

Quarterly Activities Report

For the quarter that ended on 31 March 2025

Highlights:

LAVERTON GOLD PROJECT

🇺🇸 The results from the 4,443 metres of RC drilling conducted in late 2024 were internally reviewed during the quarter. This resulted in additional drill programmes being planned to be conducted at Burtville East, Rainier and Comet Well.

🇺🇸 Drilling at the Laverton Gold Project subsequently recommenced, beginning at the bonanza grade Burtville East Project; the main focus of the programme was to test for any potential extensional zones, with additional activities to include:

- probing the historic stope to allow safe future near surface bulk sampling activities
- metallurgical and mineralogical holes to provide data for future mining studies
- assaying existing high-grade gold stockpiles with a view to monetisation

🇺🇸 **Historic intercepts from the Company's 2022 600m maiden drill campaign at Burtville East included:**

- **BVE006:** 15m at 53.94g/t Au from 27m, inc. 1m at 478.00g/t from 28m
- **BVE009:** 10m at 7.15g/t Au from 84m, inc. 1m at 62.80g/t Au from 91m
- **BVE002:** 1m at 73.3g/t Au from 93m

Visible gold was panned from drill hole cuttings (see ASX Announcements, 14 July 2022 and 29 September 2022)

🇺🇸 **2024 drilling at Burtville East returned wide, high-grade gold intercepts, inc. multiple 1m bonanza grade peaks:**

- **24BERC06:** 6m at 28.66g/t Au from 44m, inc. 1m at 127.00g/t Au from 44m
- **24BERC08:** 8m at 15.29g/t Au from 68m, inc. 1m at 52.30g/t Au from 68m and 1m at 56.00g/t Au from 69m

(see ASX Announcement, 13 December 2024)

🇺🇸 All three planned drill programmes have since been completed and assay results returned for the Burtville East stockpiles (see ASX release dated April 29, 2025)

CORPORATE

🇺🇸 Placement of \$685k successfully conducted in early March

🇺🇸 Funds to be mainly applied towards additional exploration at Burtville East

Panther Metals Ltd (ASX: PNT) ('Panther' or 'the Company') is pleased to report on its activities during the three months ending 31 March 2025.

Laverton Gold Project

Background

Since listing in December 2021, the Company has been actively exploring its 100% owned tenements in the Laverton Gold Project area (LGP), which covers approximately 265km² of highly prospective and under-explored gold targets, striking over 35km in length along the LGP trend.

During 2024 the Company undertook a full database synthesis of the LGP area, that involved merging recent exploration activities with available historic data to complete an advanced geochemical interrogation study, which generated 36 highly anomalous gold geochemical targets

Further to the study, the Company commenced a drill programme in September 2024 which was originally planned to cover 7,000m of reverse circulation (RC) drilling over 10 highly prospective gold targets at the LGP.

As previously advised in the December 2024 quarterly activities report, a total of 4,443 metres of RC drilling was completed over several drill targets contained within the Laverton Gold Project area. Flooding and subsequent access issues prevented the completion of the planned programme in its entirety.

The results from this round of drilling were released to the ASX on 30 October 2024 and 13 December 2024.

Importantly, the drill results from this programme have provided valuable insights, which has allowed the Company to plan more refined drilling programmes at Burtville East and Comet Well.

Burtville East – Resumption of Drilling

In March the Company advised that it had commenced a further 2,000 metre RC drilling programme at the Burtville East Gold Project.

The main focus of this new round of drilling is to test for any potential extensional zones (see Figure 1 overleaf).

For further information, please refer to the ASX announcement on 11 March 2025.

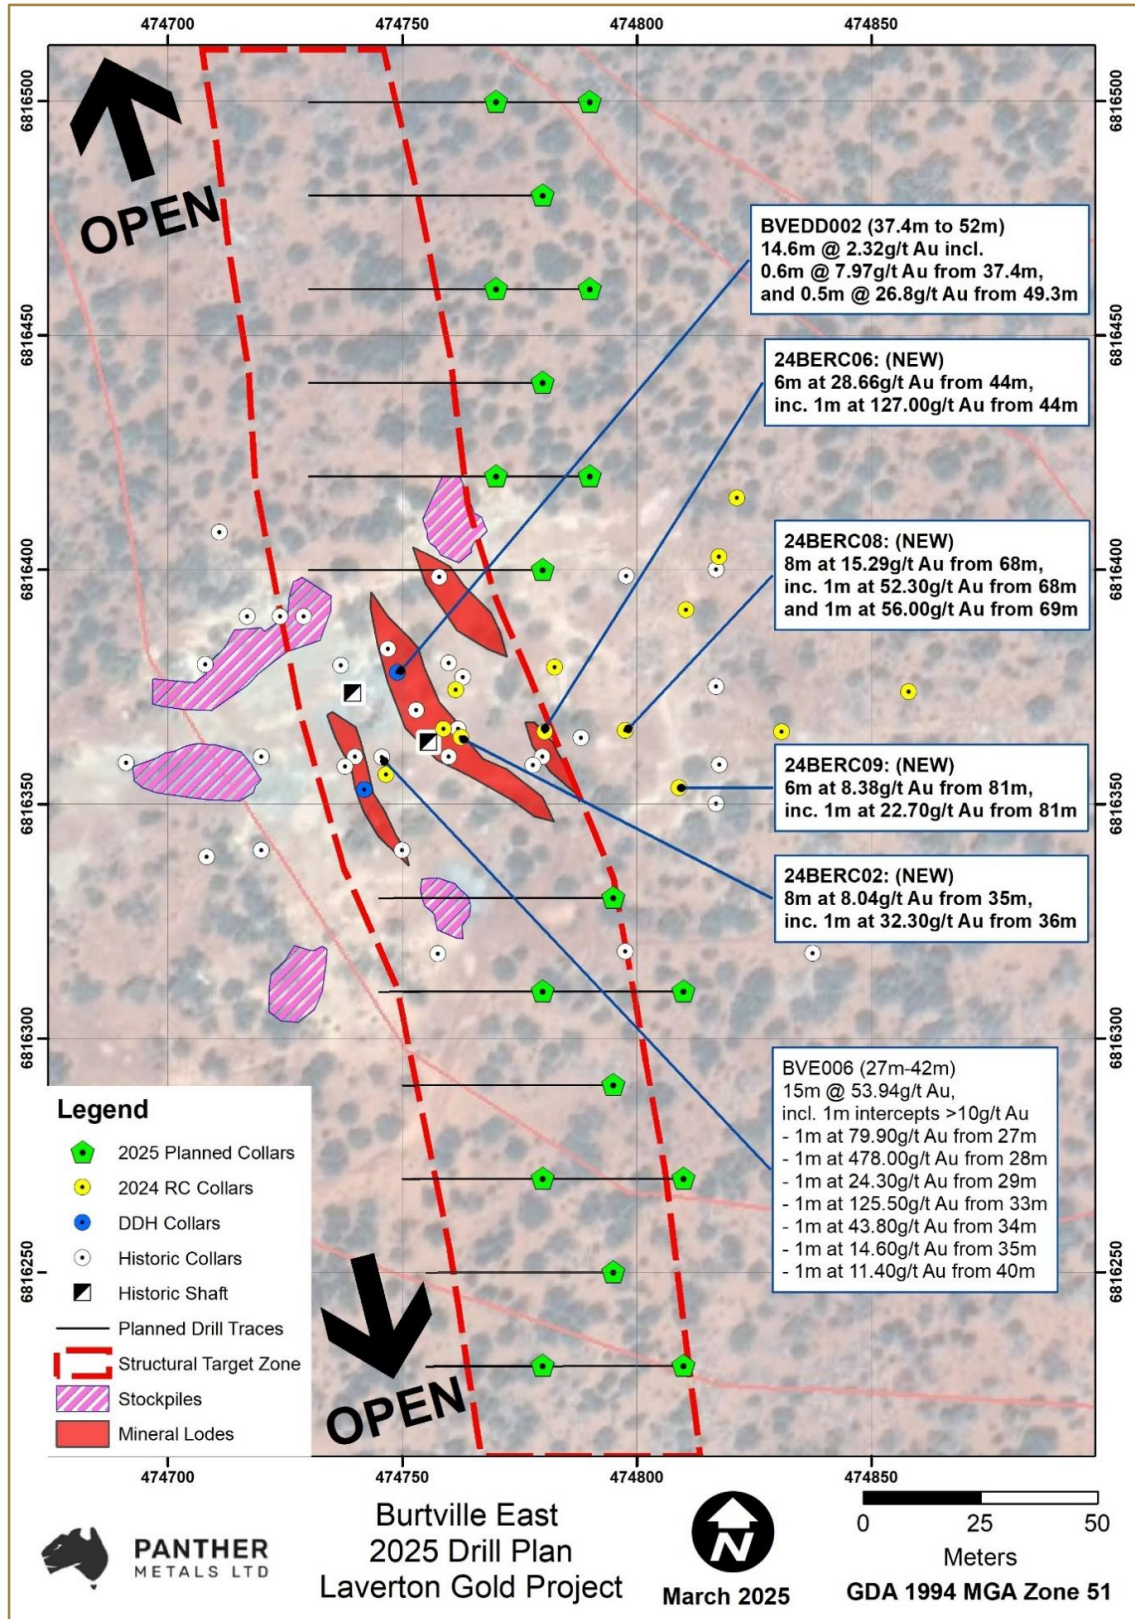

Figure 1: Current planned drilling (in green) with the Company's historic drilling and best intercepts.

Burtville East – Other Exploration Activities

The following exploration activities were also planned for Burtville East:

- 🇺🇸 Probing the historic stope to allow safe future near surface bulk sampling activities
- 🇺🇸 Metallurgical and mineralogical holes to provide data for future mining studies
- 🇺🇸 Testing existing high-grade gold stockpiles with a view to monetisation

Comet Well and Rainier Targets

As stated above, the Company internally reviewed prior drilling results at Comet Well.

The Company planned to further test several anomalous gold results from the prior campaign via an aircore drilling programme at Comet Well.

It also planned to test the Rainier target, previously missed due to inclement weather.

Corporate

The Company successfully completed a Placement in early March through GBA Capital to raise approximately \$685,000 (before issue costs).

A total of 52,733,785 new fully paid ordinary shares were issued at a price of \$0.0130 each. The issue price represented a 7.01% premium to the 15-day VWAP of \$0.0121.

Under the Placement, for every two (2) shares issued under the offer, investors will receive one (1) free attaching unlisted option, with an exercise price of \$0.025 and an expiry of 2 years from the date of issue ('**Placement Options**'), subject to shareholder approval.

A total of 26,366,893 Placement Options are to be issued under the Placement.

GBA Capital Pty Ltd acted as Lead Manager to the Placement and will receive a 6% fee on the funds raised, together with 4 million unlisted options to be issued on the same terms as the Placement Options ('**Lead Manager Options**').

Shareholder approval for the issue of the Placement Options and Lead Manager Options will be sought at the annual general meeting to be held on 2 May 2025.
