ENVIRONMENTAL PROGRESS

Titanium Sands Limited ("TSL" or "the Company") is pleased to confirm progress on the environmental studies for the Mannar Heavy Mineral Project (The Project) in Sri Lanka.

The Project environmental consultants in Sri Lanka have confirmed a recent site visit to Mannar Island and confirm progress towards addressing the various items raised in the Terms of Reference (TOR) issued in March this year¹.

In conjunction with community and stakeholder comments received, and the requirements of the TOR, specific studies are underway within the Environmental Impact Assessment (EIA) focusing on selected factors including impact to the water table, coastline impact, horticulture, community livelihood and the effects of the Project on migratory birds.

Titanium Sands Managing Director Dr James Searle said "the environmental impact assessment is a very real and detailed study of the Project area. Each and every environmental concern as outlined in the TOR will be studied and addressed by external experts in the field.

In addition, it is expected the Project will generate significant employment opportunities and long-term wealth for the community not just during the Project but also ongoing post rehabilitation. Sustainable agriculture will be developed for landowners, re-establishing the land in an environmentally friendly way with significant future benefits to Mannar communities."

The Company will provide further updates as available.

Ends-

The Board of Directors of Titanium Sands Ltd authorised this announcement to be given to the ASX.

COMPLIANCE STATEMENTS

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning the Company's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "expect," "intend," "may", "potential," "should," "further" and similar expressions are forward-looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that further exploration will result in additional Mineral Resources.

Competent Persons

Except where indicated, exploration and technical information above have been reviewed and compiled by James Searle BSc (hons), PhD, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy, with over 37 years of experience in metallic and energy minerals exploration and development, and as such has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Searle is the Managing Director of Titanium Sands Limited and consents to the inclusion of this technical information in the format and context in which it appears.

Previously Reported information foot notes for reference

This report includes information that relates to announcements previously made to the ASX. The information was extracted from the Company's previous ASX announcements as follows:

¹ ASX:TSL Announcement : 26th March 2025, Terms of Reference for environmental study provided for Mannar Heavy Mineral project.
