
Enterprise Metals Limited (ASX: ENT) ('**ENT** or the '**Company**') is pleased to provide the following Summary Report on its activities during the March 2025 Quarter.

Doolgunna Project, WA: ENT 100% - Gold – Copper - 80km²

Following the signing of a modern Heritage Agreement with the Yugungna-Nya People (NYP), Enterprise Directors met formally with the Yugungna-Nya Board of Trustees, and agreed for a Heritage Survey to be undertaken prior to Enterprise's planned RC drilling program over the Vulcan gold prospect, and the Goodins Fault gold prospect.

Subsequently the NYP advised that the Heritage Survey of the planned drill sites would be between 29th April to 2nd May. Following the completion of the Heritage Survey, and a written report, Enterprise expects to be on the ground drilling in the 1st or 2nd week of May. A suitable drilling contractor has been selected for the Doolgunna reverse circulation drilling component at Vulcan, and the same contractor will undertake the aircore drilling component at the Goodins Fault prospect.

As advised in the previous December Quarterly Report, the drill sites have been selected on the basis of "*follow up drilling*" to gain an understanding of the structural controls on gold mineralisation previously intersected, and also on clear access, ie. minimal environmental disturbance.

On 14 October 2024, DEMIRS advised that Enterprise had been awarded a grant of up to \$90,000 for RC drilling under the WA Government's Exploration Incentive Scheme. (EIS). This grant will cover just under 50% of Enterprise's planned RC/AC budget for the Vulcan/Goodins areas.

Mandilla Project, WA: ENT 100% - Gold – Lithium - 9.6km²

During the March Quarter Enterprise received further Ultrafine (UFF) assays from orientation soil samples collected on E15/1437. These assays identified a cluster of +30ppb gold results within shallow alluvial soils east of the Emu Rocks Granite.

While previous UFF soil samples were collected with a pick and shovel to approximately 25-30cm deep, the recent soil samples were collected using a small handheld chainsaw auger with a 50cm flight, in the immediate vicinity of previously collected soil samples. The shallow auger samples, after UFF analysis, produced higher level of gold and some gold pathfinder assays.

Murchison Project, WA: ENT 100% Zinc - Copper – Gold - 212km²

GEM Geophysical were contracted to undertake two Moving Loop Electromagnetic (MLEM) surveys on E20/913, and two MLEM surveys on E20/912. Due to rain in the Murchison, only one line of MLEM was completed on one anomaly of E20/913. Subject to weather, it is expected that the four MLEM surveys will be completed in May 2025.

Eneabba East Project, WA. - ENT Option - HMin - Titanium - Base Metals -597km²

The Eneabba East Project is located ~275 km north of Perth, east and southeast of Iluka Resources Ltd's Eneabba HM mine sites. Iluka is currently working to recover monazite in tailings dams containing Rare Earths for treatment in its planned Eneabba Rare Earth Refinery.

Enterprise Metals signed a 12 month Option Agreement with Century Minerals Pty Ltd in May 2024 whereby Enterprise had the right to explore for all minerals including heavy minerals (HM) such as zircon, monazite, rutile, ilmenite, Rare Earths and base metals including titanium. Due to land access issues, Century has extended the Option period to May 2026.

The Eneabba East Project consists of two granted exploration licences:

- E70/5884 – Badgingarra which lies adjacent to the Dandaragan Scarp which is southeast of and sub-parallel to the Gin Gin Scarp, and
- E70/5999 - Coorow which lies immediately south of Empire Metals Ltd (AIM) Pitfield Titanite Project, and has potential for near surface HMin, titanite and base metals under shallow cover.

New Opportunities Assessment

A key part of Enterprise's business strategy is to continue to seek out first class exploration opportunities that have the potential to add significantly to shareholder value. Under this strategy, the Company has continued to assess a number of gold, base metals and heavy mineral exploration opportunities in Western Australia.

Enterprise Corporate

Cash and cash equivalents at end of Quarter: \$233,000

Details of Mining Exploration Activities

Details of exploration activities during the Quarter are set out above. Expenditure incurred on exploration activities during the Quarter was \$132,000.

The Company's exploration and evaluation expenditure for the Quarter related predominantly to geological consulting, field work, UFF soil sampling and assaying, and tenement administration and maintenance.

Details of Mining Production and Development Activities

There were no expenses incurred in relation to mining or production activities during the Quarter ended 30 March 2025.

Related Party Payments

During the Quarter ended 31 March 2025, the Company made payments of \$24,000 to related parties and their associates. These payments related to existing remuneration arrangements (director fees and consulting fees).
