The Board of Bulletin Resources (ASX: BNR, Bulletin) provides the following Activities Report for the quarter ending 31st March 2025.

Lake Rebecca Gold Project

Bulletin has acquired 100% ownership of 509km² of gold prospective exploration tenements adjacent to its Lake Rebecca Gold Project, 150km east north-east of Kalgoorlie, Western Australia. The acquisition consolidates 1,100km² of gold prospective exploration tenements in the southern Laverton Tectonic Zone (LTZ). The tenements are near the Northern Star Resources Ltd (ASX:NST) 4.0 Moz Au Carosue Dam Operations and Ramelius Resources Limited (ASX:RMS, Ramelius) 1.4 Moz Au Rebecca gold project and 1.8 Moz Au Roe gold project (Figure 1).

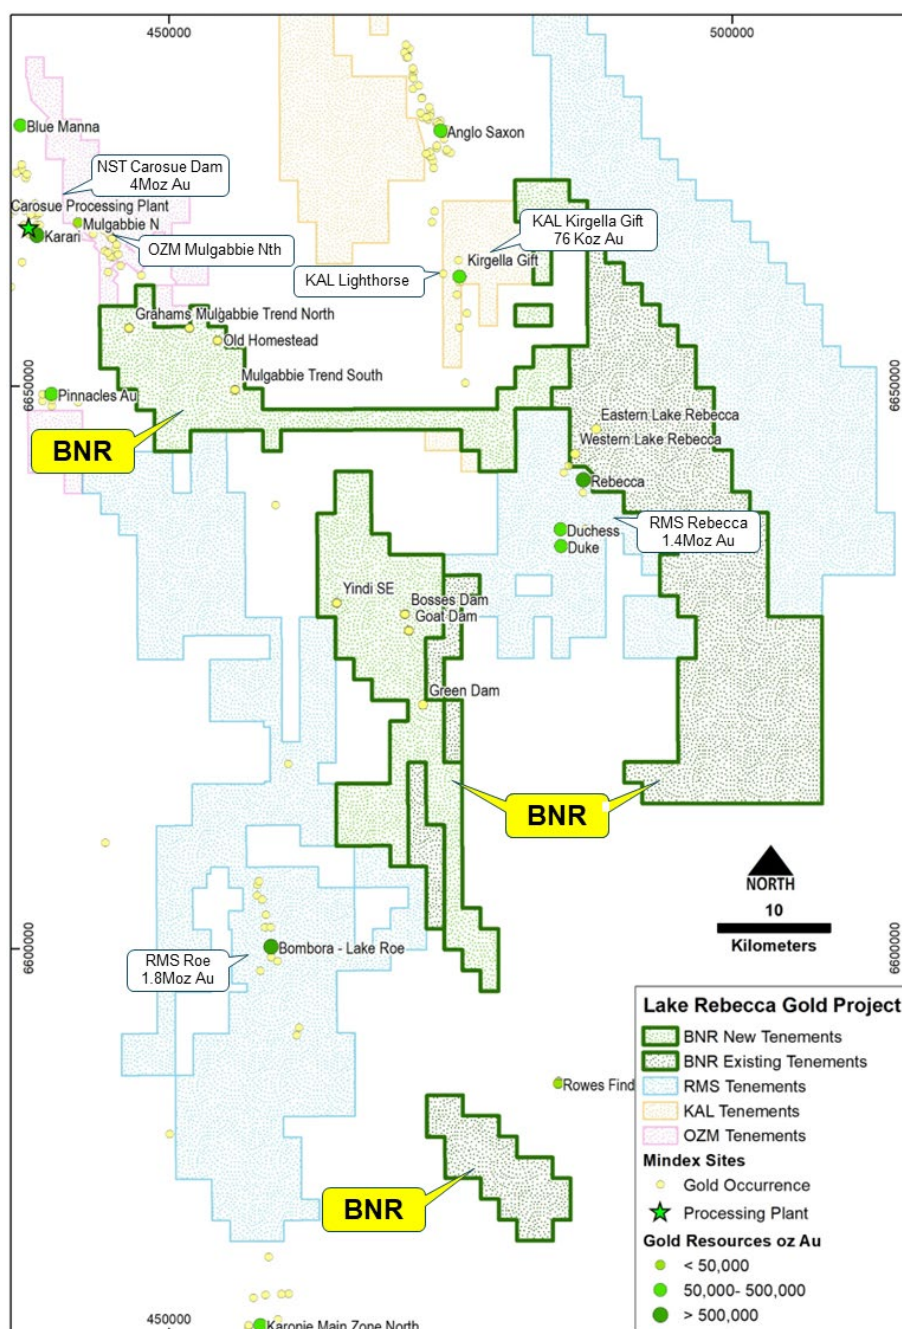

Figure 1: Bulletin's newly expanded Lake Rebecca Gold Project and surrounding tenure

The newly acquired tenements are immediately southeast and along strike of OzAurum Resources Limited's (ASX:OZM) recent high grade drill results, including 20m at 3.57g/t Au and 9m at 5.79 g/t Au at Mulgabbie North (refer OZM ASX announcements dated 3 February & 1 April 2025). They are also along strike of Kalgoorlie Gold Mining Limited's (ASX:KAL) 76.4Koz Au Kirgella Gift deposit and nearby Lighthorse prospect with intercepts including 17m at 4.81 g/t Au from recent drilling (refer KAL ASX announcement dated 17 February 2025).

The newly acquired tenement package has three established north-northwest oriented gold mineralised trends.

The western trend is associated with extensive drill defined gold-arsenic anomalies that straddle branches of the KKSZ system and includes the Graham's Find, Graham's Find South, Graham's Find East, Mulgabbie South and Old Homestead targets. The targets are southeast and along strike of NST's 4.0M oz Au Carosue Dam operations and OZM's recent high grade drill results including 20m at 3.57g/t Au and 9m at 5.79 g/t Au at Mulgabbie North (refer OZM ASX announcements dated 3 February & 1 April 2025).

The central trend is associated with drill defined gold anomalism that straddles the Laverton/Pinjin and Celia Fault systems and includes the Goats Dam, Bosses Dam and Yindi SE targets.

The eastern trend extends into the Rebecca gold system and comprises the structural corridor hosting gold mineralisation such as the 76.4Koz Au Kirgella Gift deposit and nearby recent drilling KAL at Lighthorse with results including 17 m at 4.81 g/t Au (refer KAL ASX announcement dated 17 February 2025).

Multiple drill ready gold prospects provide immediate exploration targets with previous drill results including (refer BNR ASX announcement dated 10 April 2025):

Goat Dam	4m at 3.86 g/t Au from 131m 3m at 4.24 g/t Au from 89m 1m at 5.92 g/t Au from 155m 18m at 0.68 g/t Au from 164m
Grahams Find	2m at 14.14 g/t Au from 33m 8m at 1.85 g/t Au from 28m 5m at 1.35 g/t Au from 83m 4m at 1.60 g/t Au from 35m
Mulgabbie	7m at 3.51 g/t Au from 45m 2m at 4.90 g/t Au from 51m 4m at 2.12 g/t Au from 42m 10m at 1.79 g/t Au from 37m
Old Homestead	2m at 8.19 g/t Au from 60m 4m at 1.41 g/t Au from 67m

Ravensthorpe Lithium Project

The 130km² Ravensthorpe Lithium Project is located only 12km southwest and along strike of Rio Tinto's (ASX: RIO) Mt Cattlin lithium mine. The Ravensthorpe Lithium Project hosts outcropping, high grade spodumene bearing pegmatites and initial drilling of these pegmatites is proposed to determine their potential economic importance.

In April 2024, DEMIRS advised it had refused to grant Bulletin's Native Vegetation Clearing Permit (NVCP) application which is required to clear access for tracks and drill pads to allow drilling to progress at Ravensthorpe.

It is Bulletin's view that there were no reasonable grounds for the refusal decision. Bulletin subsequently lodged an appeal against the decision to the Western Australian Office of the Appeals Convenor during the June 2024 quarter. Bulletin lodged its appeal on the basis that DMIRS had erred in its decision and did not appropriately assess or consider Bulletin's expert and independent environmental reports, which concluded that any environmental impact resulting from the proposed drilling programme would not be significant. Further, Bulletin believes that DEMIRS did not take into account detailed and comprehensive avoidance, mitigation and offset measures designed by Bulletin.

Expert and independent environmental assessments also demonstrated the proposed drilling programme will not result in any significant impact on the environment. Bulletin's expert evidence was further supported by the earlier decision of the Western Australian Environmental Protection Authority (EPA) not to assess the drilling programme proposal. The EPA decides not to assess a proposal when it determines that the likely effect on the environment is not so significant as to warrant any further work or investigation by the EPA (*refer BNR ASX announcement dated 4 October 2023 and <https://environmentonline.dwer.wa.gov.au/article/?code=KA-01030>*).

Bulletin has been advised that the Appeal's Convener's investigation is nearing completion. Upon completion, a report and recommendation will be provided to the Western Australian Minister for Environment for the Minister's final determination.

Bulletin will continue to update shareholders with information as it comes to hand.

Corporate

During the quarter Bulletin increased its interest in Matsa Resources Limited ("Matsa") by participating in a placement conducted by Matsa whereby Bulletin acquired 10M shares at an issue price of \$0.038 per share. Bulletin also acquired 1.75M Matsa shares on market during the quarter giving it an 11.16% interest in Matsa. Bulletin notes that during the quarter Matsa became the subject of an on-market cash offer for all of its shares by Patronus Resources Limited ("Patronus") at an offer price of \$0.045 per share. Bulletin elected not to participate in the Patronus offer and notes that at the date of this report Patronus has been unsuccessful in acquiring any Matsa share under the takeover offer as Matsa shares have traded well above the offer price.

On 14 February 2025 Bulletin announced that it had received a cash payment totalling \$0.8M from Ramelius Resources Limited (Ramelius, ASX:RMS), associated with the partial sale of 1.35km² of tenure from its Lake Rebecca Gold project in 2021. Bulletin received a total amount of \$4.768M in cash and RMS shares from the sale process (refer BNR ASX announcement dated 2 February 2021).

Financial Commentary

An overview of the Company's financial activities for the quarter ending 31 March 2025 (Appendix 5B) notes that: Exploration expenditure paid during the reporting period was \$147,000, with exploration undertaken at the Company's projects. Corporate and other expenditure amounted to \$184,000.

The total amount paid to directors of the entity and their associates in the period (item 6.1 of the Appendix 5B) was \$66,000 and includes salary, directors' fees, consulting fees and superannuation. Fees paid to Matsa Resources Limited for the provision of offices, accounting and administration services was \$24,000.

Bulletin received \$800,000 as the final payment from RMS for the partial sale of exploration tenure as noted above. Payments for the purchase of investments in listed entities amounted to \$741,000 during the quarter. Bulletin holds investments in Ramelius Resources Limited, Matsa Resources Limited and Auris Minerals Limited worth \$6,032,000 at the end of the quarter.
