Disclaimer

This document has been prepared as a summary only and does not contain all information about Spectur Limited (the "Company") – including its assets, liabilities, financial position and performance, profits and losses, or the rights and liabilities attaching to the Company's securities. This document should be read in conjunction with any public announcements and reports (including financial reports, third-party studies, and disclosure documents) released by the Company.

The release, publication, or distribution of this presentation in certain jurisdictions may be restricted by law. Persons in such jurisdictions into which this presentation is released, published, or distributed should inform themselves about and comply with any applicable restrictions. This presentation does not constitute, or form part of, an offer to sell or the solicitation of an offer to subscribe for or buy any securities, nor the solicitation of any vote or approval in any jurisdiction. There shall be no sale, issue, or transfer of the securities referred to in this presentation in contravention of applicable law.

This document is provided for informational purposes only and does not constitute financial advice. Persons needing advice should consult their stockbroker, bank manager, solicitor, accountant, or another independent financial adviser. Certain statements made in this presentation are forward-looking

statements. These are not historical facts but are based on the Company's current expectations, estimates, and projections about the industry in which it operates, and its beliefs and assumptions. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," and "estimates," and similar expressions, are intended to identify forward-looking statements.

Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, they involve risks and uncertainties. No assurance can be given that actual results will be consistent with these statements. They are subject to known and unknown risks, uncertainties, and other factors, some of which are beyond the Company's control, and which could cause actual results to differ materially from those expressed or implied.

Spectur Limited cautions shareholders and prospective investors not to place undue reliance on forward-looking statements, which reflect the Company's views only as of the date of this presentation. The Company undertakes no obligation to publicly update or revise forward-looking statements to reflect subsequent events, circumstances, or unanticipated events occurring after the date of this presentation, except as required by law or applicable regulation.

Investment Highlights

Over 15 years of experience in solar powered Al-driven protection, safety, and warning solutions.

Proven product-market fit, >2,900 devices deployed and >600 customers and a deepening moat through integrated Al, sensing, and communication platforms.

~\$3 billion in addressable markets across Government, Utilities, Construction, Telecommunications, and Council sectors, underpinned by regulatory, ESG and safety drivers. Growing recurring revenue base with >60% of revenues recurring and high margin products.

Positioned for sustainable, profitable growth with a disciplined strategy to fund future expansion from operations rather than dilution.

Transitioning to a scalable SaaS and managed services model

Introducing Our New CEO

ANTHONY SCHMIDT
Chief Executive Officer

Anthony is an experienced senior executive with a proven track record of delivering transformation and growth in technology, operations, and customerfocused businesses.

He joined Spectur in early 2024 as General Manager - Operations and was appointed Acting CEO in January 2025 and confirmed as CEO on April 1st, 2025.

Previously, Anthony led Scancam, an antifuel theft Al enforcement business, from startup through to acquisition, and brings deep expertise in scaling B2B technology ventures, operational turnaround, and commercialisation strategy.

Why Spectur, Why Now?

"I believe Spectur has an incredible foundation.

A technology stack that offers real-world impact and a huge opportunity to evolve into a market leader in SaaS-enabled solutions in solar powered technology. My focus is on strengthening that foundation, unlocking profitable growth, and delivering meaningful, lasting value for all shareholders."

Anthony Schmidt, CEO

Our Mission

To lead Australia in solar-powered visual
Al technology, delivering innovative solutions
that empower safer, more secure, cleaner,
and more sustainable businesses and communities

– anywhere, anytime.

What We Do

Spectur protects communities, organisations, and critical infrastructure by delivering intelligent, proactive visual solutions that operate where traditional systems fail – in remote, unpowered, and challenging environments.

Our unique, modular platforms combine solarpowered hardware with advanced sensing, thinking, and acting AI software technologies – transforming passive surveillance into intelligent systems that detect, decide, and respond in real time.

Our Industries

Telecommunications and Critical Infrastructure

The Challenges We Solve

- Security and surveillance
- Safety and warning
- Environmental monitoring
- Al platforms

- Temporary locations
- Remote locations
- Harsh environments
- 4/5G connectivity
- Starlink compatible

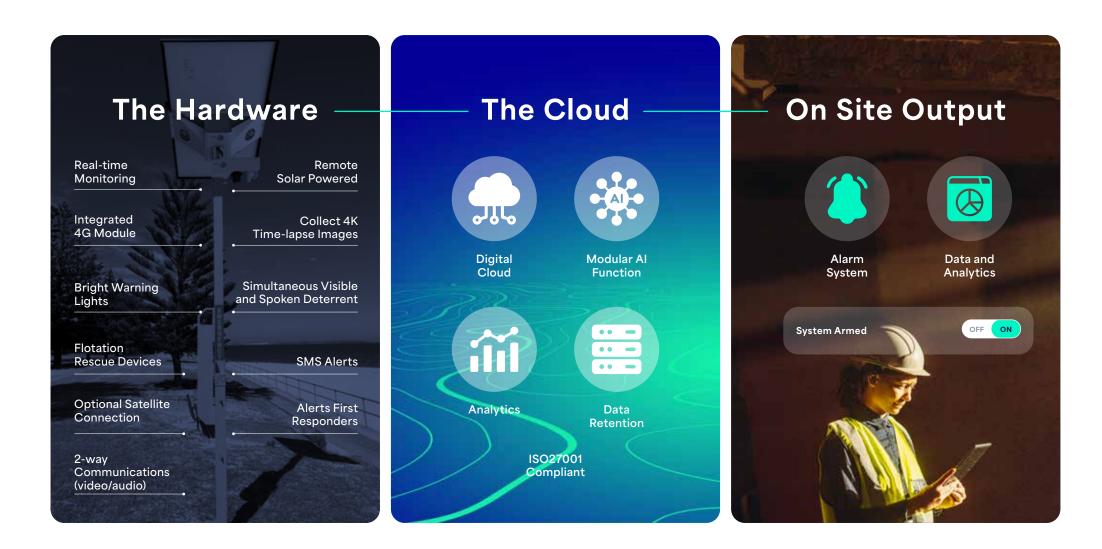

- Unpowered locations
- Robust and versatile
- Diverse applications
- Scalable solar solutions
- · Go where others fail

for the people we serve

any location, anytime

all across the country

And How We Solve Them

Our Offering

Our Offering

Hardware

HD7: Single-camera solar platform for high-definition surveillance.

STA7: Solar powered and versatile system offering up to 4 camera coverage.

240X: Mains-powered, adaptable for indoor and outdoor applications.

ERB7: Emergency Response Beacon providing visual and audible alerts in critical situations.

SS7: The dual camera workhorse designed for cost effective construction solutions.

STA-Power:

Modular solar battery system ensuring continuous power supply

STA-Power Trailers:

Mobile, rapid-deployment units for flexible surveillance

Enablement Platform for Custom Solutions:

Powers bespoke safety, AI, monitoring, or emergency systems beyond traditional surveillance—opening up new verticals like environmental sensing, communication relays, and warning devices.

Flexible Installation Options

Our systems are designed for flexibility, with installation options ranging from permanent in-ground mounts to relocatable concrete blocks and mobile trailer bases.

This versatility allows us to meet the needs of diverse environments – from urban infrastructure projects to remote, rugged sites.

Hardware

SOLAR-ENGINEERED FOR AUTONOMY

Purpose-built to operate independently in remote and off-grid environments, Spectur systems integrate high-efficiency solar arrays with intelligent STA power modules to maximise uptime and performance—day and night.

INTEGRATED POWER & CLOUD PLATFORM

Our hardware is fully integrated with Spectur's cloud infrastructure, enabling real-time system health monitoring, AI processing, and device management. Intelligent telemetry modules report on power, performance, and environmental conditions.

INDUSTRIAL-GRADE DESIGN

Engineered for harsh Australian conditions—heat, wind, dust, and rain—using corrosion-resistant materials, sealed housings, and passive thermal regulation for long-term field reliability.

HIGH-DEFINITION, INTELLIGENT VISION

Advanced cameras with edge-Al capabilities support licence plate recognition, behavioural analytics, time-lapse, and live streaming—delivering situational awareness and automated alerts when it matters most.

STA-Power Module

Smart, Modular Solar Power for the Edge

The **STA-Power** module is Spectur's proprietary solar battery solution, engineered to deliver **continuous**, **autonomous power**. More than just a solar battery, STA-Power is the intelligent backbone that enables flexible, long-term operation of security, surveillance, and warning systems without reliance on the grid.

Modular Solar-Battery Architecture

Scalable design to suit varied power loads and environmental conditions—ideal for high-demand AI applications, remote sites, and diverse form factors.

Always-On, Always-Available

Delivers reliable 24/7 operation with smart charging, deepdischarge protection, and intelligent energy prioritisation.

Hardware Agnostic

Enables integration of third-party cameras, sensors, and communication devices—Spectur or non-Spectur—thanks to universal voltage and interface options.

Seamless STA Ecosystem Integration

Native compatibility with Starlink or e/5G connections, provides the vital link to the cloud for real time alerts, warnings and calls to action.

Built for Australia's Harshest Environments

Rugged construction tested in coastal, arid, and hightemperature conditions to support mission-critical uptime for months or years.

Software

Spectur's software ecosystem powers intelligent, real-time responses to safety, security, and environmental challenges. Our platform capabilities span detection, alerting, monitoring, Al-driven analysis, live streaming, and data capture—enabling customers to act faster, reduce risk, and operate more efficiently.

Our core cloud platform that enables remote device management, alert configuration, health monitoring, and system automation across the fleet.

A specialised solution for environmental monitoring and public safety communications, ideal for government and researchbased applications.

A mobile-friendly app interface for live notifications, real-time alerts, and visual verification of events—empowering field response teams.

Enables low-latency, highquality video feeds from remote locations, supporting real-time surveillance and operational awareness.

Together, these solutions form a scalable software suite that transforms standalone cameras into powerful, Al-enabled edge devices—delivering visual intelligence and actionable insights to our customers.

Professional Expertise

At Spectur, our team of dedicated professionals brings deep expertise across engineering, AI, IoT, and field deployment to deliver tailored, high-impact solutions for our clients.

From initial consultation through to deployment and ongoing support, we partner with clients to solve complex problems—enhancing safety, compliance, and operational efficiency in even the most remote or demanding environments.

At Spectur, our value lies not just in the components we build, but in the complete solutions we deliver. By combining solar-powered hardware, intelligent software platforms and expert professional services, we turn complex challenges into outcomes that matter.

End-to-End Solutions that Protect, Inform and Empower

Our Solutions

Our solutions are actively deployed across Australia, delivering safety, security, and critical warnings where they're needed most:

Autonomous
Security Solutions
for asset protection.
Combine with alarm
monitoring and
guard security, for a
complete protection
system.

Defense
Remote and rapid
deployment to reduce
threats and secure
critical infrastructure.

Critical Infrastructure

Illegal Dumping
Enabling authorities
to provide better
amenity against illegal
rubbish dumping.

Emergency beacons
With integrated
voice support for
remote and high-risk
environments.

Our Solutions Continued

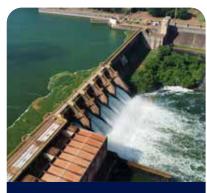

Maritime Safety
Provide the
community with live
waterway conditions,
vital for planning safer
trips to sea.

Project Management Review progress of large-scale projects overtime manage deliverable.

Shark Safety
Remote and rapid
deployment for
government & council
to reduce threats
and secure critical
infrastructure.

Environmental monitoring
Including flood detection and data logging for water authorities.

Competitive Advantages

Many devices, one interface

Easy to use via application or via website

APIs for multiple integrations

Fully programmable

Presents all data in one place

Designed as a platform

Suits 3rd party cameras, sensors, Al. data sources Data stays in Australia

Australian designed and manufactured

Eliminates security issues from foreign technology

Zero native competitors

To suit all commercial imperatives

Only turnkey solution for resellers

Market Opportunity

Spectur operates within a large and expanding market for Al-enabled, solar-powered sensing and communication solutions. Our long-term opportunity spans diverse geographies—including major metropolitan and regional areas across Australia, with future expansion potential into global markets.

\$3B addressable market across Australia.

Expanding global potential in protection, environmental monitoring, and remote safety.

Strong tailwinds from government safety mandates, ESG initiatives, and cost-efficient infrastructure.

Opportunity exists across all sectors with minimal penetration to date, positioning Spectur for accelerated expansion.

Scope of Opportunity: Immediate Indicators in Australia

Sector	Current Deployments	Total Addressable Market in Australia	
Beaches	>200 devices installed	12,000 beaches	
Construction	>250 customers	5,750 medium and large companies (20+ FTEs)	
Mobile Towers	>200 sites and growing	21,472 towers	
Military	>4 DoD bases protected	63 bases and hundreds more DoD assets	
Councils	>60 councils served	562 councils	

Company Performance

Business Model and Revenue Streams

Pivot to recurring revenue SaaS - change over time

SUBSCRIPTION

Recurring SaaS -Software Licences for use of systems

36% of revenue

RENTAL INCOME

Rental and lease models (recurring)

29% of revenue

HARDWARE SALES

Full systems (requires subscriptions)

18% of revenue

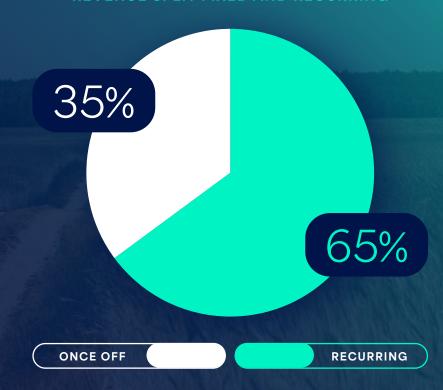

SERVICES & MAINTENANCE

Income from maintenance, field and professional services

17% of revenue

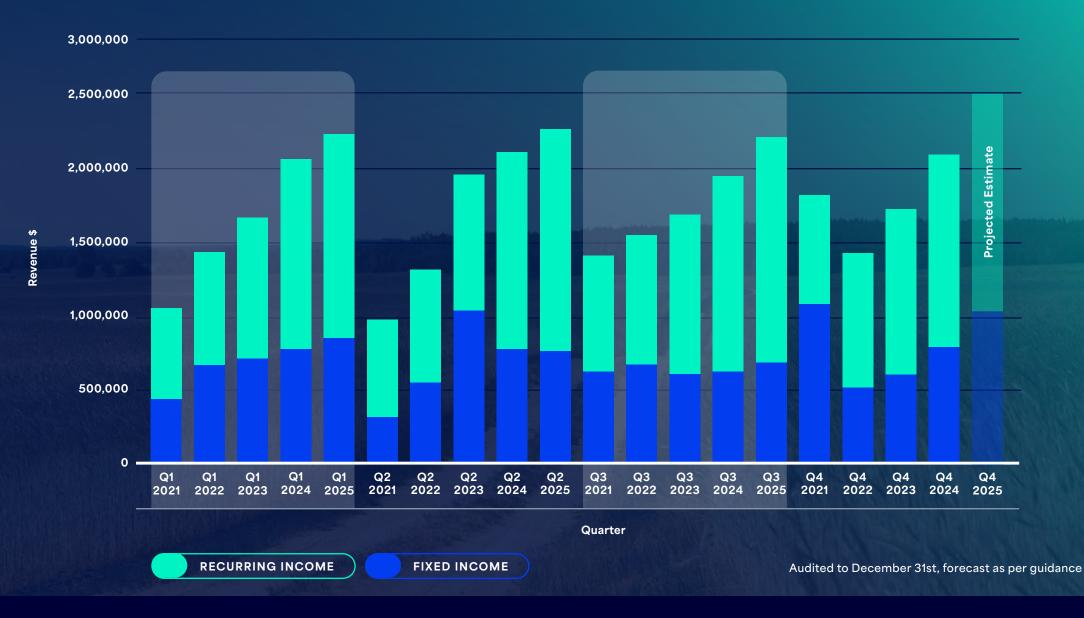

As of March 31st 2025 unaudited.

REVENUE SPLIT FIXED AND RECURRING

Strong Quarter on Quarter Performance

FIXED INCOME VS RECURRING INCOME

^{*} as of March 31st, audited *forecast unaudited.

Operating Cashflow

After a period of aggressive development and growth in strategic operations, the company is now optimising for sustainable, positive cashflow.

Our growth strategy will focus on self-sustaining cashflow, rather than dilutionary equity raises.

Expected to become operational cashflow neutral by the end of June 2025 with more than \$1.5M p.a. of cost reduction initiatives implemented.

Growth Strategy and Roadmap

Our 1-2 Year Priorities

SCALE SOFTWARE & AI PLATFORM

Investment in cloud infrastructure and cost optimisation

Implementation of companywide ISO27001 accreditation

Unlock solutions-based offerings with expanded AI capability

GROW RECURRING REVENUE

Drive Maintenance and Managed Service offerings

Deepen enterprise and government contracts

Expand SaaS and subscription offerings

Increase rental volume with the competitive SS7 solution

EXPAND HARDWARE PLATFORM OFFERINGS

Commercialise STA-Power and mobile trailers
Increase flexibility through

hardware-agnostic platform integrations

Launch SS7 product post MVP soft launch

RESTRUCTURE & REPOSITION FOR GROWTH

Complete cost base reset to enable self-funded strategic expansion

Overhaul of internal ERP and systems for scaling.

Commercial Pipeline & Market Opportunity

Key Pipeline Initiatives

Rock Fishing safety pilot (ERB)

Expansion of warning systems: shark alerts, bushfire, muster points, ERB and flood monitoring

Government safety and environmental monitoring projects, including vessel monitoring

Further expansion into telecommunications and critical infrastructure

Major Sector Opportunities

Critical Infrastructure:

24-site monitoring ongoing and asset protection in telecommunications

Resources:

Evacuation system automation for miners and explosive suppliers

Regional Councils:

Post-flood monitoring

Coastal Councils:

People counting, public safety, tourism data

Construction:

Olympics and other large infrastructure projects

National Parks:

monitoring and data collection

Strategic Focus

Mature AI capabilities to continue to add value in solution solving and high margin products

Expansion of safety and warning systems

Increase SaaS revenue streams and solutions

Launch new Market Solutions

Drive National Footprint

ISO27001 implementation to further solidify government and enterprise accessibility.

Investment Highlights Timeline

Nov 2009 2019 Aug 2020 Dec 2022 **Business launched** Strategic shift to Launched STA6 platform, Announced acquisition Apr 2025 a revolutionary edge/cloud as Uwatchit Pty Ltd, 'Sense, Think, Act' of 3 Crowns focusing on the domestic solutions; tightened fog computing platform. Technologies (3CT), Launched SS7 Dual geographic and sector expanding environmental security market. Rental Camera for focus: moved from monitoring capabilities. scalable security inbound to outbound sales. Mar 2021 rental solutions. **Expanded** into 2015 safety and warning 2020 Oct 2023 platforms; secured Transitioned to milestone contracts Subscription Reported company solar-powered revenue exceeded with Surf Life Saving record revenue systems; exited WA and NSW. \$1 million, including over \$7M for the powered software, data, and FY2023. camera space. monitoring services. Nov 2021 Oct 2024 2018 Signed \$1.07 million Awarded three-year Achieved \$2 million revenue contract with Optus, contract with Transport milestone through sales. 2010 expanding into the for NSW worth \$787,428. rentals, subscriptions, and telecommunications extendable to \$2.36 million. field services. Filed first patent sector. for transmitting high-resolution still frames instead of low-quality video. 2017 Dec 2020 Mar 2023 Listed on ASX with **Established Spectur** Released STA7, a solar-21.25 million shares at **New Zealand Limited** powered multi-camera as a 51:49 joint venture an issue price of solution with up to four with Deus Ex in Auckland. modular 4K video cameras. \$0.20.

The Board

DARREN COOPER
Non-Executive Chairman

Accomplished executive with over 20 years' leadership experience across property development, financial services, and listed company operations.

Darren holds a Bachelor of Business and a Masters of Applied Finance and is also a GAICD.

Joined Spectur in 2018

GERARD DYSON
Non-Executive Director

Gerard has more than 25 years experience across a range of local and global roles. Dr Dyson holds Honours and PhD qualifications in Engineering as well as a Bachelor of Commerce and Advanced Diploma in Business Management. He is also a GAICD.

Joined Spectur in 2019

MARCO DA SILVA
Non-Executive Director

With over 21 years of experience, Marco is the CEO of Grant Transformers and the Managing Director of Antipodes Power Solutions, specialising in power conditioning and renewables.

Marco's expertise lies in electrical engineering and manufacturing. He is passionate about providing specialised solutions tailored to meet customers' precise needs.

Joined Spectur in 2023

SUZIE FOREMAN
Company Secretary

Chartered accountant with 25+ years' experience across startups to ASX 300 companies in the UK and Australia.

Specialist in corporate governance, financial reporting, and ASX company secretarial services.

Joined Spectur in 2017

Investment Thesis

Making communities safer, smarter and more sustainable.

Cost base reset to position for profitable growth

Scaling cloud and Al platform

Deep technology moat and value proposition with large accessible market.

Drive to fund capital from operations and drive investment in growth from surplus rather than dilution.

Position company to high value SaaS and service provider business.

Grow existing and add to recurring revenue Streams

Expand national footprint and addressable markets.
