

25 June 2025

Additional Drill Rig Secured for Enlarged Drill Program at the Christmas Creek Gold Project

DDH1 diamond drill rig scheduled to arrive on site in the coming weeks

Highlights

- Drill contractor DDH1 engaged to undertake diamond core drilling at Christmas Creek to allow for deeper exploration targeting and to obtain detailed structural information relating to gold mineralisation.
- Diamond rig scheduled to arrive on site early July.
- Current RC drilling is ongoing, targeting extensions to the previously reported high-grade intervals at the Martin prospect in drill-hole 24XRC097, including:
 - 10m @ 12.66g/t Au from 59m; and
 - 10m @ 7.34g/t Au from 94m
- Initial batch of RC assays are expected to be received in mid to late July 2025.
- Heritage surveying recently completed, paving the way to test additional targets during the current drilling program.

Trek Metals Limited (ASX: **TKM**) ("**Trek**" or the "**Company**") is pleased to advise that the Company's high-impact exploration program at the Christmas Creek Gold Project in the Kimberley region of Western Australia has been expanded, with a second drilling contractor, DDH1 Drilling, engaged to provide diamond core drilling services in addition to the Reverse Circulation (RC) program currently underway (Figure 1).

Trek Metals' CEO Derek Marshall, said:

"The securing of this second rig to undertake diamond drilling at Christmas Creek represents an exciting milestone, providing the opportunity to get down deeper into the system and obtain a much clearer picture of the geology and structural controls of the gold mineralisation.

"The initial RC holes have been drilled underneath, down-dip and along strike from the high-grade intercepts achieved at the Martin Prospect last year, as we aim to fully delineate what we believe to be a significant stacked high-grade vein system.

"The RC drilling is on-going, and we expect to test several prospects over the coming weeks.

"We look forward to seeing what the current round of drilling reveals, with the first round of assay results expected to be reported to the market in the coming weeks."

The diamond drill rig is expected to arrive on site in the coming weeks, with the initial diamond program targeting the Martin Prospect area. Diamond drilling will enable Trek to undertake deeper exploration targeting at Christmas Creek and obtain detailed structural information relating to the gold mineralisation.

The diamond drilling will be undertaken in parallel with the RC program that commenced at Christmas Creek in early June (see ASX Announcement 5 June 2025). This RC drilling is currently targeting the areas around, beneath and along strike from the high-grade intercepts reported at the Martin Prospect in drill-hole 24XRC097, including:

- 10m @ 12.66g/t Au from 59m; and
- 10m @ 7.34g/t Au from 94m

Initial assay results from the RC drilling are expected to be reported in mid to late July.

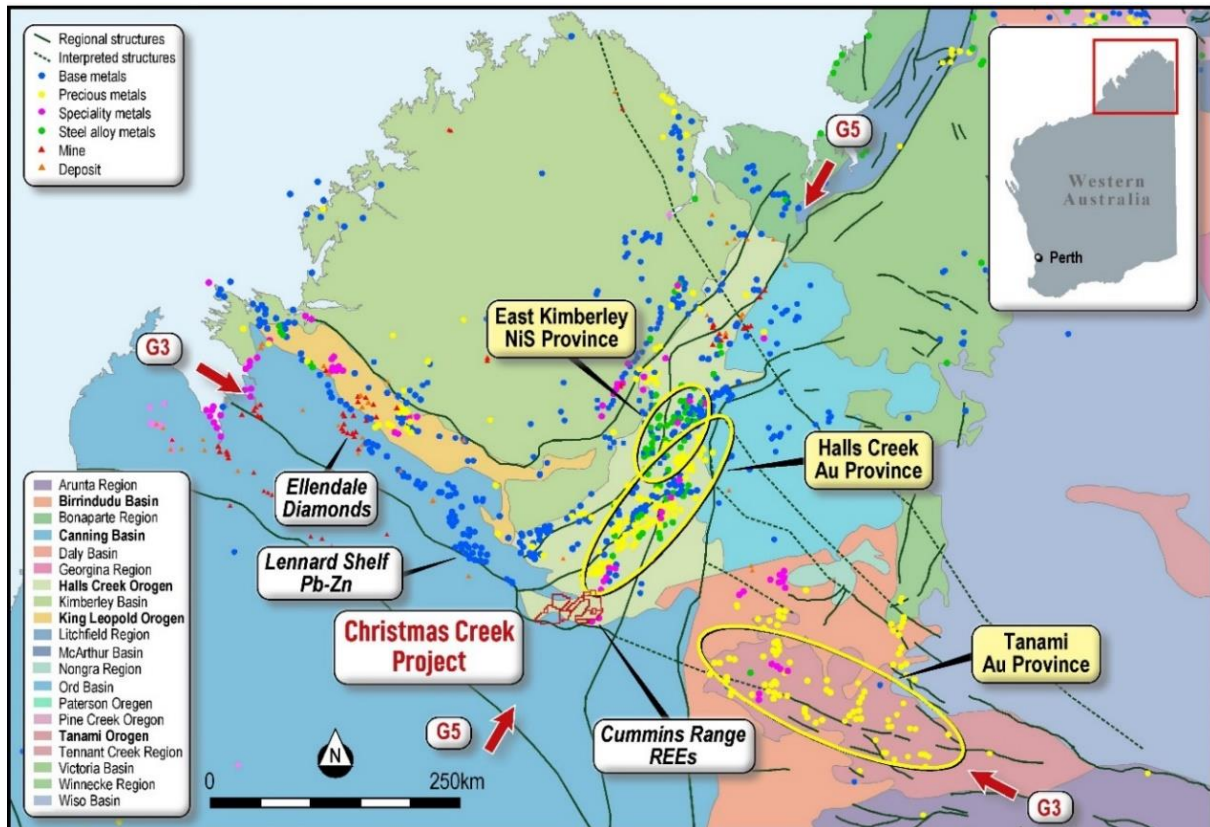

Figure 2: Continental scale context and location map for the Christmas Creek Project, located at the intersection of G3 and G5 metallogenic lineament corridors, potentially representing the intersection of the Granites-Tanami Orogen & the Halls Creek Orogen.

Christmas Creek Project (Kimberley, Western Australia)

Located south-west of Halls Creek, the Christmas Creek Project comprises a previously unexplored, largely concealed district-scale gold and rare earths exploration opportunity in the Kimberley region of WA associated with major continental-scale tectonic lineament intersections.

The Christmas Creek Project was previously part of Newmont Exploration Pty Ltd's (Newmont) global exploration portfolio, with Trek acquiring the project in December 2023. The Company has also secured additional tenement applications to add to this district-scale greenfields gold and rare earths exploration project.

COMPETENT PERSONS STATEMENT

The information in this report relating to Exploration Results is based on information compiled by the Company's Chief Executive Officer, Mr Derek Marshall, a Competent Person, and Member of the Australian Institute of Geoscientists (AIG). Mr Marshall has sufficient experience relevant to the style of mineralisation and to the type of activity described to qualify as a competent person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Marshall has disclosed that he holds fully paid Ordinary Shares and Performance Rights in the Company. Mr Marshall consents to the inclusion in this announcement of the matters based on his information in the form and content in which it appears.

DISCLAIMERS AND FORWARD-LOOKING STATEMENTS

This announcement contains forward looking statements. Forward looking statements are often, but not always, identified A words such as "seek", "target", "anticipate", "forecast", "believe", "plan", "estimate", "expect" and "intend" and statements that an event or result "may", "will", "should", "could" or "might" occur or be achieved and other similar expressions.

The forward-looking statements in this announcement are based on current expectations, estimates, forecasts and projections about Trek and the industry in which it operates. They do, however, relate to future matters and are subject to various inherent risks and uncertainties. Actual events or results may differ materially from the events or results expressed or implied by any forward-looking statements. The past performance of Trek is no guarantee of future performance.

None of Trek's directors, officers, employees, agents or contractors makes any representation or warranty (either express or implied) as to the accuracy or likelihood of fulfilment of any forward-looking statement, or any events or results expressed or implied in any forward-looking statement, except to the extent required by law. You are cautioned not to place undue reliance on any forward-looking statement. The forward-looking statements in this announcement reflect views held only as at the date of this announcement.
