- Drilling began during the Quarter at the Company's Esperança project in the Lithium Valley region of Minas Gerais, Brazil
- Drill program of 2,000m to test artisanal workings where spodumene was identified in November 2024. Drilling ongoing subsequent to end of Quarter
- Further lithium in soil anomalism up to 429ppm Lithium identified at the Company's Caraíbas project in the Lithium Valley Region of Minas Gerais, Brazil
- Further lithium in soil anomalism up to 320ppm Lithium identified at the Company's Canabrava project in the Lithium Valley Region of Minas Gerais, Brazil
- Multiple lithium targets identified across all three project areas in Brazil
- Mapping and ground reconnaissance works ongoing to define further drill targets
- Managing Director, Alex Biggs completed a site visit to Brazil during the Quarter to visit drilling operations at Esperança project and review targets at Caraíbas and Canabrava projects

Lightning Minerals Managing Director Alex Biggs said, "The first Quarter of the 2025 calendar year has been a strong one for the Company as we began drilling at Esperança. The number of targets we have across our Brazilian projects is testament to the prospectivity of the Lithium Valley in Minas Gerais and our works are ongoing subsequent to end of Quarter with confidence in the potential of our project areas increasing steadily as we execute our plans. Exploration drilling is continuing at Esperança and plans are underway for Reverse Circulation drilling at both Caraíbas and Canabrava. We look forward to the coming Quarter as we execute further exploration on additional targets in Brazil".

OPERATIONAL REVIEW

CARAÍBAS, SIDRÔNIO AND ESPERANÇA PROJECT OVERVIEW (100% L1M)

Exploration has focused on phase 1 drilling at the Esperança project focusing on the spodumene bearing pegmatites discovered in November 2024 (ASX Announcement 18 November 2024). Spodumene was confirmed during the period through Raman Spectroscopy (ASX Announcement 17 January 2025).

Multiple areas of lithium in soil anomalism have previously been identified including a 2km lithium in soil anomaly up to 239ppm Li at the Caraíbas project (ASX Announcement 02 December 2024) and lithium in soil anomalism up to 113ppm Li at the Canabrava project (ASX Announcement 03 October 2024). Infill soil sampling results across these key areas of interest was released during the Quarter for the Caraíbas and Canabrava projects with results up to 429ppm Lithium and 320ppm Lithium respectively.

Drill contractors Energold were engaged to complete up to 2,000m of diamond drilling at the Esperança project which began on the 20th February 2025 (ASX Announcement 21 February 2025). Drilling is ongoing subsequent to end of Quarter.

Further ground reconnaissance and drill target identification was also completed across all three project areas with drill planning underway for Caraíbas and Canabrava. 59 infill samples, and 78 new primary samples were completed at the Canabrava project. The infill soil sampling program was designed to follow up previous results where samples on 400m spaced sample lines returned results up to 113ppm Lithium (ASX Announcement 03 October 2024). The infill samples were collected on a reduced line spacing of 100m and show consistent lithium anomalism >80ppm which coincides with mapped pegmatites over a 700m strike length (Figure 6).

A small 78 sample program was also completed in the south-eastern areas of the Canabrava project in residual Salinas Formation sediments. Results are shown in Figure 7. The two easternmost sample lines have consistent lithium values above 200ppm with a peak result of 320ppm. Infill sampling at this location is being considered as part of the drill targeting and prioritisation exercise.

Soil results for the remaining 213 samples taken at the Caraíbas project show high tenor soil responses for lithium. Sampling proximal to an artisanal mine with known lithium mineral occurrences of lepidolite (ASX Announcement 22 April 2024) has returned elevations up to 429ppm Lithium, with several adjacent

samples returning values over 200ppm Lithium which is considered a high response for residual soils of Salinas Formation in the region (Figure 5).

The results are currently being investigated with follow up site visits underway to ascertain if outcropping geology at the sites can explain the magnitude of the lithium response. The results of field investigations will feed into the ongoing drill targeting and prioritisation exercise with a view to potentially developing new high priority targets post completion of the Esperança drilling campaign. This will be targeted at the identified lithium in soil anomaly extending approximately 2km with peak results up to 239ppm Lithium (ASX Announcement 02 December 2024).

DUNDAS PROJECT OVERVIEW (100% L1M)

A number of areas of interest were identified in the previously completed regional soil sampling program on Dundas North tenements E28/3027 and E28/3028 where broad lithium in soil anomalism was identified across an area of 35km² and up to 147ppm Li (ASX Announcement 01 May 2023). A detailed infill program has been completed during the Quarter within the initial program which was spaced at 400m x 400m. Infill sampling is planned on 100m x 200m spacing with results pending subsequent to end of Quarter.

DALMAS AND HIVER PROJECT OVERVIEW (100% L1M)

Data review is ongoing in the period through engagement of specialist Canadian consultants to complete a historic data review and compile all relevant, regional geological datasets including data collected during the Company's field program in 2023. Works are ongoing subsequent to end of Quarter.

MAILMAN HILL PROJECT OVERVIEW (100% L1M)

An internal review of the auger program completed in July 2024 which yielded anomalous gold results (ASX Announcement 21 August 2024) is underway with discussions underway regarding further exploration potential which would be completed via Aircore drilling. Evaluation is ongoing subsequent to end of Quarter.

MT BARTLE PROJECT (100% L1M)

Application for the Mt Bartle tenements is still pending based on execution of heritage agreements. Data review and analysis is ongoing and continues subsequent to the end of Quarter. Discussions regarding execution of heritage agreements are continuing.

ABOUT LIGHTNING MINERALS

Lightning Minerals is a mineral exploration company, listed on the Australian Securities Exchange (ASX:L1M) and focused on the exploration of critical minerals and lithium at its tenements across Western Australia. The acquisition of the Caraibas, Canabrava and Esperança lithium projects in Minas Gerais, Brazil are potentially transformational to the Company's success in the lithium sector. The Company also owns the Dundas project in the prolific Dundas region of Western Australia, the Dalmás and Hiver lithium projects in Quebec, Canada, another significant and evolving lithium region globally. The Company also holds other projects in Western Australia which include Mt Bartle and Mailman Hill which are prospective for gold, base metals and critical minerals.

FORWARD LOOKING STATEMENTS

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward-looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

COMPETENT PERSONS STATEMENT

The information contained herein that relates to exploration results is based on information compiled or reviewed by Mr Jarrad Woodland, who is a Competent Person and a member of the Australasian Institute of Mining and Metallurgy. Mr Woodland is a full-time employee of the Company. Mr Woodland has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Woodland consents to the inclusion of his name in the matters based on the information in the form and context in which it appears. Mr Woodland holds options in Lightning Minerals.

REFERENCES TO PREVIOUS ANNOUNCEMENTS

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters have not materially changed. The Company also confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
