's leading logistics service providers with operations in over 130 countries.

The Agreement allows DB Schenker to provide new Li-ion batteries to Envirostream who will safely store them until a return is requested. In addition, the Agreement allows DB Schenker to provide used Li-ion batteries to Envirostream who will store and process the batteries (together the "**Services**").

The Agreement provides exclusivity on the processing of used batteries and, significantly, diversifies Envirostream's services and revenues through providing safe storage of Li-ion batteries. These new services along with the provision of tolling services for international recycling companies, have been identified as the first opportunities to provide adjacent and complimentary services.

The Agreement commenced on 4 April 2025, with a 1-year term and has no minimum volumes during the term and, as a result, Livium is not able to quantify the economic impact of the Agreement at this stage. No additional infrastructure is required to provide these services however expansion will enable increased volumes and range of service to be offered.

Comment from Livium CEO and Managing Director, Simon Linge

"We are very pleased to take this first step in expanding our service offer with DB Schenker, an expert in logistics. This Agreement with DB Schenker demonstrates Livium's ability to deliver blue chip services to major international organisations underpinned by our safety and risk management standards."

"There remain many other opportunities with clients to build on our core recycling activities and we look forward to providing these expanded services to DB Schenker whilst seeking to further diversify our recycling service offering with other leading companies."

Comment from DB Schenker Australia and New Zealand CEO, Craig Davison

"This agreement with Livium marks a significant milestone for DB Schenker in Australia and New Zealand. Our extensive logistics experience combined with Livium's recycling technology makes us poised to deliver comprehensive and sustainable solutions for battery storage and recycling across many verticals."

"We are excited about the opportunities this collaboration will bring and look forward to a successful and impactful partnership."

Forward-looking statements

This announcement contains forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties that it is beyond the Company's ability to control or predict and which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Investors should be aware that past performance should not be relied upon as being indicative of future performance.

About Livium

Livium (previously Lithium Australia) is aiming to lead and enable the global transition to sustainable lithium production. The Company operates Australia's market leading battery recycler, produces critical battery material lithium ferro phosphate (LFP), and has developed a patented lithium extraction technology (LieNA®). Livium's revenue-generating recycling business and technologies are well-placed to capitalise on growing global lithium-ion battery demand and provides diversification benefits to global supply chains.

About DB Schenker

With around 71,100 employees at more than 1,850 locations in over 130 countries, DB Schenker is one of the world's leading logistics service providers. The company operates land, air, and ocean transportation services, and it also offers comprehensive logistics and global supply chain management solutions from a single source. Aiming for a sustainable future of the logistics industry, DB Schenker continuously invests in innovative transport solutions, renewable energies, and low-emission products for its customers.
